Dear Clerk of the PUC,

I am addressing the following remarks to the Commissioners of the PUC. I live in Rindge, NH, and am chair of my town's energy commission. Working with our DPW Director to keep down energy expenses has helped our town to keep our budget flat for years. NHSAVES has been a big factor in helping us to replace lighting in all our buildings as well as many other projects.

I have heard that you are changing the way that energy costs are calculated to make it more difficult for energy measures to qualify.

I hope you understand how negligent you are being when there's an urgency to reduce pollution and the expense of meeting our energy needs? The most cost effective way to do that is with energy efficiency programs. All our energy needs will eventually be met with renewables, but energy efficiency can help make that problem a much smaller one to begin with and less expensive in the long run.

Your actions in trying to kill or reduce the impact of the NHSAVES program are irresponsible and illogical. Please grant a rehearing and actually LISTEN to the technical experts. I'm sure you want to do what's right for the future of New Hampshire.

Sincerely,
Patricia Martin
17 Farrar Road
Rindge, NH 03461
