Dear Commission,

As a citizen and voter in New Hampshire, I am appalled that the Public Utilities Commission cut funding to an initiative that would address climate change, even in small ways, at a time when all people must do what is possible. This decision is also negatively impacting small businesses and those that can give good jobs to people without college degrees. Additionally, it serves clients who receive fuel assistance, so reducing the need for fuel will save the state money.

In all ways this is a bad decision. Please reconsider.

Thank you.

Cynthia
