
1/18/21

Good day,

As I understand, if approved, Pennichuck will raise our water rates 21%

However we already have the highest rates by far in the area, so why would or should they increase?

As a price per unit comparison, if the proposed increase goes through, how can it be justified?

Manchester \$1.64

Merrimack \$2.32

Hudson \$3.30

Litchfield \$9.42!!!

This new amount would be almost 6 times the price that Manchester pays!

Again, how can this be justified? Are we somehow 6 times wealthier?

Regarding the 21 percent increase- I am very confident that nobody received a 21% pay increase this year, let alone the fact that many people are out of and have been out of work for months!

Please vote against this illogical and absurd increase.

Thank you,

Dan Paquette
