

1/28/21

To Whom It May Concern:

We are writing to express our dismay regarding the above subject. An increase ranging from 90.62% to 124.75% above the current rate is totally unacceptable. We would be interested how these numbers were calculated. (A spreadsheet would be helpful.) As folks on a fixed income are finding increasing costs spiraling out of control, it becomes more difficult to make ends meet. (Especially with Covid's attack!)

Please do not pass these rates, until they become in line with REALITY!

Thank you for your consideration,

Richard Younginger
