

To Whom It May Concern: some time ago, it came to our attention our parcel of land was located just outside of the service territory of Liberty Utilities. We purchased this parcel in March 2020 with the intent to build a home on this site.

As we eventually learned to our great surprise, this geographic location is not actually covered by **any** electrical utility. We have since met with Liberty Utilities at our site and are advising and confirming we agree with the petition Liberty has filed. We are requesting approval be expedited for Liberty that would permit their territory to be extended to include our location, as we still have no electricity on site.

Our interest in securing timely approval is to get electricity access to continue building our home, as well as for electricity supply once it is completed. Location and service address:

781 Monroe Rd.
Bath, NH 03740

Thank you in advance for your prompt attention to this matter.

Best regards,

Steve Rood, LEED GA, MBA
