III. BACKGROUND

1

- 2 Q. When did it become necessary for electric utilities in New Hampshire to purchase
- 3 energy on behalf of their customers in the manner they do now?
- 4 A. It began in 1996 when the New Hampshire legislature passed RSA 374-F, which started
- 5 the process of deregulation, or restructuring, and required utilities in the state to divest
- 6 their ownership of generation assets. Prior to 1996, the utilities generated most or all of
- 7 the power their customers consumed and passed the costs of doing so on to their
- 8 customers through regulated rates.
- 9 Q. Who provides energy to New Hampshire ratepayers now?
- 10 A. Deregulation created competition in the energy market throughout the state, meaning that
- customers could either choose a third-party supplier to provide the commodity portion of
- their service or receive the commodity portion of their service from their electric utility,
- as was the practice before deregulation. For customers who do not choose a third-party
- supplier, those customers are served by the electric distribution utility under energy
- service.
- 16 Q. How have the procurement practices of the New Hampshire utilities changed since
- 17 **deregulation was implemented?**
- 18 A. Several dockets and their resulting settlement agreements and orders have established and
- then refined how utilities make energy service solicitations, how bids are evaluated, and
- 20 how best to conduct the entire procurement process. Those proceedings include the
- 21 Settlement Agreement in Docket No. DE 05-126, dated November 18, 2005, which was
- approved by the Commission in Order No. 24,577 (Jan. 13, 2006), amended by Order No.

2		27, 2013) in Docket No. DE 13-018, and further amended by Order No. 25,806 (Sept. 2,
3		2015) in Docket No. DE 15-010. Liberty followed those approved processes in
4		conducting the energy service solicitation that gives rise to the rates being proposed in
5		this docket.
6	IV.	RECONCILIATION OF ENERGY SERVICE ADJUSTMENT FACTOR (ESAF)
7	Q.	Please summarize the Company's ESAF reconciliation.
8	A.	The Company calculates the differences between revenues and costs on an annual basis
9		for the following items for this reconciliation filing:
10		• Energy Service Reconciliation – power supply
11		• Renewable Portfolio Standard ("RPS") reconciliation – costs for
12		complying with its RPS obligations
13		• Energy Service Adjustment Provision, which consists of two components:
14		o Energy Service Adjustment Factor ("ESAF") reconciliation – any
15		over- or under-collection of the prior period's ESAF
16		o Energy Service Cost Reclassification Adjustment Factor
17		("ESCRAF") reconciliation – any over- or under-collection of the
18		prior period's ESCRAF

V. ENERGY SERVICE RECONCILIATION

1

19

2	Q.	Is the Company presenting a reconciliation of Energy Service power supply costs
3		and revenues in this filing?
4	A.	Yes. The Energy Service Reconciliation for the period August 2021 through July 2022 is
5		presented in Schedule HMT/AMH-3, page 1.
6	Q.	Please explain the Energy Service Reconciliation.
7	A.	Schedule HMT/AMH-3, page 1, presents the reconciliation of Energy Service revenue
8		and Energy Service expense by month for the reconciliation period. The detail behind
9		each month's Energy Service revenue is included on page 2 of Schedule HMT/AMH-3.
10		The detail behind each month's Energy Service expense is included on page 3 of
11		Schedule HMT/AMH-3.
12	Q.	On Schedule HMT/AMH-3, page 2, why is the Company subtracting amounts from
13		Energy Service revenue in column (a) for the other components of revenue in
14		columns (b) through (e)?
15	A.	Any revenue relating to the RPS compliance, Energy Service Adjustment Factor, and the
16		Energy Service Cost Reclassification Adjustment Factor is reconciled separately from
17		Energy Service revenue. To perform these separate reconciliations, the revenue for these
18		items is subtracted from the total Energy Service revenue billed to customers to properly

reflect the base Energy Service revenue for the current reconciliation period.

Direct Testimony of H. Tebbetts and A. Hall

Page 8 of 13

1	Q.	What is the result of the Company's Energy Service Reconciliation for the period
2		ending July 2021?
3	A.	As shown on Schedule HMT/AMH-3, page 1, the Company has estimated an over-
4		collection of Energy Service power supply costs of \$1,285,492 and will reflect this over-
5		collection in its proposed Energy Service Adjustment Factor to take effect on August 1,
6		2022.
7	Q.	Is the Company presenting a reconciliation of the cost of complying with the
8		Renewable Portfolio Standard obligation in this filing?
9	A.	Yes. The RPS Reconciliation for the period July 2021 through June 2022 is presented in
10		Schedule HMT/AMH-4. Although the RPS program year is a calendar year, the
11		reconciliation year is July 2021 through June 2022 because the Company may purchase
12		Renewable Energy Certificates (RECs) and make Alternative Compliance Payments
13		(ACPs) to meet its 2021 RPS obligations through June 2022. The expenses associated
14		with the 2021 program year are accounted for through June 13, 2022, because the trading
15		period for the 2021 program year ends on June 13, 2022. After this date, the Company

year.

A. Schedule HMT/AMH-4 presents the actual reconciliation of RPS compliance adder revenue and expense by month. The RPS compliance adder revenue is collected from
Energy Service customers during the period. These costs are based on actual revenues
and expenses for the period. The Company has estimated an over-collection of \$863,492.

will know its obligations for RPS compliance and/or to pay the ACPs for the previous

Docket No. DE 22-024
Direct Testimony of H. Tebbetts and A. Hall
Page 9 of 13

1		The primary reason for this estimated over-collection is the timing mismatch between
2		2022 RPS revenue and 2021 RPS costs. The RPS expenses incurred in 2022 were to
3		meet a portion of the 2021 RPS obligation. The 2021 RPS revenue is based on the
4		increased RPS obligation for 2021 as compared to 2020 and the estimated market price of
5		2021 RPS RECs.
6	Q.	How is the Company treating the projected over-collection of RPS expense?
7	A.	Consistent with the previously-approved methodology, the Company has combined the
8		projected RPS expense over-collection with the projected over-collection of Energy
9		Service power supply costs in the calculation of the proposed Energy Service Adjustment
10		Factor.
11	VI.	CALCULATION OF THE ESAF RECONCILIATION
12	Q.	Please explain Schedule HMT/AMH-5.
13	A.	The calculation of the Energy Service Adjustment Factor charged to customers includes
14		the over-collection of Energy Service, the overcollection associated with the Energy
15		Service Adjustment Factor for the prior period, and the overcollection of RPS. The sum
16		of these amounts is estimated to be an over-collection of \$349,570 which, when divided

by estimated Energy Service forecasted kilowatt-hour sales, results in an estimated ESAF

of (\$0.00066) to be included in Energy Service rates effective August 1, 2022.

18

1	VII.	ENERGY SERVICE COST RECLASSIFICATION ADJUSTMENT FACTOR
2		(ESCRAF) RECONCILIATION
3	Q.	Please describe the reconciliation of the administrative costs of providing Energy
4		Service.
5	A.	The Company must reconcile its administrative costs of providing Energy Service with
6		its Energy Service revenue associated with the collection of administrative costs, and the
7		excess or deficiency resulting from that reconciliation, including interest at prime, must
8		be reflected in the subsequent year's ESCRAF.
9	Q.	Is the Company presenting a reconciliation of administrative costs of providing
10		Energy Service with its Energy Service revenue associated with the collection of
11		administrative costs in this filing?
12	A.	Yes. The ESCRAF Reconciliation for the period August 2021 through July 2022 is
13		presented in Schedule HMT/AMH-6.
14	Q.	Please explain the ESCRAF reconciliation.
15	A.	The detail behind each month's ESCRAF administrative expense is shown on pages 2
16		through 4 of Schedule HMT/AMH-6. The calculation of the cash working capital impact
17		is presented on pages 5 through 8 of Schedule HMT/AMH-6.
18	Q.	Has the Company calculated the proposed ESCRAF for the period beginning
19		August 1, 2022?
20	A.	Yes. Schedule HMT/AMH-6, page 1, calculates the estimated ESCRAF of \$0.00068 per

kWh for the Small Customer Group and \$0.00300 per kWh for the Large Customer

1	Group for the period of August 1, 2022, through July 31, 2023. The proposed ESCRAF
2	would be combined with the Energy Service rates for billing.

3 Q. Has the Company calculated the ESCRAF in the same manner as in the prior year's

- 4 filing?
- 5 A. Yes. The Company has calculated the ESCRAF in the same manner as in the prior year's
- filing and in accordance with the methodologies and allocations approved in the
- 7 Settlement Agreement in Docket No. DR 95-169, Granite State Electric Company Rate
- 8 Increase.

9 VIII. PROPOSED ENERGY SERVICES RATES

- 10 Q. Please describe the Company's most recent solicitation.
- 11 A. As further described in Mr. Warshaw's upcoming June 13, 2022, testimony, the
- 12 Company goes out to bid for pricing for the periods of February through July, and August
- through January. Those final awarded bids are translated into rates using the monthly bid
- price (MWh) multiplied by the load loss factor, calculated by Liberty's Energy
- Procurement group. The base energy service rate calculation will be provided in
- Attachments HMT/AMH-1 and Attachment HMT/AMH-2, line 10, on June 13, 2022.
- 17 Q. What adjustments are made?
- 18 A. Two adjustments are made, one for an RPS factor and one for a reconciling factor.
- 19 Q. What is the RPS factor?
- 20 A. New Hampshire's RPS statute, RSA 362-F, requires each electricity provider to meet
- certain percentages of their customer load by purchasing RECs representing generation

Liberty Utilities (Granite State Electric) Corp. d/b/a Liberty
Docket No. DE 22-024
Direct Testimony of H. Tebbetts and A. Hall
Page 12 of 13

from various renewable sources based on total MWh supplied to their customers. New Hampshire's RPS statute divides renewable energy sources into four separate classes. As the Company is a provider through its energy service, we must procure RECs to meet the annual RPS obligations or make ACP to the extent RECs are not available or are not appropriately priced. These obligations may be found on the Commission's website³. The factor is the charge to customers to pay for those requirements added to the base energy service rate.

8 Q. What is the reconciling factor?

1

2

3

4

5

6

7

As the Company procures RECs or makes ACPs to meet the RPS obligation each year, those costs change. The reconciling factor is the vehicle for the Company to collect or refund the under- or over-collection from the previous period.

12 Q. Is this approach typical?

13 A. Yes, each year since 2008 Liberty has calculated the RPS factor and the reconciling
14 factor when proposing energy service rates for a twelve-month period and then applied
15 the same factors when proposing its next set of energy service rates, for the subsequent
16 twelve-month period. Accordingly, we expect to propose new factors when the Company
17 next proposes rates for August 2023, which it will do around May 2023. The factor will
18 stay in place through July 2024.

1 Q. Do the results of these calculations establish the energy service rates for Liberty's

- 2 **default customers?**
- 3 A. The Large Customer Group pays the monthly rate calculated. The Small Customer
- 4 Group is billed on a weighted-average six-month rate.
- 5 Q. Please explain.
- 6 A. The pricing received from the winning bidder provides a monthly price for the six-month
- period. For rate stability, the various Commission orders cited above require the Small
- 8 Customer Group's rate to be calculated as a weighted-average six-month rate. The Large
- 9 Customer Group pays the monthly rate instead of paying a weighted-average six-month
- rate.
- 11 Q. Does this conclude your testimony?
- 12 A. Yes, it does.
