

To whom it may concern:

I recently did some research after learning about the potential increase on Litchfield residents' water. If you move forward with this increase, Litchfield's rates will be \$9.42 per unit of water. Hudson pays \$3.30, Merrimack is \$2.32, and Manchester is \$1.64. We pay between 2.9 times and 5.7 times more than our neighbors

Additionally, the average Litchfield homeowner will pay almost \$90 per month for water. With lawn watering, I may pay \$1,500+ per year for water.

This is unacceptable! Please consider these facts before pushing forward.

Sincerely,
Erin Robbins
Concerned Litchfield resident
