Exhibit 31 Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 1 of 22

1 I. INTRODUCTION AND QUALIFICATIONS

2 Q. Please state your full names, positions, and business addresses.

3 A. (WC) My name is William J. Clark and I am the Senior Director, Business Development.

Docket No. DG 20-105

- 4 My business address is 116 North Main Street, Concord, New Hampshire.
- 5 (MS) My name is Mark R. Stevens and I am a Business Development Professional. My
- 6 business address is 116 North Main Street, Concord, New Hampshire.
- 7 Q. Please state by whom you are employed.
- 8 A. We are employed by Liberty Utilities Service Corp. ("Liberty"), which provides services
- 9 to Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities
- ("EnergyNorth" or "the Company") along with other regulated utility affiliates, including
 Granite State Electric.
- 12 Q. Please describe your educational and professional background.
- A. (WC) I graduated from St. Anselm College in Goffstown, New Hampshire, with a 13 Bachelor of Science degree in Financial Economics in 1991. I have twenty-five years of 14 experience in the natural gas and electric utility industries with roles in Operations, Sales, 15 Marketing, and Business Development. I joined Liberty in 2012 as a Key Account 16 Manager and progressed into my current position as Senior Director, Business 17 Development East Region. In this role I am responsible for strategic investment 18 19 opportunities including acquisitions, emerging technologies and organic growth. (MS) I graduated from Saint Anselm College in Goffstown, New Hampshire, with a 20
- 21 Bachelor of Science degree in Business in 2000. I have approximately five years of

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 2 of 22

| 1 | | experience in the natural gas utility industry with roles in Sales and Business |
|----|----|--|
| 2 | | Development. I joined Liberty in July 2015 as a Sales Account Manager and have been |
| 3 | | in my current position as a Business Development Professional since January 2019. In |
| 4 | | my current role I am responsible for strategic growth and expansion opportunities for |
| 5 | | both EnergyNorth and Granite State Electric. |
| 6 | Q. | Have you previously testified in regulatory proceedings before the New Hampshire |
| 7 | | Public Utilities Commission? |
| 8 | А. | (WC) Yes, I have previously testified before the New Hampshire Public Utilities |
| 9 | | Commission (the "Commission") with respect to EnergyNorth's various growth |
| 10 | | initiatives such as the Managed Expansion Program (Docket No. DG 16-447), the |
| 11 | | Windham and Pelham Franchise Expansion (Docket No. DG 15-362), the Liberty |
| 12 | | Utilities and Concord Steam Joint Petition for Approval of an Asset Purchase Agreement |
| 13 | | (Docket No. DG-16-770), and the Company's special contract with the New Hampshire |
| 14 | | Department of Administrative Services ("NHDAS") (Docket No. DG 17-035). |
| 15 | | (MS) No, I have not previously testified before the Commission. |
| 16 | Q. | What is the purpose of your testimony? |
| 17 | A. | Our testimony provides status updates regarding two special contracts approved by the |
| 18 | | Commission in Docket Nos. DG 14-091 and DG 17-035, including information in |
| 19 | | support of the Company's request for recovery of certain costs associated with these |
| 20 | | contracts that are not already being recovered through rates. |

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 3 of 22

| 1 | | In Docket No. DG 14-091 the Commission approved a lease and special contract between |
|--|-----|--|
| 2 | | EnergyNorth and Innovative Natural Gas ("iNATGAS") related to the construction of a |
| 3 | | compressed natural gas ("CNG") facility on Company-owned property. ¹ The iNATGAS |
| 4 | | contract is discussed in more detail in Section II of our testimony. |
| 5 | | In Docket No. DG 17-035, the Commission approved a special contract between |
| 6 | | EnergyNorth and the NHDAS for temporary gas boiler installation at certain state office |
| 7 | | buildings in Concord, New Hampshire. ² The NHDAS contract is discussed in more |
| 8 | | detail in Section III of our testimony. |
| 9 | II. | iNATGAS SPECIAL CONTRACT UPDATE |
| 10 | Q. | Please describe the iNATGAS Special Contract. |
| 10 | | • |
| 11 | A. | In Docket No. DG 14-091, EnergyNorth filed a petition for approval of a special contract |

| 11 12 13 14 15 | | In Docket No. DG 14-091, EnergyNorth filed a petition for approval of a special contract and lease agreement with iNATGAS related to construction of a CNG facility. In order to facilitate the transaction with iNATGAS, EnergyNorth agreed to lease land to iNATGAS for locating the CNG fueling station. Pursuant to the terms of the lease agreement, iNATGAS agreed to pay rent to EnergyNorth during the term of the lease. |
| 11 12 13 14 15 16 | | In Docket No. DG 14-091, EnergyNorth filed a petition for approval of a special contract and lease agreement with iNATGAS related to construction of a CNG facility. In order to facilitate the transaction with iNATGAS, EnergyNorth agreed to lease land to iNATGAS for locating the CNG fueling station. Pursuant to the terms of the lease agreement, iNATGAS agreed to pay rent to EnergyNorth during the term of the lease. The lease agreement also outlined the construction obligations of iNATGAS and |

¹ See Orders No. 25,694 (July 15, 2014) and No. 26,002 (Apr. 16, 2017).

^{2 &}lt;u>See</u> Order No. 26,018 (May 15, 2017).

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 4 of 22

| 1 | | including: (1) construct the compressor station; (2) conduct all site work and site |
|----|----|---|
| 2 | | preparation; (3) extend a transmission grade natural gas service line to the compressor |
| 3 | | station; (4) provide a 1250 KVA 3-phase step-down transformer and related electrical |
| 4 | | connections; (5) install gas conditioner equipment and up to six electric motor-driven |
| 5 | | compressors; (6) pay the property taxes and costs of snow removal at the compressor |
| 6 | | station and CNG fueling station; and (7) prepare and submit all necessary permitting with |
| 7 | | the City of Concord and State of New Hampshire. |
| 8 | | The special contract outlined the terms by which EnergyNorth provides firm |
| | | |
| 9 | | transportation of CNG to the iNATGAS CNG fueling station. The special contract runs |
| 10 | | for a term of 15 years and provided that iNATGAS would be a sales customer of the |
| 11 | | Company for the first year of the special contract. Under the special contract, iNATGAS |
| 12 | | pays a fixed delivery charge for all therms metered at the delivery point. This charge will |
| 13 | | remain in effect for the 15-year term of the special contract and is not subject to |
| 14 | | adjustment. iNATGAS agreed to pay this charge, which was at the time in excess of the |
| 15 | | Company's tariff, in order to compensate EnergyNorth and its customers for its |
| 16 | | construction costs and permitting obligations outlined in the lease. |
| 17 | Q. | Please describe the projected sales analysis relied on by the Company for approval |
| | χ. | |
| 18 | | of the special contract. |
| 19 | А. | iNATGAS provided annual sales volume projections for the facility. Using these |
| 20 | | projections, EnergyNorth developed a cost analysis that considered the benefits |
| 21 | | associated with three scenarios: a minimum analysis (based on the volumes required |
| | | |

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 5 of 22

under the take or pay obligation discussed below); a baseline analysis; and an accelerated 1 sales analysis. EnergyNorth estimated that it would incur costs between \$1.8 and \$2.2 2 million associated with its construction and permitting obligations associated with the 3 lease and special contract. 4 Based on the projections provided by iNATGAS and the Company's cost estimates, the 5 6 Company determined that it would be able to recover its investment in 5.5 years under the minimum revenue projection scenario. The Company's analysis also calculated 7 recovery of the investment in as few as three years and four months under the accelerated 8 9 projection analysis, using data from iNATGAS. EnergyNorth determined that the project was financially beneficial for the Company and its customers based on this analysis 10 because the 5.5 year recoupment timeline was less than the 6-year revenue test required 11 12 for similar investments under the Company's tariff at the time. Other benefits associated with the arrangement were projected to occur based on the provision in the special 13 14 contract that iNATGAS would become a sales customer for at least the first year of the 15 special contract, because this would lead to increased off-peak demand on the Company's system allowing EnergyNorth to spread out its fixed costs across greater volumes and 16 thereby reducing the average unit cost to all sales customers.³ 17

^{3 &}lt;u>See</u> Order No. 25,694, at 9.

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 6 of 22

| 1 | Q. | Did the special contract include any provisions to ensure that these benefits to |
|----|----|--|
| 2 | | customers would in fact accrue? |
| 3 | A. | Yes. iNATGAS agreed to purchase certain minimum quantities of gas over the 15-year |
| 4 | | term of the special contract (the "minimum take or pay" obligation). The minimum take |
| 5 | | or pay obligation was set at 300,000 dekatherms ("Dth") of natural gas per year for the |
| 6 | | first two years of the special contract term; 500,000 Dth for the third and fourth years of |
| 7 | | the special contract term; and 1,300,000 Dth per year for the remainder of the special |
| 8 | | contract term (years five through fifteen). |
| 9 | | iNATGAS guaranteed its minimum take or pay obligation through personal and |
| 10 | | corporate guarantees, and by depositing \$1.22 million into an escrow account to be used |
| 11 | | as a backstop in the event payments were not received from iNATGAS pursuant to the |
| 12 | | minimum take or pay obligation. This escrow amount represented the net present value |
| 13 | | of the special contract's minimum take or pay obligation over the first five years of the |
| 14 | | agreement. |
| 15 | | The Commission approved the special contract finding that EnergyNorth's investments |
| 16 | | were more than offset by the anticipated revenues and were similar to upfront |
| 17 | | investments in physical plant that the Company has made to serve other large customers. ⁴ |
| 18 | | The CNG facility was built and placed into service on December 1, 2016. ⁵ The |

⁴ Order No. 25,694, at 8–10.

⁵ The Commission approved certain clarifying amendments in Order No. 26,002 (2017).

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 7 of 22

Commission's approval of the special contract included review of the Company's cost
 estimate related to its investment under the terms of the lease.

3

Q. Did EnergyNorth incur costs in excess of the original estimates to facilitate the

4 project?

Yes. As referenced above, EnergyNorth incurred costs that were in excess of the original 5 A. estimates due to the following factors: (1) the Company determined that it was in the best 6 interest of customers to construct a full capacity facility from the start, instead of limiting 7 construction to the proposed phased approach, based on changed market circumstances 8 9 (approximately \$700,000); (2) the City of Concord imposed additional road construction and paving requirements (approximately \$600,000); (3) the Company determined that 10 design changes were necessary to ensure protection of the equipment at the facility 11 12 (approximately \$200,000); (4) the Company incurred increased costs for asphalt and concrete work together with minor design changes (approximately \$600,000); and (5) the 13 Company's project estimate included only direct costs and therefore did not account for 14 15 Allowance for Funds Used During Construction ("AFUDC"), overheads, and burdens associated with the project (approximately \$435,000). These incremental costs totaled 16 17 approximately \$2.5 million.

18

19

Q. How did the Commission address cost recovery for this project in EnergyNorth's 2017 rate case?

A. The Commission previously considered cost recovery of the Company's investment
 related to the CNG facility in Docket No. DG 17-048, EnergyNorth's 2017 rate case, and

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 8 of 22

| 1 | | approved recovery of the plant up to \$2,296,307 consistent with costs projected in Docket |
|----------------------------------|-----------------|--|
| 2 | | No. DG 14-091, but did not allow inclusion of the incremental costs that were not |
| 3 | | included in the original estimate. ⁶ The Commission's order in the 2017 rate case did not |
| 4 | | preclude recovery of these additional costs, subject to a future determination that the |
| 5 | | special contract could provide customer benefits. ⁷ The Company has performed an |
| 6 | | updated discounted cash flow analysis, discussed below and provided as Attachment |
| 7 | | WJC/MRS-1, that demonstrates there are positive customer benefits even with the |
| 8 | | additional costs, and that recovery of the total project costs is thus justified. The |
| 9 | | Company now seeks approval for recovery of the incremental costs associated with the |
| 10 | | special contract that were not included in the original approval. |
| 10 | | Specific contract and the product of the configuration of the second |
| | 0 | |
| 11 | Q. | Why did the Company decide to move forward with completion of the full capacity |
| | Q. | |
| 11 | Q. A. | Why did the Company decide to move forward with completion of the full capacity |
| 11 12 | | Why did the Company decide to move forward with completion of the full capacity facility instead of adhering to the phased construction plan? |
| 11 12 13 | | Why did the Company decide to move forward with completion of the full capacity facility instead of adhering to the phased construction plan? The original cost estimate was for a first phase of construction that would not have |
| 11 12 13 14 | | Why did the Company decide to move forward with completion of the full capacity facility instead of adhering to the phased construction plan? The original cost estimate was for a first phase of construction that would not have accommodated the accelerated growth model beginning in years 4 and 5, and therefore |
| 11 12 13 14 15 | | Why did the Company decide to move forward with completion of the full capacity facility instead of adhering to the phased construction plan? The original cost estimate was for a first phase of construction that would not have accommodated the accelerated growth model beginning in years 4 and 5, and therefore these costs would have been necessary later in the contract term under the proposed |
| 11 12 13 14 15 16 | | Why did the Company decide to move forward with completion of the full capacity facility instead of adhering to the phased construction plan? The original cost estimate was for a first phase of construction that would not have accommodated the accelerated growth model beginning in years 4 and 5, and therefore these costs would have been necessary later in the contract term under the proposed phased construction plan. The decision to build a "full capacity" facility at the outset |

⁶ The Commission denied recovery of these costs by implementing a downward adjustment to the Company's requested revenue requirement which was based on a one-year analysis of the revenue requirement associated with the actual plant investment as compared to the \$2,296,307 of capital costs allowed, rather than based on a multi-year discounted cash flow analysis used to approve the contract.

⁷ Order No. 26,122, at 31.

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 9 of 22

| 1 | | propane prices were also extremely high. By proceeding with the full capacity |
|----|----|---|
| 2 | | construction, the iNATGAS CNG facility would become the only CNG facility in the |
| 3 | | Northeast with firm capacity on an interstate pipeline capable of providing customers |
| 4 | | with a cost-effective alternative to oil, propane, or spot gas. Large CNG providers were |
| 5 | | also announcing frequent new customers at that time. Based on these conditions, |
| 6 | | EnergyNorth determined that additional customer benefits would be realized if the |
| 7 | | facility were built at full capacity from the outset. |
| | | |
| 8 | | In order to enable the benefits associated with a full capacity facility, the Company |
| 9 | | incurred costs of approximately \$700,000 that were incremental to the original project |
| 10 | | cost estimate. It is important to note that these costs were always going to be incurred in |
| 11 | | order to facilitate the minimum take or pay obligation volumes starting in year five of the |
| 12 | | special contract; the Company's decision to move forward with the full capacity build out |
| 13 | | was a timing decision and should not be viewed as a project cost overrun. ⁸ |
| | | |
| 14 | Q. | Please explain the additional requirements imposed by the City of Concord and why |
| 15 | | these costs were not included in the project cost estimate. |
| 16 | A. | Increased costs were attributed to new conditions imposed by the City of Concord related |
| 17 | | to reconstruction and paving on Broken Bridge Road where the facility is located. It was |
| 18 | | after the Commission's order was issued approving the special contract that EnergyNorth |

⁸ EnergyNorth identified these additional costs related to the full capacity facility needs through discovery in Docket No. DG 14-091. See, e.g., Response to Staff 2-8 in DG 14-091 ("At full build out, the station capacity for thermal/filling applications, will be approximately 2,300,000 dth's per year. To achieve this build out, two additional compressors will be required as well some minor extensions of the canopy at the CNG station. Liberty's expected cost for this would be approximately \$600,000-\$700,000")

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 10 of 22

| 1 | was informed for the first time of these new conditions, which included a requirement by |
|----|--|
| 2 | the City to install a new water line from the top of Broken Bridge Road to the driveway |
| 3 | of EnergyNorth's LNG facility, to reconstruct and repave the length of Broken Bridge |
| 4 | Road from the pet crematorium to the end of the public road, and to construct a public |
| 5 | turnaround point. Because there is little traffic on Broken Bridge Road other than |
| 6 | EnergyNorth (there is one other business and only two homes), and since EnergyNorth |
| 7 | has been using the road for decades (its Concord LNG facility is located there), the |
| 8 | Company had no reason to believe the City would require an upgrade of almost the entire |
| 9 | road, and installation of water service as part of the iNATGAS project. This incremental |
| 10 | work required by the City accounted for approximately \$600,000 in mandated costs that |
| 11 | were incremental to the original estimate. |

12

Q. Please explain why design changes were necessary.

The design changes implemented by EnergyNorth were made to better protect the 13 A. Company's investment in the facility. These design changes were also made to optimize 14 15 facility run time, which can enhance distribution revenues. The design changes included housing the compressors and control systems within a full, three-sided building, rather 16 17 than beneath an open canopy, the construction of roof protections over the meters and regulators, and additional equipment behind the compressor building. Making these 18 19 design changes ensured that the equipment owned by the Company (an investment in 20 excess of \$1.3 million) would be better protected, recognizing that damage to this equipment would be the financial responsibility of the Company. Further, by 21 constructing these protections the Company anticipated more available run time at the 22

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 11 of 22

| 1 | | facility due to the increased reliability and service associated with protection from |
|----|----|--|
| 2 | | weather. The other design changes that resulted in incremental costs were minor. |
| 3 | Q. | Please explain the additional costs for asphalt and concrete work. |
| 4 | A. | The Company incurred costs of \$635,000 for additional asphalt and concrete work. |
| 5 | | These costs were necessary for timely completion of the project. The actual costs (in |
| 6 | | response to a competitive request for proposals) were higher than projected, likely due to |
| 7 | | the fact that the work was done at the end of the construction season when asphalt plants |
| 8 | | were closing for the winter. |
| 9 | Q. | Please explain why the Company did not include known, indirect costs including |
| 10 | | AFUDC in its original cost estimate for the project? |
| 11 | А. | The Company agrees that including these indirect costs would have provided a more |
| 12 | | complete cost estimate. However, as discussed below, even if these costs had been |
| 13 | | included it would not have changed EnergyNorth's determination that the investment |
| 14 | | would provide benefits to customers. The Company has also updated its internal |
| 15 | | processes to ensure that indirect costs are included in all cost-benefit analyses. |
| 16 | Q. | Is the special contract beneficial to customers even with the additional costs? |
| 17 | А. | Yes. Even with the additional costs incurred by the Company to complete the facility, |
| 18 | | the project provides positive benefits to customers based on the minimum take or pay |
| 19 | | obligations over the term of the contract. The minimum take or pay obligation was |
| 20 | | specifically included in the special contract to ensure benefits to EnergyNorth's |
| 21 | | customers. The Company has prepared an updated analysis (discussed below) that sets |

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 12 of 22

| 1 | | forth these benefits, which analysis is provided as Attachment WJC/MRS-1 and shows a |
|----|----|---|
| 2 | | positive net present value ("NPV"), even if revenues do not exceed the minimum take or |
| 3 | | pay obligation. |
| 4 | Q. | Has the Commission previously reviewed the costs associated with the iNATGAS |
| 5 | | special contract? |
| 6 | А. | Yes. As stated above, the Company sought recovery of its total investment |
| 7 | | (\$4,956,658)9 in its 2017 rate case. The Commission's Order allowed EnergyNorth to |
| 8 | | recover the plant associated with its investment up to the level of costs presented in |
| 9 | | Docket No. DG 14-091 of \$2,245,000, but did not foreclose recovery of the additional |
| 10 | | costs upon a showing of customer benefit.10 |
| 11 | Q. | Did the Commission state a reason why it did not approve the Company's total |
| 12 | | investment in its 2017 base rate case? |
| 13 | А. | The Commission determined that the Company's initial analysis in support of its |
| 14 | | projected investment amount was incomplete as presented in Docket No. DG 14-091 |
| 15 | | because the original project costs did not include the incremental costs described above. ¹¹ |

⁹ See Attachment WJC/MRS-1. The DCF analysis included in the attachment is provided on the same basis as Exhibit 46 in Docket No. DG 17-048, i.e., the amount used in the analysis is exclusive of burdens which brings the adjusted total to \$4,815,594, the amount reflected in the DCF analysis.

¹⁰ See Order No. 26,122, at 31.

¹¹ Order No. 26,122 at 28-29.

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 13 of 22

| 1 | | The Commission also questioned whether the benefit analysis presented in support of the |
|----------------------------------|-----------------|---|
| 2 | | project was reliable if it did not account for the costs associated with construction of the |
| 3 | | complete facility (instead of just the costs associated with the first phase of the project). ¹² |
| 4 | | Finally, the Commission raised concerns about when the Company became aware of the |
| 5 | | increased paving and construction requirements imposed by the City of Concord and the |
| 6 | | increased costs related to design changes. The Commission stated that if these increased |
| 7 | | costs were known to EnergyNorth prior to approval of the special contract an updated |
| 8 | | analysis should have been provided. ¹³ |
| 9 | | These concerns led the Commission to initially approve recovery of only the plant |
| | | |
| 10 | | associated with the original cost estimate in the 2017 base rate case. |
| 10 11 | Q. | associated with the original cost estimate in the 2017 base rate case. Has EnergyNorth addressed the Commission's findings in the 2017 base rate case? |
| | Q. A. | |
| 11 | | Has EnergyNorth addressed the Commission's findings in the 2017 base rate case? |

| 1 | | outside of the Company's control. EnergyNorth was required to comply with the |
|----|----|--|
| 2 | | requirements of the City of Concord related to paving and road construction. |
| 3 | | Further, it was prudent to incur the additional costs associated with the accelerated |
| 4 | | buildout. As discussed above, after approval of the special contract there was a change in |
| 5 | | market conditions. This change in market conditions resulted in increased demand due to |
| 6 | | very cold weather conditions during the winter of 2014/15 coupled with increased prices. |
| 7 | | Accelerated and expanded buildout of the facilities was prudent in light of these changed |
| 8 | | market conditions because by building the complete capacity facility, the Company |
| 9 | | positioned itself to take advantage of these market conditions for the benefit of its |
| 10 | | customers. |
| 11 | Q. | Is the iNATGAS contract currently providing benefits to customers? |
| 12 | А. | Yes. Although the CNG facility has seen low actual volumes and iNATGAS purchases |
| 13 | | have been below the minimum take or pay obligation, EnergyNorth remains entitled to |
| 14 | | payments for the full minimum take or pay obligations as outlined in the special contract, |
| 15 | | and has received such payments. iNATGAS has compensated EnergyNorth through a |
| 16 | | combination of direct payments and through withdrawals from the escrow account that |
| 17 | | was established under the terms of the agreement. Further, it is EnergyNorth's |
| 18 | | |
| | | understanding that iNATGAS is actively pursuing customers to utilize the CNG |

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 15 of 22

1Q.Have you prepared an updated Exhibit 46 from Docket No. DG 17-048, and if so2what are the results of that analysis?

Yes. Exhibit 46 included an NPV analysis based on the actual EnergyNorth construction 3 A. costs and overheads of the CNG facility over the 15-year term of the contract under three 4 different revenue scenarios, as well as an NPV analysis using the original estimated 5 project costs. Those three revenue scenarios were (a) receipt of the annual take or pay 6 7 minimum, (b) a baseline scenario of volumes anticipated at the time of the negotiated special contract, and (c) an accelerated volume scenario under a high oil price scenario. 8 Please see Attachment WJC/MRS-1 for the updated analysis of Exhibit 46. The updated 9 results demonstrate a positive NPV based on the 15-year contract term, using the final, 10 actual construction costs of the facility, and under the contracted minimum take or pay 11 scenario. 12

13 Q. Does the special contract contain protections for the Company related to the ability

14 of iNATGAS to make payments as required during the remaining contract term?

15 A. As detailed above, the Company negotiated, and the Commission approved, several

16 provisions in the special contract that are designed to ensure that EnergyNorth receives

17 payments under the contract and/or that the Company has appropriate recourse options.

18 These protections include the escrow account, corporate guarantees, and forced

19 liquidation of iNATGAS assets. Although the Company does not anticipate a default

20 event by iNATGAS, if such an event were to occur, EnergyNorth would take all

appropriate steps to enforce the payment provisions of the special contract for the benefitof its customers.

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 16 of 22

| 1 | Q. | Does the Company have any additional information relevant to the Commission's |
|----|----|---|
| 2 | | prior review of the project costs? |
| 3 | A. | Yes. The Commission's order in the 2017 rate case proceeding and the resulting rates |
| 4 | | relied on an analysis performed by Commission Staff that did not account for the |
| 5 | | increasing minimum pay or take obligation that is set forth in the special contract. As |
| 6 | | discussed above, iNATGAS' obligation increases pursuant to a set schedule. Starting in |
| 7 | | year 5 of the special contract, its obligation increases to 1,300,000 Dth. The analysis |
| 8 | | relied on in the 2017 rate case used the lower minimum take or pay obligation applicable |
| 9 | | for years 1 and 2 of the contract, which was only 300,000 Dth, and not the higher |
| 10 | | minimum obligations in subsequent years. As a result, the rates approved for recovery of |
| 11 | | the costs associated with this special contract should, at a minimum, be updated to reflect |
| 12 | | the current minimum take or pay obligation. Without this adjustment, the Company will |
| 13 | | not be collecting an amount that is consistent with the investment approved by the |
| 14 | | Commission in Docket No. DG 17-048. In fact, when the take or pay obligation |
| 15 | | increases under the special contract, the Company will begin over-collecting if an |
| 16 | | adjustment is not made. |

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 17 of 22

1 III. <u>NEW HAMPSHIRE DEPARTMENT OF ADMINISTRATIVE SERVICES</u>

2 SPECIAL CONTRACT UPDATE

Q. Please describe the circumstances that led to the special contract with the New

4 Hampshire Department of Administrative Services ("NHDAS') that was the subject

5 **of Docket No. DG 17-035.**

The special contract with NHDAS resulted from the wind down of Concord Steam and A. 6 7 the Company's agreement to assist NHDAS in connection with that event. Concord Steam was the utility that provided steam service to a number of state-owned buildings in 8 Concord, New Hampshire. In the fall of 2016, Concord Steam announced that it would 9 go out of business, and the Commission authorized Concord Steam to terminate service 10 as of May 31, 2017.¹⁴ The termination of service by Concord Steam meant that its 11 customers, including NHDAS, had to convert to an alternative heating source over a 12 relatively short period of time. 13

14 NHDAS is the agency responsible for managing State-owned buildings, including the 15 buildings that were served by Concord Steam. At the time that the Commission authorized termination of service by Concord Steam, NHDAS lacked sufficient time or 16 17 budget to convert the impacted buildings to another heating source ahead of the May 31, 2017, termination date. NHDAS thus developed a plan to install temporary steam boilers 18 to heat the impacted state buildings until such time as NHDAS could implement a 19 20 permanent conversion. NHDAS approached EnergyNorth for assistance with obtaining and financing the temporary boilers. EnergyNorth agreed to assist NHDAS, and the 21

¹⁴ Order No. 25,966 (Nov. 10, 2016).

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 18 of 22

provisions of the agreement were set forth in the special contract approved in Docket No.
 DG 17-035.

3 Q. Why did EnergyNorth enter into this contract?

- A. EnergyNorth agreed to the terms of the special contract to assist NHDAS and facilitate
 Concord Steam's wind down of operations because, absent the special contract, NHDAS
 (Concord Steam's largest customer) would not have had the ability to heat its buildings.
 This likely would have jeopardized Concord Steam's termination of service and could
 have resulted in extraordinarily high rates for NHDAS, if all other Concord Steam
 customers had converted away from steam and NHDAS was the last Concord Steam
- 10 customer, solely responsible for all of Concord Steam's costs.
- 11 Q. Please describe the basic terms of the contract.
- 12 A. The special contract required EnergyNorth to arrange for contractors to design and install
- 13 the temporary steam boilers, all subject to NHDAS approval. Under the special contract,
- 14 EnergyNorth was also the party responsible for payment of the contractors subject to later
- 15 reimbursement from NHDAS. The contractors performed all construction work,
- 16 EnergyNorth provided natural gas services to the temporary boilers, and the project was
- 17 managed by NHDAS personnel.
- 18 The special contract did not include a set price for the work; instead, the contract 19 contained a "not-to-exceed" price. A not-to-exceed price was necessary because exact 20 costs were unknown at the time that the special contract was executed and NHDAS, as a 21 state agency, is prohibited from entering open-ended time and materials contracts. The

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 19 of 22

| 1 | | exigent circumstances required this approach. The parties agreed to a not-to-exceed |
|----------------------------|-----------------|--|
| 2 | | amount of \$2,725,000, based on contractor estimates. Pursuant to the terms of the |
| 3 | | contract, NHDAS agreed to repay EnergyNorth for these contractor costs through a |
| 4 | | surcharge on the monthly utility bills related to the temporary boiler accounts. |
| 5 | | Lastly, the special contract contained the following provision that obligated NHDAS to |
| 6 | | seek additional funds if the actual costs exceeded the not-to-exceed amount: "If the costs |
| 7 | | that Liberty reasonably incurs are greater than the not-to-exceed amounts then |
| 8 | | NHDAS agrees to take all reasonable steps to obtain the funds necessary to reimburse |
| 9 | | Liberty, including, but not limited to, seeking Governor and Executive Council approval |
| | | |
| 10 | | », |
| 10 11 | Q. | " Did the contractors complete the work by the May 31, 2017 deadline? |
| | Q. A. | |
| 11 | | Did the contractors complete the work by the May 31, 2017 deadline? |
| 11 12 | | Did the contractors complete the work by the May 31, 2017 deadline? Yes, the temporary boilers were installed, connected to EnergyNorth's natural gas system |
| 11 12 13 | А. | Did the contractors complete the work by the May 31, 2017 deadline? Yes, the temporary boilers were installed, connected to EnergyNorth's natural gas system and to the existing steam pipes, and in service by May 31, 2017. |
| 11 12 13 14 | А. Q. | Did the contractors complete the work by the May 31, 2017 deadline? Yes, the temporary boilers were installed, connected to EnergyNorth's natural gas system and to the existing steam pipes, and in service by May 31, 2017. How long did the temporary boilers provide steam service? |
| 11 12 13 14 15 | А. Q. | Did the contractors complete the work by the May 31, 2017 deadline? Yes, the temporary boilers were installed, connected to EnergyNorth's natural gas system and to the existing steam pipes, and in service by May 31, 2017. How long did the temporary boilers provide steam service? The boilers at the state office campus on Pleasant Street in Concord provided service for |

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 20 of 22

| 1 | Q. | Were the final costs for installation and removal of the boilers in excess of the not- |
|----|----|--|
| 2 | | to-exceed amount? |
| 3 | А. | Yes. Although the temporary boilers in downtown Concord were installed with few |
| 4 | | issues and within the contractor's budget, installation of the boilers behind the |
| 5 | | Department of Corrections Building, adjacent to the former Concord Steam plant, |
| 6 | | encountered many difficulties. The contractor encountered conditions that were |
| 7 | | unknown when the contractor prepared its cost projections. These conditions included |
| 8 | | unknown tunnels, unknown infrastructure in the tunnels, an empty underground cistern, |
| 9 | | unplanned removal of a building, the repeated need to re-route various piping, and other |
| 10 | | issues. As a result of these unknown and unforeseen conditions, the total contractor costs |
| 11 | | were above the not-to-exceed amount by \$1,716,593 million. |
| 12 | Q. | Did NHDAS reimburse EnergyNorth for the costs incurred that were in excess of |
| 13 | | the not to exceed limit under the agreement? |
| 14 | A. | Not in their entirety. After significant negotiation between EnergyNorth and its |
| 15 | | contractor, the contractor reduced its bill by \$100,000. This left \$1,616,593 in |
| 16 | | unreimbursed costs. NHDAS agreed to seek Governor and Executive Council approval |
| 17 | | for payment of an additional \$569,004, which was paid to EnergyNorth in early 2020. ¹⁵ |
| 18 | | EnergyNorth has not been reimbursed for approximately \$1,047,589 in contractor costs |
| 19 | | incurred to complete this project. |
| | | |

¹⁵ The additional payment was the result of extensive negotiations between the Company and NHDAS.

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 21 of 22

1 Q. Does EnergyNorth propose to recover the outstanding costs in this proceeding?

Yes. While the impetus for the special contract with NHDAS was to assist NHDAS, 2 A. there are benefits for all EnergyNorth customers. When NHDAS made the decision to 3 leave the Concord Steam distribution system and convert the majority of the State of New 4 Hampshire buildings to natural gas, it meant that Concord Steam's business model was 5 no longer viable, that Concord Steam would have to close, which would necessitate the 6 7 conversion of all Concord Steam customers to alternative fuels. EnergyNorth viewed the conversion of all Concord Steam customers, including NHDAS, as a single large 8 conversion opportunity.¹⁶ The Company performed the financial analysis required for 9 investments over \$1 million per the EnergyNorth tariff based on a portfolio approach, 10 treating all the former Concord Steam customers as a single project. As a result, the 11 Company is seeking to recover the outstanding costs associated with the NHDAS 12 conversion in this proceeding. By adding the NHDAS connections to EnergyNorth's 13 distribution system, the Company was able to increase its customer base and throughput 14 over which to recover its fixed costs, thereby providing a benefit to all other customers. 15 The Company's updated¹⁷ analysis is provided as Attachment WJC/MRS-2. 16

17

Q. Would recovery of these costs harm other EnergyNorth customers?

18 A. No. As shown in Attachment WJC/MRS-2, there are benefits to EnergyNorth customers

19

as a result of this contract and the Concord Steam customer conversions. The costs

¹⁶ Note that EnergyNorth successfully executed on this opportunity, acquiring over 97% of the former Concord Steam customers. The load from these customers was the equivalent of acquiring over 2100 new residential customers.

¹⁷ See Docket DG No. 16-770 for original DCF analysis.

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities Docket No. DG 20-105 Direct Testimony of William J. Clark and Mark R. Stevens Page 22 of 22

| 1 | | incurred by the Company are similar to a line extension where EnergyNorth makes an |
|----|----|--|
| 2 | | upfront investment in order to serve a large customer and there is a benefit that accrues to |
| 3 | | the Company's other customers. The current EnergyNorth tariff requires a discounted |
| 4 | | cash flow analysis be performed for projects which require an investment over \$1 |
| 5 | | million. A 10-year NPV analysis is then performed and if the result is positive the |
| 6 | | investment is considered to be a benefit for all customers. As the analysis shows in |
| 7 | | Attachment WJC/MRS-2, there is a substantially positive NPV result in the amount of |
| 8 | | \$875,710, including recovery of these costs as proposed by the Company, which will |
| 9 | | flow through to all EnergyNorth customers. |
| 10 | Q. | Is EnergyNorth seeking a return on the NHDAS costs? |
| 11 | A. | No. As shown in the "Revenue Requirement" column, rows 1, 2, and 3 of Attachment |

12 WJC/MRS-2, EnergyNorth is simply seeking reimbursement of the funds it advanced for

13 NHDAS' benefit three years ago, with no carrying charge, amortized over three years.

14 IV. <u>CONCLUSION</u>

- 15 Q. Does this conclude your testimony?
- 16 A. Yes.

Attachment WJC/MRS-1

In Docket No. DG 19-161, the Secretarial Letter on September 28, 2020, stated that consistent with Order No. 26,122,¹ Liberty must also include in its next initial rate case filing "an analysis of Liberty's investment in its iNATGAS facility similar to Exhibit 46 in DG 17-048, in sufficient detail, to allow the Commission to evaluate the investment and its impacts on firm customers."

This attachment provides the updated analysis in a format similar to Exhibit 46 in Docket No. DG 17-048. Specifically, this attachment contains the following documentation:

a) <u>Attachment WJC/MRS-1(a)</u>: Exhibit 46 part (a) required the Company to provide "a REVISED Attachment to Staff 1-1.e in DG 14-091 (Hall Testimony, Attachment SRH-1) that includes projected AFUDC based on the cost estimates, anticipated construction schedule and Concord property tax rate at that time. Provide supporting work papers in both hard copy and electronic (Microsoft Excel) formats, with all data and formulas intact."

Attachment WJC/MRS-1(a) provides a copy of the Company's original response to Exhibit 46 part (a), as this is an historical document that is unchanged in the updated analysis.

b) <u>Attachment WJC/MRS-1(b)</u>: Exhibit 46 part (b) required the Company to provide "an updated REVISED Attachment to Staff 1-1.e in DG 14-091 (Hall Testimony, Attachment SRH-1) using the actual investment amounts (including AFUDC), calendar years corresponding to the in-service date and current Concord property tax rate. Provide supporting work papers in both hard copy and electronic (Microsoft Excel) formats, with all data and formulas intact."

Attachment WJC/MRS-1(b) provides an updated analysis of the project using the actual investment amounts (including AFUDC), calendar years corresponding to the in-service date and current Concord property tax rate.

c) <u>Attachment WJC/MRS-1(c)</u>: Exhibit 46 part (c) required the Company to "update Attachment 5-4.3 to include actual monthly consumption and gross margin since May 2017."

Attachment WJC/MRS-1(c) provides an update to Attachment 5-4.3 to include actual monthly consumption and gross margin through June 2020.

Attachment WJC/MRS-1(c) contains confidential customer usage information and confidential pricing can be calculated from the "consumption" and "gross margin" figures.

¹ Order No. 26,122 (Apr. 27, 2018) stated the following with respect to the special contract with iNATGAS: "Nevertheless, the plant has been built and, for purposes of the base rates set in this case, we will allow recovery of the plant up to the level of costs presented in DG 14-091 (\$2,245,000) plus related O&M expense. *We will reevaluate this investment in Liberty's next rate case and may consider putting more of the investment in rate base at that time*. The remedy fashioned here will put ratepayers in the position they were in when this project was approved." Id. at 31-32 (emphasis added).

The customer information is confidential pursuant to RSA 363:38, and the Commission orally granted confidential treatment of the pricing information in the underlying docket that approved the iNATGAS contract. See Transcript of 4/23/2014 prehearing conference in Docket No. DG 14-091, at page 12. A motion for confidential treatment will be filed to protect the information in this docket.
