Public Utilities Commission,

To the Public Utilities Commission,

I am writing about Liberty's request for additional gas capacity contracts for NH customers via DG 21-008.

Our state does not need more fracked gas and I ask that you not support this request by Liberty. We have to act NOW to reduce our carbon emissions. We owe it to our children and grandchildren and the generations to come.

They need a livable planet and we are denying them that right. Liberty's money would be better spent investing in renewable energy. This is the future of energy for our state and our nation and the world. I have solar panels on my home and make more electricity than I use; it is going back into the grid benefiting my neighbors.

Please reject Liberty Utilities' request and focus on better energy efficiency and renewable energy projects in our state.

Thank you.
