PUBLIC UTILITIES COMMISSION****DG 20-154****NORTHERN UTILITIES, INC.****2020/2021 Annual Cost of Gas****ORDER OF NOTICE**

On September 18, 2020, Northern Utilities Inc. (Northern or the Company) submitted a Winter 2020/2021 and Summer 2021 cost of gas (COG) filing outlining its proposed COG for the winter period (November 1, 2020 through April 30, 2021) and the summer period (May 1, 2021 through October 31, 2021), including proposed local distribution adjustment charges (LDAC) for the period of November 1, 2020 through October 31, 2021. In support of the Company's proposed rates, Northern filed testimony, revised tariff pages, and schedules. The COG submission and subsequent docket filings, other than any information for which confidential treatment is requested of or granted by the Commission, will be posted to the Commission's website at <http://puc.nh.gov/Regulatory/Docketbk/2020/20-154.html>.

The proposed winter 2020/2021 residential COG rate is \$0.7315 per therm, a \$0.1667 per therm increase compared to last winter's weighted average residential COG rate of \$0.5648 per therm. The proposed changes to Northern's residential COG rate and LDAC rates is expected to increase a residential heating customer's winter bill by approximately \$124, or 13 percent over the entire winter period.

The proposed winter 2020/2021 commercial and industrial (C&I) high winter use COG rate is \$0.7437 per therm, and the proposed C&I low winter use COG rate is \$0.6465 per therm. The changes in the C&I COG and LDAC rates for high and low winter users is expected to

increase a C&I customer's winter bill by between 16 and 23 percent, respectively, over the entire winter period.

The proposed summer COG rate for 2021 is \$0.4412 per therm for residential customers, a \$0.2061 per therm increase compared to last summer's weighted average residential COG rate of \$0.2351 per therm. The proposed change in residential COG and LDAC rates is expected to increase a residential heating customer's summer bill by approximately \$32, or 13 percent over the entire summer period.

Northern proposes summer 2021 COG rates of \$0.4733 per therm for C&I high winter use customers and \$0.3943 per therm for C&I low winter use customers. The proposed changes in the C&I COG and LDAC rates for high and low winter C&I users are expected to increase a C&I customer's summer bill by 11 percent and 40 percent, respectively, over the entire summer period.

A variety of components makes up the proposed LDAC charges of \$0.1099 per therm for residential customers and \$0.0472 per therm for C&I customers, compared to the \$0.0706 per therm and \$0.0359 per therm rates, respectively, currently in effect. The proposed charge to recover environmental remediation costs is \$0.0061 per therm, compared to the \$0.0057 per therm rate currently in effect. per therm for C&I customers, compared to the respective \$0.0114 per therm and \$0.0019 per therm rates currently in effect.

Northern is updating, and decreasing, its Company Allowance (for lost and unaccounted for gas and Company use of gas) for the period November 2020 through October 2021 from 1.38 to 1.30 percent. Northern also proposes changes to its supplier balancing charges, peaking demand charges, capacity allocator percentages, and short-term borrowing limits.

The filing raises, inter alia, issues related to RSA 374:2 and RSA chapter 378, including: the justness and reasonableness of rates; the forecasting of sales, supplier prices, and transportation prices; weather normalization; the calculation of indirect gas costs; purchasing decisions related to current and past supplies; capacity and revenue projections related to transportation services and released capacity; the reconciliation of prior period costs and revenues; and the prudence and recovery of environmental remediation. Each party has the right to have an attorney represent the party at the party's own expense.
