

I can't believe I even need to write this letter. Litchfield's water rates are already obscene and astronomically higher than all surrounding towns. There's absolutely no reason for this.

On top of this, we have no other choice. We are stuck with Pennichuck. We can't even opt for a well because our ground water is polluted. So the state of NH is going to allow St Gobain to pollute our ground water and the repercussion is they pay for water hookup to an outrageously priced water source? It would be comical if it weren't true.

No friggin way. You want to raise the rates? Have St Gobain pay the increase. This is asinine and you should be ashamed for even entertaining the rate increase.
