Subject: Defunding NH Saves is a tragic mistake. Please re-think

EXTERNAL: Do not open attachments or click on links unless you recognize and trust the sender.

Several weeks ago, I read of the decision to defund NH Saves, an initiative that has helped hundreds of NH families and businesses shift to more energy efficient means of lighting and heating their homes and businesses. As we learn of the increasingly severe storms that are the result of global climate change, why would NH do something that endangers every one of its citizens? Do we need 200-mile tornados to sweep through out state in order to see the powerful ways in which our continued reliance on fossil fuels is literally killing us and our livelihoods? PLease think of our children and grandchildren--let's leave a planet that is safe for them to live on. PLease reconsider your decision to defund NH Saves.

Thank you for listening.
