Subject: Docket 21-078: Public comment

EXTERNAL: Do not open attachments or click on links unless you recognize and trust the sender.

To whom this may be of concern:

I am very concerned that NH, my home since 1967, does everything in its power to reduce air pollution from cars and support efforts to limit the negative effects of climate change. I believe it is important to provide more charging stations. That money is available from the VW settlement is to our advantage. We are a state that values those who vacation here, adding greatly to the economic vibrance of our communities. People who come will need and want more charging stations.

My friends who have electric cars look very carefully where these charging stations are available when they plan their trips. At the moment I'm doing my part by driving a Prius that gets great mileage, but my next car will be an EV. (I am 85 years old and want to do my part to pass along a world that is livable for the next generations.

PLEASE support Docket 21-078.

Thank you.
