Dear Barry:

You have requested that the New England Power Pool (“NEPOOL”), a voluntary association of entities that participate in the wholesale electric markets in the six New England states, indicate to you whether XOOM Energy, LLC (“XOOM”) is a member “in good standing in NEPOOL.” This letter is in response to that request.

As of the date of this letter, XOOM is a NEPOOL member, entitled to full rights and subject to full obligations of members as set forth in the Second Restated NEPOOL Agreement, which is NEPOOL’s governing document. XOOM has not requested termination of, nor has NEPOOL received an application or has a request pending for, the termination of XOOM’s status as a NEPOOL Participant or as a Market Participant under the Tariff.

Respectfully,

Additional Information and Required Notes

Power Sources - The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power as needed to meet the requirements of all customers in New England. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. 'Known Resources' include resources that are owned by, or under contract to, the supplier. 'System Power' represents power purchased in the regional electricity market. Electric suppliers are required to obtain a certain amount of renewable energy in accordance with RSA 362-F, the state's renewable portfolio standard law. They may also choose to obtain amounts of renewable energy above their legal obligation, and utilities must also offer a renewable energy option to allow customers to choose to support the purchase of additional renewable energy by the utility.

Air Emissions - **Carbon Dioxide (CO2)** is released when fossil fuels (e.g., coal, oil and natural gas) are burned. CO2, a greenhouse gas, is a major contributor to climate change. **Nitrogen Oxides (NOx)** form when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (smog), and may cause respiratory illness with frequent high level exposure. NOx also contribute to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life. **Sulfur Dioxide (SO2)** is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO2 include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO2 combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.

If you have questions or need further explanation please call XOOM Energy New Hampshire, LLC at 1-888-997-8979 or the New Hampshire Public Utilities Commission, toll-free at 1-800-852-3793.

SURELOCK 12 TERMS AND CONDITIONS

We Are Committed To Your Satisfaction: If you are not completely satisfied with XOOM Energy New Hampshire's SureLock 12 program for any reason, please contact us. If we are unable to resolve your concern to your full satisfaction, you may terminate this Agreement, in accordance with its terms. Alternative methods of terminating service with XOOM include contracting with a new electricity supplier, contracting with an aggregator granted agency authority, or by contacting your local utility to select utility default service.

Service & Term: XOOM Energy New Hampshire, LLC ("XOOM" or "Company") agrees to act as your exclusive electric power supplier. XOOM is registered by the New Hampshire Public Utilities Commission ("NHPUC") to offer and supply electricity as a competitive electric power supplier ("CEPS") in the State of New Hampshire (Registration No. DM 13-185). The Term of this Agreement will begin with your first meter read by your local utility following your acceptance into the program and will continue for twelve (12) months. You also have the right to change your CEPS at any time and with no advance notice requirement, subject to the payment of any termination fees and all other terms of this Agreement.

Acceptance into the Program: These terms and conditions are subject to your acceptance into the program by both XOOM and your local utility. You will be promptly notified if you are not accepted into the program.

Local Utility Services: XOOM is an independent retail marketer of electricity and is not affiliated with your local utility. Your local utility will continue to deliver your electricity, read your meter, send your bill, and make necessary repairs. Your local utility will also respond to emergencies and provide other basic utility services as required. XOOM Energy is not an agent of your local utility and your utility will not be liable for any of XOOM Energy's acts, omissions or representations.

Price: Your rate for electric power purchases will be a fixed price of \$0.0899 per kWh, plus taxes and fees, if applicable. You understand that XOOM's price does not include (and that you will be billed by the distribution company for) charges related to the delivery of electricity, including but not limited to, the price of transmission and distribution, the system benefits charge, stranded cost recovery charge, and taxes. The average monthly price for service can be found in your Disclosure Summary, which is incorporated into this Agreement.

Preferred Form of Communication: You understand that by accepting this Agreement, you have consented to being sent any future notices and disclosures in electronic form, rather than paper form, and have selected electronic communications as your preferred method of communication. You also understand and that you have the option to supplement your electronic communications with US Mail at any time during your contract by calling XOOM at 1-888-997-8979 or by sending an email to customercare@xoomenergy.com.

Renewal Notice; Notification of Changes: Subject to governing law, XOOM can renew this Agreement with new or revised Terms. XOOM will send you written notice no less than 45 days and no more than 60 days prior to the end of the Term. The notice will specify the date by which you must advise XOOM if you do not want to renew your Agreement. If you do not advise XOOM by the specified date, this Agreement will automatically renew to one of XOOM's available products as described in your renewal notice. XOOM reserves the right, with fifteen (15) days' notice, to amend this Agreement to adjust its service to accommodate any change in regulations, law, tariff or other change in procedure required by any third party that may affect XOOM's ability to continue to serve you under this Agreement.

Rescission: If you initially received this Agreement electronically, you may rescind your authorization to use XOOM by notifying XOOM within five (5) business days from the date of the initial electronic delivery of this Agreement. If you initially received this Agreement by first class mail, you may rescind your authorization to use XOOM six (6) business days from the initial postmarked date without penalty or cancellation fee by calling XOOM at 1-888-997-8979 or by sending an email to customercare@xoomenergy.com.

Relocation: When moving to an address within your local utility's service territory, XOOM will make every effort to transfer your service to your new service address when you move to an address within your local utility's service territory, provided that you notify XOOM within fifteen (15) days of your move. If a transfer of service is not successful or you move to a location outside your local utility's service territory, you or XOOM may cancel this Agreement at no cost to you. Failure to notify XOOM of your move will be considered a cancellation of this Agreement in accordance with its terms.

Cost Recovery Fee: You understand and agree that in order for XOOM to offer and fulfill its fixed rate obligation to you, it has to purchase electric power in advance of usage in amounts needed to cover the full term of this Agreement. If you cancel this Agreement early, you will be responsible for paying a cost recovery fee ("Cost Recovery Fee") of \$110 which is intended not as a penalty, but simply to offset the cost of selling the unused portion of your electricity to others and estimated lost revenue that XOOM may incur from such a sale, if any, and related expenses.

Credit and Deposits: This Agreement is contingent upon a satisfactory credit review and maintenance of good credit. XOOM reserves the right to require a deposit from you prior to providing electricity should XOOM find your credit is unsatisfactory. If XOOM holds your deposit longer than thirty (30) days, your deposit will accrue interest from the day it was received by XOOM at a rate in accordance with applicable law.

Payment and Collection: Your bill will be based on monthly meter readings provided to XOOM by your local utility. If there is an error in your meter reading, XOOM will adjust its bill to you upon your local utility providing a corrected meter reading to XOOM. XOOM will pass through to you all costs and fees related to the collection of any past due charges, including but not limited to collection agency fees, legal and court fees and account termination fees. By accepting this Agreement, you understand and agree to allow your utility to share billing and payment information with XOOM, including participation in budget billing or extended payment arrangements. You represent that you are financially able and willing to fulfill the terms and conditions of this Agreement and that you have not filed, are in the process of filing or plan to begin any bankruptcy proceedings. Additional Information and Required Notes

Power Sources - The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power as needed to meet the requirements of all customers in New England. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. 'Known Resources' include resources that are owned by, or under contract to, the supplier. 'System Power' represents power purchased in the regional electricity market. Electric suppliers are required to obtain a certain amount of renewable energy in accordance with RSA 362-F, the state's renewable portfolio standard law. They may also choose to obtain amounts of renewable energy above their legal obligation, and utilities must also offer a renewable energy option to allow customers to choose to support the purchase of additional renewable energy by the utility.

Air Emissions - **Carbon Dioxide** (CO2) is released when fossil fuels (e.g., coal, oil and natural gas) are burned. CO2, a greenhouse gas, is a major contributor to climate change. **Nitrogen Oxides** (NOx) form when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (smog), and may cause respiratory illness with frequent high level exposure. NOx also contribute to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life. **Sulfur Dioxide** (SO2) is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO2 include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO2 combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.

XOOM Energy Airline Rewards Program Terms for American Airlines AAdvantage® Members:

a) American Airlines reserves the right to change the AAdvantage® program and its terms and conditions at any time without notice, and to end the AAdvantage® program with six months notice. Any such changes may affect your ability to use the awards or mileage credits that you have accumulated. Unless specified, AAdvantage® miles earned through this promotion/offer do not count toward elite-status qualification or AAdvantage Million MilerSM status. American Airlines is not responsible for products or services offered by other participating companies. For complete details about the AAdvantage® program, visit aa.com/aadvantage. American Airlines, AAdvantage, the Flight Symbol logo and AAdvantage Million Miler are marks of American Airlines, Inc.

b) Rewards are subject to the Terms of Service between XOOM and you, including, but not limited to, all terms related to dispute resolution, including the following terms and conditions. XOOM reserves the right to disqualify any account holder from participation in reward programs.

c) After the closing date of each billing cycle XOOM will calculate the total dollar amount of electricity and/or natural gas supply purchased (XOOM service charges) on your behalf (charged to your account during that billing cycle) and the mileage credit due to you as set forth in paragraph (d). XOOM will subsequently request that American Airlines award the AAdvantage® mileage credit. If your XOOM account status is not active and current on the date a billing cycle closes, no XOOM service charges will be reported to American Airlines for that billing cycle. For purposes of this program, active accounts are defined as those that are billing more than \$0 on the XOOM Energy Airlines Reward Program plan and those for which XOOM has not received a request on behalf of the customer to discontinue (drop) their service. The dollar amount of XOOM service charges for a billing cycle is the dollar amount of all purchases of electricity and/or natural gas made by XOOM on your behalf and placed on your account during the billing cycle and any XOOM monthly fees, reduced by any credits posted to the account during the billing cycle.

d) You will earn 2 AAdvantage® miles for every one dollar (\$1.00) of XOOM service charges made on your account rounded to the nearest dollar. Please allow 8-10 weeks for mileage postings to appear on your AAdvantage® account statement. There will be delays between the date XOOM makes a XOOM service charge on your behalf, the date XOOM reports your XOOM service charge to American Airlines, and the date that American Airlines credits your AAdvantage® account. For this and other reasons, the records of XOOM and the records of American Airlines regarding accrued mileage may differ. Mileage credits will not be available for use by you until they are awarded by American Airlines. In the event of any discrepancy, the records of American Airlines will control the determination of mileage credit awards.

e) From time to time, XOOM may offer bonuses or other premiums (for example, Account Activation Miles) to new XOOM customers. These bonuses are solely for persons who are not currently, and have not previously been, XOOM customers; therefore, unless otherwise stated, you are not eligible to receive these bonuses for any new XOOM account you open after your initial account is opened. Further, unless otherwise stated, you will only be eligible to receive these bonuses after your 2nd billing cycle as an XOOM account holder if at that time your account status is both current and active as defined in paragraph (c). A single customer is eligible to receive rewards or bonuses for a total of four accounts, regardless of the total number of accounts enrolled. If you receive a bonus for which you are not eligible, XOOM may request American Airlines to revoke the bonus, or reduce your mileage credit by the amount of the bonus, or charge your account for the fair value of the bonus.

f) For avoidance of doubt, should you choose to change your plan or cancel your XOOM Energy Airline Rewards Program, you will no longer qualify for the XOOM Energy Airline Rewards Program.

XOOM Energy Airline Rewards Program Terms for Southwest Airlines Rapid Rewards® Members:

a) Rapid Rewards® is a program offered by Southwest Airlines®. It is not a product or program of XOOM Energy LLC. Southwest Airlines is solely responsible for establishing the terms and conditions of your participation in the Southwest Airlines Rapid Rewards program. All Rapid Rewards terms and conditions apply and can be found at Southwest.com/rrterms. Southwest Airlines may change or terminate the Rapid Rewards program rules in accordance with the Southwest Airlines Rapid Rewards terms and conditions.

b) Rewards are subject to the Terms of Service between XOOM and you, including, but not limited to, all terms related to dispute resolution, including the following terms and conditions. XOOM reserves the right to disqualify any account holder from participation in reward programs.

c) After the closing date of each billing cycle XOOM will calculate the total dollar amount of electricity and/or natural gas supply purchased (XOOM service charges) on your behalf (charged to your account during that billing cycle) and the point credit due to you as set forth in paragraph (d). XOOM will subsequently request that Southwest Airlines award the point credit. If your XOOM account status is not active and current on the date a billing cycle closes, no XOOM service charges will be reported to Southwest Airlines for that billing cycle. For purposes of this program, active accounts are defined as those that are billing more than \$0 on the XOOM Energy Airlines Reward Program plan and those for which XOOM has not received a request on behalf of the customer to discontinue (drop) their service. The dollar amount of XOOM service charges for a billing cycle is the dollar amount of all purchases of electricity and/or natural gas made by XOOM on your behalf and placed on your account during the billing cycle and any XOOM monthly fees, reduced by any credits posted to the account during the billing cycle, rounded up or down to whole dollar amounts. Point accumulation is subject to certain limitations, exclusions, and restrictions by Southwest Airlines. There is no limit to the number of Rapid Rewards points that may be earned. Bonus points do not count toward tier status or Companion Pass status. XOOM is not responsible for awarding points under the Southwest Airlines Rapid Rewards program, arranging or providing any services related to travel, the use of points, any delay, failure, or refusal by Southwest Airlines to award or redeem points for award travel, or any decision by Southwest Airlines to revoke or cancel points or membership in the Southwest Airlines Rapid Rewards program.

d) You will earn two (2) Rapid Rewards points for every one dollar (\$1.00) of XOOM service charges rounded to the nearest dollar. You will earn 10,000 Rapid Rewards bonus points for each electric account you enroll or 5,000 Rapid Rewards bonus points for each natural gas account you enroll after the account has been active for 2 months. Bonus points will appear in your Rapid Rewards account within eight weeks after you earn your enrollment bonus. Southwest Airlines will show accrued point credits on your Southwest Airlines Rapid Rewards statement. There could be delays between the date XOOM makes a purchase on your behalf, the date XOOM reports your point credit to Southwest Airlines, and the date that Southwest Airlines credits your Southwest Airlines Rapid Rewards account. For this and other reasons, the records of XOOM and the records of Southwest Airlines regarding accrued points may differ. Points will not be available for your use until they are posted to your Rapid Rewards account. In the event of any discrepancy, the records of Southwest Airlines will control the determination of point awards.

e) From time to time, XOOM may offer bonuses or other premiums (for example, Account Activation Points) to new XOOM customers. These bonuses are solely for persons who are not currently, and have not previously been, XOOM customers; therefore, unless otherwise stated, you are not eligible to receive these bonuses for any new XOOM account you open after your initial account is opened. Further, unless otherwise stated, you will only be eligible to

receive these bonuses after your 2nd billing cycle as an XOOM account holder if at that time your account status is both current and active as defined in paragraph (c). A single customer is eligible to receive rewards or bonuses for a total of four accounts, regardless of the total number of accounts enrolled.

f) For avoidance of doubt, should you choose to change your plan or cancel your XOOM Energy Airline Rewards Program, you will no longer qualify for the XOOM Energy Airline Rewards Program.

g) XOOM is responsible for its obligations under its Agreement with you (the Terms of Service) but XOOM is not responsible for the administration of the Southwest Airlines Rapid Rewards program. Southwest Airlines is not a party to the XOOM Agreement, and Southwest Airlines is not responsible for any goods or services supplied by XOOM.

h) By entering into the XOOM Agreement (the Terms of Service), you will be deemed to have authorized XOOM and Southwest Airlines to share information with each other about your account consistent with the respective privacy policies of XOOM and Southwest Airlines.

Additional Information and Required Notes

Power Sources - The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power as needed to meet the requirements of all customers in New England. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. 'Known Resources' include resources that are owned by, or under contract to, the supplier. 'System Power' represents power purchased in the regional electricity market. Electric suppliers are required to obtain a certain amount of renewable energy in accordance with RSA 362-F, the state's renewable portfolio standard law. They may also choose to obtain amounts of renewable energy above their legal obligation, and utilities must also offer a renewable energy option to allow customers to choose to support the purchase of additional renewable energy by the utility.

Air Emissions - **Carbon Dioxide** (CO2) is released when fossil fuels (e.g., coal, oil and natural gas) are burned. CO2, a greenhouse gas, is a major contributor to climate change. **Nitrogen Oxides** (NOx) form when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (smog), and may cause respiratory illness with frequent high level exposure. NOx also contribute to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life. **Sulfur Dioxide** (SO2) is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO2 include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO2 combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.

Additional Information and Required Notes

Power Sources - The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power as needed to meet the requirements of all customers in New England. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. 'Known Resources' include resources that are owned by, or under contract to, the supplier. 'System Power' represents power purchased in the regional electricity market. Electric suppliers are required to obtain a certain amount of renewable energy in accordance with RSA 362-F, the state's renewable portfolio standard law. They may also choose to obtain amounts of renewable energy above their legal obligation, and utilities must also offer a renewable energy option to allow customers to choose to support the purchase of additional renewable energy by the utility.

Air Emissions - **Carbon Dioxide (CO2)** is released when fossil fuels (e.g., coal, oil and natural gas) are burned. They contribute to acid rain and ground-level ozone (smog), and may cause respiratory illness with frequent high level exposure. NOx also contribute to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life. **Sulfur Dioxide (SO2)** is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO2 include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO2 combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.

Additional Information and Required Notes

Power Sources - The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power as needed to meet the requirements of all customers in New England. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. 'Known Resources' include resources that are owned by, or under contract to, the supplier. 'System Power' represents power purchased in the regional electricity market. Electric suppliers are required to obtain a certain amount of renewable energy in accordance with RSA 362-F, the state's renewable portfolio standard law. They may also choose to obtain amounts of renewable energy above their legal obligation, and utilities must also offer a renewable energy option to allow customers to choose to support the purchase of additional renewable energy by the utility.

Air Emissions - **Carbon Dioxide** (CO2) is released when fossil fuels (e.g., coal, oil and natural gas) are burned. CO2, a greenhouse gas, is a major contributor to climate change. **Nitrogen Oxides** (NOx) form when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (smog), and may cause respiratory illness with frequent high level exposure. NOx also contribute to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life. **Sulfur Dioxide** (SO2) is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO2 include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO2 combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.

Additional Information and Required Notes

Power Sources - The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power as needed to meet the requirements of all customers in New England. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. 'Known Resources' include resources that are owned by, or under contract to, the supplier. 'System Power' represents power purchased in the regional electricity market. Electric suppliers are required to obtain a certain amount of renewable energy in accordance with RSA 362-F, the state's renewable portfolio standard law. They may also choose to obtain amounts of renewable energy above their legal obligation, and utilities must also offer a renewable energy option to allow customers to choose to support the purchase of additional renewable energy by the utility.

Air Emissions - Carbon Dioxide (CO2) is released when fossil fuels (e.g., coal, oil and natural gas) are burned. CO2, a greenhouse gas, is a major contributor to climate change. Nitrogen Oxides (NOx) form when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (smog), and may cause respiratory illness with frequent high level exposure. NOx also contribute to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life. Sulfur Dioxide (SO2) is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO2 include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO2 combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.

Additional Information and Required Notes

Power Sources - The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power as needed to meet the requirements of all customers in New England. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. 'Known Resources' include resources that are owned by, or under contract to, the supplier. 'System Power' represents power purchased in the regional electricity market. Electric suppliers are required to obtain a certain amount of renewable energy in accordance with RSA 362-F, the state's renewable portfolio standard law. They may also choose to obtain amounts of renewable energy above their legal obligation, and utilities must also offer a renewable energy option to allow customers to choose to support the purchase of additional renewable energy by the utility.

Air Emissions - **Carbon Dioxide (CO2)** is released when fossil fuels (e.g., coal, oil and natural gas) are burned. CO2, a greenhouse gas, is a major contributor to climate change. **Nitrogen Oxides (NOx)** form when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (smog), and may cause respiratory illness with frequent high level exposure. NOx also contribute to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life. **Sulfur Dioxide (SO2)** is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO2 include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO2 combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.

Additional Information and Required Notes

Power Sources - The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power as needed to meet the requirements of all customers in New England. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. 'Known Resources' include resources that are owned by, or under contract to, the supplier. 'System Power' represents power purchased in the regional electricity market. Electric suppliers are required to obtain a certain amount of renewable energy in accordance with RSA 362-F, the state's renewable portfolio standard law. They may also choose to obtain amounts of renewable energy above their legal obligation, and utilities must also offer a renewable energy option to allow customers to choose to support the purchase of additional renewable energy by the utility.

Air Emissions - **Carbon Dioxide (CO2)** is released when fossil fuels (e.g., coal, oil and natural gas) are burned. CO2, a greenhouse gas, is a major contributor to climate change. **Nitrogen Oxides (NOx)** form when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (smog), and may cause respiratory illness with frequent high level exposure. NOx also contribute to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life. **Sulfur Dioxide (SO2)** is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO2 include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO2 combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.
