

1/11/21

I live in Atkinson and I'm very disturbed by the constant increase, and in some cases a drastic increase, of my water rates. The fact that a private company can impose such great adjustments in a pseudo "semi-public" utility is not right.

Hampstead area water has gotten enough in recent years for increases. How is a 65% increase justifiable?! It's not. This is a fleecing of the public....and must not be tolerated.

Please do not allow this catastrophic increase to be passed on to consumers.

Thank you!
