---

Public Utilities Commission,

To the members of the Public Utilities Commission,

The NH weatherization program has been extremely helpful in making people's homes more comfortable and in reducing the state's use of fuel and electricity. This benefits everyone, not just those who get their homes worked on. It benefits us all by reducing the peak use of electricity and therefore reducing the cost we all pay.

Not everyone can afford to do weatherization work on their own and the help from NH Saves can make all the difference.

Please restore - or consider increasing - the amount we allot to this critical program.
