DEPARTMENT OF ENERGY RESPONSES TO COMMISSION RECORD REQUESTS

Docket No. DG 06-107 and Docket No. DE 21-073

2019 and 2020 Liberty (Granite State Electric) Annual Storm Fund Reports

NHPUC Record Request 1

Date Request Received: 7/21/22 Request No. RR 1 Date of Response: 8/24/22 Respondents: Stephen R. Eckberg Karen J. Moran

RECORD REQUEST No. 1:

"Please define 'service' as it may be contemplated by National Electric Safety Code or other industry reference." July 21, 2022 Hearing Transcript at 4, 317 (request to Liberty) 313, 318 (DOE permitted to respond as well).

DOE'S RESPONSE:

Reference: Liberty's response to the PUC Record Request 1 (RR 1), Exhibit #29; Exhibit #15 (Typical Pole Top drawing); FERC, CFR Title 18, Chapter 1, Subchapter C, Part 101 eCFR :: 18 CFR Part 101 -- Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject to the Provisions of the Federal Power Act

The Department of Energy (DOE) provides the following additional information related to the definition of "service" as contained in an industry-wide standard.

DOE also comments on Liberty's response to the same record request, filed in this docket as Liberty's Exhibit 29.

DOE Additional Industry Reference:

The Federal Energy Regulatory Commission (FERC) has promulgated rules applicable to all regulated utilities including a standard system of accounts and accounting for electric utilities to use in maintaining their financial records and reporting to FERC. RSA 374:8; NH Code Admin Rules Puc 307.04 Uniform System of Accounts (adopting the FERC and Uniform System of Accounts for New Hampshire public utilities), and Puc 308.10, Annual Report, (requiring New Hampshire public utilities to file FERC form No. 1 "Annual Report of Major Electric Utilities, Licensees and Others," as described in 18 C.F. R. § 141.1, with the New Hampshire Public Utilities Commission at the same time the utility files such report with the FERC.

The industry-wide standard which defines "services" is the Federal Energy Regulatory Commission's Uniform System of Accounts for Public Utilities and Licensees, referenced as the Title 18 Code of Federal Regulations (CFR) Chapter 1, Subchapter C, Part 101. Specifically, Account 369 Services in the FERC system of accounts is described as follows:

"[Account] 369 Services.

This account shall include the cost installed of overhead and underground <u>conductors</u> leading from a point where wires leave the last pole of the overhead system or the distribution box or manhole, or the top of the pole of the distribution line, to the point of connection with the customer's outlet or wiring. Conduit used for underground service conductors shall be included herein.

Items

1. Brackets. 2. Cables and wires. 3 Conduit 4. Insulators. 5. Municipal inspection. 6. Overhead to underground, including conduit or standpipe and conductor from last splice on pole to connection with customer's wiring. 7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks. 8. Permits. 9. Protection of street openings. 10. Service switch. 11. Suspension wire." (Emphasis added)

In its most recent FERC Form No. 1 (Calendar year ending December 2021) revised filing (filed May 16, 2022, Liberty (Granite State Electric) identified totals in Plant Account 369 Services as \$12,169,154; Plant Account 365 Overhead conductors and devices as \$ 85,405,219, and Plant Account 364, Poles, Towers, and *Fixtures* as \$45,976,363. For comparison purposes, the Company's entire reported plant in service figure is \$305,583,593. See FERC No. 1 form at 204-207. (Attached hereto as Attachment 1). Thus, for accounting, and tracking of capital asset purposes, the industry describes "service" separately.

DOE's Comments on Liberty's response to Record Request No.1 (RR 1) (Liberty's Exhibit 29)

With regard to Liberty's response to the Commission's Record Request #1 (RR 1), Liberty's Exhibit 29, the Department of Energy (DOE) agrees that the National Electric Code (NEC) and the National Electric Safety Code (NESC) are industry references. Based upon information and belief, the NESC focuses on large power systems that supply power to homes and businesses. The NEC focuses on the electric systems within those homes and businesses. In most situations, the NESC applies to equipment and systems utilizing substantially higher voltage than those applicable to the NEC.

In the opinion of the DOE, although the NEC and NECS definitions do not explicitly

distinguish "services" and "secondary" lines, the description of FERC Account 369 *Services*, also an industry reference, and Liberty's Exhibit 15 (Typical Pole Top drawing) do explicitly distinguish "service" lines from the "primary" and "secondary" lines. This is consistent with DOE's position that primary and secondary lines go from pole to pole, while service lines run from the poles to the customer's outlet or wiring. *See* July 21, 2022 Hearing Transcript at 296 (Eckberg) 67-68, 68 lines 7-21 (Strabone).

With regard to the term "service drop," DOE finds Liberty's statement that the NEC and NESC are "referring to the section of wire between the last pole and the house/structure, which is the same wire that Liberty refers to as a 'service," unclear. *See* Liberty's Exhibit 29; Transcript at 296, 67-68. In the quoted comment from Liberty's Exhibit 29, Liberty seems to have referenced part, but not all, of the definition of "service" as stated in the FERC system of accounts, Account 369, *Service*, which (as set forth above) describes "service [lines]" as:

"...overhead . . . conductors leading <u>from</u> a point where the wires <u>leave the</u> <u>last pole of the overhead system</u>...or <u>the top of the pole of the distribution</u> <u>lines to</u> the point of connection with the customer's outlet or wiring." (Emphasis added)

See FERC Account 369 Service.

The definitions Liberty cited in Exhibit 29 were compared to the published NESC codes. Liberty omitted a word (shown in **bold**) from the 2014 NEC definition of "service drop." The 2014 NESC code defines "service drop" as "The overhead conductors between the **utility** electric supply and the service point."

The most current version of the NEC approved in New Hampshire is the 2020 NEC (effective July 1, 2022). The 2020 NEC definitions are as follows:

"Service" is defined as "the conductors and equipment connecting the serving utility to the wiring system of the premises served."

"Service Drop" as defined as "the overhead conductors between the serving utility and the service point." and

"Service Point" is defined as "the point of connection between the facilities of the serving utility and the premises wiring,"

These definitions are consistent with DOE's distinction among primary, secondary and service lines.

The 2017 NESC is the most current version of the NESC itself.

Erica L. Menard Director, Rates and Regulatory Affairs 15 Buttrick Rd. Londonderry, NH 03053 603-361-3475 Erica.Menard@libertyutilities.com

May 16, 2022 Via Electronic Report Filing

Daniel Goldner Chairman New Hampshire Public Utilities Commission 21 South Fruit St., Suite 10 Concord, NH 03301-2429

Dear Chairman Goldner:

Re: Liberty Utilities (Granite State Electric) Corp. d/b/a Liberty FERC Form No. 1 Annual Report — YE 2021

Pursuant to Puc 308.10, enclosed for filing please find Liberty's FERC Form No. 1 Annual Report of Major Electric Utilities, Licensees and Others for the year ending December 31, 2021, which was filed with the FERC on May 16, 2022. Please note this report has been electronically filed via the Commission's Electronic Report Filing system.

Thank you for your attention to this matter. Please do not hesitate to call if you have any questions.

Sincerely,

Erica & Menard

Erica L. Menard

Page 3 of 167

RR No. 1 Attachment 1

FERC Form Document Accession #: 20220516-8004

Filed Date: 05/16/2022

GENERAL INFORMATION

Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q (FERC Form A-Q) is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities, Licensees, and Others Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141.1), and FERC Form 3-Q (18 C.F.R. § 141.400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

one million megawatt hours of total annual sales,

100 megawatt hours of annual sales for resale,

500 megawatt hours of annual power exchanges delivered, or

500 megawatt hours of annual wheeling for others (deliveries plus losses).

What and Where to Submit

Submit FERC Form Nos. 1 and 3-Q electronically through the eCollection portal at <u>https://eCollection.ferc.gov</u>, and according to the specifications in the Form 1 and 3-Q taxonomies.

The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q filings.

Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at: Secretary

Federal Energy Regulatory Commission 888 First Street, NF

Washington, DC 20426

For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission's applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and

Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

<u>Schedules</u>	Pages
Comparative Balance Sheet	110-113
Statement of Income	114-117
Statement of Retained Earnings	118-119
Statement of Cash Flows	120-121
Notes to Financial Statements	122-123

The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

"In connection with our regular examination of the financial statements of [COMPANY NAME] for the year ended on which we have reported separately under date of [DATE], we have also reviewed schedules [NAME OF SCHEDULES] of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases." The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. Further instructions are found on the Commission's website at <u>https://www.ferc.gov/ferc-online/ferc-onl</u>

Federal, State, and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from https://www.ferc.gov/general-information-0/electric-industryforms.

When to Submit

FERC Forms 1 and 3-Q must be filed by the following schedule:

FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and

FERC Form 3-Q for each calendar quarter must be filed within 60 days after the reporting quarter (18 C.F.R. § 141.400).

Where to Send Comments on Public Reporting Burden.

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,168 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 168 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal

Filed Date: 05/16/2022

Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

GENERAL INSTRUCTIONS

Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA.

Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.

Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.

For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.

Enter the month, day, and year for all dates. Use customary abbreviations. The "Date of Report" included in the header of each page is to be completed only for resubmissions (see VII. below).

Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.

For any resubmissions, please explain the reason for the resubmission in a footnote to the data field.

Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.

Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Schedule specific instructions are found in the applicable taxonomy and on the applicable blank rendered form.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.

FNO - Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and" firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract. OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

DEFINITIONS

Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

EXCERPTS FROM THE LAW

Federal Power Act, 16 U.S.C. § 791a-825

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to with:

'Corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities, as hereinafter defined;

'Person' means an individual or a corporation;

'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;

'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, unitizing, or distributing power;

"project' means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

"Sec. 4. The Commission is hereby authorized and empowered

'To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to

Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.

Page 5 of 167

be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304.

Every Licensee and every public utility shall file with the Commission such annual and other periodic or special* reports as the Commission may by rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports shall be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and perlacement of the project works and other facilities,

FERC FORM NO. 1 (ED. 03-07)

depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies*.10

"Sec. 309.

The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be field..."

GENERAL PENALTIES

The Commission may assess up to \$1 million per day per violation of its rules and regulations. See FPA § 316(a) (2005), 16 U.S.C. § 8250 (a).

	CORPORATIONS CONTROLLED BY RESPONDENT								
 Report below the names of all corporations, business trusts, and similar organizations, controlled directly or indirectly by respondent a any time during the year. If control ceased prior to end of year, give particulars (details) in a footnote. If control was by other means than a direct holding of voting rights, state in a footnote the manner in which control was held, naming a intermediaries involved. If control was held jointly with one or more other interests, state the fact in a footnote and name the other interests. Definitions See the Uniform System of Accounts for a definition of control. Direct control is that which is exercised without interposition of an intermediary. Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control. Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as where the voting control is equally divided between two or more parties who together have control within the meaning of the definition of control in turniform System of Accounts, regardless of the relative voting rights of each party.

INFORMATION ON FORMULA RATES - Formula Rate Variances								
 If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1. The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1. The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts. Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote.

This report is: Name of Respondent: Date of Report: Year/Period of Report (1) 🗹 An Original Liberty Utilities (Granite State Electric) Corp. 05/16/2022 End of: 2021/ Q4 (2) A Resubmission NOTES TO FINANCIAL STATEMENTS 1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement. 2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock. 3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Commission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
 If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be included herein. 7. For the 3Q disclosures, respondent must provide in the notes sufficient disclosures so as to make the interim information not misleading. Disclosures which would substantially duplicate the disclosures contained in the most recent FERC Annual Report may be omitted 8. For the 3Q disclosures, the disclosures shall be provided where events subsequent to the end of the most recent year have occurred which have a material effect on the respondent. Respondent must include in the notes significant changes since the most recently completed year in such items as: accounting principles and practices; estimates inherent in the preparation of the financial statements; status of long-term contracts; capitalization including significant new borrowings or modifications of existing financing agreements; and changes resulting from business combinations or dispositions. However were material contingencies exist, the disclosure of such matters shall be provided even though a significant change since year end may not have occurred. 9. Finally, if the notes to the financial statements relating to the respondent appearing in the annual report to the stockholders are applicable and furnish the data required by the above instructions, such notes may be included herein. (in thousands of U.S. dollars) Liberty Utilities (Granite State Electric) Corporation's financial statements contained herein have been prepared in accordance with the accounting requirements of the FERC as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a comprehensive basis of accounting other than GAAP. The attached Notes to Financial Statements have been prepared in conformity with GAAP. Accordingly, certain footnotes are not reflective of Liberty Utilities' financial statements contained herein Liberty Utilities (Granite State Electric) Corp. (the "Company"), formerly known as Granite State Electric Company, is an electric retail distribution company providing electric service to approximately 45,000 customers in 21 communities in the State of New Hampshire. The properties of the Company consist principally of substations and distribution lines. The Company is owned by Liberty Energy Utilities (New Hampshire) Corp., which is a wholly owned subsidiary of Liberty Utilities Co. ("Liberty Utilities"), a holding company for water distribution and wastewater treatment assets, electric utility assets, and natural gas utility assets Significant accounting policies (a) Basis of preparation The accompanying financial statements and notes have been prepared in accordance with generally accepted accounting principles in the United St ("U.S. GAAP"). The Company's operating results are subject to seasonal fluctuations that could materially impact quarter- to-quarter operating results and, thus, one quarter's operating results are not necessarily indicative of a subsequent quarter's operating results. During the summer period, electrical distribution utilities can experience higher or lower demand in the summer or winter depending on the specific regional weather and industry characteristics. Accounting for rate regulated operations (b) The Company is subject to rate regulation overseen by the New Hampshire Public Utilities Commission ("NHPUC"). The NHPUC provides the final determination of the rates charged to customers. The Company's activities are accounted for under the principles of U.S. Financial Accounting Standards Board Accounting Standard Codification Topic 980, Regulated Operations ("ASC 980"). Under ASC 980, regulatory assets and liabilities that would not be recorded under U.S. GAAP for non-regulated entities are recorded to the extent that they represent probable future revenue or expenses associated with certain charges or credits that will be recovered from or refunded to customers through the rate making process. Included in note 6, Regulatory matters, are details of regulatory assets and liabilities, and their current regulatory treatment. In the event the Company determines that its net regulatory assets are not probable of recovery, it would no longer apply the principles of the current accounting guidance for rate-regulated enterprises and would be required to record an after-tax, non-cash charge or credit against earnings for any remaining regulatory assets or liabilities. The impact could be material to the Company's reported financial condition and results of operations. The Company's accounts are maintained in accordance with the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission ("FERC") the Regulator and National Association of Regulatory Utility Commissioners in the United States. Cash and cash equivalents (c) Cash and cash equivalents include all highly liquid instruments with an original maturity of three months or less. Restricted cash (d) Cash reserves segregated from the Company's cash balances are maintained in accounts administered by a separate agent and disclosed separately as restricted cash in these financial statements. The Company cannot access restricted cash without the prior authorization of parties not related to the Company. (e) Accounts receivable

	The costs of acquiring or constructing utility plant include the following: materials, labor, contractor and professional services, construction overh directly attributable to the capital project (where applicable), and allowance for funds used during construction ("AFUDC").								
	AFUDC represents the cost of borrowed funds and a return on other funds. Under ASC 980, an allowance for funds used during construction projects I are included in rate base is capitalized. This allowance is designed to enable a utility to capitalize financing costs during periods of construction of ut plant subject to rate regulation. The interest capitalized that relates to debt reduces interest expense on the statements of comprehensive income. AFUDC capitalized that relates to equity funds is recorded as interest and other income on the statements of comprehensive income.								
	Improvements that increase or prolong the service life or o occur at regular intervals over the life of	capacity of an asset a	are capitalized. Co	osts incurred for	major expenditures or overh	nauls

The FASB issued ASU 2020-04, Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting, which provides

FERC FORMALS: Figure 1 account of the control of th adoption of this standard on its financial statements. The Company does not expect a significant impact on its financial statements as a result of the adoption of this update.

Accounts receivable

Accounts receivable as of December 31, 2021 include unbilled revenue of \$2,249 (December 31, 2020 - \$2,171). Accounts receivable as of December 31, 2021 are presented net of allowance for doubtful accounts of \$734 (December 31, 2020 - \$752).

Utility plant

Utility plant consists of electricity distribution assets used to distribute electricity within a specific geographic service territory to end users of electricity. These assets include poles, towers and fixtures, low-voltage wires, transformers, overhead and underground conductors, street lighting, meters, metering equipment and other related equipment.

Utility plant consists of the following:

2021	2018
\$ 4,814 \$	4,825
256,941	230,733
17,066	10,787
278,821	246,345
(61,410)	(53,052)
\$ 217,411 \$	193,293
\$	\$ 4,814 \$ 256,941 17,066 278,821 (61,410)

AFUDC capitalized to the cost of the assets in 2021 and 2020 is as follows:

	2	2021	2020
AFUDC capitalized on regulated property:			
Allowance for borrowed funds	\$	169 \$	127
Allowance for equity funds		278	207
Total	\$	447 \$	334

Intangible Assets

Intangible assets as of December 31, 2021 include renewable energy credits of \$1,667 (2020 - \$1,597).

Intragine assets as of December 31, 2021 include renewable energy credits of \$1,667 (2020 - \$1,597). **Regulatory matters** The Company is subject to rate regulation by the NHPUC, and the FERC in some instances. The NHPUC has jurisdiction with respect to rate, service, accounting procedures, issuance of securities, acquisitions and other matters. The Company operates under cost-of-service regulation as administered by NHPUC. The Company is accounted for under the principles of ASC 980. Under ASC 980, regulatory assets and liabilities that would not be recorded under U.S. GAAP for non-regulated entities are recorded to the extent that they represent probable future revenue or expenses associated with certain charges or credits that will be recovered from or refunded to customers through the rate-setting process.

At any given time, the Company can have several regulatory proceedings underway. The financial effects of these proceedings are reflected in the financial statements based on regulatory approval obtained to the extent that there is a financial impact during the applicable reporting period.

Regulatory assets and liabilities consist of the following:

	December 31,	December 31,
	2021	2020
Regulatory assets		
Pension and post-employment benefits (a)	\$5,783	\$7,840
Energy costs adjustment (b)	8,148	8,010

Other	308	260
Total regulatory assets	15,618	17,808
Less: current regulatory assets	(11,011)	(10,537)
Non-current regulatory assets	\$4,607	\$7,271
Regulatory liabilities		
Cost of removal (f)	\$7,620	\$6,922
Energy costs adjustment (b)	1,897	2,070
Storm costs (g)	2,666	1,654
Income taxes (e)	4,981	5,235
Total regulatory liabilities	17,164	15,881
Less: current regulatory liabilities	(4,834)	(3,995)
Non-current regulatory liabilities	\$12,330	\$11,886

Pension and post-employment benefits (a)

As part of certain business acquisitions, the NHPUC authorized a regulatory asset or liability being set up for the amounts of pension and post-employment benefits that have not yet been recognized in net periodic cost and were presented as AOCI prior to the acquisition by Liberty Utilities. The balance is recovered through rates over the future services years of the employees at the time the regulatory asset was set up (an average of 10 years).

The mortality assumption for December 31, 2021 uses the Pri-2012 mortality table and the projected generationally scale MP-2021, adjusted to reflect the ultimate improvement rates in the 2021 Social Security Administration intermediate assumptions for plans in the United States.

In selecting an assumed discount rate, the Company uses a modeling process that involves selecting a portfolio of high-quality corporate debt issuances (AA- or better) whose cash flows (via coupons or maturities) match the timing and amount of the Company's expected future benefit payments. The Company considers the results of this modeling process, as well as overall rates of return on high-quality corporate bonds and changes in such rates over time, to determine its assumed discount rate.

The rate of return assumptions are based on projected long-term market returns for the various asset classes in which the plans are invested, weighted by the target asset allocations.

Weighted average assumptions used to determine net benefit cost for 2021 and 2020 were as follows:

Commitments and contingencies

(a) Contingencies

The Company is involved in various claims and litigation arising out of the ordinary course and conduct of its business. Although such matters cannot be predicted with certainty, management does not consider the Company's exposure to such litigation to be material to these financial statements. Accruals for any contingencies related to these items are recorded in the financial statements at the time it is concluded that its occurrence is probable and the related liability can be estimated.

The normal ongoing operations and historic activities of the Company are subject to various federal, state and local environmental laws and regulations and are regulated by agencies such as the United States Environmental Protection Agency and the New Hampshire Department of Environmental Services ("NHDES"). Like most other industrial companies, an electric distribution utility generates some hazardous wastes. Under federal and state laws, potential liability for historic contamination of property may be imposed on responsible parties jointly and severally, without fault, even if the activities were lawful when they occurred. In the case of regulated utilities these costs are often allowed in rate payers over a specified period.

As of December 31, 2021 and 2020, the Company had reserves related to its environmental obligations of \$117 and \$118, respectively, included as other long-term liabilities in the accompanying balance sheets, which represents management's best estimate of the future costs to investigate and remediate the sites as necessary. These environmental reserves are recorded on a discounted basis. Remediation costs for each site may be materially higher than noted, depending on changing technologies and regulatory standards, selected end use for each site, and actual environmental conditions encountered.

(b) Commitments

(a) Fair value of financial instruments

N

The Company has outstanding purchase commitments for the purchase of electric power. Detailed below are estimates of future commitments under these agreements:

This report is: Name of Respondent: Date of Report: Year/Period of Report (1) 🗹 An Original Liberty Utilities (Granite State Electric) Corp. End of: 2021/ Q4 05/16/2022 (2) A Resubmission ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108) 1. Explain in a footnote any important adjustments during year. Explain in a footnote any difference between the amount for book cost of plant retired, Line 12, column (c), and that reported for electric plant in service, page 204, column (d), excluding retirements of non-depreciable property. 3. The provisions of Account 108 in the Uniform System of Accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications. 4. Show separately interest credits under a sinking fund or similar method of depreciation accounting. Document Accession #: 20220516-8004 Filed Date: 05/16/2022

This report is: Date of Report: Year/Period of Report Name of Respondent: (1) 🗹 An Original Liberty Utilities (Granite State Electric) Corp. End of: 2021/ Q4 05/16/2022 (2) A Resubmission RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES 1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount. 2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be field, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members. 3. A substitute page, designed to meet a particular need of a company, may be used as Long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a footnote. Document Accession #: 20220516-8004 Filed Date: 05/16/2022

	of Respondent: y Utilities (Granite State Electric) Cc	rp.	This report is: (1) I An Original (2) A Resubmission LECTRICITY BY RATE	Date of Rep 05/16/2022 SCHEDULES		Year/Period of Report End of: 2021/ Q4		
 Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Page 310. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of customers. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly). For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

	TRANSMISSION OF ELECTRICITY BY ISO/RTOs										
2. (3. - - - - - - - - - - - - - - - - - - -	 Report in Column (a) the Transmission Owner receiving revenue for the transmission of electricity by the ISO/RTO. Use a separate line of data for each distinct type of transmission service involving the entities listed in Column (a). In Column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO – Firm Network Service for Others, FNS – Firm Network Transmission Service for Self, LFP – Long-Term Firm Point-to-Point Transmission Service, OLF – Other Long-Term Firm Transmission Service, SFP – Short-Term Firm Point-to-Point Transmission Reservation, NF – Non-Firm Transmission Service, OS – Other Transmission Service and AD- Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes. In column (c) identify the FERC Rate Schedule or tariff Number, on separate lines, list all FERC rate schedules or contract designations under which service, as identified in column (b) was provided. In column (c) identify the total revenues distributed to the entity listed in column (a).

Filed Date: 05/16/2022

This report is: Year/Period of Report Name of Respondent: Date of Report: (1) 🗹 An Original 05/16/2022 Liberty Utilities (Granite State Electric) Corp. End of: 2021/ Q4 (2) A Resubmission TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565) 1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported. 3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FIS- Firm Network Transmission Service for Self, LFP - Long-Term Firm Point-to-Point Transmission Reservations. OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point-to- Point Transmission Reservations, NF - Non-Firm Transmission Service, and OS - Other Transmission Service. See General Instructions for definitions of statistical classifications. Report in column (c) and (d) the total megawatt hours received and delivered by the provider of the transmission service 5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
Enter ""TOTAL"" in column (a) as the last line.
Footnote entries and provide explanations following all required data. This report is: Year/Period of Report Name of Respondent: Date of Report: (1) 🗹 An Original End of: 2021/ Q4 Liberty Utilities (Granite State Electric) Corp. 05/16/2022 (2) A Resubmission Depreciation and Amortization of Electric Plant (Account 403, 404, 405) 1. Report in section A for the year the amounts for: (b) Depreciation Expense (Account 403); (c) Depreciation Expense for Asset Retirement Costs (Account 403.1); (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405). 2. Report in Section B the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year. 3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year. Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-account used. In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used. For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type of mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis. 4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related. A. 	AMOUNT	S INCLUD	ED IN ISO/R	TO SETTLEMENT	STAT	TEMENTS				
	 The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

Filed Date: 05/16/2022

This report is: Year/Period of Report Name of Respondent: Date of Report: (1) 🗹 An Original Liberty Utilities (Granite State Electric) Corp. End of: 2021/ Q4 05/16/2022 (2) A Resubmission TRANSMISSION LINE STATISTICS 1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage o voltages in group totals only for each voltage. If required by a State commission to report individual lines for all voltages, do so but do not gr 2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do r 3. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property. 4. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Mir construction need not be distinguished from the remainder of the line. 5. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost o column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owr such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated. 6. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a fo voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in c 7. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another or amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by responder Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other 8. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how the second s company. 9. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year. LENGTH (Pole miles) -COST OF LINE (VOLTAGE (KV) -(In the case of DESIGNATION (Indicate where other column (j) Land, I underground lines than 60 cycle, 3 phase) and clearing rig report circuit miles) On On Size of Structures Number Type of Structure Conductor Construct Line То Operating Designated Supporting From Land of of No of Line and Costs Structure Another Circuits Material Designated Line (f) (h) (a) (b) (d) (e) (i) (j) (k) (c) (g) 1 2 3 4 5

 Report below the information called for concerning all non-power goods or services received from or provided to associated (affiliated) companies. The reporting threshold for reporting purposes is \$250,000. The threshold applies to the annual amount billed to the respondent or billed to an associated/affiliated company for non-power goods and services. The good or service must be specific in nature. Respondents should not attempt to include or aggregate amounts in a nonspecific category such as "general". Where amounts billed to or received from the associated (affiliated) company are based on an allocation process, explain in a footnote.

Docket Nos. DG 06-107/DE 21-073 Exhibit 30 B

DEPARTMENT OF ENERGY RESPONSES TO COMMISSION RECORD REQUESTS

Docket No. DG 06-107 and Docket No. DE 21-073

2019 and 2020 Liberty (Granite State Electric) Annual Storm Fund Reports

NHPUC Record Request 2

Date Request Received: 7/21/22 Request No. RR 1 Date of Response: 8/24/22 Respondents: Stephen R. Eckberg Karen J. Moran

RECORD REOUEST No. 2:

"Please describe when and why the Company began filing Annual Storm Reports in individual dockets." July 21, 2022 Hearing Transcript at 4, 318.

DOE's RESPONSE

Reference: Exhibit 27

The Company began filing its Annual Storm Reports in individual dockets after then PUC Staff directly asked the Company's Attorney to file the Annual Storm Reports in individual dockets. *See* Exhibit 27 Liberty's Responses to DOE Set One Combined [06-107 and 21-73] data requests, Bates 000049 (email from PUC Staff Attorney to Liberty's Attorney dated February 25, 2021, as forwarded to Heather Tebbetts on July 7, 2022).

For the convenience of the reader Exhibit 27 includes the following statement from PUC Staff Attorney Lynn Fabrizio, "... I think I'm going to recommend up the line that these annual reports get new docket numbers each year, as is done for the other 2 electric companies, so that it doesn't keep getting lost in the shuffle ... Does that work for you?"

And Liberty's response from Michael Sheehan, "That makes sense."
