		3
1	AFTERNOON SESSION	
2	(Hearing resumed at 12:50 p.m.)	
3	CHAIRMAN GOLDNER: Okay. Ms.	
4	Robidas, you can swear in the witnesses.	
5	(WHEREUPON, TIMOTHY HARNED and JASON M.	
6	LAJOIE were duly sworn and cautioned by	
7	the Court Reporter.)	
8	TIMOTHY HARNED, SWORN	
9	JASON M. LAJOIE, SWORN	
10	CHAIRMAN GOLDNER: Okay. We'll go	
11	to direct examination. Mr. Richardson.	
12	MR. RICHARDSON: Thank you, Mr.	
13	Chairman.	
14	DIRECT EXAMINATION	
15	BY MR. RICHARDSON:	
16	Q. Good afternoon. Could you both please state	
17	your names and addresses for the record,	
18	please.	
19	A. (Lajoie) Certainly. Jason Lajoie. My	
20	address is 39 Reddington Landing in Hampton,	
21	New Hampshire.	
22	A. (Harned) Timothy Harned, 66 Lovering Road,	
23	North Hampton, New Hampshire.	
24	Q. And why don't I start with having you adopt	

{DW 21-093} [AFTERNOON SESSION ONLY] {2/23/22}

your prefiled testimony, and then I have some follow-up questions for you about things we heard this morning.

Mr. Harned, starting with you, do you have exhibits that were premarked as 8 and 9 with you today?

- A. (Harned) Yes, that's my testimony. Correct.

  I do not have them labeled as an exhibit.
- 9 Q. That's all right. They've been identified,10 though.
- 11 A. (Harned) Yes.

1

2

3

4

5

6

7

- Q. And we heard today, before I asked you to
  adopt that testimony, about a discrepancy
  where, if I understand correctly, it was
  believed that Aquarion was paying a seasonal
  rate. But as Aquarion witnesses explained,
  that's not the case. Do you recall that?
- 18 A. (Harned) Yes, I do.
- Q. Okay. So with that correction or caveat in mind, is that -- is your testimony true and accurate, to the best of your knowledge and belief?
- 23 A. (Harned) Other than that issue, to the best 24 of my knowledge it is.

[WITNESS PANEL: HARNED|LAJOIE]

5 And you adopt that as your testimony --1 Q. (Harned) Yes, I do. 2 Α. -- before the Commission --3 Q. (Harned) Yes, I do. 4 Α. -- today. Thank you. 5 Q. For our stenographer's benefit, please 6 7 wait until I finish, even if you see where 8 I'm going before I do. So, thank you. Fire Chief Lajoie, you have a letter 9 which has been marked as Exhibit 10. And is 10 11 that your testimony for the Commission today? (Lajoie) Yes, it is. 12 Α. And is that letter, Exhibit 10, is that true 13 Q. 14 and accurate, to the best of your knowledge and belief? 15 16 (Lajoie) Yes. Α. 17 Q. Thank you. I want to -- let's start with the questions about fire protection because I 18 19 think that there's an interest in that, and 20 we heard a lot about that this morning. 21 And so Chief Lajoie, can you just tell 22 us about your background as a fire chief, how 23 long you've been a fire chief, what your

experience is, et cetera?

A. (Lajoie) Certainly. I've been with the North
Hampton Fire Department just shy of 20 years.
I've been in the fire service for a total of
30 years now. I have been fire chief for

just over two years.

5

16

17

18

19

20

21

22

23

- Q. And this morning we heard from the Wiggin Way
  Homeowners Association President, Mr. Roy.

  And I think he said that he applied a
  standard of, you know, houses that would have
  been, those within 1,000 feet. Do you agree
  that that is the standard or the limits of a
  fire protection benefit?
- A. (Lajoie) No, I would disagree with that. It could go well beyond 1,000 feet.
- 15 Q. And could you explain why that is the case.
  - A. (Lajoie) Certainly. So, generally, fire engines carry a supply hose on them, generally 1,000 feet of supply. And the general rule for that is every thousand feet of supply hose that's laid out, you want to have a fire department pumper truck in line being able to pump every thousand feet to the next pumper truck that eventually gets to the fire scene.

- Q. And how -- so what would be kind of like the
  maximum range that the North Hampton Fire
  Department working with Stratham would lay
  out if needed?
- 5 (Lajoie) That would be dependent upon the Α. location of the fire, what we're tieing into, 6 7 whether it's a static water source, whether 8 it's a fire pond, whether it's a cistern, or even if it's a municipal water source. 9 As in the case of a fire hydrant, you could 10 11 essentially pump every thousand feet for an excess of 5- to 10,000 feet if need be. 12 would not be the case in this area because of 13 the water sources that are available. 14
  - Q. And when you say "the water sources that are available," what's the, I guess what's the most important water source?
- A. (Lajoie) From a fire department's

  perspective, if you have the choice of a fire

  hydrant versus a cistern or a static water

  source, the preferred method would be going

  to a fire hydrant.
- 23 Q. And why is that?

15

16

17

24 A. (Lajoie) Because it's going to be a

guaranteed water source that's coming in.

The length of time that it takes to be able to connect to a fire hydrant and get immediate water versus having to connect to a cistern. A cistern does not have pressurized water coming into the fire truck. It is something that the apparatus operator has to actually take into the pump of the fire truck. So that does take some time to do so. In a perfect scenario, you could have that completely set up within a few minutes. But sometimes there's mechanical errors that occur, that you don't produce a vacuum to get that water sucked into the pump of that truck.

So in any case, during an emergency, if you have an immediate water source close by, any fire ground officer would opt for the guaranteed water source that's going to be coming into the fire truck.

Q. We also heard testimony from Mr. Roy, when I was asking him about the benefits. And I believe his response was that I was asking the wrong fire department in seeking your

opinion on this. What's your reaction to that?

3

4

5

13

14

15

16

17

18

19

20

21

22

23

- (Lajoie) I would say that collaboratively, Α. fire chiefs in the area work together as part of a mutual aid district. And so while my position is the North Hampton Fire Chief, my responsibility is the Town of North Hampton. And Chief Matt Larrabee, the fire chief for the Town of Stratham, we do work together during large-scale incidents. So in the event that Stratham gets a report of a fire, we respond immediately. So we provide assistance during any type of response where there could be any fire involvement, because staffing is a concern. Even though you have a staffed fire department, it's very typical that it takes a multitude of personnel and trucks to extinguish a fire. It's not just, you know, one or two fire trucks.
- Q. When you were working on this issue and preparing your testimony, did you ever reach out to the Stratham Fire Department?
- A. (Lajoie) I did. When I was assessing the area and the location, I did not have the

knowledge. I knew that there were cisterns in that neighborhood. I didn't have the knowledge of how much water those cisterns held. So I placed a phone call to Fire Chief Matt Larrabee, just for my own knowledge, and he advised me that they held 30,000 gallons of water. And he asked me if there was an issue, and I said, "No, I just need it for my own knowledge." I explained to him that these proceedings were going to be coming into question and taking place. And his concern was, is this going to create an issue between the two towns and their ability to have a hydrant available to them in an emergency circumstance, which I wanted to immediately assure him that, no, it would not be a problem.

- Q. So if I understand, just to be clear, his concern was essentially that he wanted to make sure that that fire hydrant remained available because it was important.
- 22 A. (Lajoie) That's correct.

13

14

15

16

17

18

19

20

21

22

23

- Q. So my next question was what type of a fire department is the Stratham Fire Department?
  - A. (Lajoie) Stratham is a volunteer fire department which relies heavily on volunteers that are not housed in the station; primarily they're at home. I do have the knowledge that volunteerism in the region, never mind the state, can be a challenge. So Stratham, over the last few years, has began to employ staffing that is available at the fire station. So to my knowledge, they have two people, or two firefighters on duty during the daytime.
  - Q. And so what does that mean? If you could describe it for the Commissioners, because I

know this isn't probably things they normally deal with. But logistically, what happens if Stratham were to originate a call for a fire in the Wiggin Way system? What would your response be? What would Stratham's? How would that work?

A. (Lajoie) Certainly. So common practice for the area fire departments -- because staffing is a challenge, as I stated before. Not just one or two firefighters can respond to a house fire and put that out themselves with one or two fire trucks. It takes multiple people. By standards, you should have 15 to 17 firefighters on scene within the first ten minutes of a fire.

So to achieve those standards, what many fire departments have done, especially in the Town of Stratham, is they employ -- within our mutual aid district, we have run carts. And so what the Town of Stratham has asked the Town of North Hampton, if they ever have a report of a house fire and they get dispatched to that right away, if we would respond immediately, along with other towns,

such as Greenland, Exeter and so on. So in the event that Stratham gets a report of a house fire, we respond immediately once they page out that call.

- Q. Let's assume, hypothetically, a call is made.

  What would North Hampton's role be in

  responding to a particular fire in the

  department -- in that subdivision?
- A. (Lajoie) Certainly. So that can be completely dependent on who arrives on scene first. There's oftentimes that we do respond to mutual aid to the Town of Stratham, where North Hampton is the first on scene. So the crew that first arrives is the one to make the, usually the immediate fire ground decision-making until the responsible town gets there, and then both will collaborate together on, you know, strategy and tactics.

In this case, there's so many variables that are in play, that we could very well arrive on scene -- particularly speaking to Wiggin Way, we could be responding and arrive first, or we could be there second. So our role could be varied as to when we arrive on

scene.

1

2

3

12

13

14

15

16

17

18

19

20

21

22

23

24

If we arrive on scene and we confirm that there is a fire, let's say specific to the area between our town line and where the Wiggin Way cistern is, I can tell you that my fire officers are going to opt for establishing an immediate water supply by means of the hydrant on Wiggin Way. Conversely to that, if Stratham was the first arriving fire company on scene and we were the second, the second arriving company is usually the one who establishes a water supply for that fire attack pumper that's at the fire scene. Now, that could come from either the cistern or it could come from the fire hydrant. But I know from talking with the Stratham fire chief, that in any case he would hope that in that general vicinity that that hydrant would be available to him, and not just for the primary water source, but also for establishing a secondary water source.

And I'll add to that, if you don't mind.

There's an extreme importance of when you're

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

speaking of establishing a water supply for immediate fire attack, you always want to have a secondary means of a water supply in case your first supply fails. Now, a failure could come from a mechanical failure of the truck. And if that were to occur, you don't want to have a disruption of your water, your fire flow, you know, for extinguishment purposes. So if you have established a secondary water supply, you've got that safeguard in place.

supply happened to be the cistern, that 30,000 gallons of water is just a limited supply. So if our pumps, our fire trucks are -- I can speak for North Hampton. We can pump up to 1500 gallons per minute. So if you're taking water as a primary water supply from the cistern, you're going to use up that water within a 20-minute time period. So when it comes to fire ground strategies and tactics, you're always thinking about endless water supply. That's what you want is an endless water supply. So you can most

certainly always get that from a fire hydrant.

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

- Q. What is the range of firefighting kind of response times? I mean, because I know that there's an initial fire response. But is there a need for water over a prolonged period of time when you're firefighting? Can you explain that?
  - (Lajoie) Absolutely. So, yeah, you want to Α. ensure that if you have a confirmed fire, our first objective is to maintain that we've got an immediate water supply. Second to that is we're looking at the amount of fire involvement that is in a home. Is it one room? Is it multiple rooms? Is it an entire home? And so then based on the fire involvement, we have calculations that will determine how much water we're going to need to extinguish a fire and in what time frame. So, you know, even though you've got a fire truck responding and we carry attack hose, you're not necessarily going to just use, you know, one hose off a truck. You could have multiple hoses and different sizes that

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

require different gallons per minute and different pressures. So given all of those circumstances, we always look to maintain a water supply that's going to be long-lasting.

And, you know, I don't remember who it I think it was Mr. Roy's point, that Stratham has tanker trucks. That is true. Ι can tell you that Stratham has two tanker trucks. Their tankers carry 3,000 gallons of water, where a fire engine, a pumper truck, may only carry 1,000 to 1,500 gallons of water. So eventually that water could be used up and then eventually will need to be refilled. So while you have a primary water supply attacking a fire, let's say, for instance, it was the cistern being used, you're now having to find a water supply to then fill up the trucks that are using up their water. So that's where we would opt for the fire hydrant.

Q. And I'm sorry. I guess I didn't ask the question as well as I should or communicate what I was also thinking about.

Do fires -- are they just put out by the

```
initial attack with the water, or is there a
1
2
         role of fire suppression over time that is a
         benefit of hydrants that cisterns don't have
3
         over time?
4
5
         (Lajoie) Over time. Are you talking in one
    Α.
         fire ground instance, if there is a home on
6
7
         fire that we're making sure that once the
8
         fire is extinguished, that we don't need to
9
         keep that ongoing water supply?
         That's kind of where I was going, yes.
10
    Q.
         (Lajoie) Okay. So our objective is to
11
    Α.
12
         quickly extinguish the fire as soon as
         possible. It doesn't just happen within, you
13
14
         know, the first few minutes of a fire.
15
         can be sometimes over an hour. Sometimes it
16
         can be over a two-hour time period.
17
    Q.
         Okay.
                I think that covers that issue, and so
18
         I'm going to wait and move on to -- oh,
19
         sorry.
                 There was one other question.
20
              How many fires does North Hampton
21
         respond to in Stratham per year?
```

22 (Lajoie) On average, it's three to five. Α.

23 Q. Okay. Thank you.

24

Mr. Harned, I have some questions for

- you. But let's start first with your
  background, who you are, what your roles are
  for the Town.
- A. (Harned) Okay. Roles for the Town, I am the secretary of the -- it's an elected position, and I'm the secretary of the North Hampton
  Water Commission. Because it may come up, I also am the chair of the North Hampton
  Planning Board, which is also an elected position.
- 11 Q. Thank you. What's your professional and educational background and experience?

- A. (Harned) Well, professionally, I'm happily retired for the last couple years. Prior to that I worked in the design of specialized electric motors for the aerospace industry, which those motors were used in a lot of pump applications. From the educational standpoint, I have a bachelor's, a master's and a Ph.D. in mechanical engineering.
- Q. Thank you. We heard a lot of testimony this morning about the due diligence request and information that North Hampton asked Aquarion to provide: Leak detection, construction

plans. Why was that information important to North Hampton?

A. (Harned) That was a concern to North Hampton from the standpoint that we recognized how many customers were being added. And it was not a huge percentage compared to the number of customers that were already in town. But if you refer to the RSA that this connection is being done under, one of the things it does is it protects the existing ratepayers when a connection is made. It basically says costs should not be borne by existing ratepayers.

understanding and knowing what the condition of the system was and what Aquarion was acquiring and whether we expected it to be something that could last a number of years, or were there potential problems that with different use and different feeds might be causing problems within a year or two that would have to be addressed. So we were trying to get a handle on that to find out what the risk factor was for the existing

1 ratepayers.

- Q. And was Aquarion able to provide you with information that addressed those concerns?
- 4 A. (Harned) Basically not.

Why is that a concern?

- Q. So we've heard a lot about how this is new plastic pipe. You know, some of it's 1.5 inches, some of it's 3, some of it's 4.
  - A. (Harned) I guess the concerns that we have about that is just when you get into those smaller-diameter pipes, like, you know, an inch, 2-inch, just the smaller diameters, the structural integrity and the requirements of those materials, how those pipes are buried, how they've been -- because there's a proper process that you've got to go through in digging trenches and setting the pipes in them and making sure they're not going to settle over time, which does take quite a few years to happen. Just the structural integrity of plastic pipes that are in that smaller diameter.
  - Q. What would happen, you know, based on your experience on the planning board, if a system

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

like this were to be proposed with that type of pipe? Would that be allowed?

A. (Harned) Okay. So I can't speak for the planning board. I can just give you a gut feeling as to what the response would be, after having been involved for a number of years.

The two subdivisions that I recall that have been done over the time that I've been involved with the board, to the best of my knowledge, they were both done with iron pipe. Now, every case is different. And if somebody were coming in with a smaller subdivision and were proposing plastic or PVC, we don't have ordinances or we don't have site plan regulations in the Town of North Hampton that specifically specifies exactly what materials have to be used for the water distribution system.

So given that each case can be different and has to be evaluated, we would rely fairly strongly on Aquarion to make sure something was being done that was acceptable to their standards and the requirements that they have

and what they would work to, what they would be willing to accept long term.

Now, if they came in with the iron pipe that we've typically seen in the past, I think our comfort level would be up. If they came in with and said the builder wants to put in PVC and we're okay with that, I think that would get a closer look from due diligence in the Town. And I just have -- I can't tell you this would happen. But I just have very strong feeling that planning boards have the option of hiring their own experts at the applicant's cost to review plans and what's going on.

so I strongly feel that if somebody came in with something like that, it would be the planning board's decision to go out and hire an outside consultant to review all the plans, what was being done, to come up with their opinion, strictly responsible to the Town of North Hampton and the planning board, as to whether or not it was an acceptable solution or not.

Q. So we heard public comment this morning

- suggesting that North Hampton's motivations in this case were political or partisan. Is it -- I assume from your answer that -- can you explain your reaction to that, based on what you've just told us?
- A. (Harned) Yeah, that was not what the reaction was. When this issue first came up, there was some discussion within the Town of North Hampton. North Hampton was agreeable to the temporary connection and did not object to that at all, as far as I'm aware of. There were conversations held with different people and different boards at different times, but I never knew the Town to object to the temporary connection.

Because of the potential for the system, its quality and what we might be taking on, there was concern about the long-term impacts of the -- or relatively short-term impacts of the permanent hookup. When we were before the Water Council appealing the decision, we made the offer that if Wiggin Way was willing to continue to take the responsibility for maintaining the system, we

could reach an agreement that Aquarion could continue to supply water to them. And it would be metered at that one -- they would treat Wiggin Way as one customer, and it would be metered at that connection. Now, in terms of being fair to each house, you know, then Wiggin Way could go and install a meter at each one of the houses that could record that information and found out what each house's appropriate portion of what the total meter total was. We were willing to go ahead and do that. And we were agreeable to that.

So it was not a political issue. It's a concern. Primarily it was a concern about the condition, what we were getting and that kind of thing.

I will be honest. The other concern is that, in terms of dealing with rates and rate increases and other things that go on, and new wells being put in and the impact new wells can have on abutting property owners and their private wells and things like that, Hampton, North Hampton and Rye have a long-term relationship. And we've always

worked well together and tend to see things the same way. We have a history in the -given the PUC rate cases, we have a history of sharing costs and things like that. We just have a good working relationship.

There was some concern voiced by some people that if there was -- if the franchise was expanded into a new town, was that new town going -- was their outlook and their interests and their motivation, was it going to be consistent with what this long-term -- what the other towns were and what our long-term working relationship was. So there were some people that had that concern also.

- Q. It would be fair to say that your goal, or the Town's goal was to make sure that the same standards that would apply to construction in North Hampton were followed or addressed or considered on this project.
- A. (Harned) Yes.

Q. And you mentioned looking to Aquarion -- and
I'm looking at Paragraph 40(c) of their
tariff. Do you know what Aquarion's tariff
requires for the size of mains?

- A. (Harned) I will not say that I specifically,
  absolutely know what it requires, but I am
  under the impression it requires iron pipe.
  - Q. Well, and I'm -- I'll represent to you that the tariff in Paragraph 40(c) says that main pipe extensions are to be at least 8 inches inside diameter.

Is that consistent with what you've seen
for systems in North Hampton served by
Aquarion?

- 11 A. (Harned) The one -- yes. The ones that have 12 been put in the last 20 years or so.
- 13 Q. Okay.

4

5

6

7

17

18

19

20

21

22

23

- A. (Harned) I'm not saying I know all the
  details on every one of them, but that is
  consistent with the ones I'm aware of.
  - Q. What's your reaction to the comments we heard today, that Wiggin Way customers don't feel they'll need or benefit from fire protection in the system because they have their cistern?
  - A. (Harned) Even without hearing the chief's testimony or, you know, talking about this in the past, I mean, you go down, there's

several hydrants. On the North Hampton side of the line is the Winterberry subdivision. On the Stratham side of the line is the Wiggin Way subdivision. And the road that enters Wiggin -- the road that enters Winterberry in North Hampton parallels the town line between the two towns for a fair distance down, and there are a number of hydrants down the road. If you go to the last one, it's basically sitting there very, very close to the border between the two towns.

we talked about 1,000 feet. We've talked about connecting multiple pumper trucks together to have a range of greater than 1,000 feet. But even if you ignore that for a minute and know where the cistern is and know where this hydrant is and know where the town line is, it's just common sense tells you that there's quite a few houses, that the first fire truck that arrives on the scene is going to make a beeline for that hydrant. It's significantly closer to a number of the

- 1 Stratham homes than the cistern is, and then
- the pond is even further away towards the
- other end.
- 4 Q. Let me ask where I was going with this in a
- 5 different way.
- 6 Do you have water service at your home?
- 7 A. (Harned) At my home on Lovering Road?
- 8 Q. Yes.
- 9 A. (Harned) Yes, the well in my yard.
- 10 Q. Oh, okay. But you don't have --
- 11 A. (Harned) No, I don't. Sorry.
- 12 Q. You don't have utility water service; right?
- 13 A. (Harned) No, I do not. We do not.
- 14 Q. Okay. But you -- does that mean you don't
- 15 pay fire protection charges?
- 16 A. (Harned) So the hydrant cost, the way it was
- 17 set up way back when, regardless of whether
- it would be done the same way today if it
- were being done today, the way it was done
- 20 way back when is the hydrants in town, the
- 21 bill for the hydrant protection service in
- 22 town is submitted to the Town of North
- 23 Hampton. And it is basically distributed.
- 24 It becomes part of the budget. And it just

is distributed to all property owners in town, regardless of whether you have water hydrant service or not.

So I guess the answer to your question is yes, there's a portion of our tax bill that goes to paying that hydrant charge.

- Q. And we heard that in -- it was suggested it was unfair for Wiggin Way to pay for hydrant charges, even if they were getting a benefit, because they're paying for the volunteer fire department in their town through their tax bills. I assume it's the same issue in North Hampton? This was the comment about them being double-charged.
- A. (Harned) Yeah. So there was a discussion there that they're being double-charged. In a sense, there are people in North Hampton that have the hydrants on their street that are getting the single charge. But there's also -- it's not a majority of the Town of North Hampton, but there's a significant percentage in North Hampton where people don't have hydrants on their streets and not within 1,000 feet of the hydrants, and all of

those people are basically paying for the hydrants. So they're not getting double-billed, but they're paying for something they're not really receiving service for.

- Q. There's another benefit, though, that North
  Hampton gets with hydrants through insurance
  rates. Do you know what that is?
- A. (Harned) I'm not an insurance expert, but just out of curiosity I did call our homeowners insurance agent last week, just in thinking about this, because honestly, my wife had mentioned the issue to me. I said hmm.

So I called the insurance agent, and what they explained to me, for most of the insurance companies in North Hampton, they look at the distance your home is from a fire department, which is five miles, and they look at the distance you are from the closest hydrant, and they put a thousand-foot radius around that. So if you have -- in terms of when they begin to price out your homeowners insurance and your fire insurance, if you

have those, you basically get a discount on your rate. Now, I wasn't worried. query about the distance from the fire department. But I did query about the distance from the hydrant. And the woman I was speaking to said, well, obviously there's not one number. It depends upon the value of the home, when it was built, the cost to replace it, some of the materials, all of those kind of things. But she said if I were to give you kind of an average number of what we see for the Town of North Hampton, if you were within 1,000 feet of hydrant, it's worth I suspect more expensive \$200 on average. homes, it would be worth more than that, and less expensive homes, it would be worth less. But she said \$200 was basically the average.

Q. One last question for you. We have heard a lot, and it's been suggested, I think based on the PUC's annual report form showing about 18 to 19 percent of revenues for Aquarion's water service come from fire protection rates. I mean, is there a specific number that the Town is looking for, or is it more

- that it needs to be looked at and the correct decision made?
  - A. (Harned) I'm not sure I understand exactly what you're looking for in the question.
    - Q. Let me rephrase it then.

4

5

22

23

24

Is the Town fixed on a number or more wants to see that this issue gets considered by the Commission and the appropriate outcome reached, whether it's 18 percent, 14 percent or 25?

(Harned) Yeah, the Town does not have a Α. specific number. The first number that you could throw a dart at is basically what does it -- you know, in terms of a percentage, what does it break down to, you know, in terms of what other people are paying. But I think the Town is just looking at it for a fair and reasonable, you know, dealing with Because we do look at it. the issue. are several hydrants very close to the town There's one in particular right there at the end. And we believe that Wiggin Way is receiving the benefit of those hydrants. When they weren't an Aquarion customer and

```
34
1
         they were on the other side of the town,
         well, that was kind of a moot point at that
2
                 That was like a sleeping dog that's
3
         time.
         not worth kicking. But, you know, at this
4
5
         stage of the game, where they're going to
         become Aquarion customers, we just feel that
6
7
         they should be treated in a similar manner to
8
         all other Aquarion customers.
9
         And I'll ask one more question, because you
    Q.
         essentially expressed the same view that Mr.
10
11
         Roy expressed. You're just making sure that
12
         both -- that everyone is treated fairly; is
         that fair to say?
13
         (Harned) Yes.
14
    Α.
15
         Thank you.
    Q.
16
                    MR. RICHARDSON: No further
17
         questions.
18
                    CHAIRMAN GOLDNER:
                                        Thank you, Mr.
19
         Richardson.
20
                    Ms. Lowry, do you have any
21
         questions?
22
                                        Thank you.
                    MS. LOWRY:
                                I do.
                                                    Pull
23
         that microphone a little bit closer to me
24
         here.
```

## 1 DIRECT EXAMINATION

16

17

Q. I just have few follow-up questions for you gentlemen. I want to make sure that this is clear.

Captain Lajoie, I'll direct some of these first questions to you, although, Mr.

Harned, if you have some information, please don't hesitate.

I want to make sure that this is clear. When the first responding department arrives to a fire, if that fire were to be in Wiggin Way, regardless of the town the department originated from, they would be able to tap into that hydrant there on Winterberry Lane in North Hampton without North Hampton's permission; is that correct?

- 18 A. (Lajoie) That's incorrect. They could use that if need be.
- Q. Oh, I'm sorry. I thought that's what I was saying. So they would be able to use that --
- 22 A. (Lajoie) They would --
- 23 Q. -- without getting permission; right?
- 24 A. (Lajoie) That's correct.

- 1 Q. So that would be available there for Wiggin
- Way's benefit, that hydrant.
- 3 A. (Lajoie) Yes.
- 4 Q. And I wanted to clarify as well, North
- 5 Hampton hears every Stratham call for fire
- protection services; is that correct?
- 7 A. (Lajoie) Do we hear it?
- 8 Q. Do you get the calls?
- 9 A. (Lajoie) Yes.
- 10 Q. Not the telephone calls but the calls --
- 11 A. (Lajoie) That's correct. We do hear the
- 12 calls go out.
- 13 Q. As the fire chief, is it fair for me to
- 14 assume that you are involved in budget
- 15 preparations for the Town of North Hampton?
- 16 A. (Lajoie) Yes.
- 17 Q. And that would be primarily for the fire
- department; correct?
- 19 A. (Lajoie) That's correct.
- 20 Q. Okay. Are the fire protection charges for
- 21 fire hydrants inside of the fire department's
- 22 budget?
- 23 A. (Lajoie) No.
- 24 Q. Those are outside?

```
1 A. (Lajoie) Correct.
```

- Q. All right. Mr. Harned, I have a few follow-up questions for you, just to make sure these points have been made.
- We talked about two -- we talked about a few, but I want to draw your attention to two document pages inside of Exhibit 1. Do you have Exhibit 1 up there with you?
- 9 A. (Harned) I believe I do, but I do not have them labeled as exhibits.
- MS. LOWRY: If I may?
- 12 CHAIRMAN GOLDNER: Sure. Of
- course.
- 14 (Document handed to witness by Ms. Lowry.)
- 15 BY MS. LOWRY:
- Q. I want to draw your attention to just two pages, and then I'm going to ask the
- 18 questions.
- 19 The two pages are Page 31 and Page 75.
- 20 And if I'm not mistaken, Page 31 is not
- 21 labeled. I'm sorry. So if you could just
- look at Page 30 and 32, it's the page in
- 23 between there.
- 24 A. (Harned) Yeah, 31 and which page?

- 1 Q. Seventy-five.
- 2 A. (Harned) Yes.
- Q. Okay. So on Page 75 we have the schedule of assets that describes all the pipes in Wiggin
- Way, the PVC material, the diameters of those
- pipes; is that correct?
- 7 A. (Harned) That's correct.
- 8 Q. And on Page 31 we have a drawing, I'll call
- 9 it, of the pipes within that Wiggin Way.
- 10 This is not a plan. It's not construction
- plans, as-built plans. But it's a drawing of
- where we think they might be; right?
- 13 A. (Harned) That's correct.
- 14 Q. Based on all of the other information that
- 15 was requested from the Towns to Aquarion, do
- we have any other information about this
- 17 system: The trustworthiness of this system,
- 18 the failure rates, the water loss of the
- 19 system? Do we have any other information
- about what's there?
- 21 A. (Harned) Not that I'm aware of. I don't
- believe I've seen any other information.
- 23 Q. Someone testified in their direct testimony
- for Aquarion -- and I apologize, I don't

```
1
         recall who it was -- but they said that they
         expect the pipes in Wiggin Way to, quote,
2
         last for decades.
3
               In your experience and opinion, is there
4
         any foundation to give weight to that claim?
5
         (Harned) In my experience, I can't say that
6
    Α.
7
         they're wrong. But I can't say that they're
         correct either.
8
         Because we don't know.
9
    Q.
10
         (Harned) We just don't know.
    Α.
11
         How would you compare Aquarion's due
    0.
         diligence in learning about the Wiggin Way
12
13
         system to, say, the North Hampton Planning
14
         Board's due diligence when it considers a
15
         water system?
16
         (Harned) I would like to think that the
    Α.
17
         planning board would exhibit a little more
         due diligence in verifying that things --
18
         what things are, how it's being done, and
19
20
         whether it meets the standards.
21
    Q.
         Thank you.
22
                                I have nothing further.
                    MS. LOWRY:
23
                    CHAIRMAN GOLDNER:
                                        Okay.
                                               Thank
24
         you.
```

1 So we'll move to cross-examination

- 2 to Aquarion. Ms. Chiavara.
- MS. CHIAVARA: Yes. Thank you.
- 4 Give me just a moment here.
- 5 CROSS-EXAMINATION
- 6 BY MS. CHIAVARA:
- 7 Q. My first questions are going to be for Mr.
- 8 Harned.
- 9 Mr. Harned, if you could please refer to
- 10 Exhibit 8. Sorry. I think you mentioned you
- don't have them labeled as exhibits. But --
- 12 A. (Harned) Yeah, I do not.
- 13 Q. -- it's your initial testimony that was filed
- on January 31st --
- 15 A. (Harned) Yes, I have that.
- 16 Q. -- 2022.
- 17 A. (Harned) Yeah.
- 18 Q. Okay. Could you turn to Bates Page 2 and let
- me know when you're there.
- 20 A. (Harned) Okay. Is that effectively the first
- 21 page which starts with "Background"?
- 22 Q. Should be, yes. Now I'm working with pulling
- up multiple documents, so let me make sure.
- 24 (Document handed to witness by Attorney

- 1 Richardson.)
- A. (Harned) Yes, my Page 2 does not have a number on it, but the one that Attorney Richardson just handed me had a 2 on it.
- 5 Q. Okay. Great. Thank you.

Okay. On Line 5 you indicate that
you're an elected member of the North Hampton
Water Commission. How long have you served
on the Commission?

- A. (Harned) I don't know the exact number. I
  got involved when Well 17, 18 and 19 were put
  in that are now located behind Winterberry.
  I'd say it was in the ballpark of 25 years
  ago.
- 15 Q. Okay. Thank you. And did you prepare this
  16 testimony entirely by yourself, or did anyone
  17 else contribute to this other than your
  18 counsel?
- A. (Harned) No, just Attorney Richardson and myself. No one else did.
- Q. Okay. Still looking at Bates Page 2,
  Lines 13 through 15. It seems that the gist
  of your testimony is that having Aquarion
  provide permanent water service to Wiggin Way

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

- will be, quote, unfair to residents in North
- 2 Hampton, many of whom pay for the cost of
- 3 fire protection in the tax bills but have no
- 4 water service and do not benefit from
- 5 Aquarion's fire protection service, end
- 6 quote. Is that right?
- 7 A. (Harned) That's part of what our concern is,
- yes.
- 9 Q. And that is what's in the testimony?
- 10 A. (Harned) Yes.
- 11 Q. Okay. So am I correct in saying that
- 12 Aquarion singly charges the Town itself
- 13 directly under its tariff for public fire
- 14 protection service?
- 15 A. (Harned) You're using a couple legal terms
- that I'm not familiar -- not sure I'm
- 17 completely familiar with. But four of the
- 18 hydrants --
- 19 Q. I can rephrase --
- 20 A. (Harned) Go ahead.
- 21 Q. -- the question. I'm just asking does
- 22 Aquarion bill the Town specifically, the Town
- itself, pursuant to its tariff --
- 24 A. (Harned) Yes.

- 1 Q. -- for public fire protection?
- 2 A. (Harned) Yes. Yes, my understanding is it's
- based on a certain per-hydrant charge. So
- 4 whatever the hydrant charge is times the
- number of hydrants is what North Hampton gets
- 6 billed.
- 7 Q. Yes. And then that bill goes to the Town?
- 8 A. (Harned) Yes.
- 9 Q. Okay. So Aquarion does not charge North
- 10 Hampton residents directly for these costs;
- is that right?
- 12 A. (Harned) It does not.
- 13 Q. Okay. So really, it's the Town of North
- 14 Hampton that is Aquarion's public fire
- 15 protection service customer and not the
- 16 residents of North Hampton; is that correct?
- 17 A. (Harned) I'm not sure how we're parsing words
- 18 here because, yes, one bill is sent out to
- 19 the Town of North Hampton, and then the Town
- of North Hampton basically distributes that
- 21 total bill to all the property owners in the
- town of North Hampton. So it is all the
- property owners in the town of North Hampton
- 24 that end up paying that bill that the Town of

- 1 North Hampton gets.
- 2 Q. Right. Yes. And according to your
- 3 testimony, it's the Town that allocates these
- 4 costs to the town property owners through
- 5 local property taxes; correct? That's on
- Bates Page 4, Lines 7 through 9.
- 7 A. (Harned) That's correct.
- 8 O. Okay. So it's the Town's decision how to
- 9 allocate those costs to North Hampton
- 10 residents?
- 11 A. (Harned) Yes.
- 12 Q. Does anyone outside of North Hampton have a
- 13 role in deciding how the Town assesses these
- 14 costs to residents?
- 15 A. (Harned) Not that I'm aware of.
- 16 Q. Okay. And North Hampton has elected to
- 17 include in its cost for fire protection
- 18 service as a general expense in local taxes
- 20 that correct?
- 21 A. (Harned) That's correct, to the best of my
- 22 understanding.
- 23 Q. Okay. To your knowledge, does Aquarion have
- any say in how the Town assesses its fire

- protection costs to local residents? And to

  put it another way, can Aquarion tell the

  Town if or how to pass these costs on to

  residents?
- 5 A. (Harned) Not that I'm aware of.
- Q. And does the Public Utilities Commission tell
  the Town of North Hampton how to assess its
  fire protection costs to the North Hampton
  residents?
- 10 A. (Harned) Not that I'm aware of.
- 11 Q. Okay. Thank you very much.

12

13

14

15

16

17

18

19

20

21

22

23

24

We're now turning to still Bates Page 4, but Lines 21 and 22. You state that North Hampton property owners, quote, are forced to subsidize the cost of Aquarion's fire protection service even though they receive little or no benefit.

As we just discussed, though, in the last few questions, it is the Town and not Aquarion that decides how fire protection charges are assessed to the town residents. So Aquarion isn't forcing property owners to subsidize anything; correct?

A. (Harned) Correct.

- Q. Thank you.
- Now, Bates Pages 6 and 7, your testimony
- 3 concludes with two recommendations for the
- 4 Commission to consider; is that right?
- 5 A. (Harned) Please give me a moment.
- 6 0. Sure.

1

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

- 7 (Witness reviews document.)
- 8 A. (Harned) Yes.
  - Q. So your first recommendation is stated on
    Bates Page 6, Lines 21 through 25, where you
    state, quote, It would seem reasonable to
    condition approval of the franchise expansion
    based on a condition or surcharge that Wiggin
    Way customers pay a surcharge which reflects
    the cost of the fire protection benefits they
    received and/or the costs being paid by North
    Hampton, Hampton and other fire protection
    customers to maintain fire protection in the
    system.

I realize you just testified a bit to what this percentage is. Do you maintain that it's the 18.7 percent that should be the surcharge, or do you have a different calculated amount?

- (Harned) I think if I were asked what was my 1 Α. 2 initial reaction and what seems to be the most logical, the 18.7 would be the number. 3 But if some other number can be arrived at 4 5 that takes into consideration something I haven't thought of or another way of looking 6 7 at it, I would certainly be open to 8 discussing that other number. I'm not hard over on 18.7 or that's the only possible 9 10 answer.
- Q. And in your proposal, the surcharge would
  apply to all Aquarion water service customers
  or just the customers of Wiggin Way?
- A. (Harned) Just the customers in Wiggin Way, if

  I understand your question correctly.
- 16 Q. Yup.

23

24

- A. (Harned) The residents of North Hampton are already paying that. So we're talking about looking to have the Wiggin Way customers be treated the same way the North Hampton ones are, and they would also pay that same amount.
  - Q. Well, they'd be the only one paying the surcharge, though. North Hampton and Hampton

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

- residents don't pay a surcharge. This
  surcharge would only be applied to Wiggin
  Way; is that correct?

  A. (Harned) They wouldn't be paying a surchar
- A. (Harned) They wouldn't be paying a surcharge to Aquarion. But the residents of North

  Hampton are paying that charge to the Town, and the Town pays it to Aquarion.
- 8 Q. Okay. I'm going to move on.

Do you agree that the Commission

determined in Aquarion's last rate case that

Aquarion's current rates are just and

reasonable?

- 13 A. (Harned) I don't have -- I have not reviewed
  14 that, and I don't have enough information to
  15 answer that question.
- Q. Okay. Would you agree that the rates that
  are currently in the Aquarion tariff, the
  rates they currently charge, have been
  determined to be just and reasonable?
- 20 A. (Harned) Yes.
- Q. Thank you. And this includes -- does this
  include the current rates Hampton and North
  Hampton currently pay for both water service
  and fire protection service, that the

- 1 Commission found these to be just and
- 2 reasonable as well?
- 3 A. (Harned) That's my understanding, that they
- 4 did.
- 5 Q. Okay. Do you know if the Commission has ever
- 6 calculated a surcharge to water customers for
- 7 services that they do not receive?
- 8 A. (Harned) I do not know that answer to that.
- 9 I don't know that they have.
- 10 Q. Okay.
- 11 A. (Harned) But I don't know that they haven't
- 12 either.
- 13 Q. Okay. I heard you list your background and
- qualifications. Have you -- do you have any
- 15 background in utility ratemaking?
- 16 A. (Harned) Absolutely none.
- 17 Q. Have you ever worked for a utility or a
- 18 utility commission in ratemaking or any other
- 19 capacity?
- 20 A. (Harned) I have not.
- 21 Q. So you've never done a utility cost of
- 22 service study either?
- 23 A. (Harned) I have not.
- 24 Q. So without the Wiggin Way customers, North

Hampton and Hampton's rates are just and reasonable. But if the Wiggin Way customers are added to the franchise without a surcharge, Hampton and North Hampton's rates will become unjust and unreasonable? Is that consistent with your testimony?

MR. RICHARDSON: I'm going to object just because I think he's testified that he doesn't -- you know, he doesn't have any experience in rate design, and that's really where this question is going. I think he's answered it.

MS. CHIAVARA: Well, what he's said in testimony is that the rates -- if Wiggin Way does not pay a surcharge, that rates would be unjust and unreasonable. But in previous questions, we just determined that the current rates that North Hampton and Hampton are paying are just and reasonable. So I'm asking if it's the addition of Wiggin Way customers that would make these rates unjust and unreasonable.

CHAIRMAN GOLDNER: I'll allow it just so he can respond to his testimony,

yeah.

A. (Harned) I think I'd answer that in terms of a fair and level playing field. The residents of North Hampton, while -- and I'm not saying everyone. You asked me if the PUC had found a reasonable and justified rate.

To my knowledge, the PUC has done that. If I told you that every single person in North Hampton was happy with the answer that the PUC came up with, I would be misleading you.

I'm saying is that the rate that has been established includes a cost for the hydrants used for fire protection in North Hampton.

Aquarion bills the Town of North Hampton for that cost. North Hampton distributes that cost to the property owners in town. They pay it to the Town of North Hampton, and the North Hampton pays the bill to Aquarion. So that's part of what I consider a fair and reasonable rate. When Wiggin Way comes onboard, that part of the process will still stay basically in place the way it is. All we're looking for is for the residents of

- Wiggin Way to pay the same costs on the same 1 level playing field, and that's to include 2 what the cost of the hydrants and the fire 3 protection is worth to the residents of 4 5 Wiggin Way. The hydrants and the fire protection that 6 Q. 7 don't exist in Wiggin Way or --8 Α. (Harned) I'm sorry, not the fire protection, 9 because I guess that's the fire hydrant, but the fire department. Not the hydrants. 10 11 sorry. 12 Right. So you're asking them to -- you're Q. asking Wiggin Way to pay an equal charge, a 13 14 charge equal to the Town of Hampton and North 15 Hampton, despite the fact that there are no 16 hydrants within Wiggin Way and so no way for 17 them to receive fire protection service. (Harned) But I think that there's --18 Α. 19 0. That's just a "Yes" or "No" question.
- 20 are no hydrants in Wiggin Way, but you want
  21 them to pay --
- MR. RICHARDSON: Mr. Chair --
- 23 Q. -- effectively the same charge.
- MR. RICHARDSON: -- I think it's

fair if they ask the question to allow the witness to answer.

CHAIRMAN GOLDNER: So I'll allow the question to proceed. Mr. Harned.

- A. (Harned) Thank you. So, yes, there are no hydrants in Wiggin Way. But Wiggin Way, as the chief has testified, will have the use of hydrants that are right on the town line and therefore achieve the benefit of those hydrants. And I would further say there are properties in Wiggin Way that are closer to the hydrants than some of the properties that are in Winterberry, that the hydrants were installed for.
- Q. Okay. Leaving aside your surcharge proposal for a moment, do you have any reason to disagree that eliminating arsenic from the water supply and ensuring sufficient water supply creates a public benefit or a public good?
- A. (Harned) Yes, it certainly does. I mean, the DES has put standards in place for what the arsenic limit can be. They've lowered it over the course of time. There are a number

of community water systems in the state of New Hampshire that have dealt with it in a variety of different mechanisms. And this was the mechanism that Wiggin Way chose to try to solve the problem on their end. as I said earlier, we were agreeable to the temporary connection, and we also made the offer that the permanent connection could be done at the town line and water supply to Wiggin Way. It's just they would be left -they would be responsible for managing the infrastructure in Wiggin Way that we did not have good insight into and a good understanding of what its condition was. we were willing. We made the offer that they could have the water.

- Q. Yes. So you are saying that a public good exists regardless of a surcharge. There is a public good that is served here by removing arsenic from the water and ensuring adequate water supply.
- 22 A. (Harned) Absolutely.

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

Q. I only have a couple more questions. I'm
referring to Exhibit 9. That's your rebuttal

- testimony that was filed on February 14th, if you've got that handy.
- 3 A. (Harned) Yes, I do.
- Q. Okay. In your rebuttal you claim that

  Aquarion has overestimated its revenues and

  underestimated expenses for the Wiggin Way

  system; correct?
- 8 A. (Harned) Yes.
- 9 Q. And --

17

18

19

20

21

22

23

24

- 10 A. (Harned) But is this not also the part of my
  11 testimony -- well, specifically, what lines
  12 are you referring to? Because we received
  13 some new information this morning that was
  14 basically new information to us. So I'm not
  15 sure it's entirely consistent with everything
  16 that's here.
  - Q. Yes. Ms. Szabo did add additional detail to some of the utility accounting that was done. So that's fine. We can leave that and move on.

Moving to the Wiggin Way system, did you conduct any analysis to determine whether the PVC pipe in Wiggin Way is of a greater or a lesser standard of material than any other

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

- parts of the Wiggin Way system?
- 2 A. (Harned) Can you give me an example as to 3 what you mean by --
- Q. Sorry. I mean of the Aquarion system. I meant the Aquarion system. I misspoke.

  Sorry.
- 7 A. (Harned) Sorry. No problem. That clarifies it.
- No, I did not because there was just a 9 lack of information about the current -- the 10 11 materials that -- the exact materials that 12 went in, the construction techniques, how they were properly buried and embedded. All 13 14 of that information was just missing. 15 there really wasn't anything to work with to 16 get a good analysis.
  - Q. And do you have any information that contradicts Mr. McMorran's testimony that there are older portions of the Aquarion system than the Wiggin Way PVC system which was constructed in the early 2000s?
- 22 A. (Harned) Are there parts of the Aquarion 23 system that are older than Wiggin Way?
  - Q. Yes. Or do you have --

17

18

19

20

21

1 A. (Harned) Yes, there were.

- Q. -- information that contra -- okay. All right.
- A. (Harned) No, I would agree there are portions
  of the existing Aquarion system that are
  older than the Wiggin Way system.

[Court Reporter interrupts.]

Q. That is all I have for you, Mr. Harned.

Thank you very much.

The next few questions I have are for Fire Chief Lajoie. Chief Lajoie, thank you very much for being here. I have a few questions. Shouldn't take too long.

First, regarding the testimony that you just provided on the stand, did you testify that your fire department is equipped to reach further than 1,000 feet from a hydrant to reach the location of a fire in Wiggin Way?

- A. (Lajoie) Yes, we could be, in conjunction with other fire apparatus at the scene.
- Q. Okay. Would that same reach of over a thousand feet apply to homes in North Hampton that are greater than 1,000 feet from a fire

- 1 hydrant?
- 2 A. (Lajoie) Yes.
- 3 Q. Thank you. Turning to your statement or your
- 4 testimony marked as Exhibit 10. At Bates
- 5 Pages 31, 32, you cite the Seacoast Chief
- Fire Officers Mutual Aid District Agreement;
- 7 is that right?
- 8 A. (Lajoie) Yes.
- 9 Q. And North Hampton, Hampton and Stratham are
- 10 parties to that agreement; correct?
- 11 A. (Lajoie) That's correct.
- 12 Q. Is Rye also a party to that agreement?
- 13 A. (Lajoie) Yes.
- 14 Q. Okay. It's my understanding that assistance
- by the town parties to this agreement is
- 16 voluntary on the part of the responding town.
- 17 Is that correct?
- 18 A. (Lajoie) Correct.
- 19 Q. Okay. So if North Hampton makes a request
- 20 for assistance from Stratham, is Stratham
- 21 required to provide assistance, or is it the
- 22 town's choice? And would -- I'll do a
- two-part question here. And would the
- 24 opposite also be true, that if Stratham is

- requesting assistance from North Hampton, is it North Hampton's choice whether to provide assistance?
- A. (Lajoie) Yes, we both are in that agreement with the knowledge that when one town asks for assistance, we will respond.
- Q. Great. Thank you. Would the responding town
  bill North Hampton for its costs, or does the
  agreement provide that in the spirit of
  mutual assistance, every town bears its own
  cost and there is no reimbursement?
- 12 A. (Lajoie) That is true, there is no cost incurred.
- 14 Q. Thank you.

16

17

18

19

20

21

22

Regarding your testimony again on the stand just a little bit ago about the volume of water needed or sought by firefighters when seeking hydrants to fight a fire, are you aware that the Aquarion tariff only charges for water capacity with its fire protection charges and does not impose volumetric charges?

- 23 A. (Lajoie) I was not aware of that.
- 24 Q. Okay. Lastly, this is -- I'm wrapping up

- here. You provided an attachment to your
- 2 statement that is a map of the public fire
- 3 hydrants in North Hampton. Is that correct?
- 4 It's Bates Page 33.
- 5 A. (Lajoie) Yes.
- 6 Q. Do you agree this map generally depicts North
- 7 Hampton, which is bordered on the south by
- 8 Hampton, to the west by Stratham, to the
- north by Rye and Greenland, which borders
- North Hampton's northwest boundary?
- 11 A. (Lajoie) Yes.
- 12 Q. Great. Do you agree that the map shows a
- 13 number of fire hydrants in close proximity to
- 14 the borders between the towns, several towns?
- 15 A. (Lajoie) Yes.
- 16 Q. With respect to the proximity, these are
- 17 similar to the single hydrant on Winterberry
- 18 Lane, H644, in proximity to Stratham;
- 19 correct?
- 20 A. Yes.
- 21 Q. And do any of the towns, to your knowledge,
- 22 pay a surcharge for fire protection service
- because of the hydrants located near but not
- 24 within their borders?

- 1 A. (Lajoie) No.
- 2 Q. Thank you. And to your knowledge, has the
- one hydrant in North Hampton near Wiggin Way
- 4 on Winterberry Lane been used at any time
- 5 since 2017 to provide emergency services to
- 6 Stratham?
- 7 A. (Lajoie) To my knowledge, no.
- 8 Q. Would you happen to know if it's been used
- 9 anytime in, say, the last ten years?
- 10 A. (Lajoie) I would say, to the best of my
- 11 recollection, in the last ten years it was
- not used for any fire incident in Stratham.
- 13 Q. Okay. Has it ever been used for a fire
- incident in Stratham, to your knowledge?
- 15 A. (Lajoie) To my knowledge, no.
- 16 Q. Okay.
- 17 MS. CHIAVARA: That's all the
- questions I have. I have nothing further.
- 19 Thank you.
- 20 CHAIRMAN GOLDNER: Thank you.
- 21 We'll move to Mr. Reimers.
- MR. REIMERS: Thank you, Mr. Chair.
- 23 CROSS-EXAMINATION
- 24 BY MR. REIMERS:

{DW 21-093} [AFTERNOON SESSION ONLY] {2/23/22}

- 1 Q. I have questions for Mr. Harned.
- 2 Mr. Harned have you read Aquarion's
- 3 reply testimony?
- 4 A. (Harned) Yes, I did.
- 5 Q. And did you read --
- 6 MR. REIMERS: I'm sorry, Mr. Chair,
- 7 I don't have the Bates number.
- 8 BY MR. HARNED:
- 9 Q. But on Page 10 of the reply testimony, did
- you read the part on Lines 18 to 19 where it
- says, "Although the Towns' positions have
- changed over time..."?
- 13 A. (Harned) North Hampton -- let me catch up.
- 14 Pages 9 and 10.
- 15 Q. I'm sorry. Yes. I'm referring to Exhibit 5,
- Page 10 of the testimony, Line 18.
- 17 (Document handed to witness by Attorney
- 18 Richardson.)
- 19 A. (Harned) Okay. So Page 9, Line 18.
- 20 Q. Page 10. I'm sorry. Page 10, Line 18.
- 21 A. (Harned) "Has the interconnection caused any
- 22 negative impacts to the Aquarion Water
- Company New Hampshire system or customers?"
- 24 Q. No, I believe I'm looking at Exhibit 5, which

- is the rebuttal testimony of John Walsh,
- Debra Szabo and Carl McMorran. And I'm
- 3 looking at Page 10 of the testimony.
- 4 A. (Harned) Yes.
- 5 Q. Page numbers are in the upper right. And on
- 6 Line 18 there begins a sentence that says,
- 7 "Although the Towns' positions have changed
- 8 over time --"
- 9 A. (Harned) Sorry. There's two sets of page
- 10 numbers on the pages. I was on the wrong
- one.
- 12 Q. Oh, I'm sorry about that.
- 13 CHAIRMAN GOLDNER: Yeah, Mr.
- Reimers, that's Bates Page 12.
- 15 WITNESS HARNED: Page 12. Yes.
- 16 MR. REIMERS: Thank you, Mr. Chair.
- 17 And Mr. Harned and Mr. Chair and everyone, I
- 18 apologize for the confusion.
- 19 A. (Harned) So now that we're on the right page,
- we're at Line 18?
- 21 BY MR. REIMERS:
- 22 Q. Yeah. Would you agree with the statement
- that the Towns' positions have changed over
- 24 time?

- A. (Harned) I wouldn't say dramatically. As the case has gone through and we've learned things, there's been some change, but I won't say it was dramatic.
- Q. Earlier in your testimony, in response to
  some questions by counsel, you were talking
  about the appeal to the Water Council of the
  DES Order. Do you remember that?
- 9 A. (Harned) Yes, I do.
- Q. And you talked about the reasons for the appeal and the settlement offer that was made; is that correct?
- 13 A. (Harned) Yes.

15

16

17

18

19

20

21

22

23

24

Q. And in that notice of appeal it says, "Adding additional service area" -- and this is referring to Wiggin Way -- "Adding additional service area at this time will severely hamper Aquarion's ability to meet the water requirements of its current customers, as well as its future residents within its current service area."

Is it still the Towns' position that adding 43 homes will severely hamper Aquarion's ability to provide water to North

```
Hampton?
1
         (Harned) No, it is not.
2
3
         North Hampton's concern now has changed to a
    Q.
         fire protection surcharge only; is that
4
5
         correct?
         (Harned) It's changed to a fair treatment of
6
    Α.
         all customers, and it's through that, if
7
         that's the mechanism.
8
         Has the Town of North Hampton always been
9
    Q.
         committed to a fair treatment of the Wiggin
10
11
         Way customers?
         (Harned) As balanced against the fair
12
    Α.
         treatment of the North Hampton residents and
13
14
         the North Hampton portion of the system, yes.
15
                    MR. REIMERS: All my other
16
         questions have been asked by other counsel.
17
         Thank you very much.
18
                    CHAIRMAN GOLDNER:
                                        Thank, Mr.
19
         Reimers.
                    We'll move to Mr. Tuomala and Ms.
20
21
         Amidon.
22
                                  I'm sorry, Mr. Chair.
                    MR. REIMERS:
23
         I overlooked one piece of paper. Can I ask
24
         one more question?
```

{DW 21-093} [AFTERNOON SESSION ONLY] {2/23/22}

- 1 CHAIRMAN GOLDNER: Sure.
- 2 BY MR. REIMERS:
- 3 Q. So Mr. Harned, your question -- or you had
- 4 said that the Town no longer thinks that
- 5 adding Aquarion -- Wiggin Way customers will
- 6 severely hamper the ability to provide water
- 7 to North Hampton. Will you please turn to
- 8 what's been premarked as Exhibit 2? And
- 9 that's the letter from the Attorney General's
- 10 Office.
- 11 A. (Harned) I don't have that.
- 12 Q. I can simply -- have you seen that letter
- 13 before? It's a September 1st, 2001 letter
- 14 signed by Senior Assistant Attorney General
- 15 Chris Aslin.
- 16 A. (Harned) Until I see the letter, I cannot
- 17 answer that question --
- 18 MR. RICHARDSON: Attorney Reimers,
- I can provide the letter to him if that would
- be what you want me to do.
- 21 MR. REIMERS: I would appreciate
- 22 that. Thank you very much, Attorney
- 23 Richardson.
- 24 BY MR. REIMERS:

- 1 Q. Mr. Harned, do you see the -- I'm sorry.
- 2 Have you seen this letter before?
- A. (Harned) I believe I have, but it's been quite a while. I have not reviewed it
- 5 recently.
- 6 Q. Well, I'm going to look at the last sentence
- 7 in that indented block quote. And it says,
- 8 "Aquarion has been providing water to the
- 9 Wiggin Way homeowners for the past four
- 10 years." I'm sorry. I'm going to look at two
- 11 sentences. "NHDES hereby confirms that
- 12 Aguarion continues to meet all NHDES
- 13 requirements for suitability and availability
- of water necessary to serve the Wiggin Way
- 15 homeowners."
- You would agree with that, wouldn't you?
- 17 A. (Harned) Yes, I would. Would you like me to
- 18 explain why I now agree with that?
- 19 Q. Please.
- 20 A. (Harned) So when we originally filed the
- 21 appeal with the Water Council, we had
- 22 received data from Aquarion that showed some
- summertime usage when they had had a pump
- failure and their ability to deliver water a

couple days before or a couple days after
that pump failure; the demand exceeded. Now,
it was a warm summer weekend. There was a
lot of demand at Hampton Beach. But we saw
some plots where demands and ability to
supply a matter of days apart were out of
balance. So that was the root cause of a lot
of our concerns at that point in time.

Subsequent to that and why positions changed is Aquarion has developed another well. And I'm not sure exactly what the permitting status of it is today. Carl could elaborate. But they developed another well that adds significant capacity to their ability to deliver water. So some of the concerns we had at one point about their ability to deliver water are -- they've been reduced rather substantially by a high-capacity well.

Q. So am I hearing you correctly, that that
multiple-year appeal to the New Hampshire
Water Council by the Towns of Hampton and
North Hampton was based on North Hampton's
mistaken --

1 A. (Harned) No.

11

16

17

18

- Q. -- characterization of a couple days of information?
- A. (Harned) It's not mistaken at all. They
  brought a new well online -- or they're in
  the process of developing the well, which, as
  far as everything we've seen, will give them
  significant capacity. So the situation has
  changed in terms of what their capacity was
  then and what their capacity appears to be
- Q. Okay. But you have no -- but you were in
  agreement with Attorney General Aslin -Assistant Attorney General Aslin as to his
  conclusions in this Exhibit 2; is that right?
  - A. (Harned) At this point in time, yes, when he wrote it. But we were not in agreement with it going back significantly earlier.
- 19 Q. Okay. Thank you.

going forward.

- 20 CHAIRMAN GOLDNER: Okay. Thank
  21 you. We'll move to Mr. Tuomala and Ms.
  22 Amidon.
- MR. TUOMALA: Thank you, Mr.

## CROSS-EXAMINATION

2 BY MR. TUOMALA:

1

14

15

16

17

18

19

20

21

22

23

24

I did have one additional question. I 3 Q. believe this will be for Mr. Harned regarding 4 a back and forth that he had had with 5 Attorney Richardson regarding the proposed 6 surcharge of 18.7 percent. And I believe the 7 8 dialogue was that the Town wasn't necessarily "married," if I can use that term, to that 9 surcharge amount; that it would be flexible 10 11 in determining some other amount, but whatever amount it was should be just and 12 reasonable. 13

My question to you, based on that: Has the Town, as the intervenor raising this issue of a surcharge, considered conducting an impartial cost of service study regarding Aquarion's rates, and specifically Wiggin Way?

- A. (Harned) I can't answer that. I do not know the answer to that. I can't answer that question.
- Q. Well, I guess, to your knowledge, then, in your capacity as representing the Town, do

- 1 you know if the Town has considered that
  2 whatsoever?
- (Harned) I do not know the answer to that 3 Α. question. Different water commissioners on 4 the commission divvy up our responsibilities, 5 and there are other commissioners who are 6 7 more focused on rate cases and some of the other issues, and I can't speak for them 8 9 right now. Wiggin Way was one of the ones that I took on, so I'm more familiar with 10
- Q. Well, I guess, then, to your knowledge, has
  the Town considered a cost of service study
  for Wiggin Way?
- 15 A. (Harned) Not to my knowledge.
- 16 Q. Okay. Thank you very much.

that end of it.

- MR. TUOMALA: No further questions,

  Mr. Chairman.
- CHAIRMAN GOLDNER: Okay. We'll
  move to Commissioner questions. Commissioner
  Chattopadhyay.
- 22 INTERROGATORIES BY COMMISSIONERS:
- 23 BY COMMISSIONER CHATTOPADHYAY:
- Q. Good afternoon. So I have some questions for

- you Chief. If you would go to Exhibit 10. 1 2 And can you again state which are the towns that abut North Hampton and, you know, can 3 you just quickly state those names again? 4 5 (Lajoie) Sure. That would be the towns of Α. Hampton, Exeter, Stratham, Greenland and Rye. 6 7 Okay. And do those other towns have hydrants 0. 8 that have provided firefighting service to the Town of North Hampton? 9 (Lajoie) There are some in proximity on the 10 Α. 11 borders of town. I could give an example.
- The Town of Rye has a hydrant close to the town line of North Hampton that we would utilize in the event of a fire.
- Q. Do they try to recover the costs from your town when you have relied upon their service?
- 17 A. (Lajoie) No.
- Q. No. So this is just trying to be absolutely certain that I understand what you said previously.
- You've worked for 20 years on
  firefighting. And I'm just trying to
  confirm, do you know whether -- because
  Wiggin Way Association has been there for,

- starting 2000, to the best of my
- 2 recollection. Did you just -- did you say a
- while ago that you never had to rely upon the
- 4 hydrants to provide firefighting to Wiggin
- Way Association?
- 6 A. (Lajoie) To my knowledge, we have never
- 7 responded to a fire on Wiggin Way and
- 8 utilized our hydrant.
- 9 Q. Okay. So when you said -- I think you said
- 10 at some point that three to five times a year
- 11 you have to have -- rely on helping Stratham?
- 12 A. (Lajoie) That's correct.
- 13 Q. And what do you mean by that? Do you use
- 14 hydrants in other places?
- 15 A. (Lajoie) So we've responded to other fires in
- 16 Stratham as an engine. At times we have used
- 17 another water source. So Stratham does not
- 18 have fire hydrants, so we would have to
- secure another means of water supply when
- we've responded.
- 21 Q. So Stratham does not have any hydrants? Is
- that what you're saying?
- 23 A. (Lajoie) As far as I know, they're 100
- 24 percent rural.

Q. Because you're in firefighting service -- I
mean, this is just a general question. I
asked this question initially and didn't get
a response because, you know, it's a matter
of expertise perhaps. So, and you may not be
able to answer this question. But I'm still
curious whether you can.

The question is, like do you have a sense how -- for example, in Stratham you have the cistern and then they have the pond. And I heard that the pond is big enough. How would the process work when a house gets on fire? How would the process work? And, you know, assume that you're not going to rely on the hydrant. So can you give me a sense of what would happen?

A. (Lajoie) Sure. So the first arriving fire engine would be a pumper, and that typically carries anywhere -- I'm not sure what Stratham's fire engine carries for water supply. They generally carry 1,000 to 1500 gallons onboard. So the initial attack engine would provide the immediate water for fire attack. The next truck to the scene

would be a tanker truck. Typically what that
truck will do is tie in to the first arriving
attack pumper and give its tank water to that
attack pumper. During that process, the
other incoming fire companies will then
establish a water supply. So that could be
an engine from our town, it could be another
town that's coming in. That's when they
would go into, you mentioned the fire pond.
They would then have to set up their truck at
that pond. I think somebody mentioned that
there are dry hydrants there. There's
different means of taking water. If there's
a dry hydrant in place, it's a lot quicker as
opposed to a five-minute operation. If
there's a dry hydrant that's there, that's
basically a pipe that comes out of the pond
that you can put a hard suction hose between
the fire apparatus itself and that hydrant
connection and draw from that water source.
That can be time-consuming. It could take
three to five minutes with all the mechanics
that are involved. But generally that's what
would happen is the first arriving truck

- would be a fire attack truck that would be using its onboard water to get water quickly onto that fire. Secondary trucks coming in would establish the water supply.
- Q. Would it be possible for you to know whether,
  ever, Wiggin Way, the residents of Wiggin
  Way, had to face a fire, you know, episode?
  Would you know that? Like I know you're not
  from Stratham, but --
- 10 A. (Lajoie) Yes, we would hear the call for a report of a fire.
- Q. And have you heard any calls from Wiggin Way, ever?
- 14 A. (Lajoie) No.
- 15 Q. No. Okay. I'm just confirming you said
  16 that. But I'm just -- okay.

17 This question is for you, Dr. Harned. I'm going to... just as, you know, when 18 19 Wiggin Way assumed that it's part of the 20 Aquarion, okay, there is a concern that some 21 of the system there, as far as the future is 22 concerned, may give more problems, and 23 therefore they may have to be repaired or maintained, or there will be maintenance 24

costs, all of that, that ratepayers in North Hampton or Hampton will have to bear those.

Do you agree that it can also happen that a part of North Hampton or Hampton somewhere has some issues with its water system, and then folks will need maintenance on them, or even repair could be pretty costly as well? In that situation, if Wiggin Way is part of the Aquarion system, they may have to bear those costs as well. Would you agree with that?

A. (Harned) I would agree with that. But I also would agree with that with the following caveat: That if Wiggin Way has a problem 15, 20 years down the road, it falls into the category that I believe you described. I mean, Aquarion does routine maintenance. They replace mains. Things need to be done. As they said, they have some very old ones.

What we're concerned about is in the near-term future. Because if I remember my -- somebody can correct me. If I remember my RSAs correctly, it's RSA 485 that's being used for this process to enable Aquarion to

23

24

extend into Wiggin Way. That specifically says that as a result of that expansion and taking over that system, there are not supposed to be any costs that go back to the Hampton and North Hampton ratepayers. Now, it doesn't talk about a time frame of when that's supposed to happen or anything. you've got to apply some common sense. If we have all sorts of problems in the next two years, it seems unfair that the North Hampton and Hampton residents should have to pay for If we don't have any problems until 25 or 30 years down the road, well, they're part of the system at that point in time.

So I'm just -- I agree that it will all be borne down the road when things settle out. That's fine. It's just we're concerned about knowing the condition, you know, and knowing whether there's problems in the near future that will cause a significant expense.

Q. Does that statute ensure that Wiggin Way will not have to pay for any, you know, repairs or maintenance that happen in North Hampton or Hampton --

- 1 A. (Harned) Not that I --
- Q. -- let's say in the near future? No? Not
- 3 that you know of?
- 4 A. (Harned) I do not believe it does.
- 5 Q. Okay. Thank you.
- 6 COMMISSIONER CHATTOPADHYAY: That's
- 7 all I have.
- 8 BY CHAIRMAN GOLDNER:
- 9 Q. Okay. I just have a couple of questions to
- 10 wrap up the Commissioner questions. It's a
- 11 question for both Mr. Harned and Chief
- 12 Lajoie.
- Is there -- and I'd like you both to
- answer independently. It's a short question.
- 15 Is there any talk of not making the North
- 16 Hampton fire hydrants available to Wiggin
- 17 Way? Is there any -- so it would be
- 18 available.
- 19 A. (Lajoie) Yes, it would be available.
- 20 Q. Okay. Thank you. I just want to make sure
- 21 everyone was safe here.
- 22 Second question is -- and this is maybe
- a follow-up to an earlier question from the
- Department of Energy -- if Wiggin Way is

```
approved with no surcharge, the position of
1
2
         the Town would be that there's some unfair,
         you know, cost that's being accrued to the
3
         Town and not being accrued to Wiggin Way.
                                                      I
4
5
         suppose there are solutions for that, though.
         One could, for example, take the fire
6
7
         protection cost and put in a water bill as
8
         opposed to assessing it through property
         taxes.
9
                 Is that something the Town would
         consider?
10
         (Harned) Well, again, I'm not typically
11
    Α.
         involved in the rate cases. But isn't that
12
         something that the PUC gets to decide?
13
         The tariff -- Ms. Chiavara may be able to
14
    Q.
15
         jump in here. But I think the tariff is
16
         determined -- it's not determined by the PUC,
17
         it's determined by the Town; right?
                    CHAIRMAN GOLDNER:
18
                                       Ms. Chiavara,
19
         can you help me with this?
                                   The tariff is
20
                   MS. CHIAVARA:
21
         approved by the PUC. So the tariff terms
22
         are -- the tariff is a contract between the
23
         Company and its customers.
                                      But the terms of
24
         the tariff are set and approved by the
```

	8:	1
1	Commission.	
2	CHAIRMAN GOLDNER: So the current	
3	tariff approved by the PUC at the request of	
4	the parties was that fire protection is	
5	assessed via property taxes as opposed to the	
6	water bill?	
7	MS. CHIAVARA: No. Actually, the	
8	terms of the Aquarion tariff, as they stand	
9	now, public fire protection charges are	
10	assessed per hydrant within a given	
11	municipality, and then that bill goes to the	
12	Town itself. It's then up to the Town to	
13	determine how it assesses fire protection	
14	charges on its residents.	
15	CHAIRMAN GOLDNER: Okay. Thank	
16	you. That's helpful.	
17	BY CHAIRMAN GOLDNER:	
18	Q. All right. That's all the questions that I	
19	have, except for maybe one for Chief Lajoie.	
20	I'm just curious. So I'm looking at a	
21	map of your town, and I'm seeing fire	
22	hydrants well covered in the central part of	
23	town, northwest part, southeast part. Pretty	

good coverage except for the southwest

- portion where there's no fire hydrants. I

  assume that that's -- so how do you put out

  fires over there?
- A. (Lajoie) So we also have a tanker truck.

  Seventy percent of North Hampton is covered
  by fire hydrants, the remaining 30 is on
  rural response. So we respond immediately
  with a fire engine, with our secondary -- or
  a second truck would be a tanker truck.
- 10 Q. And those tanker trucks, you said, are 1500 gallons?
- 12 A. (Lajoie) Ours carries 3,000.

20

21

22

23

- Q. Three thousand. And you were talking before
  about the pond being, I think 30,000 gallons,
  and 1500 gallons per minute, so you'd burn up
  the pond in 20 minutes. What do you do with
  fires where you've only got a tanker truck
  with some fraction of that capacity?
  - A. (Lajoie) Right. So not just us. This is a system-wide practice where we have run carts in place, where we have multiple fire departments with tanker trucks responding to us. So we have different methods of having water. For instance, there's what's called

- like a PortaTank. So our tanker truck
  carries, it's basically a portable pool. We
  can dump its contents of 3,000 gallons of
  water into that. Our alarm cart allows for
  additional trucks to be coming in and dumping
- their water supply into that same. So that
- keeps a continuous supply of water coming in.
- 8 Q. What's, like, the most trucks you've seen at a house fire? Five or something? More?
- 10 A. (Lajoie) I would say more. I would say up to 15.
- 12 Q. Really? Okay.
- 13 A. (Lajoie) Yes.
- Q. And how many of these trucks does the Town of
  North Hampton have?
- 16 A. (Lajoie) So we have two pumper trucks and a tanker truck.
- Q. Okay. And so to get 15 trucks, it would be, you know, all the neighboring towns would come to the house fire.
- 21 A. (Lajoie) Correct.
- Q. Okay. And so you were talking before -- and
  I just want to clarify. So Stratham lies to
  the west. And then at the southwest corner

- there's a lot of houses, it looks like both in Stratham and some in North Hampton. But it sounds like there's no fire hydrants on either side of the town border on that southwest corner.
- 6 A. (Lajoie) Correct.
- 7 Q. Okay. Thank you.

12

13

14

15

16

17

18

19

20

21

22

23

- 8 CHAIRMAN GOLDNER: Okay. Very
  9 good. We'll move to -- okay. Commissioner
  10 Chattopadhyay has a follow-up.
- 11 BY COMMISSIONER CHATTOPADHYAY:
  - Q. Sorry. Can you give me a sense of like -you're sort of pooling your resources, trying
    to meet the needs of a fire in a house or
    something. Typically, if there is a metric,
    like per day, how many fires do you have to
    take care of? It could be flipped, and like
    one fire incident happens over seven days or
    something. Can you give me a sense of what
    goes on from your experience?
    - A. (Lajoie) Certainly. We typically look at it over an annual counting. We don't look at it per day. We look at it on an annual basis.

      So are you looking specifically to how many

85 1 fires North Hampton has responded to in the 2 last year? Yeah. And I would assume that you're 3 Q. responding to fires in other towns as well. 4 (Lajoie) That's correct. 5 Α. So, yeah, that's what I want to get. 6 0. 7 (Lajoie) Okay. I don't have those exact Α. 8 numbers in front of me, but we could -- I would say that the number's greater than 20 9 10 between our town and other responding 11 communities that we respond to. 12 Twenty over a year? Q. (Lajoie) Absolutely. And I'm sure it's quite 13 Α. 14 higher than that. I just don't have those exact numbers in front of me. 15 16 Okay. Thank you. Q. 17 Α. (Lajoie) You're welcome. CHAIRMAN GOLDNER: All right. Very 18 good. We'll move to redirect. 19 Richardson. 20 21 MR. RICHARDSON: Thank you, Mr. 22 Chairman. And I'd like to start with a 23 question that addresses the one that you

24

raised as well because that was on my list.

## 1 REDIRECT EXAMINATION

- 2 BY MR. RICHARDSON:
- 3 Q. Mr. Harned, you were asked about options for
- 4 how the Town assesses the bill that it gets.
- 5 And the Town doesn't have a water department
- 6 currently; right? So you're not --
- 7 A. (Harned) Sorry. No, it does not.
- 8 Q. Okay. So you're not charging for rates for
- 9 water service or anything like that; correct?
- 10 A. (Harned) Correct.
- 11 Q. Okay. So the Town goes to town meeting based
- on the board of selectmen's budget, and
- that's where this charge is located; is that
- 14 right?
- 15 A. (Harned) That's correct.
- 16 Q. Okay. And then after town meeting, I assume
- 17 there's a procedure where the Town goes
- 18 before the DRA to set a tax rate.
- 19 A. (Harned) Both of those steps occur. I'll be
- 20 honest with you. I'm not sure I know for
- 21 sure which one comes first. I think you're
- 22 right. But I'm not the person to testify to
- that.
- Q. Okay. So you're not familiar with the

- 1 municipal budget process.
- 2 A. (Harned) Not in terms of the Department of 3 Revenue Administration I'm not.
- Q. Okay. Do you know the difference between like an enterprise fund and a general obligation?
- 7 A. (Harned) No.
- Q. Okay. All right. Commissioner [sic] Lajoie,
  do you understand the tax-setting process at
  all, at least in terms of how the fire
  department works and what happens with your
  tax rates, or how the fire department's
- 14 A. (Lajoie) Yes, specific to the fire

budget impacts the tax rate?

department.

- Q. Okay. So the Town, I assume, approves the fire department's budget by town meeting vote?
- 19 A. (Lajoie) Yes.
- Q. And then someone in the town body goes with
  all of the warrants that were voted on in the
  budget and approaches the DRA, and the DRA
  then sets the tax rate. Is that your
  understanding?

- 1 A. (Lajoie) That's my understanding.
- Q. And are you aware of towns having any other
- option where there isn't an enterprise fund,
- 4 like a water department or a sewer
- 5 department?
- 6 A. (Lajoie) I myself am not aware.
- 7 Q. Okay. Are either of you aware of any legal
- authority that would allow you to just bill
- 9 residents for bills that you get from
- 10 Aquarion? I'll withdraw the question. I can
- tell by the looks on your faces you don't --
- 12 you're not sure of the answer --
- 13 A. (Harned) Well, I was just looking for
- 14 clarification. Were you asking if a bill
- 15 from Aquarion sent to the town could be given
- 16 to certain residents? I don't believe
- 17 there's a mechanism. But the way it's
- 18 handled today, where it's distributed evenly
- 19 based on the tax rate to all residents,
- that's what the Town does.
- 21 Q. And my point being that the DRA then looks at
- 22 what's appropriate to include in taxes or not
- and approves your tax rate. In other words,
- the Town doesn't set your tax rate --

- 1 A. (Harned) No.
- 2 Q. -- the Department of Revenue does.
- 3 A. (Harned) Yes, I agree.
- 4 Q. And Mr. Harned, the fire protection charges
- 5 that the Town receives are based on the
- 6 tariff, and that's Aquarion that proposes
- 7 that. That's not what the Town -- the Town
- 8 never made that proposal, did they?
- 9 A. (Harned) Not to the best of my knowledge, no.
- What you described is my understanding.
- 11 Q. So you're not aware then of the Town having
- any choice to do things differently than they
- currently do.
- 14 A. (Harned) No.
- 15 Q. Okay. Mr. Lajoie, do you have your
- 16 testimony? And I'd like to refer to the --
- 17 which is Exhibit 10, the map that's on the
- 18 last page at Bates Page 33.
- 19 A. (Lajoie) Yes.
- 20 Q. I'm going to refer -- direct your attention
- 21 to the, I guess what's the southwest corner,
- in the area where there's essentially no
- 23 hydrants.
- Now, you were asked by the Commissioners

- if there were ever instances where you were
- getting benefits from hydrants from other
- 3 towns. So in that southwest corner, is that
- 4 where Exeter is?
- 5 A. (Lajoie) Yes.
- 6 Q. And how much of a -- we can't see town lines
- on this diagram. But is there a lot of
- 8 coverage, common borders between Exeter and
- 9 North Hampton?
- 10 A. (Lajoie) There's a small portion.
- 11 Q. Is it basically just that corner?
- 12 A. (Lajoie) Yes.
- 13 Q. Okay. And are there fire hydrants on the
- 14 other side that you have ever used or are
- aware of that you would use in that corner
- 16 where Exeter is?
- 17 A. (Lajoie) I'm not sure how close in proximity
- 18 it is to our town border. But if there was
- one, we would be able to utilize it.
- 20 Q. Okay. But you're not aware of one at this
- 21 point.
- 22 A. (Lajoie) I am not.
- 23 Q. Okay. So then describe for me, is the
- 24 southern border, is that -- basically along

- North Hampton, is that basically the Town of Hampton?
- 3 A. (Lajoie) Yes.
- Q. So all of the hydrants on the Hampton side
  would be basically paid for by Hampton
  charges, fire protection charges, which are
  actually greater than North Hampton's; right?
- 8 A. (Lajoie) I'm not sure if they're greater.
- 9 Q. Okay. Do they have more hydrants than...
- 10 A. (Lajoie) I would say yes, because of the
  11 number of streets and the size of the town,
  12 there are more hydrants.
- Q. And I'll represent to you that that's the
  case. But the point being that the Hampton
  side is where Aquarion hydrants are, and
  that's along the southern border of
  Exhibit 10 on Page 33.

Just to complete the circle, I want you to go to the east side and then north of the Town of North Hampton. And I assume that along the coast, is that where Aquarion's hydrants are located serving Rye?

23 A. (Lajoie) Yes.

18

19

20

21

22

24 Q. Okay. And does the Rye Water District have

- any hydrants that border North Hampton? 1 2 (Lajoie) The only area that I believe borders North Hampton that belong to Rye Water 3 District is where our Mill Road turns into 4 their West Road. 5 Okay. And I'm having trouble seeing the map 6 Q. 7 a little bit. Are there hydrants in that 8 location? Can you describe what's there? 9 (Lajoie) There are hydrants in Rye, just over Α. 10 the border. They don't -- they're not 11 represented on that map, as this map 12 indicates Aquarion hydrants only. But on Mill Road in North Hampton there is no 13 hydrants. 14 15 And are you -- does your department ever rely Q. 16 on Rye Water District hydrants to fight fires 17 in North Hampton? (Lajoie) If there's a fire in that vicinity, 18 Α. 19 we would have the option of using a fire 20 hydrant.
- 21 Q. Okay. And that's a municipal rate.

22 And has the Rye Water District ever 23 asked you to pay for those?

24 A. (Lajoie) To my knowledge, never. No.

{DW 21-093} [AFTERNOON SESSION ONLY] {2/23/22}

- Q. Okay. And then I think you mentioned that
  Greenland also borders.
- So just to complete the list of towns,

  could you explain to the Commissioners where

  Greenland sits generally on this map?
- (Lajoie) Sure. So it would be on the north 6 Α. 7 side of town. It's actually not showing that 8 much of it just because of the frame that's there. But if you look at where -- if you 9 can follow Post Road going north to where 10 11 Deer Run Road is indicated on the map, that's 12 where Greenland ends up bordering North 13 Hampton.
  - Q. So is that common border, is that essentially from Deer Run Road over to the -- kind of where the Stratham town line goes south on the western side? Is that right?
- 18 A. (Lajoie) Correct.

15

16

- Q. So that's a small area, kind of like Exeter
  was on the corner.
- 21 A. (Lajoie) Correct.
- 22 Q. Okay. And are there hydrants on both sides?
- 23 A. (Lajoie) There are. I'm not exactly sure
  24 where the closest hydrant is in Greenland

- compared to the North Hampton town line.
- Q. And who would have those hydrants?

- 3 A. (Lajoie) I believe that's Portsmouth Water.
  - Q. Okay. And has Portsmouth ever asked you to pay for their fire protection charges? No?

You were asked a question by Attorney Chiavara, I believe, and it related to whether the decision to fight fires was voluntary or not under the mutual aid agreement. Do you recall that?

- A. (Lajoie) I recall something to that effect.

  I think, if I recall the question correctly,

  it was do we have the decision-making ability

  to refuse to go to a town. The only time we

  would refuse is if we're not available. And

  what I mean by that is if we're already tied

  up on another emergency call and we don't

  have that unit available to respond.
- Q. And in fact, there are, for lack of a better word, I believe standard operating procedures that obligate you to respond unless you're unavailable for some reason; is that right?
- A. (Lajoie) Correct.

Q. How often has North Hampton ever refused to respond when called?

- 3 A. (Lajoie) We've never refused.
- Q. Okay. Let me flip over and just see if I have any other questions for Mr. Harned.

6 (Pause)

7 Q. No, that's it. Thank you very much.

8 CHAIRMAN GOLDNER: Thank you, Ms.

9 Lowry.

16

17

18

19

20

21

22

23

24

MS. LOWRY: I have no follow-up questions. Thank you.

12 CHAIRMAN GOLDNER: Thank you.

Okay. So we'll release the witnesses. Thank
you very much for coming today. Thank you

everybody on the screen.

So I'm going to suggest that we move on to striking I.D. on exhibits. And then if time is requested before closing, we can certainly take five or ten minutes to let the parties prepare. Or if people want to keep going, that's fine, too.

So, first, why don't we just take a minute and take care of the exhibits. So I have exhibits that aren't in question, I

believe, are Exhibit 1, Exhibit 5, 6, 7, 8, 9 and 10. Is there any objection to striking

I.D. on those exhibits?

[No verbal response]

1

17

18

19

20

21

22

23

24

CHAIRMAN GOLDNER: No? Okay. We'll strike I.D. on those exhibits.

On Exhibit 2, the Commission will take administrative notice, as was suggested earlier. And on Exhibits 3 and 4, we'll view those as documentary evidence and give it the weight it deserves.

Any concerns before we move on? MR. RICHARDSON: Mr. Chairman, I would just note that the statute governing administrative notice requires the Commission to give prior notice of its intent. So it's -- while it was proposed as a solution, it nearly begs the same question. But, you know, in light of this particular letter coming from DES, and I think, you know, the Commission's heard our objection, that, you know, this wasn't put in into testimony so we had notice that it was going to be an issue, you know, with that caveat, I don't think we

need to object to that being admitted as a full exhibit. Just understand, you know, that we didn't come prepared to do this because it wasn't part of the testimony that was presented beforehand.

CHAIRMAN GOLDNER: Sure. I'm okay with moving forward just taking administrative notice. I think that's fine in this case. But thank you.

Okay. So let's keep moving. So we'll hold the record open for an additional day. Mr. Reimers, I think you mentioned that you'd like an additional day for public comments. So we'll hold the record open through close of business tomorrow.

MR. REIMERS: Much appreciated.

CHAIRMAN GOLDNER: And finally we'll move on to closing arguments. Would there be -- do the parties want to move to closing arguments now, or would anyone like a break?

MR. REIMERS: I would like to move on to it now. That would be my preference.

MS. CHIAVARA: The Company is ready

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

1 as well.

6

8

9

2 CHAIRMAN GOLDNER: Okay.

3 Everyone's okay?

4 MR. RICHARDSON: That's acceptable.

5 CHAIRMAN GOLDNER: Okay. All

right. I'll recognize Ms. Chiavara for

7 Aquarion's closing.

MR. RICHARDSON: If I may, Mr.

Chairman. I'm just a little bit concerned

about leaving the record open because that is

an invitation to submit information that

would come in tomorrow. We wouldn't see it

until the Commission posts it on its web

site. And I just get concerned that there's

kind of a due process issue with that. I'm

not proposing and I don't really want to do

17 closing briefs or anything like that. I

think we can cover this with the briefs we've

done in our closing statements.

20 So I wanted to make the suggestion

that I think the issues are before the

22 Commission now, and I think it would be best

23 procedurally if we just close this hearing

and didn't leave the record open for, I don't

know what would come in, and I don't know when we would see it. And I think it's -- it presents some difficulties going in that manner.

CHAIRMAN GOLDNER: Yeah, we often do record requests which come in a week or two after that the Commission makes. Here, I think we're just probably just allowing the public to file letters in the Public Comment section.

So is there any comments from the parties in terms of Mr. Richardson's concerns?

MR. REIMERS: Jason Reimers here.

My request to leave the record open was not so that, you know, I would be submitting additional testimony, exhibits or anything, but it was purely to allow members of the public to offer public comment, which is, in my understanding, is treated differently than testimony. So it would seem appropriate to me for the Commission to do as you were I think inclined to do, which is to accept written public comment through tomorrow

afternoon.

CHAIRMAN GOLDNER: Mr. Tuomala,
would you have any comment on the topic?
MR. TUOMALA: Thank you, Mr. Chair.

I think that it's a wise decision to leave for a public member to submit written comments through the end of business as suggested. I'm not quite certain that public comments are even considered part of the record.

that somehow it would open a flood gate with the parties filing last-minute briefs tomorrow, simply stating that the Commission will accept public written comments through the end of the day tomorrow is sufficient. I certainly don't intend to file anything after today's hearing. I don't think the parties had either. That wasn't the original request. So I think simply stating, as you said, the Commission will allow the filing of public comments through the end of business tomorrow, February 24th, and make no mention of leaving the record open is sufficient.

1 Thanks.

> CHAIRMAN GOLDNER: Okay. That's a reasonable compromise, right, Mr. Richardson? MR. RICHARDSON: That sounds acceptable, too. Thank you, Christopher. CHAIRMAN GOLDNER:

you.

Mr. Tuomala, we will move forward as you suggest. So, thank you for clarifying. Mr. Richardson finds that acceptable. And thank you, Mr. Reimers as well.

Okay.

So we'll move to closing, and I'll recognize Ms. Chiavara, representing Aquarion.

MS. CHIAVARA: Thank you, Chair Just a point of order. Goldner. Company, pursuant to PUC 203:26, as the petitioner, we would respectfully request that we could exercise our right to either open or close the proceedings. So we would prefer to give our closing statement last.

CHAIRMAN GOLDNER: Yes, thank you, Ms. Chiavara. My mistake.

Let's begin then with the Town of
Hampton. Ms. Lowry.

MS. LOWRY: Thank you, Chair.

Attorney Richardson will be handling the closing for both Towns today.

6 CHAIRMAN GOLDNER: Thank you.

We'll move to Mr. Richardson.

MR. RICHARDSON: Thank you, Mr.

Chairman.

18

19

20

21

22

23

24

It's been stated in the record already, but I'd like to state it again. The Town of North Hampton, and Hampton joins in this as well -- there's no objection to the franchise being expanded to include these But as you've heard in testimony, areas. both the Wiggin Way homeowners and the North Hampton residents really want the same thing, to be treated on equal footing. And we heard testimony today that, if you look at the cost per customer for North Hampton, it's about \$163 in fire protection charges, that if those were -- if the same rate were applied in Wiggin Way, those customers would be avoiding it. And it's a difficult exercise

to decide what a just and reasonable rate is, 1 to decide whether there's undue subsidy or 2 preference. But just because it's difficult 3 on the record to come up with a concrete 4 number isn't -- that's not a reason to avoid 5 doing it when the evidence shows that there 6 7 is a discrepancy. And that was really the point raised by Mr. Harned and raised by the 8 And the reason for asking that is to 9 say, look, we're looking at a problem that --10 11 it may be 18.7 percent. It's a different number in 2020 [sic]. It fluctuates some. 12 And depending on the methodology that gets 13 14 used, the numbers can come out a little bit 15 differently. And we're not the utility. We 16 only know what we can see from the annual 17 reports and from the discovery which we got, which was very limited. I mean, we wanted to 18 19 see what the system was, what should a 20 capital budget be for this. And we were 21 really denied the opportunity to do so 22 because each time we asked for that type of 23 information, the response was, "Aquarion doesn't have it. Aquarion didn't look at 24

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

it." And that's -- there's an element -- and I'm not accusing anyone of wrongdoing in that sense. But there's an element of willful ignorance in that approach. And it makes it harder for this Commission to do its job, which is to decide what is just and reasonable.

I'll suggest to you that the concept of "just and reasonable" under RSA 378:7, and the concept of "undue preference" or "advantage" under RSA 378:10 really comes down to paying a fair share. In other words, if you're receiving a benefit and you're a customer and there's a cost associated with that benefit that you're receiving, you should pay your share of it, whatever it is. And that's really where we would like to see this case go.

Now, there's been reluctance to do that because I think, to some extent,

Aquarion doesn't want to go through that exercise. They're looking at this as 43 customers. You know, let's -- we've been ordered to do this. Let's just make it

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

disappear rather than have to do a cost of service study ourselves to show that what our proposal is reasonable. I think we've raised the question, and I think that there are numbers that can be gleaned. And I know the Commission's role is not just as a judicial body but also as an investigative one. have the authority and, in some cases, even the obligation to reach your own conclusion. What we have done is make our best effort to provide a record and provide information that would allow you to do that. We respect and recognize that you have a lot of discretion. You also have a lot of expertise. And we would welcome your opinion highly on that because I honestly, looking at the Bench here, I would give your conclusion as to whether there is a subsidy and the amount much greater rate -- much greater weight than my own.

The one thing that does trouble me, though, is Aquarion's methodology, as you saw in response to North Hampton data request, was to look at this and say, well, there was

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

no added cost to serve these customers. But the language that they used in response to North Hampton Request 10, and that was in Exhibit 9, talked about variable costs. But we know from looking at administrative and general expenses that if you apply that ratio of the 43 customers being added to the total amount of, I think it was 1,477,000 in administrative and general, just as an example, that came out at about \$155 per customer.

There are also costs associated with pumping the water, supplying the water, the capital costs associated with the investment and plant. All of that is part of the entire operation which makes the fire protection water available at the hydrant right on the town line. And one thing I'm very convinced is that the fire departments would use those hydrants, even though the customers say they don't want them. I mean -- and they would benefit from it, even if they subjectively think it's not needed. You know, when there's a fire, the fire

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

department has a job to do, and that's to save lives and property. And they're going to do that in the best way that they can.

And our rate structure should be set up that would allow them to do that, because that is part of the public interest puzzle that gets solved in a franchise case.

So I think the Commission can turn to the F48, and you can look at what the costs are overall, and you can make an understanding of what these costs are. And what you'll see is there's not a budget leftover. If there's a main break here, the costs of a main break are going to exceed the revenues once you start looking at the Wiggin Way system being accounted for, its allocation of transmission of costs, of administrative and general, of all the other different components that are on the F48, which is included in Exhibit 9.

And this isn't that novel an approach.

When a town gets a water bill and it doesn't

have a water department, it doesn't have an

enterprise fund, it doesn't have a revenue

mechanism or a legal authority to just say, okay, we're going to take these taxpayers and we're going to make them pay for it. And then how would they do that. They don't have water service. They don't have water rates. You could have some customers with one-size mains -- or excuse me -- meters, others with different ones. But there's no mechanism for them to do that other than starting a water department of their own, but then that carries accounting costs. You know, if it were to be in a village district, you need to have separate elections, a separate clerk, a treasurer.

It's a very cumbersome process, where at the end of the day the Town does what it's supposed to do. It gets a bill because the tariff says that the Town gets a bill. The tariff says that North Hampton and Rye are all customers. Their only choice is to tell the DRA this is what our spending is for the rear. Please set our tax rate so we can send out a bill for it. There's not a clear mechanism set forth in any of the memoranda

 $\{DW 21-093\}$  [AFTERNOON SESSION ONLY]  $\{2/23/22\}$ 

1

16

17

18

19

20

21

22

23

24

that I read that would show a different path that would alleviate this problem. really not a problem in that sense, because the water service and the fire protection rates lower the fire insurance. That same process you heard today is going to happen in Wiggin Way. So not only are they going to get the public safety benefit, many of them, whether it's a thousand feet or whatever distance the insurance companies use in their fire system classifications, but they're going to benefit from it as well because the fire lines can go in multiples. They can go a thousand feet, the next pump trucks to that can go all the way out. And making that water available creates a situation where you don't need 15 trucks because you can fill the trucks right from the hydrant and deliver it to the site. And that's really what this case comes down to.

So our request is that the Commissioners look at this, they look at the evidence, and relying on their own expertise, sort through this and try to find the best outcome that is

just and reasonable and fair so that North
Hampton customers and Wiggin Way customers
are treated the same. Thank you.

CHAIRMAN GOLDNER: Thank you, Mr. Richardson.

Mr. Reimers.

MR. REIMERS: Thank you, Mr. Chair.

I've been with Wiggin Way for several years

now, beginning before the Water Council

appeal of the Towns.

Beginning in about 2004, the residents of Wiggin Way have been experiencing, or they began experiencing water quality and water quantity issues. And these were serious. The arsenic levels were dangerous, and they exceeded state standards. The system produced too little water, often running dry, and they had to get bulk deliveries. Most of us fortunately haven't had to deal, or at least I haven't, with running out of water. They limped along for years doing their best. NHDES closely reviewed these issues and then finally in April of 2017 issued an order requiring that

23

24

Aquarion permanently connect Wiggin Way, the 43 homes, to their system. The Towns of Hampton and North Hampton appealed to the Water Council. The main contention of the Towns was that providing water to these 43 homes would result in Aquarion not being able to fulfill their existing obligations to existing customers. As they stated in their notice of appeal, quote, It will severely hamper Aquarion's ability to meet water requirements of its current customers. Harned testified today that this is no longer And no harm has come to pass to a concern. the existing customers after four years, almost five, of Wiggin Way being connected.

To the Water Council, North Hampton also alleged, quote, Once Aquarion acquires the Wiggin Way water system, the cost of connecting to, repairing and upgrading this system and decommissioning the Wiggin Way wells will be borne by Aquarion's current customer base, end quote. Again, not true. The residents of Wiggin Way are paying for all of the costs of connection. They have

already paid certain of these bills. And they're paying for the cost of decommissioning the existing out-of-service water system. And as you heard from Mr. Roy, they've got significant costs ongoing until this matter is resolved and the franchise expanded. They have to keep that system going. Wiggin Way has also been paying a WICA surcharge that has already benefitted the Towns.

As Aquarion pointed out on Page 10 of their reply testimony in this case, and which I spoke with Mr. Harned about, the Towns have taken many positions over the years, and most of them have been rejected by DES, rejected by the Water Council. And some of them have already been rejected by the Commission. And we hope that you reject the current proposal of a clean water surcharge.

This year the Towns' new position is that they're concerned with Wiggin Way receiving fire protection services that Wiggin Way is not even asking for or receiving. Wiggin Way residents are already

paying for fire protection through their taxes that they pay to the Town of Stratham.

19

20

21

22

23

24

The Towns have desperately tried to make this a rate case. In their January 31st memo of law just a few weeks ago, the Towns state at Page 5, quote, This proceeding is more than a franchise expansion. Aquarion is proposing to change from one rate class, seasonal rates, to another, permanent rates. This triggers rate review under RSA 378:7, end quote. This is wrong. And so the Towns' argument that this is a rate case is based solely on a purported change from seasonal to permanent rates. And once you correct the Towns' incorrect premise, this is simply a franchise expansion to 43 new customers, nothing more. It is not a rate case.

For nearly five years the Town has blamed Wiggin Way for their well issues. They've called it "mismanagement." They've falsely portrayed the Wiggin Way residents as living in large homes, filling their pools with a hose, and indiscriminately watering their lawns. They have sought to penalize

Wiggin Way for their water problems, and now 1 they want Wiggin Way residents to pay a 2 discriminatory surcharge just to get clean 3 And they want Wiggin Way residents to 4 5 pay a discriminatory surcharge for not having They portray Wiggin Way residents 6 arsenic. 7 as "free-loading" off of the Aquarion system and free-loading off of Hampton and North 8 Hampton. In reality, the Wiggin Way 9 10 customers, 43 homes, consist of about 105 11 residents. These are families who have dealt with water problems for almost two decades, 12 have water-related costs that are more than 13 14 double the average New Hampshire water 15 customer. They're paying all of the cost of 16 interconnection, all of the cost of 17 decommissioning, and they've had to deal with fending off the Town's ever-shifting 18 19 argument. So please don't penalize these 20 people. They are the affected people. 21 Hampton and North Hampton act as if the 22 Aquarion water system is their own municipal 23 water system. They act as if there's a hierarchy of customers, with them at the top. 24

If the Towns have issues with Aquarion -- for example, they don't like the fire protection payments, or they don't like to clear snow from their hydrants, that's fine. But they treat the Wiggin Way residents that are happy to treat them as collateral damage in their fight with Aquarion. And this has been going on for years.

And I bring up the Water Council action. I know that's years past. But the Towns' arguments and behavior in this docket is very similar, and they have just been dragging Wiggin Way through their grievances with Aquarion.

So what we are asking for, as
Attorney Richardson said, is fairness.
Please treat all Aquarion customers equally.
And finally, put this matter to bed by
approving the franchise expansion so that the
DES order can finally be carried out.
They've had to deal with this issue for much
too long. They deserve a permanent
connection to clean water. They deserve
certainty after years of uncertainty. And

23

24

they deserve to market their homes as having guaranteed clean water. And they deserve to be treated like any other Aquarion water customer paying the regular tariff rate.

That is fairness.

Thank you for listening to us today and your thoughtful questions, and we really appreciate it. Thank you.

CHAIRMAN GOLDNER: Thank you.

We'll move to the Department of Energy. Mr.

Tuomala.

MR. TUOMALA: Thank you, The Department would like to Commissioners. take this time during closing to provide a framework for the Commission to look back and rely upon when it deliberates and ultimately decides this matter before it. There's been a considerable amount of discussion today, argument and information regarding rates, costs associated, and those subsequent With all that aside, the Department issues. would like to provide perspective by drawing the Commission's attention back to the original and ultimate issue in this docket,

and the dockets that precede it. As also highlighted by Mr. Reimers, this is a franchise expansion. And this case has been stated multiple times for Wiggin Way, which is 43 customers in Stratham who have been actually receiving water supply from Aquarion for almost the last five years.

Now, for a franchise expansion, the Commission must look to its relevant statutory authority, which includes RSA 374:22 and RSA 374:26 in its determination. Pursuant to RSA 374:22, quote, No person or business entity shall commence business as a public utility within the state without first having obtained the permission and approval of the Commission.

RSA 374:26 further states that the Commission will grant a request for franchise authority if it finds that it is for the public good. And pursuant to prior commission orders, the public good -- when determining the public good for a proposed franchise expansion, the Commission assesses, among other things, the managerial, technical

and financial expertise of the petitioner.

In this case, it would be Aquarion. You can find that in one of the most recent orders of Hampstead Area Water company, Order 26,301.

And that was from October 22nd of 2019.

Furthermore, under RSA 374:22, III, no water company shall obtain the permission or approval of the Commission to operate as a public utility without first satisfying any DES requirements concerning the suitability and availability of water.

Now, given those requirements and that framework applied to this instant docket, the Department supports the Company's request, absolutely. We note that the Commission has recently determined that Aquarion, through its current ownership, has demonstrated its managerial, financial and technical capabilities to operate a utility in New Hampshire. And that was from last year's different docket, purchase of the Abenaki Water System, Order No. 26,506, from August 6, 2021. And from the Department's standpoint, there's nothing in the record

that would change its mind or should change the Commission's mind to that finding from that order. In fact, Aquarion does possess all those capabilities of providing water and water service as a water utility in New Hampshire.

We also note the administrative notice of the DES letter which fulfills the subsection III of RSA 374:22 verifying Aquarion's ability to provide suitable an available water. As such, the Department supports a ruling that Aquarion's franchise expansion request is in the public good by the Commission and that the Commission grant Aquarion's franchise area for the Wiggin Way community.

Turning to the secondary issues in discussions about rates, possible surcharges. The Department, as a threshold matter, should note that this issue does not agree that the Commission should entertain a rate examination at this stage or in this docket at all. The Department would like to emphasize that its position is that this is

not a rate matter, and as such, the Towns' 1 requested relief should not be granted. 2 While prior Commission orders may have 3 acknowledged the application of currently 4 5 approved utility tariffs to a new customer group is, quote, just and reasonable, an 6 examination of a different rate is not 7 8 supported by precedence nor statutory authority. The language of RSA 374:22 and 9 374:26 does not allow for the imposition of a 10 11 surcharge on a proposed franchise area, as In fact, neither of 12 the Towns suggests. those statutes discuss the application or 13 examination of rates. 14 As such, the 15 Commission's examination should end there, 16 with its determination of the proposed 17 franchise expansion is within the public good and order accordingly. That argument aside, 18 19 however, the application of the requested 20 surcharge by the Towns also failed, as that 21 request was properly examined in the context 22 of a rate case, which is currently undergoing 23 in DW 21-184, or in the instance of a special contract, of which neither is applicable in 24

this docket itself as a franchise expansion.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

Even if -- I will go even further to say, even if the Commission could examine rates in a franchise expansion, the Department's position is that the application for the proposed surcharge amounts to little more than a penalty upon the Wiggin Way customers, which is impermissible per RSA 378:10, which prohibits undue or unreasonable prejudice or disadvantage to customers, and RSA 378:14, which prohibits a utility from charging or receiving a greater or lesser or different compensation for any service rendered to any person. It is clear in this docket that the utility would like to apply its currently approved tariff rates to these customers no different than any other residential customer in its system in New Hampshire. As such, the proposed application comports with 378:10 and 378:14. The proposed surcharge, however, would run afoul of both those statutes by allowing the Company to charge these 43 residential customers differently than its approximately

8- to 9,000 other residential customers it serves in New Hampshire.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

This is also not the examination of a rate change which has been mentioned in some of the prior briefs. The Towns previously argued that Aquarion's application of year-round rates instead of seasonal rates, both from its currently approved tariff, qualifies as a rate change and thus requires Commission authority. If that argument were held true, every instance of a different tariff rate application would require Commission approval -- e.g., a customer no longer residing in his seacoast home for 12 consecutive months elects to become a seasonal customer would require a docketed matter for Commission approval. Α rate change, furthermore, is not the application of one part of a tariff in place of another, but instead is a wholesale change to a tariff rate which would apply to every customer, not individually, which is typically the subject of a rate increase or a rate case, again, as in DW 20-184.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

If for some reason the Commission does rule that this is ripe for further rate examination as the Towns suggests, the Department's position would be that the burden should be placed upon the Towns as the party requesting a rate examination, as they should be the ones providing the supporting evidence with the implication of an unbiased expert cost of service study.

Lastly, the Department notes that the Company's original petition requested Commission approval of the asset transfer agreement between Wiggin Way and Aquarion. The Department, for the record, wants to maintain its position that it spoke about in the prehearing conference, that while the contract is evidence that no other Aquarion customers will bear the cost to expand this franchise and should be assigned the weight the Commission determines is appropriate in its examination, Commission approval for the agreement is not required nor permitted by The contract is entered into by a statute. private homeowner association and a utility.

1	As such, there's no statutory authority which
2	directs that Commission approval is
3	necessary. Had Wiggin Way been a utility,
4	then, yes, the Department would agree 374:30
5	would apply, requiring the Commission
6	authorize such a transfer. Again, the
7	Department is not refuting the transaction
8	agreement as evidence. It should be weighed
9	accordingly by the Commission, especially to
10	the fact that no other Aquarion customers
11	will be burden by this by Aquarion's
12	taking ownership over the Wiggin Way
13	property, but that approval by the Commission
14	for that agreement is not necessary.

In closing, the Department supports the expansion of Aquarion's franchise to permanently service the Wiggin Way community and respectfully requests that any rate matters be dismissed on the bases previously provided. Thank you for that.

MR. RICHARDSON: Mr. Chairman.

CHAIRMAN GOLDNER: Yes.

MR. RICHARDSON: In the interest of just trying to get to the right result, could

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

I just speak briefly to the one issue about RSA 378:14 that Attorney Tuomala just referenced?

CHAIRMAN GOLDNER: I'll allow it, yeah.

MR. RICHARDSON: I just want to point out that that statute does say you can't charge a different or lesser rate. that means that the utility has to charge the rate that is in its tariff. It really begs the question, though, because if -- I think the evidence shows that the Wiggin Way customers are receiving the fire protection benefits and the benefits of that service, but they're not paying for it. So it really comes -- it brings the investigation or question full circle. Obviously, if the Commission deems that an adjustment rate is appropriate, it can approve this as a condition and say we want to see the cost of the -- that that would be appropriate based on the evidence in an Order of Notice, and then the customers will receive that before it's approved and implemented.

So thank you. I wanted to get that out there. I'd actually invite Attorney
Tuomala, with the Commission's leave, to respond to it. But that's how I see that issue playing out. And I think it is an important one for this Commission to weigh in its review of this case.

CHAIRMAN GOLDNER: Taking an unusual approach to closing today, but Mr. Tuomala or Mr. Reimers, if you'd like to comment before we close with Ms. Chiavara.

MR. REIMERS: I'll leave that to Mr. Tuomala.

MR. TUOMALA: Thank you for that.

I guess a brief response is that I
respectfully disagree with Mr. Richardson.
We're talking about the application of
currently approved tariff rates. And if you
were to follow through with this surcharge,
that's different from what every other
Aquarion customer is facing, every other
residential customer, and thus starkly
contrasts with 374:18. There has been no
substantial evidence to the Department's

position provided by the parties that somehow 1 2 Wiggin Way customers are unfairly benefitting from fire protection. It's been stated 3 numerous times that they don't need it, 4 they're not requesting it. So it's not as if 5 they are somehow getting away with something. 6 7 A better word escapes me at this point. it's not as if there is proof in this record 8 that they need private fire protection in the 9 way of a hydrant in their system, and instead 10 11 they say, no, we'll just leap over the boundary here and take from that. 12 just looking for the application of the same 13 14 rates that everybody else does. And I think 15 that to the issue, a surcharge applied to 16 just them specifically does run afoul of that 17 statutory authority. Thank you. CHAIRMAN GOLDNER: 18 Okay. We'11 close with Ms. Chiavara. 19 20

MS. CHIAVARA: Thank you, Chair.

The Company has maintained throughout this docket, which the Department of Energy has just mapped out from a legal and regulatory standpoint, and will be

reiterated here to a certain extent, that 1 this is a matter of a franchise expansion and 2 continued application of the approved tariff 3 rate of Aquarion to the customers of the 4 5 Wiggin Way subdivision so that they may finally have a permanent solution to 6 receiving a safe and adequate supply of 7 8 water. Nothing in this matter triggers the need for rate analysis, and nothing 9 implicates any rights of the Towns of Hampton 10 The Commission's sister 11 and North Hampton. agency, the Department of Environmental 12 Services, found, pursuant to their authority 13 14 to require improvements under RSA 485:4, that there was a health issue to be remedied and 15 16 that Aquarion's water distribution system is the most feasible and cost-effective option 17 to address the Wiggin Way water system's 18 arsenic and low-water quality issues, which 19 20 is a definitive public good sufficient to 21 satisfy RSA 374:26 and to grant the franchise 22 expansion under RSA 374:22.

extension of a public utility to an area of impaired water quality. It states that, quote, RSA 485:4, II, provides that if DES determines that, one, an extension of water service from an existing public water supply system to the area of impaired water quality or quantity is the most feasible and cost-effective alternative; two, the extension is consistent with municipal master planning, local water system policies and rules, RSA 9-B and RSA 162-C:2,V; and three, the existing public water system has adequate water supply and system capacity to serve the problem area, DES shall order the municipality, corporation or person who owns the public water system to allow connection to its water distribution system from the identified area, regardless of existing municipal or public water system service area boundaries. DES found all of these things and ordered exactly that. While the DES certainly doesn't bind the Commission's action, DES, in its order, provides all the necessary facts to support the Commission

granting this limited franchise expansion.

Despite claims to their contrary, the Towns of Hampton and North Hampton are quite simply unaffected by the franchise expansion and should have no say in this In fact, their involvement in this matter for the last several years, and most recently in this docket, has done nothing but frustrate the mandate and delay implementation of the DES order and impaired the orderly and prompt conduct of this proceeding contrary to RSA 541-A:32 by raising numerous irrelevant, and unsupported claims, significantly complicating this docket and distracting from the very real problem facing the customers of Wiggin Way and the very straightforward solution of making them franchised customers of Aquarion. The dilatory tactics of the Towns and their punitive and discriminatory proposals should no longer be entertained. The customers of Wiggin Way need permanent relief, and Aquarion has done everything necessary and appropriate in response to the DES order,

including bringing this petition for a franchise expansion, the final regulatory step needed to resolve this matter. By promptly approving the Company's petition, the Commission will be resolving a longstanding problem for only affected customers to this matter, the 43 customers of Wiggin Way.

Nonetheless, the Towns persist with these baseless claims to support a discriminatory proposal that is contradicted by law and the Commission-approved Aquarion tariff. While the proposal for an 18.7 percent or any other surcharge should be rejected on its face for the reasons just discussed, there is also ample basis in law for rejecting this proposal. RSA 378:14 flatly prohibits a utility to, quote, charge or receive a greater or lesser or different compensation for any service rendered to any person, firm or corporation than the compensation fixed for such service by the schedules on file with the Commission and in effect at the time such service is rendered,

end quote.

The service Wiggin Way will receive is permanent, year-round water service only, not fire protection service. So the year-round water service rate is the only rate permitted to be charged to Wiggin Way. An 18.7 percent surcharge, or any surcharge, is prohibited by law. There are no provisions that would allow for it in Aquarion's tariff, and such a surcharge is purely discriminatory and would serve as a penalty for a non-existent offense. proposed surcharges, by definition, are unjust and unreasonable, and the application of it to Wiggin Way would be arbitrary and capricious.

The Towns' reliance on the hypothetical that one hydrant in North

Hampton could theoretically be used in the event of a fire to reach homes in Wiggin Way is no basis for the discriminatory treatment that they are proposing, and the situation is no different than many other areas where hydrants are in close proximity to residences

in adjoining towns. It is certainly no basis 1 for justifying the outlandish surcharge 2 proposal, which has not only been dispelled 3 by the other supporting facts about Wiggin 4 Way's fire protection discussed by Wiggin Way 5 and Aquarion witnesses today, and in 6 7 testimony, but on its own is wholly unpersuasive. As discussed in detail, 8 municipal boundaries determine who pays for 9 public fire protection service. Full stop. 10 11 There are no circumstances that support Wiggin Way paying anything related to public 12 fire protection service when there are no 13 14 hydrants in Wiggin Way. The Towns' claims 15 are particularly egregious when you consider 16 that the apparent objective is to gain financially by holding hostage a transaction 17 intended to ameliorate a health hazard. 18

In addition, the Company's witnesses thoroughly supported Aquarion's calculations regarding costs incurred and revenues generated by Wiggin Way, and the Towns' claims to the contrary are equally disingenuous. Aquarion is a regulated public

utility with a track record for excellent operations and service. The Company has a tremendous amount of experience in utility accounting and is supremely qualified to make the calculations presented to the Commission. There is no evidence to the contrary or reason to doubt them. In contrast, the Towns' witnesses have no utility or ratemaking experience or qualifications, and the claims are unsupported by any analysis and are factually incorrect. The Towns have raised nothing that even suggests the possibility that a subsidy prohibited by RSA 378:10 exists.

RSA 378:7 is also not at issue here. The purpose of RSA 378:7 is to change tariff rates, not to apply ad hoc changes to existing rates to certain customers, which is, as I said, prohibited by RSA 378:14. There is no rate change contemplated at all here. Wiggin Way is already paying the year-round water service tariff rate, and that is the only rate to apply. There is no change needed nor any change appropriate to

make.

In summary, the Company respectfully requests that the Commission grant the franchise expansion, as it clearly serves the public good. The facts of the public good are not in dispute, so there is nothing impeding an expedient grant of the franchise expansion. The expansion has the support of two sister agencies, and the residents of Wiggin Way badly need a permanent resolution for safe water and adequate supply. It is undisputed that the Aquarion system can provide this relief with no impacts to other customers, and for these reasons the Commission should approve the franchise expansion. Thank you very much.

CHAIRMAN GOLDNER: Okay. We'll take the matter under advisement and issue an order. We are adjourned. Thank you.

(Whereupon the hearing was concluded at 3:21 p.m.)

## CERTIFICATE

I, Susan J. Robidas, a Licensed
Shorthand Court Reporter and Notary Public
of the State of New Hampshire, do hereby
certify that the foregoing is a true and
accurate transcript of my stenographic
notes of these proceedings taken at the
place and on the date hereinbefore set
forth, to the best of my skill and ability
under the conditions present at the time.

I further certify that I am neither attorney or counsel for, nor related to or employed by any of the parties to the action; and further, that I am not a relative or employee of any attorney or counsel employed in this case, nor am I financially interested in this action.
