

**Public Service Company of New Hampshire d/b/a Eversource Energy**  
**Docket No. DE 22-021**

**Date Request Received: December 13, 2022**  
**Data Request No. RR-001**

**Date of Response: December 19, 2022**  
**Page 1 of 1**

**Request from: New Hampshire Public Utilities Commission**

**Witness: Littlehale, Parker and Lamontagne, Luann**

---

**Request:**

**Record Request (Exhibit 5 - CONFIDENTIAL):** Please provide confidentially to the Commission (and DOE and OCA) the risk premium calculated for all three Eversource service territories going back four years.

**Response:**

Please see 22-021\_2022-12-13\_exh\_5 – CONFIDENTIAL, that shows the risk premium calculated for all three Eversource service territories going back four years.

- **Please note, for the large customer proxy:** Upon compiling the information for this exhibit, the Company discovered that the NSTAR East (NEMA) and NSTAR East (SEMA) multipliers from 11/15/2022 were inadvertently left out of the calculation. Eversource has corrected the multiplier number above. The 1.855 multiplier that Eversource used on December 6th for Large Customers should have been 1.934. The difference in the multiplier would have only further supported the Company's assessment of the Large Customer Group bid that was received.
  - To account for this updated calculation, Eversource has revised the Confidential excel spreadsheet for LJL-3.
