

Who it may concern,

Litchfield's rates will be \$9.42 per unit of water. Hudson pays \$3.30, Merrimack is \$2.32, and Manchester is \$1.64. We pay between 2.9 times and 5.7 times more than our neighbors

- The average Litchfield homeowner will pay almost \$90 per month for water. If you water your lawn, that cost may exceed \$250 per month. With lawn watering, you may pay \$1,500+ per year for water.
- With the St. Gobain PFOA situation, customers have no other water option as wells could be contaminated. We are forced to use Pennichuck.

and the water has a horrible quality it is gross See example of my tub if someone can bath in this water and have a rate increase

We need to have some action here,

Regards,

Marina Duquette
