

We are Litchfield residents who have recently been switched over to Pennichuck water due to the tainting of our well by Saint Gobain. We had no choice in this matter if we wanted our family to be free from PFOA's. We have been warned by many town members about the terrible water quality that we will now be forced to pay for. We feel that a rate increase on top of the already astronomical rate being charged to Litchfield residents is absolutely unacceptable. Our town rate already greatly exceeds all of the surrounding towns. Thank you for your time and attention in this matter.

Sincerely,

Angela Berrios-Petit
