

1/8/21

The proposed increase in HAWC rates of 65% to water consumers and 609.5% to the town of Atkinson to increase fire hydrant maintenance is egregious and borders on usury. To allow a private company to demand rates that would not be acceptable from a public utility is just plain wrong. For those Atkinson residents that have no choice but to utilize HAWC for water service, we request that this increase be denied.
