

To Whom it May Concern

I writing this with complete objection and concern with a 20%+ permanent increase to water rates. With the constant water quality interruptions and drastic cost changes during a time when many are struggling shows lack of concern for customers and loyalty to bottom line. Please Consider this cost increase for Litchfield; and at very least divide costs evenly amongst Pennichcuk East customers and not isolate costs to a small group of families in a designated geographic area. Thank you for your time and consideration.
