

To the Public Utilities Commission,

A 21% rate increase for water in Litchfield is outrageous. How can Pennichuck miscalculate their revenues by \$1.9 Million? They sell water with meters.

Why should Litchfield subsidize much larger cities and towns? Our proposed rate is 5.7 times larger than Manchester's rate.

Why are our rates already too high and unfair \$7.41 vs \$1.64? Do we get better water than Manchester, Nashua, Hudson and Derry?

Pennichuck actually takes water from Litchfield. We should get the best rates.

As a business owner in Litchfield I am jealous of Pennichuck.

I wish my company had no competition, so I could mismanage it and then just raise my prices on my customers.
