I am outraged by the PUC Commission's decision to slash funding for the NH Saves program. The program serves the PUBLIC good by reducing New Hampshire's carbon footprint. We installed a solar array at great cost to our family, and we did it not to save money, but to reduce our contribution to global warming. We did it for our fellow citizens.

You may save residents a few dollars a month, but your decision will cost our residents much, much more in the not too distant future.
