Exhibit #6 RECORD REQUEST

Reference page 98 of the transcript of the April 27, 2020, hearing in Docket DE 20-036, where Commissioner Giaimo stated: “Okay. So I know transmission owners, there was a big discussion about 15, 20 years ago when transmission investment was far exceeding initial estimates. And through the ISO tariff and one of the attachments they have an objective formula that they use, which is then used to determine whether or not some of the investments were, for lack of a better term, prudent, and whether or not they overspent and were so far off budget. I guess I would suggest that maybe the Company consider some sort of similar format to provide guidance. It may be helpful.”

What, if anything, has the Company done to take the Commissioner up on this suggestion or something similar to that?
