

**THE STATE OF NEW HAMPSHIRE
BEFORE THE
PUBLIC UTILITIES COMMISSION**

Unitil Energy Systems, Inc.

DOCKET NO. DE 21-030

REQUEST FOR CHANGE IN RATES

PETITION FOR STEP ADJUSTMENT

Consistent with the terms of the Settlement Agreement filed with the New Hampshire Public Utilities Commission (the “Commission”) in this docket on February 11, 2022, Unitil Energy Systems, Inc. (the “Company”) hereby petitions the Commission to approve a step adjustment as called for in the Settlement Agreement and for such other relief as requested. In support of this Petition, the Company states as follows:

1. The full procedural history for this docket is set forth in the Settlement Agreement filed with the Commission on February 11, 2022.
2. Pursuant to Section 2 of the Settlement Agreement, the Settling Parties agreed that the initial rate change shall be followed by two additional Step Adjustments to rates on June 1, 2022 and June 1, 2023, effective on a service-rendered basis. This filing represents the first of those step increases.
3. Section 2.3 of the Settlement Agreement provides that the Company shall file its June 1, 2022 step adjustment with the Commission for review and approval on or before February 28, 2022 in accordance with Section 5.2.

4. Section 5.2 of the Settlement Agreement provides that the Step Adjustment filings shall include, at a minimum, a list of all capital projects completed in each Investment Year, which shall include a project description, the initial budget, any revised budget, final cost, and the date each project was booked to plant in service. In addition, each step adjustment filing shall include, for each project, all project documents, including but not limited to, Capital Budget Form, Construction Authorizations (including any applicable change orders), and Work orders.

5. Included with this Petition are the Direct Testimony of Christopher J. Goulding and Kevin E. Sprague (marked as Exhibit CGKS-1) and supporting Schedules (Schedules CGKS-1 through CGKS-9). The testimony, and the supporting schedules, present the Company's revenue requirement for its 2022 Step Adjustment based on 2021 capital spending, provide the Revenue Apportionment to the Company's rate classes, class Rate Design, and the resulting Monthly Decoupling Revenue Per Customer Targets for effect June 1, 2022, and provide class Bill Impacts associated with the 2022 Step Adjustment.

6. As described in the above-identified testimony, and the supporting schedules, this filing provides the relevant support for the Company's June 1, 2022 Step Adjustment consistent with the terms of the Settlement Agreement.

7. Pursuant to the terms of the Settlement Agreement, the June 1, 2022 Step Adjustment is capped at \$1,377,331. As described in the testimony and supporting schedules, the calculated 2022 Step Adjustment is \$1,376,786 for 2021 capital spending.

7. The rate adjustments requested by the Company in this filing result in rates that are just and reasonable and in the public interest and should, therefore, be approved.

WHEREFORE, the Company respectfully requests that the Commission:

A. Grant the Company's 2022 Step Adjustment request for a revenue requirement increase in the amount of \$1,376,786 as described in the included testimony and supporting schedules; and

B. Order such further relief as may be just and appropriate.

Respectfully submitted,

UNITIL ENERGY SYSTEMS, INC.

By its Attorneys:

Patrick Taylor
Chief Regulatory Counsel

Matthew C. Campbell
Senior Counsel

Matthew Fossom
Senior Counsel

Unitil Service Corp.
6 Liberty Lane West
Hampton, NH 03842-1720

Dated: February 28, 2022

Certificate of Service

I hereby certify that on this 28th day of February 2022, a copy of the foregoing Petition was served pursuant to N.H. Code Admin. Rule Puc 203.11.

Matthew C. Campbell

1 **I. INTRODUCTION**

2 **Q. Please state your name and business address.**

3 A. My name is Christopher J. Goulding, and my business address is 6 Liberty Lane
4 West, Hampton, New Hampshire 03842.

5 My name is Kevin E. Sprague, and my business address is the same as Mr.
6 Goulding's.

7 **Q. Mr. Goulding, what is your position and what are your responsibilities?**

8 A. I am the Director of Rates and Revenue Requirements for Unitil Service Corp.
9 ("Unitil Service"), a subsidiary of Unitil Corporation ("Unitil Corp") that
10 provides managerial, financial, regulatory and engineering services to Unitil
11 Corp's utility subsidiaries including Unitil Energy Systems, Inc. ("UES" or the
12 "Company"). My responsibilities include all rate and regulatory filings related to
13 the financial requirements of UES and Unitil Corp's other subsidiaries.

14 **Q. Please describe your business and educational background.**

15 A. In 2000 I was hired by NSTAR Electric & Gas Company ("NSTAR," now
16 Eversource Energy) and held various positions with increasing responsibilities in
17 Accounting, Corporate Finance and Regulatory. I was hired by Unitil Service in
18 early 2019 to perform my current job responsibilities. I earned a Bachelor of
19 Science degree in Business Administration from Northeastern University in 2000
20 and a Master's in Business Administration from Boston College in 2009.

1 **Q. Have you previously testified before this Commission or other regulatory**
2 **agencies?**

3 A. Yes, I have testified before the New Hampshire Public Utilities Commission (the
4 “Commission”) on various financial, ratemaking and utility regulation matters,
5 including utility cost of service and revenue requirements analysis. I have also
6 testified before the Maine Public Utilities Commission and Massachusetts
7 Department of Public Utilities on similar matters on several occasions.

8 **Q. Mr. Sprague, what is your position and what are your responsibilities?**

9 A. I am Vice President of Engineering for Unitil Service. In this capacity, I manage
10 all of the Company’s engineering functions, including electric engineering, gas
11 engineering, computer-aided design and drafting, Geographic Information
12 Systems (“GIS”), and management of utility-owned land and property.

13 **Q. Please describe your business and educational background.**

14 A. I been employed by Unitil Service for over 25 years. I was originally hired as an
15 Associate Engineer in the Electric Distribution Engineering group. I have held
16 the positions of Engineer, Distribution Engineer, Manager of Distribution
17 Engineering, Director of Engineering and now Vice President of Engineering. I
18 accepted the Vice President of Engineering position in January of 2019. I hold a
19 Bachelor of Science in Electric Power Engineering from Rensselaer Polytechnic
20 Institute and a Master of Business Administration from the University of New
21 Hampshire.

1 **Q. Do you have any licenses that qualify you to speak to issues related to**
2 **engineering?**

3 A. Yes. I am a registered Professional Engineer in the State of New Hampshire and
4 the Commonwealth of Massachusetts.

5 **Q. Have you previously testified before this Commission or other regulatory**
6 **agencies?**

7 A. Yes, I have testified on previous occasions before the New Hampshire Public
8 Utilities Commission, the Maine Public Utilities Commission and the
9 Massachusetts Department of Public Utilities. Most recently, I have testified in
10 UES' pending rate case in docket DE 21-030. I have also testified in several of
11 UES' annual Reliability Enhancement Program ("REP"), Least Cost Integrated
12 Resource Planning ("LCIRP") and Vegetation Management Program ("VMP")
13 filings, and Grid Modernization related dockets.

14 **II. SUMMARY OF TESTIMONY**

15 **Q. What is the purpose of your testimony?**

16 A. The purpose of our testimony is to present and support the Company's revenue
17 requirement for its 2022 Step Adjustment based on 2021 capital spending. The
18 next part of our testimony provides the Revenue Apportionment to the
19 Company's rate classes, class Rate Design, and the resulting Monthly Decoupling
20 Revenue Per Customer ("RPC") Targets for effect June 1, 2022. We also provide
21 class Bill Impacts associated with the 2022 Step Adjustment.

1 **Q. Please explain the increase for the 2022 Step Adjustment.**

2 A. The calculated 2022 Step Adjustment is \$1,376,786 for 2021 capital spending and
3 is included in this testimony pursuant to the proposed Settlement Agreement in
4 DE 21-030 (“Settlement Agreement”). The 2022 Step Adjustment was derived by
5 calculating the revenue requirement associated with the annual Change in Non-
6 Growth Net Plant for the period January 1, 2021 through December 31, 2021.
7 Additional details for the 2022 Step Adjustment are provided later in this
8 testimony.

9 **III. 2022 STEP ADJUSTMENT**

10 **Q. What was the Company’s forecasted capital spending for calendar year 2021**
11 **for the 2022 Step Adjustment in docket DE 21-030?**

12 A. As shown on Table 1 (Bates 363) of the Company’s pre-filed direct testimony of
13 Kevin E. Sprague in docket DE 21-030, the forecasted capital spending was
14 \$31,586,277. This was based upon a five year capital budgeted forecast that was
15 developed in 2020. The actual 2021 plant additions and cost of removal closed to
16 plant was \$26,034,218.

17 **Q. Has the Company provided a summary of projects placed into service in**
18 **2021?**

19 A. Yes. Schedule CGKS-1 provides a summary, by project, of capital additions
20 placed into service during calendar year 2021. This schedule provides each
21 applicable projects authorization number, budget code, associated FERC

1 accounts, installation costs, cost of removal, salvage, original and any subsequent
2 authorizations, budget, and date the project(s) were placed into service.
3 Importantly the summary also designates each project as with Growth (“G”) or
4 Non-Growth (“NG”) and a split showing the amount of capital additions for each
5 category is provided. During calendar year 2021 the Company had \$23,467,010 of
6 additions with \$17,757,782, or 76% classified as Non-Growth.

7 **Q. Has the Company provided Capital Budget Input Sheets and Capital**
8 **Authorization requests?**

9 A. Yes. Schedule CGKS-2 provides the Company’s Capital Budget Input Sheets and
10 Capital Authorizations for all investments placed into service during 2021.
11 Capital Budget Input Sheets provide the scope, justification and raw budget inputs
12 used by the capital budget system to calculate the budgeted amount. The Capital
13 Authorizations provides further detail on the scope and justification for the
14 project, budgeted amount, and authorized amount. If any subsequent Revised or
15 Supplemental Authorizations were required the Company has provided those
16 documents as well.

17 **Q. Has the Company provided Cost Records for projects placed in service in**
18 **2021?**

19 A. Yes. Schedule CGKS-3 provides the Company’s Cost Records for specific
20 projects placed in service in 2021. Schedule CGKS-4 provides the Company’s
21 Cost Records for blanket projects placed in service in 2021.

1 **Q. How is Net Utility Plant derived?**

2 A. Page 1 of Schedule CGKS-5 shows Beginning Utility Plant, Plant Additions,
3 Retirements, and Ending Utility Plant on Lines 1-4. Plant Additions and
4 Retirements are detailed on Page 2 by FERC account. Then Page 1, Lines 5-9
5 show Beginning Accumulated Depreciation, Depreciation, Retirements, Cost of
6 Removal, Salvage, Transfers, and Ending Accumulated Depreciation. The
7 difference between Ending Utility Plant and Ending Accumulated Depreciation
8 results in Ending Net Utility Plant shown on Line 10.

9 **Q. What is the change in Net Utility Plant in Service for calendar year 2021?**

10 A. The Ending Net Utility Plant seen on Page 1 of Schedule CGKS-5, Line 10, is
11 \$280,003,109. This figure will be the amount filed in the Company's 2021 FERC
12 Form 1, less the pro forma adjustment related to the Kensington Distribution
13 Operating Center in docket DE 21-030. The Beginning Net Utility Plant of
14 \$269,855,036, the difference of Line 1 and Line 5, matches the Ending Net Utility
15 Plant from the Settlement Agreement. Line 11 shows the Change in Net Utility
16 Plant of \$10,148,073.

17 **Q. How is the Revenue Requirement derived?**

18 A. The method used to calculate the Revenue Requirement is set forth in Section 2
19 and Section 5 of the Company's proposed Settlement Agreement. The annual
20 Change in Net Utility Plant provided above is multiplied by a factor of 76% and is
21 shown in Line 13. The factor of 76% represents the ratio of 2021 non-growth
22 capital additions to total capital additions and is supported in Schedule CGKS-2.

1 Then, Line 13 is multiplied by Line 14, pre-tax rate of return, to derive the Return
2 and Taxes on Line 15. The Pre-Tax Rate of Return of 9.19% is calculated on
3 Page 4, Column 6, Line 5. Next, Depreciation Expense is calculated on 76% of
4 the annualized depreciation of Plant Additions for 2021. The depreciation rate of
5 3.35% reflects the composite depreciation rate in docket DE 21-030. Then,
6 Property Taxes are calculated on 76% of the Change in Net Utility Plant (Line
7 13). A property tax rate of 0.66% was utilized to recover State utility property
8 taxes, using the currently effective statutory tax rate in RSA 83-F:2, or \$6.60 per
9 \$1,000 of investment. Next, per Section 5.6 of the Settlement Agreement, \$39,969
10 of post-test-year software amortization is included for recovery. Finally, Return
11 and Taxes, Depreciation Expense, Property Taxes and the Amortization of Post-
12 Test-Year Projects are added together to arrive at the Revenue Requirement in
13 Line 19.

14 **Q. What is the Revenue Requirement that you derived?**

15 A. Page 1 of Schedule CGKS-5, Line 19, shows the Revenue Requirement of
16 \$1,376,786.

17 **Q. Is the Revenue Requirement at or below the first step adjustment cap?**

18 A. Yes, pursuant to Section 2.2 of the Settlement Agreement, the first step
19 adjustment request will be for a Revenue Requirement amount not higher than
20 \$1,377,331, which is \$545 higher than the amount the Company is requesting.

1 **IV. RATE DESIGN & DECOUPLING TARGETS**

2 **Q. Please describe how the Revenue Requirement increase was allocated to rate**
3 **classes.**

4 A. The Revenue Requirement increase was allocated to the rate classes consistent
5 with Section 6.3 of the Settlement Agreement, which applies increases
6 proportionately to all customer classes except outdoor lighting, using proposed
7 April 1, 2022 distribution rates and test year billing determinants. The outdoor
8 lighting class revenue requirement remains the same. A schedule showing the
9 resulting allocation of the Revenue Requirement is provided in Schedule CGKS-
10 6.

11 **Q. Please explain the 2022 Step Adjustment Rate Design.**

12 A. Schedule CGKS-7 shows the rate design from currently proposed rates for effect
13 April 1, 2022 in Docket DE 21-030 to the rates proposed in this filing. As shown
14 on pages 1 and 2, for the purpose of the rate calculations, the 2020 Test Year
15 billing determinants are shown in Column (G). Columns (H) through (I) show the
16 Company's proposed rates, revenues, as well as the dollar and percentage changes
17 from the Company's Settlement Agreement permanent rate increase effective
18 April 1, 2022. Next, Columns (L) through (P) shows the Company's proposed
19 2022 Step Adjustment increase of \$1,376,786. The increase is applied
20 proportionately through distribution demand or energy charges as applicable for
21 all rate classes. Outdoor lighting rates remain the same. The fixed transformer
22 ownership discounts were left unchanged. Please note that amount of the increase

1 generated in the rate design process differs slightly from the Step Increase due to
2 rounding of the rates. Rates for the Residential Whole House Time of Use
3 (“TOU”) and Residential and General Service Electric Vehicle (“EV”) class are
4 provided on page 3. As noted, these rates are subject to approval in DE 20-170
5 and may have a different effective date. Pursuant to the Settlement Agreement in
6 this proceeding, the Residential Whole House TOU rates shall be the same as the
7 Residential TOU rate for EV charging, as updated from time to time, except that
8 the customer charge for the Whole House TOU rate shall be the same as the
9 customer charge for regular residential service. The demand and energy
10 distribution rates for the Residential Whole House TOU and Residential and
11 General Service Electric Vehicle rate classes were adjusted by the same
12 percentage as the corresponding rate class.

13 **Q. Has the Company provided proposed Monthly Revenue Per Customer**
14 **Targets?**

15 A. Yes. Schedule CGKS-8 provides the Company’s proposed Monthly Target RPCs
16 effective June 1, 2022 reflecting the Revenue Requirement of \$1,376,786
17 described above. The calculation reflects the methodology agreed upon and
18 described in Section 4.1 of the Settlement Agreement. These calculations are
19 driven by the Company’s rate design to generate monthly revenue targets so are
20 subject to rounding as discussed above.

1 **V. TARIFF UPDATES**

2 **Q. Does this filing include a revised Summary of Delivery Service Rates and a**
3 **Revised Summary of Low-Income Electric Assistance Program Discounts?**

4 **A.** No. The Company intends to file revised rate schedules and rate summaries in a
5 compliance filing when an order is issued since these same tariff pages are
6 pending approval for effect April 1, 2022. Once approved, those tariff pages will
7 serve as the basis to prepare the tariff changes for effect June 1, 2022.

8 **VI. BILL IMPACTS**

9 **Q. What are the class bill impacts proposed for June 1, 2022?**

10 **A.** Bill impacts are computed and shown in Schedule CGKS-9. These reflect the
11 distribution rates as proposed in this filing versus proposed rates effective April 1,
12 2022 as a part of the Company's Settlement Agreement. As a result of this filing,
13 a typical 600 kWh residential customer on Default Service will see a monthly bill
14 increase of \$0.92 or 0.5%. Impacts to other rate classes will be similar, but may
15 vary based on size and consumption pattern.

16 **VII. CONCLUSION**

17 **Q. Does this conclude your testimony?**

18 **A.** Yes, it does.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$67,479.30
Less Customer Contribution:	\$34,915.23
Net Authorized Cost:	\$32,564.07
Retirement:	\$0.00
Cost Of Removal:	\$0.00
Salvage:	\$0.00
CWO Total:	\$67,479.30

DESCRIPTION/SCOPE

Three Phase, primary underground line extension to provide three phase service to the proposed medical office building being constructed on Pleasant St., Concord. The Concord Hospital will pay in advance the reduced estimated cost of this line extension in accordance with the Economic Development Program. A final accounting will be made after the work has been completed and the customer will be credited or billed for the difference between the estimate and actual cost.

JUSTIFICATION

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$759,325.00
Less Customer Contribution:	\$45,559.00
Net Authorized Cost:	\$713,766.00
Retirement:	\$3,120.00
Cost Of Removal:	\$142,196.00
Salvage:	\$390.00
Blanket Authorization Total:	\$617,519.00

DESCRIPTION/SCOPE

This authorization covers the costs associated with minor additions and improvements to the sub-transmission and distribution systems where such improvements cannot be reasonably identified and budgeted as a specific project. The majority of this work stems from our own inspection programs, routine improvements to the system as a result of customer complaints, routine Engineering Work Requests and routine reliability improvement efforts that are less than \$20,000.

The total amount of this authorization covers the costs projected for the first six (6) months of 2018 which was derived from reviewing historical expenditures for the first six (6) months as follows:

Year First 6 months % of Total Actual

2012 \$441,700 39%

2013 \$508,900 38%

2014 \$541,400 36%

2015 \$607,500 39%

2016 \$711,100 46%

2017 \$648,800 35%

Total Budgeted Amount \$1,830,168

Authorization Amount \$ 713,766 (39% of total budget).

Balance \$1,116,402

JUSTIFICATION

Replacement of equipment due to various causes.

NOTES

For 2018 this blanket will also be utilized to replace equipment (primarily insulators and cutouts) on the distribution system which was a result of our 2017 Fall and both 2018 surveys from our Exacter inspection program. This project identifies and predicts failures of equipment prior to their failure.

7/23/2018	YES	Brock, Laurence <i>Chief Accounting Officer & Controller</i>		
7/23/2018	YES	Collin, Mark <i>SVP And Chief Financial Officer</i>		

DESCRIPTION/SCOPE

This revised authorization covers the costs associated with minor additions and improvements to the sub-transmission and distribution systems where such improvements cannot be reasonably identified and budgeted as a specific project. The majority of this work stems from our own inspection programs, routine improvements to the system as a result of customer complaints, routine Engineering Work Requests and routine reliability improvement efforts that are less than \$30,000.

The total year projection was derived from reviewing year to date expenditures (first six months), historical spending and reviewing the outlook for the remainder of the year.

Initial Authorization for first six months \$713,766
YTD (through June) Actual Expenditures \$645,500
Total Budgeted Amount \$1,830,168
Revised Authorization Amount \$1,806,600
Variance \$23,568

JUSTIFICATION

Replacement of equipment due to various causes.

NOTES

For 2018 this blanket will also be utilized to replace equipment (primarily insulators and cutouts) on the distribution system which was a result of our 2017 Fall and both 2018 surveys from our Exacter inspection program. This project identifies and predicts failures of equipment prior to their failure.

			Blanket Authorization Total:	\$123,856.00

DESCRIPTION/SCOPE

This authorization covers the costs associated with the installation and replacement of light fixtures for either new customers (installation) or existing customers (replacement of failed units).

The total amount of this authorization covers the costs projected for the first six (6) months of 2018 which was derived from reviewing historical expenditures as follows:

Year First 6 months of spending % of Full Year Actual

2012 \$129,100 49%
 2013 \$111,200 44%
 2014 \$117,100 51%
 2015 \$ 60,000 44%
 2016 \$117,900 43%
 2017 \$110,700 54%

Total Budgeted Amount \$317,856
 Authorization Amount \$152,571 (48% of total)
 Balance \$165,285

JUSTIFICATION

Customer driven and obligation to maintain/replace existing lights.

7/23/2018	YES	Brock, Laurence <i>Chief Accounting Officer & Controller</i>		
7/23/2018	YES	Collin, Mark <i>SVP And Chief Financial Officer</i>		

DESCRIPTION/SCOPE

This revised authorization covers the costs associated with the installation and replacement of light fixtures for either new customers (installation) or existing customers (replacement of failed units).

The total year projection was derived from reviewing the year to date expenditures (first six months), historical spending, and reviewing the outlook for the remainder of the year.

Initial Authorization for first six months \$152,571
YTD (through June) Actual Expenditures \$75,500
Total Budgeted Amount \$317,856
Revised Authorization Amount \$240,600
Variance \$77,256

JUSTIFICATION

Customer driven and obligation to maintain/replace existing lights.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$534,922.34
Less Customer Contribution:	\$48,629.30
Net Authorized Cost:	\$486,293.04
Retirement:	\$4,140.00
Cost Of Removal:	\$97,258.61
Salvage:	\$418.00
Blanket Authorization Total:	\$438,081.73

DESCRIPTION/SCOPE

This blanket authorization is to cover labor and material for system upgrades or improvements that are less than \$30,000 and don't fit any other category.

The typical type of work that would normally be performed would be as follows:

Less than < \$30,000

Telephone Request,

Cable TV Request,

Services,

Repairs / Replacement (failed, damaged, rotten/corroded, or in a state of disrepair) – essential to the operation of the system or a high probability of affecting reliability.

The amount of this authorization was derived by using historical data from the previous 5 years and the expected workload for the first six months of 2019.

Budget amount - \$972,586.07

1st six month auth - \$486,293.04

% of total Budget- 50%

Remaining Budget amount -\$486,293.04

JUSTIFICATION

Necessary additions and replacements to maintain a safe and reliable electric system.

3/21/2019	YES	Brock, Laurence <i>Chief Accounting Officer & Controller</i>		
3/22/2019	YES	Vaughan, Christine <i>SVP, CFO and Treasurer</i>		

DESCRIPTION/SCOPE

This is proposed as a 18 month project to cover both Seacoast and Capital operating centers. This project will require labor and material to upgrade existing TS2 infrastructure to a blended TS2/PLX platform.

Initial Project Set Up
\$372.60 PLX Command Center – endpoint licensing for 621 endpoints
\$16,000 PLX Project Management
\$1,200 PLX Substation Commissioning Certification Training (1 person)
\$1,200 PLX Command Center Training

UES PLX UPGRADE - Project Summary

Seacoast
PLX Equipment \$139,900
PLX Meters \$56,700
Contract Labor \$90,000
Internal Labor (hours) 360
Sub-total \$286,960
Capital
PLX Equipment \$212,825
PLX Meters \$125,550
Contract Labor \$75,000
Internal Labor (hours) 380
Sub-total \$413,755

JUSTIFICATION

This proposal has been developed in response to the following:

- *recent Regulatory inquiries and potential future requirements to provide Smart Grid technology solutions in the UES territories.
- *L+G will no longer support the TS2 technology past 2022
- * The last-time purchase TS2 meters will close on October 31, 2019
- * L+G offering a buy one get one promo until 9/30/2018
- * Leverage existing systems and architecture to provide the least expensive upgrade path.
- * L+G now offers blended TS2 and PLX capability making upgrading even more cost effective and efficient.
- * PLX with interval capabilities provides for more flexibility to respond to future Regulatory requirements (Smart Grid technology).
- * Seacoast TS2 System Switch Group has only 1,000 viable channels remaining.
- * Cuts time in half for outage/restoration notification.
- * Provides migration path for Itron MV90 phase out over time
- * Grid Modernization regulatory efforts underway

000035

Description/Scope

This is proposed as a 18 month project to cover both Seacoast and Capital operating centers. This project will require labor and material to upgrade existing TS2 infrastructure to a blended TS2/PLX platform.

Initial Project Set Up

\$372.60 PLX Command Center – endpoint licensing for 621 endpoints ???
 \$16000 PLX Project Management
 \$1,200.00 PLX Substation Commissioning Certification Training (1 person)
 \$1,200 PLX Command Center Training

UES PLX UPGRADE - Project Summary

Seacoast
 PLX Equipment \$139,900.00
 PLX Meters \$56,700.00
 Contract Labor \$90,000.00
 Internal Labor (hours) 360
 Sub-total \$286,960.00
Capital
 PLX Equipment \$212,825.00
 PLX Meters \$125,550.00
 Contract Labor \$75,000.00
 Internal Labor (hours) 380
 Sub-total \$413,755.00

Justification

This proposal has been developed in response to the following:

- *recent Regulatory inquiries and potential future requirements to provide Smart Grid technology solutions in the UES territories.
- *L+G will no longer support the TS2 technology past 2022
- * The last-time purchase TS2 meters will close on October 31, 2019
- * L+G offering a buy one get one promo until 9/30/2018
- * Leverage existing systems and architecture to provide the least expensive upgrade path.
- * L+G now offers blended TS2 and PLX capability making upgrading even more cost effective and efficient.

- * PLX with interval capabilities provides for more flexibility to respond to future Regulatory requirements (Smart Grid technology).
- * Seacoast TS2 System Switch Group has only 1,000 viable channels remaining.
- * Cuts time in half for outage/restoration notification.
- * Provides migration path for Itron MV90 phase out over time
- * Grid Modernization regulatory efforts underway

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$178,775.50
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$178,775.50
Retirement:	\$0.00
Cost Of Removal:	\$8,940.00
Salvage:	\$0.00
CWO Total:	\$169,835.50

DESCRIPTION/SCOPE

Perform Cable Rejuvenating Injection to approx. 5000' of direct buried cable in Alton Woods subdivision Concord. This procedure would be performed by the Novinium Company and will extend the life of the cable for 25 to 40 years, depending on the injection process. This subdivision is 34.5 Kv.

JUSTIFICATION

The Alton Woods URD has experienced several cable failures in the past ten years with the highest concentration of failures in 2018. Also, there have been failures of cable during investigation and repair of an already faulted cable. The average number of customers interrupted is 84. The average number of customer minutes of interruption is 16,255 minutes per outage. Cable rejuvenation costs are considerably less expensive and less invasive than cable replacement. Novinium statistics indicate that rejuvenation is reliable, as their reported failure rate is .4%.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$472,923.00
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$472,923.00
Retirement:	\$0.00
Cost Of Removal:	\$54,585.00
Salvage:	\$0.00
CWO Total:	\$418,338.00

DESCRIPTION/SCOPE

The two switchgear devices located just outside of the Bridge St Substation are rusted over and in need of replacement. New S&C Vista SD Pad mounted Switchgear for 1H2 and 1H3 are to be installed in the same vicinity of the existing switchgear. The existing concrete pad and switchgear will be removed. New cable from the substation to MH1 to the switchgear to MH1-A (~900ft) will be installed as well. A new cable will be installed between the two pads to create a new distribution tie.

The increased total cost is due to a number of factors that were not recognized or captured in the original budget estimate. These issues were recognized by the Engineering firm contracted to provide a survey, ground penetrating radar, structural design, site plan, and coordination with the city for any meetings and permitting that may be required. The first issue at hand is that there is limited easement space. In order to then maintain proper working clearance from a nearby building and remain within the easement, the switchgear will need to be front access only, which is costlier. Additionally, it has been determined that a stainless steel enclosure is the best method to ensure the rusting does not continue.

JUSTIFICATION

The switchgear for 1H2 and 1H3 is rusted beyond repair. The top cover has holes allowing water to get inside the main compartment. It is inoperable while energized. There are holes along the bottom, the doors, and the sides. A new circuit tie will provide additional reliability. Other alternatives were explored, but due to the limited space within the easement and substation, no other viable options were recognized. This switchgear is required and necessary to provide the A and P circuit positions feeding the Down Town Underground system.

NOTES

Due to the long lead times for the switch gear, it is anticipated this project will carry over into the year 2020. We expect to spend approx. \$200,000.00 in 2019 purchasing the equipment and design work and the remaining balance in 2020 for the installation of the new switch gear.

Description/Scope

The switchgear for 1H2 and 1H3 is rusted over and in need of replacement. A new PME-10 for each circuit will be placed on a new concrete pad. A tie point will be created at this location. The PME series are dead front switchgear.

PME-10 is rated to 600A continuous, 15.5kV, 95BIL

S&C Electric Company Manual PME Pad-Mounted Gear, Outdoor Distribution, Three-Phase Units (including mountings), Model PME-10, 14.4kV Nominal, 17.5kV Maximum, 95kV BIL, Mini-Rupter rating: 600 Amperes RMS Continuous - 600 Amperes RMS Load Dropping, Short-Circuit rating: 25,000 Amperes RMS Symmetrical Mini-Rupter - 25,000 Amperes RMS Symmetrical Main Bus - 25,000 Amperes RMS Symmetrical Pad-Mounted Gear, 620 MVA 3-Phase Symmetrical at Rated Voltage

Justification

The switchgear for 1H2 and 1H3 is rusted out. The top cover has holes allowing water to get inside the main compartment. It is in-operable while energized. There are holes along the bottom, the doors, and the sides.

DESCRIPTION/SCOPE

Construct (2) new 13.8kV circuits underbuilt along the 374 line from Gulf Street substation to Theatre St., and rebuild the 374 pole line to accommodate the new circuits.

This project is a portion of the work being completed for the downtown Concord upgrades and conversions included in the original (2019) DPBC04 - Conversion in Downtown Concord capital budget item.

JUSTIFICATION

Development in the city of Concord expected to be in service by summer of 2020 requires infrastructure upgrades.

NOTES

Straight 30% overhead on the following:
CWO #20191675 (Outside Services, Fees, etc.)

Total project cost includes transfer of costs from the 2019 Preliminary Survey (374 Line Survey).

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$590,158.00
Less Customer Contribution:	\$29,508.00
Net Authorized Cost:	\$560,650.00
Retirement:	\$3,315.00
Cost Of Removal:	\$112,130.00
Salvage:	\$429.00
Blanket Authorization Total:	\$478,457.00

DESCRIPTION/SCOPE

This authorization covers the costs associated with minor additions and improvements to the sub-transmission, distribution and substation systems where such improvements cannot be reasonably identified and budgeted as a specific project. The majority of this work is driven from our inspection programs and routine improvements to the system as a result of customer complaints or other findings.

The total amount of this authorization covers the costs projected for the first six (6) months of 2019 which was derived from reviewing historical expenditures for the first six (6) months as follows:

Year First 6 months % of Total Expenditure

2013 \$508,900 38%
2014 \$541,400 36%
2015 \$607,500 39%
2016 \$711,100 46%
2017 \$648,800 35%
2018 \$645,500 40%

Total Budgeted Amount \$1,437,564
Authorization Amount \$ 560,650 (39% of total budget).
Balance \$876,914

JUSTIFICATION

Replacement of various types of equipment as well as poles and anchors as needed.

Project Name: T&D Improvements
Submitted By: Scott D. Wade

Project Categorizations

Customer Driven, Voltage, Repair/Replacement, Other

Project Estimates

Labor Time to Install (Man Hours):	2700
Labor Time for Removal (Man Hours):	500
Transportation Expenses (Heavy Truck Hours):	1600
Transportation Expenses (Light Truck Miles):	
Material OH Electric Construction (from Stockroom):	125000
Material UG Electric Construction (from Stockroom):	
Material Gas Construction (from Stockroom):	
Material Direct Charge (Ordered directly to job.):	
Material Hot Water Heaters:	
Contract Labor Hours (Man Hours):	500
Contract Services:	420000
Other Specific Charges (\$):	
Overhead on Specific Charges (%):	
Customer Contribution (%) (before OH's applied):	5
EDP? (Yes or No):	No
Retirement:	8500
Salvage:	1100

Description/Scope

This budget item is to cover the costs associated with minor additions and improvements to the T & D system where such improvements cannot be reasonably identified and budgeted as a specific project. The majority of this work stems from telephone company requests to replace poles, our own inspection and Exacter programs, and routine improvements to the system as a result of customer complaints or other findings more specifically EWR's.

Justification

Replacement of defective equipment on a scheduled basis, intercompany replacements and changeovers.

			Blanket Authorization Total:	\$156,994.00

DESCRIPTION/SCOPE

This authorization covers the costs associated with the necessary replacements to our facilities under emergency (unscheduled) and "minor" storm conditions.

The total amount of this authorization covers the costs projected for the first six (6) months of 2019 which was derived from reviewing historical expenditures as follows:

Year First 6 mo. % of Full Year Actual

2016 \$182,400 43%
 2017 \$1,335,300* 198% *
 2018 \$1,918,000* 221% *

* These amounts reflect major storms that may not be transferred to a recovery account until later in that year or early the following year hence the notable variance compared to budgeted amounts.

Total Budgeted Amount \$389,986
 Authorization Amount \$194,993 (50% of total)
 Balance \$194,993

JUSTIFICATION

Maintain satisfactory level of service to customers by providing reliable electric service.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$520,000.00
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$520,000.00
Retirement:	\$17,000.00
Cost Of Removal:	\$105,000.00
Salvage:	\$3,000.00
Blanket Authorization Total:	\$418,000.00

DESCRIPTION/SCOPE

This revised authorization covers the additional costs associated with the necessary replacements to our facilities under emergency (unscheduled) and "minor" storm conditions.

Initial Authorization \$194,993

Revision #2 Authorization Amount \$438,800

Actual Expenditure through October 2020: \$519,682

Variance between Rev 2 & Final Actual: \$80,882

Revision #3 Authorization Amount \$520,000

Budgeted Amount for 2019: \$389,985

These additional costs are due to a higher than normal small storm activity and day to day emergency work in 2019 when compared to prior years.

JUSTIFICATION

Maintain satisfactory level of service to customers by providing reliable electric service.

NOTES

The final accounting of the Dec 2/3, 2019 had to be finalized in order for the costs of this Emergency & Storm blanket could be confirmed. This accounting took place in September, 2020.

Cost Of Removal:	\$22,514.00
Salvage:	\$585.00
Blanket Authorization Total:	\$182,744.00

DESCRIPTION/SCOPE

This authorization covers the costs associated with all work for which the vast majority of repayment is anticipated such as broken poles, 3rd party attachment requests, 3rd party damages to our facilities, and customer owned equipment that we may replace.

The total amount of this authorization covers the costs projected for the first six (6) months of 2019 which was derived from reviewing historical expenditures as follows:

Year First 6 mo. % of Full Year Actual

2014 \$157,900 38%
2015 \$192,000 42%
2016 \$121,300 28%
2017 \$90,700 34%
2018 \$185,600 52%

Total Budgeted Amount \$288,642
Authorization Amount \$112,570 (39% of total)
Balance \$176,072

JUSTIFICATION

Obligation to respond broken poles, 3rd party attachment requests and customer requests.

2/6/2019	YES	Main, Dan <i>Assistant Controller</i>	Salvage:	\$0.00
			CWO Total:	\$173,896.37

DESCRIPTION/SCOPE

This authorization is for the first year of a multi-year program to replace potted-porcelain distribution cutouts with silicone rubber cutouts.

Locations of the cutout replacements will be determined based on the reliability impact of their failures.

JUSTIFICATION

Over the past 7 years, Unitil has experienced an increase in porcelain cutout failures. From 2012 through 2018 the Unitil has encountered 302 outages caused by failed cutouts.

- 32 in 2012
- 28 in 2013
- 28 in 2014
- 49 in 2015
- 61 in 2016
- 46 in 2017
- 58 in 2018

Furthermore, additional cutouts not included in the numbers above have failed, but have not been the direct cause of outages. These units are typically identified when responding to outage calls not caused by the cutout failure or upon inspection when other work is taking place in the area.

2/19/2019	YES	Main, Dan Assistant Controller	CWO Total:	\$202,876.00

DESCRIPTION/SCOPE

This authorization is for the implementation of a distributed automation scheme between Portsmouth Avenue substation, Gilman Lane substation, and a new, normally-open tie recloser between circuits 11X2 and 19X2. This project includes the installation of the new tie recloser at (or in the vicinity of) the existing 11X2J19X2 tie switch, associated additions and modifications at Portsmouth Avenue substation, and associated additions and modifications at Gilman Lane substation.

This scheme is intended to automatically restore circuits 11X1 and 11X2 (1,700 customers) from circuit 19X2 for a loss of supply to Portsmouth Avenue; and to automatically restore circuit 19X2 (600 customers, including Exeter hospital) from circuit 11X2 for a loss of supply to the north 34.5kV bus at Gilman Lane.

This will be the 3rd authorization under the 2019 Reliability Projects. See below:

Total Budgeted Amount \$799,818

1st Authorization \$ 40,000 > North Shore Rd, Hampton

2nd Authorization \$ 85,000 > Little River Rd, Hampton

This Authorization \$205,291.00

Remaining Balance \$469,527.00

JUSTIFICATION

On average one sub-transmission outage per year causes an outage to Portsmouth Avenue substation or Gilman Lane substation.

Additionally, Portsmouth Avenue substation is supplied from the 3347 line, which is a radial line that typically experiences damage during major events.

- Estimated annual customer-minutes savings = 81473

- Estimated annual customer-interruption saving = 992

NOTES

Straight 30% overhead on the following:

Description/Scope

1) 43X1 - Reconductor Willow Road with Spacer cable (DRBE01)

Re-conductor a .75 mile heavily treed section of Willow Rd with spacer cable. This is a mainline section just outside the Willow Road Tap where permission for pruning has not been granted from property owners.

This is year one of a multi-year project:

Year 1: Design, Material purchase, late fall construction start

Year 2: Finish construction late winter

2) 17W1 - Install Reclosers/ Sectionalizers N Shore Rd (DRBE03)

Add two single phase hydraulic reclosers on North Shore Rd P.35, replace 125 QA fusing at Pole18 with cutout mounted sectionalizer and install fused cutouts at Pole 11.

3) Circuit 19X2 - Distribution Automation Scheme with Portsmouth Ave (DRBE04)

This project will consist of replacing the 11X2J19X2 tie switch with a recloser and the installation communication infrastructure between the new recloser, the 19X2 recloser at Gilman Lane substation and Portsmouth Ave substation.

A distribution automation scheme will be implemented that will restore the 1,700 customers on circuits 11X1 and 11X2 via circuit 19X2 for the loss of the 3347 line. Additionally, for a fault on the 3352 or 3362 line the 600 customers supplied by circuit 19X2 will automatically be restored via circuit 11X2.

4) 17W2 - Add Recloser Little River Rd (DRBE06)

Replace the existing 175QA fuses at pole 40 Little River Road with a three-phase electronically controlled recloser. Install FuseSavers at pole 1 North Shore Road.

Justification

1) 43X1 - Reconductor Willow Road with Spacer cable (DRBE01)

Willow Rd had three outages in 2017, two of which were tree related and the other patrolled nothing found. The owner of a section of property along Willow Road from pole 1 to pole 42 near the Willow Road Tap has repeatedly refused to allow effective pruning and hazard tree mitigation. An outage on this is mainline section of 43X1 would affect the majority of the circuit and 1862 customers. The 43X1 Station Breaker opened three times due to tree/limb contact between March 2017 and March 2018.

The projected average annual savings for this project is 78,052 customer minutes of interruptions and 950 customer interruptions.

2) 17W1 - Install Reclosers/ Sectionalizers N Shore Rd (DRBE03)

17W1 was one of the worst performing circuits in 2017 and North Shore Road has exhibited very poor resilience during major events.

Customer Exposure = 174 customers (.95 miles)

The projected average annual savings for this project is 5,153 customer minutes of interruptions and 63 customer interruptions.

3) Circuit 19X2 - Distribution Automation Scheme with Portsmouth Ave (DRBE04)

On average one subtransmission outage per year causes an outage to Portsmouth Ave substation or Gilman Lane substation.

Additionally, Portsmouth Ave substation is supplied from the 3347 line, which is a radial line that typically experiences damage during major events.

- Estimated annual customer-minutes savings = 81,473
- Estimated annual customer-interruption savings = 992

4) 17W2 - Add Recloser Little River Rd (DRBE06)

Circuit 17W2 was on the worst performing circuits SAIDI and SAIFI lists in 2016 and 2015.

The projected average annual savings for this project is 7,687 customer minutes of interruptions and 95 customer interruptions.

Cost Of Removal:	\$1,934.00
Salvage:	\$0.00
CWO Total:	\$26,744.00

DESCRIPTION/SCOPE

Three phase, underground line extension to provide three phase service to the proposed five story residential condominium complex consisting of 36 units. The developer will pay the reduced estimated cost of this line extension, in accordance with the Economic Development Program, as well as full cost for the street light removal, not under the Economic Development Program, in advance. A final accounting will be made after the work has been completed and the customer will be credited or billed for the difference between the estimate and actual cost.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$41,829.77
Less Customer Contribution:	\$22,843.77
Net Authorized Cost:	\$18,986.00
Retirement:	\$0.00
Cost Of Removal:	\$2,000.00
Salvage:	\$0.00
CWO Total:	\$39,829.77

DESCRIPTION/SCOPE

This supplement authorization is to cover the additional costs that were incurred on the above named project. There were two factors contributing to the additional expenditures; 1) additional labor necessary to complete the work and 2) timing of overhead clearing rates.

The analysis shows the project estimate accurately captured the material required to accomplish the work however additional labor was necessary due to the fact that we had to perform the work in various stages due to site conditions and construction taking place at the new building being serviced. This added approximately twenty (20) additional crew hours to the project. The second factor involved the overhead clearing rates whereby the original estimate was based on when the work was expected to be completed (2019). However, the labor and material overhead clearing rates for the periods of when the work was actually performed (2020) were higher than what was utilized in the original estimate. This project consisted of a three phase, underground line extension to provide three phase service to a new condominium building.

Original Authorization \$9,336
 Supplement Authorization \$18,986
 Variance + \$9,650

JUSTIFICATION

Provide new service to a condominium building.

			CWO Total:	\$200,000.00

DESCRIPTION/SCOPE

This authorization is for adding electronic and hydraulic reclosers to circuit 13W2 in Newton.

This will be the 4th authorization under the 2019 Reliability Projects. See below:

Total Budgeted Amount: \$799,818

1st Authorization: \$ 40,000 > North Shore Rd, Hampton

2nd Authorization: \$ 85,000 > Little River Rd, Hampton

3rd Authorization: \$205,291.00 > Portsmouth Ave, Exeter

This Authorization: \$250,000.00

(Note: A portion of the costs associated with this authorization will carryover into 2020)

Remaining Balance \$219,527.00

C-20191844 Purchase and Installation of reclosers, Associated line work, traffic control and tree trimming \$175,000.00

C-20191845 Relay Replacement \$25,000.00

Cost of Removal \$50,000.00

TOTAL COMPANY COST \$250,000.00

JUSTIFICATION

Circuit 13W2 has historically been one of the worst performing circuits on the UES-Seacoast system and typically results in multiple outage locations during major storms.

The existing 13W2 recloser control at Timberlane substation will be replaced to allow the settings flexibility to allow for protection coordination with the new reclosers.

Additionally, the replacement of the 13W2 relay will allow for increased loadability of the 13W2 circuit position at Timberlane. Current distribution load projections indicate that the 13W2 protection settings are expected to be a planning loading violation as soon as 2020.

The new reclosers will benefit approximately 1,100 customers.

-Estimated annual customer-minutes savings = 53,451

-Estimated annual customer-interruption savings = 660

NOTES

Lt. Company to set four (4) 50/50 poles and bill Tel. Co. as follows:

4 Poles - Non Billable - \$2,800

This billing is included in the total of the authorization.

Description/Scope

1) 43X1 - Reconductor Willow Road with Spacer cable (DRBE01)

Re-conductor a .75 mile heavily treed section of Willow Rd with spacer cable. This is a mainline section just outside the Willow Road Tap where permission for pruning has not been granted from property owners.

This is year one of a multi-year project:

Year 1: Design, Material purchase, late fall construction start

Year 2: Finish construction late winter

2) 17W1 - Install Reclosers/ Sectionalizers N Shore Rd (DRBE03)

Add two single phase hydraulic reclosers on North Shore Rd P.35, replace 125 QA fusing at Pole18 with cutout mounted sectionalizer and install fused cutouts at Pole 11.

3) Circuit 19X2 - Distribution Automation Scheme with Portsmouth Ave (DRBE04)

This project will consist of replacing the 11X2J19X2 tie switch with a recloser and the installation communication infrastructure between the new recloser, the 19X2 recloser at Gilman Lane substation and Portsmouth Ave substation.

A distribution automation scheme will be implemented that will restore the 1,700 customers on circuits 11X1 and 11X2 via circuit 19X2 for the loss of the 3347 line. Additionally, for a fault on the 3352 or 3362 line the 600 customers supplied by circuit 19X2 will automatically be restored via circuit 11X2.

4) 17W2 - Add Recloser Little River Rd (DRBE06)

Replace the existing 175QA fuses at pole 40 Little River Road with a three-phase electronically controlled recloser. Install FuseSavers at pole 1 North Shore Road.

Justification

1) 43X1 - Reconductor Willow Road with Spacer cable (DRBE01)

Willow Rd had three outages in 2017, two of which were tree related and the other patrolled nothing found. The owner of a section of property along Willow Road from pole 1 to pole 42 near the Willow Road Tap has repeatedly refused to allow effective pruning and hazard tree mitigation. An outage on this is mainline section of 43X1 would affect the majority of the circuit and 1862 customers. The 43X1 Station Breaker opened three times due to tree/limb contact between March 2017 and March 2018.

The projected average annual savings for this project is 78,052 customer minutes of interruptions and 950 customer interruptions.

2) 17W1 - Install Reclosers/ Sectionalizers N Shore Rd (DRBE03)

17W1 was one of the worst performing circuits in 2017 and North Shore Road has exhibited very poor resilience during major events.

Customer Exposure = 174 customers (.95 miles)

The projected average annual savings for this project is 5,153 customer minutes of interruptions and 63 customer interruptions.

3) Circuit 19X2 - Distribution Automation Scheme with Portsmouth Ave (DRBE04)

On average one subtransmission outage per year causes an outage to Portsmouth Ave substation or Gilman Lane substation.

Additionally, Portsmouth Ave substation is supplied from the 3347 line, which is a radial line that typically experiences damage during major events.

- Estimated annual customer-minutes savings = 81,473
- Estimated annual customer-interruption savings = 992

4) 17W2 - Add Recloser Little River Rd (DRBE06)

Circuit 17W2 was on the worst performing circuits SAIDI and SAIFI lists in 2016 and 2015.

The projected average annual savings for this project is 7,687 customer minutes of interruptions and 95 customer interruptions.

DESCRIPTION/SCOPE

Construct a new NH Seacoast Region Facility, in Exeter NH, to include space for the following business needs; NH Seacoast's Electric Distribution Operations Center (DOC), Business Continuity for Gas Control & Field Services, System Emergency Operating Center (S-EOC), Central Electric Dispatch (CED), OQ Testing, Training, Offices and lab for Electric Engineering Department.

Scope to include:

Preliminary Survey cost including:

- Preconstruction, engineering & design, construction management pre-construction services, geo-tech, civil/survey, environmental survey, legal fees, permitting, insurance, etc.

Construction: site work, utilities (electric, gas, comm, sewer/water), construction to include:

- 53,940 sf +/- sf for office areas, warehouse, enclosed vehicle storage area with a wash bay, etc.
- Bermed outside transformer & other storage
- Outside material laydown areas
- Emergency back-up Generator
- Construction Administration: Construction Manager and engineers & designers field observations, RFIs, Submittals review and other miscellaneous construction phase documentation.
- Project Close Out: Commissioning, As-Builts, etc.
- Furniture/Furnishings/Equipment: Office, warehouse, operations areas, building electronic access control and security systems, and Information Technology infrastructure.
- Move

This is a multi-year project:

Q3 2019 Break ground/begin construction
2020 Completion, Commissioning and Occupancy

JUSTIFICATION

The current Distribution Operations Center (DOC) is 60+ years old and no longer adequately supports the present day operational needs of UES/Seacoast. The current DOC was constructed in the 1950s. Since that time the customer base has grown as has the requirement to stock more materials (inside and out) including transformers and poles. The transformers take up a great deal of space in a stockyard that was designed for operations 60+ years ago when utility trucks were much smaller. The current day line trucks barely fit into the 1950s garage. In addition, this building will solve space constraints at other company facilities, in connection with business continuity for the company's Gas Control, Field Services and Central Electric Dispatch (CED) functions, Electric Engineering department including lab space for functional testing of equipment as well as, provide space for a Prometric certified Operator Qualifications (OQ) testing.

NOTES

Preliminary Survey costs need to be transferred into individual CWO's.

Description/Scope

Construct a new NH Seacoast Region Electric Distribution Operations Facility (DOC), in Exeter, to include;

* Preconstruction:., engineers & designers, construction management pre-construction services, geo-tech, civil/survey, environmental survey, legal fees, permitting, insurance, etc.

*Construction: site work, utilities (electric, gas, telco, sewer/water), construction to include:

** 50,000 sf +/- sf for office areas, warehouse, enclosed vehicle storage area with a wash bay, etc.

** Bermed outside transformer storage area with overflow/run off tank in case of spill, mimics Lunenburg DOC

** Bermed outside storage area with piping to tie in with transformer overflow/run off tank , mimics Lunenburg DOC

** Outside material laydown areas

** Natural Gas Generator

** Construction Administration: Construction Manager and engineers & designers field observations, RFIs, Submittals review and other miscellaneous construction phase documentation.

** Project Close Out: Commissioning, As-Builts, etc.

** Furniture/Furnishings/Equipment: Office, warehouse, operations areas, building electronic access and security systems, and Information Technology infrastructure.

** Move

Anticipated Schedule:

Q4 2018/Q1 2019: Complete P&S due diligence and purchase land (separate Auth).

Q1 2019 Break ground/begin construction

Q1 2020: Completion, Commissioning and Occupancy

Justification

The current Distribution Operations Center (DOC) is 70+ years old and no longer adequately supports the present day operational needs of UES/Seacoast. The line truck garage height and therefore height of its doors is inadequate leaving very little clearance for today's bucket trucks.

This budget item is set up the same as the 2017 Non-Budget Auth (017084) for the construction of the new FGE DOC.

** Furniture/Furnishings/Equipment: Office, warehouse, operations areas, building electronic access control and security systems, and Information Technology infrastructure.

** Move

Schedule:

Q3 2019: Complete P&S due diligence and purchase land (separate Auth).

Q3 2019 Break ground/begin construction

Q2/Q3 2020: Completion, Commissioning and Occupancy

Justification

The current Distribution Operations Center (DOC) is 60+ years old and no longer adequately supports the present day operational needs of UES/Seacoast. The current DOC was constructed in the 1950s. Since that time the customer base has grown as has the requirement to stock more materials (inside and out) including transformers and poles. The transformers take up a great deal of space in a stockyard that was designed for operations 60+ years ago when utility trucks were much smaller. The current day line trucks barely fit into the 1950s garage. In addition, this building will solve space constraints at other company facilities, in connection with business continuity for the company's Gas Control, Field Services and Central Electric Dispatch (CED) functions, Electric Engineering department including lab space for functional testing of equipment as well as, provide space for a Prometric certified Operator Qualifications (OQ) testing

Description/Scope

This carryover is for final project payments not made before the end of 2020. At this time (Aug 2020), occupancy is anticipated in early November.

Construct a new NH Seacoast Region Facility, in Exeter NH, to include space for the following business needs; NH Seacoast's Electric Distribution Operations Center (DOC), Business Continuity for Gas Control & Field Services, System Emergency Operating Center (S-EOC), Central Electric Dispatch (CED), OQ Testing, Training, Offices and lab for Electric Engineering Department.

Scope to include;

* Preconstruction: engineering & design, construction management pre-construction services, geo-tech, civil/survey, environmental survey, legal fees, permitting, insurance, etc.

*Construction: site work, utilities (electric, gas, comm, sewer/water), construction to include:

** 53,940 sf +/- sf for office areas, warehouse, enclosed vehicle storage area with a wash bay, etc.

** Bermed outside transformer storage ** Bermed outside storage ** Outside material laydown areas

** Emergency back-up Generator

** Construction Administration: Construction Manager and engineers & designers field observations, RFIs, Submittals review and other miscellaneous construction phase documentation.

** Project Close Out: Commissioning, As-Builts, etc.

** Furniture/Furnishings/Equipment: Office, warehouse, operations areas, building electronic access control and security systems, and Information Technology infrastructure.

** Move

Schedule:

DESCRIPTION/SCOPE

This revised blanket authorization is to cover labor and material for system upgrades or improvements that are less than \$30,000 and don't fit any other category for the remainder of 2020.

The typical type of work that would normally be performed would be as follows:

Less than < \$30,000

Telephone Request,

Cable TV Request,

Services,

Repairs / Replacement (failed, damaged, rotten/corroded, or in a state of disrepair) – essential to the operation of the system or a high probability of affecting reliability.

The total year projection was derived from reviewing the year to date expenditures (first six months), historical spending and reviewing the outlook for the remainder of the year

Initial Authorization for first six months \$598,939.65

1st six Months (Jan to June) Actuals \$598,939.65

Total Budgeted Amount \$1,088,981.18

Revised Authorization Amount \$1,107,500.00

Variance (\$18,518.82)

JUSTIFICATION

Necessary additions and replacements to maintain a safe and reliable electric system.

Description	Amount
Total Project Cost:	\$775,785.00
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$775,785.00
Retirement:	\$23,162.74
Cost Of Removal:	\$155,157.00
Salvage:	\$2,315.77
Blanket Authorization Total:	\$622,943.77

DESCRIPTION/SCOPE

This 2nd revised blanket authorization is for unanticipated costs for labor and material used during system emergencies & storm restoration for the remainder of 2020.

The typical type of work that would normally be performed would be as follows:

Replacement of poles, wire, cutouts, arresters, or any other associated capital hardware that pertains to overhead as well as underground

The total year projection was derived from reviewing the year to date expenditures (first six months), historical spending and reviewing the outlook for the remainder of the year

The unfavorable variance is due to several mid sized storms in the 4th quarter of 2020.

Initial Authorization for first six months \$276,928.54

1st six Months (Jan to June) Actuals \$266,908.00

Total Budgeted Amount \$615,396.75

1st Revised Authorization Amount \$625,000.00

2nd Revised Authorization Amount \$ 775,785.00

Variance (\$160,388.25) or 126% of Budget

JUSTIFICATION

Maintain satisfactory level of service to customer by providing reliable electric service.

 Total Budgeted Amount \$84,062.18
 Revised Authorization Amount \$310,000.00
 Second Rev Auth \$406,130.00
 Variance \$ (322,067.82)

JUSTIFICATION

Required for circuit conversion, stepdown changeouts, additions to working inventory or emergency spares, etc.

The large overage on the Company Transformer blanket is due to several reasons.

1 All the transformers for the Gulf St. conversion project were expected to arrive in 2019. 2020 was budgeted for a normal year with a handful of step transformer and regulator replacements. Due to extended lead times, a majority of the transformers did not arrive until Feb and March of 2020, These transformers were applied to the 2020 Blanket Authorization instead of 2019.

2. Transferred more load from Bridge St sub to The new Gulf St Sub than originally planned. This required the replacement of several large pad mount transformers in down town Concord.

3. Converted a small section of circuit 8X3 in Epsom in November 2020 , to accommodate a line extension for a new State Liquor Store. This project was not recognized and planned for in the 2020 budget.

4. Converted a small section of Cir 6X3 in Concord in Sept 2020, to accommodate the installation of a Viper Recloser to improve reliability and resiliency for the Concord Hospital. This project arose in 2020 due to resiliency concerns from Concord Hospital. This project was not recognized and planned for in the 2020 budget.

NOTES

AUTHORIZATION COMMENTS

Many of the transformers for the Gulf St Substation conversion and associated circuits were received in 2020. Several large dual ratio pad mount transformers were required to complete conversions.

Additional conversion work was performed in the 3rd quarter of 2020 to add more load to the new gulf St Sub and reduce load on Bridge St Sub.

Description/Scope

This budget item is for the purchase and installation of transformers associated with anticipated company-driven system work such as conversions, stepdown additions or upgrades, etc., or for the purchase of spare regulator or stepdown transformer inventory. A listing is attached with this line item reflecting anticipated requirements for this year.

Justification

Required for circuit conversion, stepdown changeouts, additions to working inventory or emergency spares, etc.

Total Project Cost:	\$1,186,440.54
Less Customer Contribution:	\$23,263.24
Net Authorized Cost:	\$1,163,177.30
Retirement:	\$0.00
Cost Of Removal:	\$0.00
Salvage:	\$0.00
Blanket Authorization Total:	\$1,186,440.54

DESCRIPTION/SCOPE

This supplemental authorization covers the costs associated with expenditures as the result of purchasing and installation of transformers in order to service new customers or maintain service to existing customers for the remainder of 2020.

The total year projection was derived from actual expenditures for the full year 2020.

The unfavorable variance is due to higher than anticipated customer based growth on the system and increased purchasing costs due to the Global Pandemic.

Initial Authorization for first six months \$333,631.61
 1st six Months (Jan to June) Actuals \$540,590.00
 Total Budgeted Amount \$741,403.57
 Revised Authorization Amount \$881,000.00
 2nd revised Authorization Amount \$1,163,073
 Variance (\$421,773.43) or 157% of Budget

JUSTIFICATION

Provide and maintain service to customers. This covers customer-initiated projects requiring either new transformers or replacement of existing transformers (Customer Satisfaction).

DESCRIPTION/SCOPE				
<p>Implement an Advanced Distribution Management System (ADMS) throughout the Unitil electric service territories (FG&E and UES). Unitil's existing OMS will be upgraded to an ADMS that will support VVO, CVR and power flow analysis. Additionally, ADMS will include a switch order module that will improve distribution system operating efficiencies.</p> <p>In the future the AMDS will support distribution system automation, including automated distribution switching and fault location, isolation and service restoration (FLISR). The ADMS will also serve as a platform for more advanced modules such as a Distribution Energy Resource Management System (DERMS).</p> <p>The existing system integrations with GIS, CIS, OMS and SCADA will be enhanced to provide the necessary technical information for ADMS to perform the functions described above</p> <p>The ADMS hardware and platform will be utilized by both FG&E and UES. The implementation of the ADMS is proposed to be a phased approach. The first two years of this phased approach will focus on the implementation of ADMS in the FG&E territory with the later years focusing on UES and improving functionality in the FG&E territory.</p> <p>ADMS Implementation is expected to be a multi-year project with an expected start year of 2020 and completion year of 2022.</p> <p>Anticipated Spending by Year: 2020: \$850,000 2021: \$550,000 2022: \$550,000</p> <p>The CWO's associated with this project are listed below. The estimated cost below assumes at 32/68 cost split between FGE (32%) and UES (68%). The actual costs will be split between UES/FGE per the yearly split calculated by accounting.</p> <p>CWO 1: ADMS Purchase and Implementation Year 1 (FGE) - \$240,000 CWO 2: ADMS Purchase and Implementation Year 1 (UES) - \$510,000 CWO 3: ADMS Unitil IT Hardware/Labor Year 1 (FGE) - \$32,000 CWO 4: ADMS Unitil IT Hardware/Labor Year 1 (UES) - \$68,000 CWO 5: ADMS Purchase and Implementation Year 2 (FGE) - \$160,000 CWO 6: ADMS Purchase and Implementation Year 2 (UES) - \$340,000 CWO 7: ADMS Unitil IT Hardware/Labor Year 2 (FGE) - \$16,000 CWO 8: ADMS Unitil IT Hardware/Labor Year 2 (UES) - \$34,000 CWO 9: ADMS Purchase and Implementation Year 3 (FGE) - \$160,000</p>				

CWO 10: ADMS Purchase and Implementation Year 3 (UES) - \$340,000

CWO 11: ADMS Unitil IT Hardware/Labor Year 3 (FGE) - \$16,000

CWO 12: ADMS Unitil IT Hardware/Labor Year 3 (UES) - \$34,000

JUSTIFICATION

This is part of the Grid Modernization plan filed with the DPU.

An ADMS is the next step in the evolution of distribution management systems. An ADMS integrates a comprehensive set of monitoring, analysis, control, planning, and informational tools that work together with one common network model. An ADMS merges existing OMS, DMS, circuit analysis, load flow, and SCADA systems together to provide all of the information in one location. An ADMS allows its users, operators, and dispatchers a real-time view of the distribution system. In order for the ADMS to provide benefits, it must be integrated with some of Unitil's other Grid Modernization initiatives including, the Field Area Network, Substation SCADA and VVO projects.

An ADMS system can provide many different functions such as (but not limited to) self-healing automation, control for distributed energy resources, additional SCADA functions across the distribution system, real-time load flow and circuit analysis, demand response, outage restoration, direct load control, network configuration, and VVO.

The ADMS will enable effective VVO/CVR, reducing customer energy consumption by 2% or more and is expected to reduce peak demand by the same amount. This will directly benefit customers by reducing their electricity bills. The ADMS will also improve reliability through the implementation of FLISR. The ADMS will serve as a platform for more advanced modules such as a DERMS.

CWO 15: ADMS SCADA Implementation Year 2 - Joint Costs (FGE) - \$16,000

CWO 16: ADMS SCADA Implementation Year 2 - Joint Costs (UES) - \$34,000

The cost of the following 3 CWOs will be assigned to FGE only as they are associated with portions of the project that only apply to FGE.

CWO 17: ADMS SCADA Implementation Year 1 - FGE Costs Only (FGE) - \$45,000

CWO 18: ADMS SCADA Implementation Year 2 - FGE Costs Only (FGE) - \$90,000

CWO 19: ADMS SCADA Implementation Year 3 - FGE Costs Only (FGE) - \$90,000

JUSTIFICATION

This is part of the Grid Modernization plan filed with the DPU.

An ADMS is the next step in the evolution of distribution management systems. An ADMS integrates a comprehensive set of monitoring, analysis, control, planning, and informational tools that work together with one common network model. An ADMS merges existing OMS, DMS, circuit analysis, load flow, and SCADA systems together to provide all of the information in one location. An ADMS allows its users, operators, and dispatchers a real-time view of the distribution system. In order for the ADMS to provide benefits, it must be integrated with some of Unutil's other Grid Modernization initiatives including, the Field Area Network, Substation SCADA and VVO projects.

An ADMS system can provide many different functions such as (but not limited to) self-healing automation, control for distributed energy resources, additional SCADA functions across the distribution system, real-time load flow and circuit analysis, demand response, outage restoration, direct load control, network configuration, and VVO.

The ADMS will enable effective VVO/CVR, reducing customer energy consumption by 2% or more and is expected to reduce peak demand by the same amount. This will directly benefit customers by reducing their electricity bills. The ADMS will also improve reliability through the implementation of FLISR. The ADMS will serve as a platform for more advanced modules such as a DERMS.

The decision to transition the existing SCADA master to the ABB SCADA master that is part of the ADMS platform will reduce total owning cost by requiring the maintenance of one system instead of two. This will improve operator efficiency due to operators utilizing one system for all ADMS functionality instead of ADMS and a separate SCADA system. Having SCADA as part of the ADMS platform will enhance ADMS functionality, such as system tagging and switch order management.

Estimates

Internal Labor (\$):	100000
Purchases (\$):	
Contract Services (\$):	550000
Other Specific Charges (\$):	
Retirement (\$):	
Salvage (\$):	

Description/Scope

Implement an Advanced Distribution Management System (ADMS) throughout the Unitil electric service territories (FG& and UES). ADMS will be integrated or replace Unitil's existing OMS and SCADA systems ADMS will be integrated with Unitil's existing GIS system. The ADMS will support VVO, CVR, power flow analysis, distribution system automation, including automatic distribution switching and fault location, isolation and service restoration (FLISR). The ADMS will also serve as a platform for more advanced modules in the future such as a Distribution Energy Resource Management System (DERMS). These more advanced features are currently out of the scope of the current ADMS project, however the selected ADMS platform shall be capable of these features in the future.

The ADMS hardware and platform will be utilized by both FG&E and UES. The implementation of the ADMS is proposed to be a phased approach. The first two years of this phased approach will focus on the implementation of ADMS in the FG&E territory with the later years focusing on UES and improving functionality in the FG&E territory.

ADMS Implementation is expected to be a multi-year project with an expected start year of 2020 and completion year of 2022. Additional functionality is planned beyond 2022 in FG&E (these projects are budgeted as FG&E only budget items).

Justification

This is part of the Grid Modernization plan filed with the DPU.

An ADMS is the next step in the evolution of distribution management systems. An ADMS integrates a comprehensive set of monitoring, analysis, control, planning, and informational tools that work together with one common network model. An ADMS merges existing OMS, ADMS, circuit analysis, load flow, and SCADA systems together to provide all of the information to one location. An ADMS allows its users, operators, and dispatchers a real-time view of the distribution system. In order for the ADMS to provide benefits, it must be integrated with some of Unitil's other Grid Modernization initiatives including, the Field Area Network, Substation SCADA and VVO projects.

An ADMS system can provide many different functions such as (but not limited to) self-healing automation, control for distributed energy resources, additional SCADA functions across the distribution system, real-time load flow and circuit analysis, demand response, outage restoration, direct load control, network configuration, and VVO.

The ADMS will enable effective VVO/CVR, reducing customer energy consumption by 2% or more and is expected to reduce peak demand by the same amount. This will directly benefit customers by reducing their electricity bills. The ADMS will also improve reliability through the implementation of FLISR. The ADMS will serve as a platform for more advanced modules such as a DERMS.

Retirement:	\$0.00
Cost Of Removal:	\$144,369.00
Salvage:	\$0.00
CWO Total:	\$577,477.64

DESCRIPTION/SCOPE

This is part 2 of the Downtown Conversion Project. Circuit 1H1 out of Bridge Street substation will be converted to 13.7/7.97kV. The current spacer out of Bridge Street substation will be fed from one the new Gulf Street 13.8/7.97kV circuits. Storrs Street will be re-insulated and Depot Street and Kennedy Lane will need to be reinsulated and re-conducted. This will provide a back-up to the radial underground that feeds from Storrs Street to South Main Street. The additional scope is to finish the conversion work, connecting circuits to their new circuit positions, and tapping other already installed devices.

The scope of this project has expanded. Additional conversion work is necessary for 1H1 and there are two new 13.8kV circuits instead of one.

Additional work includes: padmount transformer replacements, new switch installations, and building new circuit getaways from the converted Gulf St substation.

In addition to the distribution work to be done, some of the funds in this budget item are referenced in Auth #190198, which is the sub-transmission/374 line right-of-way rebuild portion of the overall Gulf St Conversion Project.

JUSTIFICATION

Development in the city of Concord expected to be in service by summer of 2020 requires infrastructure upgrades.

Two buildings at the corner of S. State St. and Pleasant St. in Concord are in the process of being renovated into apartments and retail space. Modeling shows that the additional load will cause the 2/0 ACSR and #2 Cu to be overloaded in the summer of 2019.

The 2/0 ACSR and the #2 Cu is expected to be loaded to 102% and 114%, respectively, of their summer normal amp rating. Voltage may also be as low as 116V in 2019. Converting the circuit will eliminate these issues and prepare for the conversion to a higher voltage class.

Phase swaps have been completed where possible to defer the conversion to 2020.

Description/Scope

This is part 2 of the downtown conversion project. The scope is to finish the conversion work, particularly switching the transformer dual ratio switch, connecting circuits to their new circuit positions, and tapping other already installed devices.

The scope of this project has expanded. Additional conversion work is necessary for 1H1 and there are two new 13.8kV circuits instead of one.

Additional work includes: padmount transformer replacements, new switch installations, and building new circuit getaways from the converted Gulf St substation.

In addition to the distribution work to be done, some of the funds in this budget item are referenced in Auth #190198, which is the sub-transmission/374 line right-of-way rebuild portion of the overall Gulf St Conversion Project.

Justification

Development in the city of Concord expected to be in service by summer of 2020 requires infrastructure upgrades.

Two buildings at the corner of S. State St. and Pleasant St. in Concord are in the process of being renovated into apartments and retail space. Modeling shows that the additional load will cause the 2/0 ACSR and #2 Cu to be overloaded in the summer of 2019.

The 2/0 ACSR and the #2 Cu is expected to be loaded to 102% and 114%, respectively, of their summer normal amp rating. Voltage may also be as low as 116V in 2019. Converting the circuit will eliminate these issues and prepare for the conversion to a higher voltage class.

Phase swaps have been completed where possible to defer the conversion to 2020.

DESCRIPTION/SCOPE

This revised authorization covers the cost of unscheduled additions and replacements of tools and equipment normally utilized by Line Dept., Garage and Stockroom.

This revision is due to purchasing Climbing gear and harnesses for 3 new linemen, hired in the 4th quarter of 2019 and the 1st quarter of 2020.

JUSTIFICATION

Allows for replacement of failed and broken tools and any addition that may be needed.

NOTES

Approx \$2500.00 to outfit each line worker with climbing gear and fall arrest system.

Retirement:	\$0.00
Cost Of Removal:	\$0.00
Salvage:	\$0.00
CWO Total:	\$10,000.00

DESCRIPTION/SCOPE

Purchase new tools or replace existing as required.

JUSTIFICATION

This project is required to maintain the ability to perform construction, maintenance and testing activities or improve work practices and productivity.

Covered Trailer: The substation crew in capital has a normal bucket truck for their vehicle, and it lacks any kind of significant covered storage like the other DOC's box trucks provide. This would give us the ability to store and transport more of our material, tools, and our increasingly expensive and sensitive test equipment in a way that protects them from being exposed to the elements.

Director, IT Infrastructure
Entered By: Darnell, Shane on 8/8/2019 9:00:11 AM
Director, IT Infrastructure
Status Changed By: Haynes, Jeremy on 3/25/2020 3:04:36 PM
Director, Enterprise IT Systems

Estimates

Internal Labor (\$):	39300
Purchases (\$):	1098851
Contract Services (\$):	251300
Other Specific Charges (\$):	
Retirement (\$):	
Salvage (\$):	

Description/Scope

This authorization includes replacement of IT asset purchases as outlined in the IT 1.01 Asset Management Policy. Generally this requires most PC and laptop assets be replaced on a 5/year replacement cycle; critical server, storage and firewalls are on a 5-year replacement cycle; and larger assets replaced as needed to maintain integrity of systems and minimizing financial risk to the Company from asset obsolescence or loss.

Of particular interest this year:

- 1) Network: Replacement of Cisco 2960 and 300 Switches, Upgrade of wireless networks and Sonic Wall firewalls at 5 sites; and upgrade of Sonic Wall Management console
- 2) Servers: Replacement of 20 servers reaching end of life (5 years); purchase of 2 Compellent 50 TB drives for Seacoast and Portsmouth; finishing the upgrade of the enQuesta server; upgrade of both OMS and SharePoint servers; and upgrade to Highly Available server environments for our critical business applications
- 3) PC's: replacement of aging equipment, licensing renewals and desktop equipment for 150 users

Estimates:

Internal Labor \$39,300

Network \$253,367

Servers/Desktops \$845,484

IT Consulting \$251,300

Total Infrastructure \$1,389,451

Estimates

Internal Labor (\$):	233430.00
Purchases (\$):	334000.00
Contract Services (\$):	306772.00
Other Specific Charges (\$):	
Retirement (\$):	
Salvage (\$):	

Description/Scope

The Customer Facing Enhancements is a comprehensive list of work to be done in 2020 for improvements in the areas of Billing, Credit & Collections, Retail Choice and Customer Service. Throughout the year as support items are entered, some are deemed to be "enhancements" and not covered under support. These tickets are coded as "enhancement" and reviewed each year for prioritization to be captured in the annual CIS enhancement work.

This work includes all customer facing tools such as billing, rates, revenue, cash, sundry, metering, and work orders.

Internal Labor

CS: 540 @ \$35 = 18,900

App Dev:

Justification

The full list of enhancements will improve business processes in the following departments: Billing, Customer Service, Retail Choice, Credit & Collections, and Customer Service

The enhancements identified for this project create the following additional benefits to the CIS environment:

- Address risk to revenue collection
- Streamline business processes (lowering risk of user errors)
- Enhance customer interaction & customer self-service offerings

IT Project Manager

Estimates

Internal Labor (\$):	39804
Purchases (\$):	
Contract Services (\$):	
Other Specific Charges (\$):	
Retirement (\$):	
Salvage (\$):	

Description/Scope

Ensure regulatory compliance of approved tariff changes.

Based upon previous experience, estimates of hours and dollars were provided for the known structural changes required in 2020.

Items that are tentatively scheduled for 2020:

- SMART Non-Bypassable Charge
- FGE Grid Mod
- FGE MMRC
- Company TOU Pilot

There is the potential for additional changes; however those are unknown at the time.

Estimated Labor: 856 hours

Estimated Cost: \$39,804

Justification

These are Regulatory Requirements. Changes to the CIS are required in these situations, and must be completed on time, accurately, and compliant with audit requirements.

Unitil is required to comply with approved Regulatory Orders and Tariffs, which requires modifications to the CIS (enQuest) system. Unitil staff from multiple departments participates in the building, testing, validation, and approval of changes to the system to ensure accurate billing, reporting, reconciliation, and bill print.

			Salvage:	\$0.00
			Total Project Amount:	\$232,500.00
DESCRIPTION/SCOPE				
<p>Implementing DevOps (IT Development and IT Operations practices combined) practices would transform Unutil's IT infrastructure, adding traceability, automation and security to every component in every environment. These improvements are badly needed to continue to support, secure and audit Unutil's increasing technology needs. The goal for the 2020 project is to fully implement DevOps practices in Unutil's Development and Staging environments to have the benefits realized in those environments and to have a way to demonstrate what a DevOps implementation would look like in Unutil's Production environment.</p> <p>Concrete deliverables for this project will include:</p> <ul style="list-style-type: none"> - Automation of DEV/Staging/Production deployments of our internal applications and databases in a fully audit compliant manner - Implementation of electronic deployment approval stage gates - Automation of enQuesta environment builds along with sliced data functionality - Implementation of new App Dev ticketing process and SLA enforcement 				
JUSTIFICATION				
<p>Implementing a modern, automated, auditable approach to IT infrastructure and applications would greatly increase compliance, efficiency and security.</p> <p>Unutil has hundreds of servers and applications spread across three separate technology environments with maintenance and deployment done manually by dozens of technology personnel. Ensuring security compliance with this manual approach to IT infrastructure is an almost impossible task; technology components do not have any audit trails attached to them so auditing Unutil's technology environments is a time-intensive manual task. Updating all of the technology to make it compliant is also a struggle with the current manual approach, with the amount of time required to perform the updates potentially leading to prolonged periods of non-compliance. This situation will only become more pronounced as Unutil's technology components become more complex in the near future.</p>

Description	Amount
Internal Labor:	\$275,000.00
Purchases:	\$14,500.00
Contract Services:	\$0.00
Other Specific Charges:	\$0.00
Retirement:	\$0.00
Salvage:	\$0.00
Total Project Amount:	\$289,500.00

DESCRIPTION/SCOPE

Implementing DevOps (IT Development and IT Operations practices combined) practices would transform Unitil's IT infrastructure, adding traceability, automation and security to every component in every environment. These improvements are badly needed to continue to support, secure and audit Unitil's increasing technology needs. The goal for the 2020 project is to fully implement DevOps practices in Unitil's Development and Staging environments to have the benefits realized in those environments and to have a way to demonstrate what a DevOps implementation would look like in Unitil's Production environment.

Concrete deliverables for this project will include:

- Automation of DEV/Staging/Production deployments of our internal applications and databases in a fully audit compliant manner
- Implementation of electronic deployment approval stage gates
- Automation of enQuesta environment builds along with sliced data functionality
- Implementation of new App Dev ticketing process and SLA enforcement

JUSTIFICATION

Implementing a modern, automated, auditable approach to IT infrastructure and applications would greatly increase compliance, efficiency and security.

Unitil has hundreds of servers and applications spread across three separate technology environments with maintenance and deployment done manually by dozens of technology personnel. Ensuring security compliance with this manual approach to IT infrastructure is an almost impossible task: technology components do not have any audit trails attached to them so auditing Unitil's technology environments is a time-intensive manual task. Updating all of the technology to make it compliant is also a struggle with the current manual approach, with the amount of time required to perform the updates potentially leading to prolonged periods of non-compliance. This situation will only become more pronounced as Unitil's technology components become more complex in the near future.

Revision 12/8/21

Revision to account for higher internal labor costs and additional unplanned software license purchases

CWO Total:	\$15,336.00

DESCRIPTION/SCOPE

This project consists of installing a fuse saver in series with the existing 65N fuse at Pole 56 Knox Road in Bow. Pole 56 will need to be replaced to accommodate this installation.

JUSTIFICATION

This area has experienced several patrolled nothing found, squirrel, and broken limb related outages. The installation of this fuse saver will decrease the number of outages.

Overhead on Specific Charges (%):	
Customer Contribution (%) (before OH's applied):	
EDP? (Yes or No):	??
Retirement:	
Salvage:	

Description/Scope

DRBC01:

This reliability budget project is to install fusesavers at 4 different locations.

- (1) @ Stickney Hill Rd, Hopkinton
- (1) @ Knox Rd, Bow
- (1) @ N. Main St, Boscawen
- (1) @ New Orchard Rd, Epsom

These fusesaver installations will require additional work apart from the fusesaver installation, e.g. pole and wire replacements, etc.

DRBC02:

Replace cutouts and fuses at P.5 Mountain Rd, Concord with a Recloser.

DRBC03:

Install a micro-processor based recloser at P.168 Main St, Chichester. Remove the existing hydraulic recloser and low-side fuses

DRBC04:

Install a microprocessor-based recloser at P.5 Regional Dr., Concord.

DRBC05:

Install a microprocessor-based recloser at P.78 Pleasant St, Concord.

Justification

DRBC01:

The identified areas experienced several patrolled, nothing found, animal, and broken limb-related outages. Fusesavers add

one layer of reclosing to a standard fuse. They operate based upon fuse TCC curves and therefore allow for reclosing in areas where it is challenging to coordinate reclosers. They also provide interruption histories, momentary or otherwise, real time current, and peak current loads.

Estimated annual savings (total):

Customer Minutes of Interruption: 36,491
Customer Interruptions: 376

DRBC02:

15W1 has experienced several operations on the fuses at P.5 Mountain Rd. Replacing the fuses with a recloser allows reclosing to eliminate some of the outages.

Estimated Annual Savings:

Customer Minutes: 27,838
Customer Interruptions: 335

DRBC03:

The hydraulic recloser at P.167 Main St, Chichester does not coordinate well with downline devices. As such, there is low-side fusing for the step down transformers at P.164 and 166. These low-side fuses have operated multiple times in the last three years. The hydraulic recloser does allow for fuse savings downline. Replacing the hydraulic recloser and low-side fuses with a microprocessor-based recloser will allow reclosing for the 451 exposed customers.

Estimated Annual Savings:

Customer Minutes of Interruption: 45,125
Customer Interruptions: 439

DRBC04:

A number of motor vehicle accidents and large tree related outages occurred in 2018 that caused the substation recloser to trip to lockout. A mid-line recloser will be another sectionalizing point with reclosing that will help lessen the effect of a mainline fault beyond the recloser.

Estimate Annual Savings

Customer Minutes of Interruption: 27,429
Customer Interruptions: 330

DRBC05:

6X3 exits the Pleasant St S/S and branches to the left and right. In order to limit the scale of the outage, a sectionalizing device in each direction will prevent a full circuit outage. This project is for a recloser in the east direction of Pleasant St. It will replace a set of fuses on P.78.

Estimated Annual Savings:

Customer Minutes of Interruption: 27,774
Customer Interruptions: 334

DESCRIPTION/SCOPE

This authorization is to cover the costs of replacing a hydraulic recloser with a three-phase G&W Viper recloser on pole 168 Main Street, Chichester. In order to accommodate the new recloser the pole will need to be replaced and reinsulated.

JUSTIFICATION

The hydraulic recloser at P.168 Main St, Chichester does not coordinate well with downline devices. As such, there is low-side fusing for the step down transformers at P.164 and 166. These low-side fuses have operated multiple times in the last three years. The hydraulic recloser does allow for fuse savings downline. This reliability budget project is to install fusesavers at 4 different locations.

- (1) @ Stickney Hill Rd, Hopkinton
- (1) @ Knox Rd, Bow
- (1) @ N. Main St, Boscawen
- (1) @ New Orchard Rd, Epsom

These fusesaver installations will require additional work apart from the fusesaver installation, e.g. pole and wire replacements, etc.

DRBC02:

Replace cutouts and fuses at P.5 Mountain Rd, Concord with a Recloser.

DRBC03:

Install a micro-processor based recloser at P.168 Main St, Chichester. Remove the existing hydraulic recloser and low-side fuses

DRBC04:

Install a microprocessor-based recloser at P.5 Regional Dr., Concord.

DRBC05:

Install a microprocessor-based recloser at P.78 Pleasant St, Concord.

Justification**DRBC01:**

The identified areas experienced several patrolled, nothing found, animal, and broken limb-related outages. Fusesavers add

one layer of reclosing to a standard fuse. They operate based upon fuse TCC curves and therefore allow for reclosing in areas where it is challenging to coordinate reclosers. They also provide interruption histories, momentary or otherwise, real time current, and peak current loads.

Estimated annual savings (total):

Customer Minutes of Interruption: 36,491
 Customer Interruptions: 376

DRBC02:

15W1 has experienced several operations on the fuses at P.5 Mountain Rd. Replacing the fuses with a recloser allows reclosing to eliminate some of the outages.

Estimated Annual Savings:

Customer Minutes: 27,838
 Customer Interruptions: 335

DRBC03:

The hydraulic recloser at P.167 Main St, Chichester does not coordinate well with downline devices. As such, there is low-side fusing for the step down transformers at P.164 and 166. These low-side fuses have operated multiple times in the last three years. The hydraulic recloser does allow for fuse savings downline. Replacing the hydraulic recloser and low-side fuses with a microprocessor-based recloser will allow reclosing for the 451 exposed customers.

Estimated Annual Savings:

Customer Minutes of Interruption: 45,125
 Customer Interruptions: 439

DRBC04:

A number of motor vehicle accidents and large tree related outages occurred in 2018 that caused the substation recloser to trip to lockout. A mid-line recloser will be another sectionalizing point with reclosing that will help lessen the effect of a mainline fault beyond the recloser.

Estimate Annual Savings

Customer Minutes of Interruption: 27,429
 Customer Interruptions: 330

DRBC05:

6X3 exits the Pleasant St S/S and branches to the left and right. In order to limit the scale of the outage, a sectionalizing device in each direction will prevent a full circuit outage. This project is for a recloser in the east direction of Pleasant St. It will replace a set of fuses on P.78.

Estimated Annual Savings:

Customer Minutes of Interruption: 27,774
 Customer Interruptions: 334

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$220,529.68
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$220,529.68
Retirement:	\$0.00
Cost Of Removal:	\$55,132.42
Salvage:	\$0.00
CWO Total:	\$165,397.26

DESCRIPTION/SCOPE

This authorization cover the cost to replace a condemned pole on the 37 line (pole 42), install a new pole with a three phase GOAB switch on pole 42X, and install a mid-span pole and G&W Viper recloser to protect circuit 37X1.

JUSTIFICATION

The existing structure has three vertical switches on it, one for each direction at pole 42. The pole has been condemned and the insulators on the switches are cracked. Replacing the switch for the 37X1 circuit with a recloser will provide the following reliability benefit beyond the condemned pole and equipment replacement.

Estimated Annual Savings:

DESCRIPTION/SCOPE				
An upgrade to the Power Plan software is required to stay current with the latest revision and enable us to receive support under our maintenance agreement.				
Major Upgrade Components: -Tax Repairs -Lease Accounting Module (Disclosure Reporting) -Property Tax (New Filing Format for MA) -Security Capabilities				
JUSTIFICATION				
By upgrading the Power Plan software on a regular basis the system will allow the company to use all of the enhancements developed in the latest versions and stay current with all security enhancements. These upgrades are performed every three years.				
Power Plan is critical component that allows accurate accounting in order to comply with SEC, FERC, SOX, audit and regulatory reporting.				
The project amount over budget is due to a change in scope from the original statement of work provided by Power Plan based on Unutil's need to separate the Time & Billing project from the Upgrade. Training workshops on new aspects of upgrade are included as well as preliminary workshops for Power Plan to understand how the systems are interfaced.				
This is an estimate supplied by Power Plan. Est Schedule for April-Oct timeframe IT time includes ~ 20 hrs

1/26/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

This revised authorization is to account for additional expenditures associated with additional work added to the project at the customers request. The additional work consisted of:

1. One Additional Padmount Transformer in order to remove an overhead bank
2. Additional second 450 foot run of Primary Underground Cable and associated material

The original authorization was to replace the main line pole in order to accommodate a New 400' primary underground line extension to a padmount transformer to serve a new recycling center at 1 Minuteman Way in Concord

The customer will pay the reduced estimated cost of this line extension and transformers, in accordance with the Economic Development Program.

A Final accounting will be made after the work has been completed. The customer will be credited, or billed for the difference in the estimated and actual cost

JUSTIFICATION

Provide safe and reliable Electric service to a new recycling center at 1 Minute man Way Concord.

DESCRIPTION/SCOPE

Replace the existing FA7T1 transformer high-side fusing with a new 38kV breaker.

JUSTIFICATION

In 2018, the Bow Bog Rd S/S transformer (18T2) was loaded to 98% of its nameplate rating. The solution to alleviate this transformer's loading condition is to shift approximately 800KVA of load from 18W2 to 7W3. This solution loads the Bow Junction S/S transformer (7T2) high-side fuse above planning guidelines. This high-side fuse replacement project will address the loading violation at Bow Junction S/S.

			CWO Total:	\$185,219.26

DESCRIPTION/SCOPE

This project consists of replacing the existing single phase #6 cu Primary and neutral with 1/0 ACSR and installing a second 1/0 ACSR phase from Pole 1 Dunbarton Center Rd, Bow to Pole 15 Dunbarton Center Rd, Bow. Install an electronic recloser on the new phase at Pole 1 Dunbarton Center Rd, Bow. Replace the existing hydraulic recloser with an electronic recloser to match the new install. This is necessary to reduce the total loading on the single recloser currently at Pole 1 Dunbarton Center Rd, Bow.

JUSTIFICATION

A hydraulic recloser on P.1 Dunbarton Rd, Bow and single phase fuse on P.75 Brown Hill Rd, Bow are expected to be loaded at 91% and 99% of their continuous current ratings, respectively, in 2020.

NOTES

This project was modified from its original scope due to issues with land owners and the town of Bow, not wanting poles along Putney Rd.

Salvage:	

Description/Scope

This project is to extend a single phase line down Brown Hill Rd in Bow. The purpose is to split load in that area between 22W3 and 18W2 and subsequently offload an overloaded recloser on 18W2. This project requires a single phase regulator to be installed at the start of Brown Hill Rd.

Additionally, to complete this project, the I-89 crossing of 22W3 needs to be reconductored to 336AA. This was separately identified as a project for 2022.

Justification

A hydraulic recloser on P.1 Dunbarton Rd, Bow and single phase fuse on P.75 Brown Hill Rd, Bow are expected to be loaded at 91% and 99% of their continuous current ratings, respectively, in 2020.

Also, reconductoring the I-89 crossing eliminates a future overload violation.

DESCRIPTION/SCOPE

This authorization is to relocate 16 sections of three phase overhead Primary and secondary from the east side of Rt 3A to the West side, to allow for State to widen Rt 3A and rebuild the intersection of Dunklee Rd. There are also 2 bridge replacements within the scope of this project. Consolidated Communications will install 16 new poles on Rt 3A and 2 new poles on Dunklee Rd. UES contractor will install approx 5000 feet of new 3 phase 336 Al Primary and 1700 feet of 4/0 ACSR neutral conductor along Rt 3A. They will also replace approx 1800 feet of 3 phase 1/0 ACSR along Dunklee Rd.

JUSTIFICATION

Comply with State and Federal Highway regulations for a State of NH DOT initiated road widening and bridge replacement project.

NOTES**AUTHORIZATION COMMENTS**

This project was not anticipated to begin during the 2020 budget year. This project was estimated in 2016, but was put on hold by the Town of Bow and State of NH DOT. The project was reinstated in Feb of 2020

DESCRIPTION/SCOPE				
Tracks outstanding debt. Provides a structured set of debt obligations with call, sinking fund, term, and redemptions. Reports on remaining par, interest, and principal payments for all securities associated with a bond issue. Archive all data related to debt issuance and provide easy access by multiple stakeholders across the organization Improve accuracy by automatically generating debt service schedules, accrual of interest, amortization of costs of issuance. Streamline internal accounting for outstanding obligations by automatically creating general ledger journal entries. Automate and enhance internal and external debt reporting.				
JUSTIFICATION				
Currently all debt tracking and interest payment calculation are done in Excel spreadsheets. The number of bonds/notes outstanding has grown and the management has become more complex. We currently have ~24 outstanding debt issuances with over 200 unique debt service payments for ~\$42 million to ~30 different holders (or nominees). In addition, the holders of our debt constantly changes, which also has to be tracked and managed. Missing a single debt payment will put us in default and the bond/note will become immediately due and payable. There will be an associated monthly/yearly time savings for both Finance and General Accounting.

12/29/2020	YES	Hevert, Robert Senior Vice President & Chief Financial Officer & Treasurer		

DESCRIPTION/SCOPE

This authorization is to replace the existing roof for Manhole # 6, with a precast concrete roof.

TF Moran has been contracted to design a new roof system.

ICR and sons has been contracted to perform the replacement. They will be responsible for obtaining any and all permits from the city of Concord and State of NH if required and provide the City with an engineered Traffic Plan.

JUSTIFICATION

Concord line crews identified deterioration within a number of manholes. Because of this, TF Moran was hired to evaluate and make suggestions on the work needed to bring this manhole back to an acceptable level of strength and increase their life span. MH 6 is in need of immediate attention but is in a typical low load hazard area.

The majority of the work will be performed in the spring of 2021.

The Engineering and purchase of the new roof is expected to be completed in 2020.

NOTES

AUTHORIZATION COMMENTS

The difference between the original budget amount and net authorized cost is as follows:
 The original scope and recommendation for this project was to reinforce the existing steel rebar, by welding new rebar to existing and resurface the concrete roof. Upon closer investigation, it was determined there was not enough solid rebar to weld to for successful reinforcement. A new plan was developed by TF. Moran to replace the entire roof with a new precast roof.

CWO Summary

CWO	Description	Amount
20201665	Replace roof with Precast roof	\$183,262.00
	Total	\$183,262.00

Description/Scope

Replace steel supports and Manhole cover chimneys.

MH 6 Weld steel plates to beams and replace brick manhole cover chimneys

Justification

Concord line crews identified deterioration within a number of manholes. Because of this, TF Moran was hired to evaluate and make suggestions on the work needed to bring this manhole back to an except able level of strength and increase their life span. This evaluation concluded MH17 is in need of immediate attention and is in a high load hazard area, MH 6 is in need of immediate attention but are in typical low load hazard area and MH15 is in need of attention, but is not critical . No timeframe of need was provided.

12/4/2020	YES	Diggins, Todd Treasurer, Director, Finance		

DESCRIPTION/SCOPE

This project consists of replacing the existing two-way truck radio system with a cellular based PTT system. This technology was tested and proven to be effective in the Concord region. The first time purchase and installation and month recurring costs of this system are less than originally budgeted since UES will not own any assets and pay attachment lease fees on third party towers.

JUSTIFICATION

This upgrade will address narrow banding requirements set by the FCC, replace aging equipment that is becoming more difficult to maintain, provide GPS location information for improved dispatch, and upgrade the poor performing dispatch consoles.

Benefits:

- o Modernizes radio system with digital communications including data capabilities.
- o Replaces 20 -25 year old obsolete equipment. Replacement equipment is becoming costly and very difficult to obtain.
- o Improves radio clarity and Increased coverage to fill existing gaps.
- o Provides automated vehicle location throughout territory via built in GPS. This includes handheld radios provided to contractors during storm response.
- o Provides more robust and reliable dispatch solution and addresses current systems' poor performance
- o Continues planned upgrades across all electric operating centers (FGE upgrade completed in 2012, Seacoast currently in progress)

Description/Scope

This is the carryover of the upgrade for the UES Capital radio systems to an all-digital solution and replace narrow band handheld radios. This replacement will include an upgrade of the Dispatch consoles in Portsmouth and local distribution operating centers.

Justification

This upgrade will address narrow banding requirements set by the FCC, replace aging equipment that is becoming more difficult to maintain, provide GPS location information for improved dispatch, and upgrade the poor performing dispatch consoles.

Benefits:

- o Modernizes radio system with digital communications including data capabilities.
- o Replaces 20 -25 year old obsolete equipment. Replacement equipment is becoming costly and very difficult to obtain.

DESCRIPTION/SCOPE

This authorization is for the upgrade from single phase to three phase underground primary and to replace the existing rise pole to service newly renovated and expanded buildings at 149 East Side Dr in Concord.

The customer will pay the reduced estimated cost of this line extension and transformers, in accordance with the Economic Development Program.

A Final accounting will be made after the work has been completed. The customer will be credited, or billed for the difference in the estimated and actual cost.

JUSTIFICATION

ECONOMIC DEVELOPMENT PROGRAM
 Justification: SUMMARY: Excluding Transformers:

C-20201666 Underground Billable \$27,561.10
 Less: Customer Contribution \$22,310.45

Total Overhead Line Allowance: \$5,250.65
 Number of Credits: 1
 Amount of each Credit: \$5,250.65

C-20201667 Underground Non Billable \$19,359.00

Net Authorized Amount \$41,845.42

2/5/2020	YES	Brock, Laurence <i>Chief Accounting Officer & Controller</i>		
2/5/2020	YES	Vaughan, Christine <i>SVP, CFO and Treasurer</i>		

DESCRIPTION/SCOPE

This authorization covers the costs associated with minor additions and improvements (under \$30,000) to the sub-transmission, distribution and substation systems where such improvements cannot be reasonably identified and budgeted as a specific project. The majority of this work is driven from our inspection programs and routine improvements to the system as a result of customer complaints or other findings.

The total amount of this authorization covers the costs projected for the first six (6) months of 2020 which was derived from reviewing historical expenditures for the first six (6) months as follows:

Year First 6 months % of Total Expenditure

2013 \$508,900 38%
 2014 \$541,400 36%
 2015 \$607,500 39%
 2016 \$711,100 46%
 2017 \$648,800 35%
 2018 \$645,500 40%
 2019 \$636,300 46%

Total Budgeted Amount \$1,608,686
 Authorization Amount \$ 643,500 (40% of total budget)
 Balance \$965,186

JUSTIFICATION

Replacement and addition of various types of equipment.

DESCRIPTION/SCOPE

This revised authorization covers the costs associated with the construction necessary to service new customers which would not be covered under other line extension categories (under \$30k and no customer contributions). Examples are services and one pole line extensions and associated work with the same.

Initial Authorization for first six months \$196,700
 Total Expenditure through Dec \$744,280
 Total Budgeted Amount \$437,600
 2nd Revision Amount \$487,700
 Revised Authorization Amount \$775,000
 Variance \$287,300

In 2020 we experienced one of the highest expenditure levels in several years whereby a high level of new services, small line extensions and associated work was experienced all of which was required in order to provide new electric service to our customers. One of the notable factors associated with the majority of this higher than usual expenditures was that several of the new service requests required additional work along our main lines such as replacing and changing over poles to accommodate the installation of a new transformer or a lateral for a single pole line extension.

			Blanket Authorization Total:	\$189,958.00

DESCRIPTION/SCOPE

This authorization covers the costs associated with the necessary replacements to our facilities under emergency (unscheduled) and "minor" storm conditions.

The total amount of this authorization covers the costs projected for the first six (6) months of 2020 which was derived from reviewing historical expenditures as follows:

Year First 6 mo. % of Full Year Actual

2017 \$1,335,300* 198% *

2018 \$1,918,000* 221% *

2019 \$ 284,800 18%

* These amounts reflect major storms that may not be transferred to a recovery account until later in that year or early the following year hence the notable variance compared to budgeted amounts.

Total Budgeted Amount \$472,396

Authorization Amount \$236,198 (50% of total)

Balance \$236,198

JUSTIFICATION

Maintain satisfactory level of service to customer by providing reliable electric service.

7/13/2020	YES	Hurstak, Daniel <i>Controller</i>		
7/14/2020	YES	Brock, Laurence <i>Senior Vice President & Chief Financial Officer</i>		

DESCRIPTION/SCOPE

This revised authorization covers the additional costs associated with the necessary replacements to our facilities under emergency (unscheduled) and "minor" storm conditions.

Initial Authorization \$236,200
Actual Expenditure through June 2020: \$364,100
Revised authorization Amount \$589,000
Budgeted Amount: \$472,400
Variance + \$116,600

NOTE: This years trending is higher than expected therefore this revised authorization amount is over the budgeted amount to reflect his higher spending level to date.

JUSTIFICATION

Maintain satisfactory level of service to customer by providing reliable electric service.

DESCRIPTION/SCOPE

This revised authorization covers the additional costs associated with the necessary replacements to our facilities under emergency (unscheduled) and "minor to moderate" storm events.

Initial Authorization \$236,200
 Actual Expenditure through Dec. 2020: \$767,253
 Total Budgeted Amount: \$472,400
 2nd Revision Amount \$589,000 (issued in July, 2020)
 This Revision Amount \$825,000
 Variance + \$236,000 (2nd Revision v 3rd Revision)

In 2020 we experienced a higher than normal minor to moderate storm events that drove these expenditures higher than expected.

JUSTIFICATION

Maintain satisfactory level of service to customer by providing reliable electric service by way of responding to outages, minor to moderate storm events and general trouble related matters.

Retirement:	\$3,579.00
Cost Of Removal:	\$34,744.00
Salvage:	\$658.00
Blanket Authorization Total:	\$281,767.00

DESCRIPTION/SCOPE

This authorization covers the costs associated with all work for which the vast majority of repayment is anticipated such as broken poles, 3rd party attachment requests, 3rd party damages to our facilities, and customer owned equipment that we may replace.

The total amount of this authorization covers the costs projected for the first six (6) months of 2020 which was derived from reviewing historical expenditures as follows:

Year First 6 mo. % of Full Year Actual

2015 \$192,000 42%
2016 \$121,300 28%
2017 \$90,700 34%
2018 \$185,600 52%
2019 \$171,200 58%

Total Budgeted Amount \$403,997

Authorization Amount \$173,719 (43% of total)

Balance \$230,278

JUSTIFICATION

Obligation to respond to customer outages, broken poles, etc. Also, to perform work upon customer requests.

DESCRIPTION/SCOPE

This authorization is for the purchase and installation of transformers that are specifically associated with company driven projects such as conversions, stepdown upgrades and stepdown installations.

There are five (5) specified 2020 distribution projects that will call for the purchase and installation of transformers;

- 1) Circuit 19H1 - Transfer to 27X1, Drinkwater Rd, Kensington.
- 2) Circuit 58X1, South Main, Plaistow - convert to 34.5kV due to new housing development on North Rd, Plaistow.
- 3) Circuit 21W1, Meditation Lane, Atkinson, upgrade existing 167kVA steps to 333kVA steps,
- 4) Circuit 13W1, Kelly Road, Plaistow, conversion to service new load Carli's Way -
- 5) Circuit 56X1, Convert Route 125, Kingston - conversion and add phases to service new customer.

JUSTIFICATION

Required for voltage and/or load driven projects.

Description/Scope

This budget item is for the purchase and installation of transformers that are specifically associated with company driven projects such as conversions, stepdown upgrades and stepdown installations.

As of October 15, 2019, there are five (5) specified 2020 distribution projects that will call for the purchase and installation of transformers;

- 1) Circuit 19H1 - Transfer to 27X1, Drinkwater Rd, Kensington. Total of \$28k > 3 - 500kVA steps (\$8k ea), 2 - 25kV 19.9kV, and 1-25kVA 2.4kV.
- 2) Circuit 58X1, South Main, Plaistow - convert to 34.5kV due to new housing development on North Rd, Plaistow. Total of \$65k > 1-500kVA step, 3 - 333kVA steps, 2-167kVA steps, 19.9kV to 2.4kV
5-50kVA, 3-37.5kVA, 6-25kVA, 7-15kVA > 19.9kV
- 3) Circuit 21W1, Meditation Lane, Atkinson, upgrade existing 167kVA steps to 333kVA steps, 13.8 to 4 kv. \$20k.
- 4) Circuit 13W1, Kelly Road, Plaistow, conversion to service new load Carli's Way - Duals, 4-15's, 4-25's, 1-37.5 - \$12k.
- 5) Circuit 56X1, Convert Route 125 - TBD - in mid October this project was reduced from original scope and therefore an additional review of specific transformer needs (reduction) needs to take place however a reduction of approx. \$130k base material and reduction of 200 contractor MH has taken place to account for an estimated reduction for transformer line item.

Justification

Required for voltage and/or load driven projects.

2/10/2020	YES	Vaughan, Christine <i>SVP, CFO and Treasurer</i>		

DESCRIPTION/SCOPE

This authorization consists of replacing poles (and changing them over) in various towns as a result of our scheduled distribution, sub-transmission inspection programs, other unscheduled findings, and transfers of poles that Consolidated Communications replaces as a result of their inspection program.

JUSTIFICATION

Replacement per our Distribution Inspection Policy and other substandard findings upon routine inspections.

			CWO Total:	\$240,000.00

DESCRIPTION/SCOPE

This authorization is for purchasing and installing two (2) electronically controlled reclosers; one on the 3354 sub-transmission line and one on the 3343 sub-transmission line at the Willow Road tap.

These reclosers will be programmed to coordinate with Kingston substation and operate for downline faults. Additionally, these reclosers will be remotely opened in the event of a lockout of the 03343 or 03354 at Kingston substation allowing load on the Guinea side of the reclosers to be restored remotely without patrolling.

There is no cost of removal associated with this project due to the fact that all of the work is new construction.

Note: This is the first of two projects that will fall under the 202 Reliability Project budget item.

JUSTIFICATION

The 3343 and 3354 lines have historically experienced one interruption per year and are routinely damaged during major storms.

Customer Exposure = 7,150 customers

The projected average annual savings for this project is 290,000 customer minutes of interruptions and 1,250 customer interruptions.

Description/Scope

3343 and 3354 Lines – Install Reclosers

Install two (2) electronically controlled reclosers, one on the 3354 line and one on the 3343 line, between East Kingston substation and Willow Road tap.

These reclosers will be programmed to coordinate with Kingston and operate for downline faults. Additionally, these reclosers will be remotely opened in the event of a lockout of the 03343 or 03354 at Kingston allowing load on the Guinea side of the reclosers to be restored remotely without patrolling.

Circuit 43X1 – Install Reclosers and Implement Distribution Automation

This project will consist of installing four electronically controlled reclosers along circuit 43X1 and 19X3.

Two of the reclosers will be installed along the mainline of circuit 43X1 between 43X1R1 and 19X3J43X1 tie. The 43X1J19X3 tie switch will be replaced with a recloser.

In order to increase the load carrying capability of the 19X3J43X1 tie the cutout mounted sectionalizers along Pine Street will be replaced with a recloser and the solid blades on Court Street will be replaced with a switch. Additionally, circuits 43X1 and 19X3 will be balanced to reduce loading on phase B.

Once installed a distribution automation scheme will be implemented between the new reclosers and the existing 43X1R1 recloser. The intent of the scheme is to have 43X1 and 19X3 automatically reconfigure for permanent faults on the mainline of circuit 43X1.

This is the first year of a two year project.

Justification

3343 and 3354 Lines – Install Reclosers

The 3343 and 3354 lines have historically experienced one interruption per year and are routinely damaged during major storms.

Customer Exposure = 7,150 customers

The projected average annual savings for this project is 290,000 customer minutes of interruptions and 1,250 customer interruptions.

Circuit 43X1 – Install Reclosers and Implement Distribution Automation

Circuit 43X1 is typically one of the worst performing circuits on the UES-Seacoast system. It is on both the Worst Performing Circuits in the Past Five Years SAIDI and SAIFI lists.

Customer Exposure = 1,200 customers

The projected average annual savings for this project is 125,000 customer minutes of interruptions and 1,650 customer interruptions.

The projected average annual savings for this project is 125,000 customer minutes of interruptions and 1,650 customer interruptions.

3/17/2020	YES	Diggins, Todd <i>Director, Finance</i>	Salvage:	\$0.00
			CWO Total:	\$368,900.00

DESCRIPTION/SCOPE

This authorization is for replacing H-structures 2064, 2066, 2083, 2084, and 2085 on the 3350 sub-transmission line and replacing H-structures 2014, 2015, and 2029 on the 3348 sub-transmission line in Seabrook for a total of eight (8) H-structure replacements.

The original budget proposal of replacing four (4) H - structures (which is shown as the Project Name above as it gets directly copied from the capital budget upon initiating an authorization) was based on a preliminary estimate for budgeting purposes. Upon a detailed review of the field inspection by OSMOSE it was determined that there were eight structures that required replacement due to their remaining strength.

It should be noted that the original budgeted amount of \$461,125 goes unchanged although four (4) additional structures are being replaced. The primary reason for this is that the replacement pole design will change from a two pole H-Structure to a single pole, single arm configuration.. The single pole structures were determined to be adequate until all of the structures are replaced in the near future.

JUSTIFICATION

A survey conducted by OSMOSE in 2019 showed that these structures are the more severely condemned of these two sub-transmission lines whereby one pole of the H structure is less than 50% remaining strength while the other pole is less than 65% remaining strength.

NOTES

Description/Scope

This project is to replace H-structures 2064, 2066, 2085 and 2084 on the 3350 sub-transmission lines in Seabrook.

Justification

A survey conducted by OSMOSE in 2019 showed that structures 2064 and 2085 are notably condemned whereby one pole of the H structures is near 50% remaining life and the other pole is 25% remaining life. The other two structures denoted are located right next to 2064 and 2085 and are 46% - 62% and 49% - 59% remaining life and due to the gains of efficiencies and costs (being next to the other two aforementioned structures) these two structures are being replaced as well.

7/2/2020	YES	Brock, Laurence <i>Senior Vice President & Chief Financial Officer</i>		

DESCRIPTION/SCOPE

This authorization is for converting South Main Street, Plaistow to 34.5/19.92 kV operation. New stepdown transformers will be installed along Spinney Ave, Chandler Ave, North Ave and South Main Street. Work will consist of replacing approximately twenty-two (22) poles and reconductoring approximately 13 poles sections, and associated re-insulating work.

C- 201864 O/H/TRAFFIC/TREE TRIMMING \$345,000

Cost of Removal \$80,000

Total Company Cost \$425,000

Total Authorization: \$425,000

Total Budgeted \$373,726

Variance \$+51,724

The variance is due to the fact that Unitil will be replacing the poles and anchors (requiring traffic control as well) versus Consolidated Communications (CC) due to the fact that CC could not replace them in a timely and needed basis.

JUSTIFICATION

This work is being performed to accommodate supplying a proposed development on North Ave. in Plaistow, NH which is expected to begin construction in August, 2020.

DESCRIPTION/SCOPE

This non budget authorization is to cover the costs associated with replacing the damaged 18X1R2 recloser at Timberswamp Road, Hampton.

During a minor wind event on September 30th, 2020, a tree uprooted and fell onto the primary conductors two sections away from the recloser. The force of the tree falling and subsequent primary conductors resulted in having the bushings of the recloser damaged.

C-20201885 OVERHEAD - NONBILLABLE \$60,000

Cost of Removal \$ 5,000

Total Company Cost \$65,000

JUSTIFICATION

The recloser is an integral part of the 18X1 circuit reliability and is critical to have in service so as to have this circuit in it's normal configuration.

NOTES

Note: Transfer all charges from CWO 20206643 to this authorization.

Retirement:	\$4,307.50
Cost Of Removal:	\$116,679.38
Salvage:	\$466.00
Blanket Authorization Total:	\$525,523.21

DESCRIPTION/SCOPE

This blanket authorization is to cover labor and material for system upgrades or improvements that are less than \$30,000 and don't fit any other category.

The typical type of work that would normally be performed would be as follows:

Less than < \$30,000

Telephone Request,

Cable TV Request,

Services,

Repairs / Replacement (failed, damaged, rotten/corroded, or in a state of disrepair) – essential to the operation of the system or a high probability of affecting reliability.

The amount of this authorization was derived by using historical data from the previous 5 years and the expected workload for the first six months of 2021.

Year full yr act. Jan to June %

2016 \$1,114,829.00 \$520,910.00 47%

2017 \$1,283,084.00 \$737,116.00 57%

2018 \$1,420,232.00 \$595,500.00 42%

2019 \$1,040,280.00 \$628,439.00 60%

2020 \$1,383,243.76 \$575,610.00 42%

Average \$1,248,333.75 \$611,515.00 50%

2021

Budget amount - \$1,166,793.80

1st six month auth - \$583,396.90

% of total Budget- 50%

Remaining Budget amount - \$583,396.90

JUSTIFICATION

Necessary additions and replacements to maintain a safe and reliable electric system.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$298,595.34
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$298,595.34
Retirement:	\$8,433.45
Cost Of Removal:	\$59,719.07
Salvage:	\$843.30
Blanket Authorization Total:	\$239,719.57

DESCRIPTION/SCOPE

This blanket authorization encompasses labor and material used on the system during emergency & storm restoration.

The typical type of work that would normally be performed would be as follows:

Replacement of poles, wire, cutouts, arresters, or any other associated capital hardware that pertains to overhead as well as underground

The amount of this authorization was derived by using historical data from the previous 5 years and the expected workload for the first six months of 2021.

Year full yr act. Jan to June %
2016 \$355,203.00 \$155,173.00 43.7%
2017 \$691,698.00 \$268,855.00 38.9%
2018 \$837,113.00 \$364,883.00 43.6%
2019 \$1,030,433.00 \$403,683.00 39.2%
2020 \$624,468.71 \$266,908.00 42.7%
Average \$707,783.14 \$291,900.40 42%

2021
Budget amount - \$663,545.20
1st six month auth - \$298,595.34
% of total Budget- 45%
Remaining Budget amount -\$364,949.86

JUSTIFICATION

Maintain satisfactory level of service to customer by providing reliable electric service.

Description	Amount
Total Project Cost:	\$264,346.35
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$264,346.35
Retirement:	\$10,000.00
Cost Of Removal:	\$10,000.00
Salvage:	\$0.00
CWO Total:	\$254,346.35

DESCRIPTION/SCOPE

This project consists of replacing the existing 13W2 circuit position 150A (240A rating in load bonus) voltage regulators at Boscawen substation.
 The new voltage regulators being installed will be rated for 438A/491A.

JUSTIFICATION

The 13W2 circuit position voltage regulators at Boscawen substation may be loaded as high as 120% of their normal summer rating during peak conditions. The voltage regulators can no longer be put in load bonus due to voltage violations determined in the system planning study. Not placing the voltage regulators in load bonus would further increase the loading over the normal summer rating.

The 13W2 voltage regulators exceeded their normal summer rating in the summer of 2020, partially due to new load from a gravel pit recently added to the circuit.

DESCRIPTION/SCOPE				
This revised Authorization is to capture unanticipated expenditures for the replacement of distribution poles and cross arms that have been identified by annual testing by the Utility Plant Inspector. This also includes the replacement of poles identified by Consolidated Communications inspection program.				
The unfavorable variance is due to additional expenditures in an effort to catch up with the back log of priority two and three Distribution condemned poles, from previous years inspections.				
Budgeted Amount - \$685,200.25 Initial Authorization - \$685,200.25 Revised Authorization - \$1,043,865.00 Variance (\$358,664.75)				
JUSTIFICATION				
The justification for this budget item is to maintain a safe and reliable infrastructure. Also, to comply with the Unitil facility inspection bulletin.

DESCRIPTION/SCOPE				
Reconductor the 37 Line from pole 8 in the vicinity of Penacook substation to Maccoy Street tap (pole 34) to achieve a minimum summer normal rating of 600A.				
JUSTIFICATION				
The 37 line is a radial subtransmission line that is used to restore circuit 4X1 for a fault between Penacook substation and pole 12 Village Street.				
The existing conductor on the 37 line is expected to exceed its normal rating for more than 12 consecutive hours under 2021 Peak Design Load levels with all 4X1/37 line generation off-line.				
NOTES				
Straight 30% overhead on the following: CWO #20211629 (Outside Services, Fees, etc.)				
Total project cost includes transfer of costs from the 2020 Preliminary Survey (37 Line Survey).

			CWO Total:	\$42,791.66

DESCRIPTION/SCOPE

This authorization is for the installation of three phase overhead to underground line extension also installing three Poles to a Padmount Transformer to service a new greenhouse located at 830 N Pembroke Rd in Concord, NH.

Company Portion \$42,791.66
 Customer Contribution \$0.00

Total Project Cost \$42,791.66

JUSTIFICATION

A Rate-of-Return calculation has been performed by Business Development and this additional load meets the requirement for there to be no customer contribution.
 The customer has signed a Performance Agreement whereas any combination of time, usage and demand such that the funds invested by the Company for this project are fully recovered, on a simple payback basis, in no more than 5 years. A copy of this agreement is attached to this authorization.

ESTIMATED COST SUMMARY

Action Date	Approved	Approver/Title	Description	Amount
2/4/2021	YES	Hilton, Mary Jane Sr. Plant Accountant	Total Project Cost:	\$223,010.14
2/5/2021	YES	Lloyd, Charles Manager Electric Operations	Less Customer Contribution:	\$0.00
2/8/2021	YES	Letourneau, Raymond VP, Electric Operations	Net Authorized Cost:	\$223,010.14
2/8/2021	YES	Bonazoli, John Manager Distribution Engineer	Retirement:	\$1,000.00
2/5/2021	YES	Sprague, Kevin VP, Engineering	Cost Of Removal:	\$15,264.45
2/8/2021	YES	Diggins, Todd Treasurer, Director, Finance	Salvage:	\$0.00
			CWO Total:	\$207,745.69

DESCRIPTION/SCOPE

This is the third year of a multi-year program to replace potted-porcelain distribution cutouts with silicone rubber cutouts.
 Locations of the cutout replacements will be determined based on reliability impact.

JUSTIFICATION

Over the past 7 years, Unitil has experienced an increase in porcelain cutout failures. From 2012 through 2019 Unitil has encounter 313 outages caused by failed cutouts.

- 32 in 2012
- 28 in 2013
- 28 in 2014
- 49 in 2015
- 61 in 2016
- 46 in 2017
- 56 in 2018
- 13 in 2019

Furthermore, additional cutouts not included in the numbers above have failed, but have not been the direct cause of outages. These units are typically identified when responding to outage calls not caused by the cutout failure or upon inspection when other work is taking place in the area.

NOTES

Based cost on 200 cutouts per year
 Cutouts \$135/ea. = \$27000
 Misc. Material - \$3000
 600 MH = 2 crews for 4.25 weeks. = completing approx. 10 cutouts per day.
 2020 Estimate X 3%

7/13/2021	YES	Hurstak, Daniel Controller		
7/14/2021	YES	Hevert, Robert Senior Vice President & Chief Financial Officer & Treasurer		

DESCRIPTION/SCOPE

This revised authorization is account for additional expenditures for cutout replacements in 2021. The additional replacements will maximize local contractor availability and minimize customer outages due to failing cutouts.

The majority of the cut out replacements in 2021 have and will be on 34.5 kv main line circuits.

This is the third year of a multi-year program to replace potted-porcelain distribution cutouts with silicone rubber cutouts.

Locations of the cutout replacements will be determined based on reliability impact.

Budget amount - \$223,010.14

Original Authorization amount - \$223,010.14

Revised Authorization amount - \$490,500.29

Variance- \$267,489.86

JUSTIFICATION

Over the past 7 years, Unitil has experienced an increase in porcelain cutout failures. From 2012 through 2019 Unitil has encounter 313 outages caused by failed cutouts.

2/18/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

Purchase Omicron Power Factor Test Set

JUSTIFICATION

UES currently does not have power factor testing capabilities. This is an issue that will need to be addressed with Broken Ground and Kingston now in-service. There are already known issues with borrowing the one test set from FGE for use in UES because we have no backup in event of failure, calibration, or repair. It also limits the company to testing in one location at a time in an environment that requires the flexibility to perform maintenance across multiple districts simultaneously.

NOTES

Note: the cost is higher than the budgeted amount to reflect an update between the quote from 2020 and increases in 2021

DESCRIPTION/SCOPE				
The Customer Facing Enhancements is a comprehensive list of work to be done in 2021 for improvements in the areas of Billing, Credit & Collections, Retail Choice and Customer Service. Throughout the year as support items are entered, some are deemed to be "enhancements" and not covered under support. These tickets are coded as "enhancement" and reviewed each year for prioritization to be captured in the annual CIS enhancement work. This work includes all customer facing tools such as billing, rates, revenue, cash, sundry, metering, and work orders.				
JUSTIFICATION				
The full list of enhancements will improve business processes in the following departments: Billing, Customer Service, Retail Choice, Credit & Collections, and Customer Service The enhancements identified for this project create the following additional benefits to the CIS environment: - Address risk to revenue collection - Streamline business processes (lowering risk of user errors) - Enhance customer interaction & customer self-service offerings - Meet new regulatory requirements

Description/Scope

The Customer Facing Enhancements is a comprehensive list of work to be done in 2021 for improvements in the areas of Billing, Credit & Collections, Retail Choice and Customer Service. Throughout the year as support items are entered, some are deemed to be "enhancements" and not covered under support. These tickets are coded as "enhancement" and reviewed each year for prioritization to be captured in the annual CIS enhancement work. This work includes all customer facing tools such as billing, rates, revenue, cash, sundry, metering, and work orders.

Justification

The full list of enhancements will improve business processes in the following departments: Billing, Customer Service, Retail Choice, Credit & Collections, and Customer Service

The enhancements identified for this project create the following additional benefits to the CIS environment:

- Address risk to revenue collection
- Streamline business processes (lowering risk of user errors)
- Enhance customer interaction & customer self-service offerings
- Meet new regulatory requirements

Description/Scope

DRBC06 - Install Recloser and Switches, Fisherville Rd - 4W4

This project is to install a new microprocessor based recloser and a switch at P.92 and P.89 Fisherville Rd, Concord (respectively).

DRBC08 - Install Recloser on Pleasant St - 6X3

Install a microprocessor-based recloser in the vicinity of Pole 83 on Pleasant St, Concord.

DRBC09 - Install Recloser on Dover Rd - 8X3

Install a microprocessor-based recloser in the vicinity of Pole 5 on Dover Rd, Epsom.

DRBC10 - Fusesaver Installations

This reliability budget project is to install fusesavers at 5 different locations.

- (1) @ Borough Rd, Canterbury
- (3) @ Rocky Point Dr, Bow
- (1) @ Elm St, Boscawen
- (1) @ Old Turnpike Rd, Salisbury
- (1) @ W. Portsmouth St, Concord

These fusesaver installations will require additional work apart from the fusesaver installation, e.g. pole and wire replacements, etc.

Justification

DRBC06 - Install Recloser and Switches, Fisherville Rd - 4W4

There have been several large outages in the past year. Installing a recloser sectionalizes the exposure of customers to outages downline of the new recloser. It provides immediate interrupting as well. The GOAB switch allows for ~1213 customers to be restored via 4W3, should an upline fault occur.

Estimated Annual Savings:

Customer Minutes: 108,069
Customer Interruptions: 1,452

DRBC08 - Install Recloser on Pleasant St - 6X3

6X3 splits into two directions just outside of the substation. A recloser is being installed in the easterly direction in 2020. This recloser is to be installed in the westerly direction to protect the other half of the circuit. This recloser will limit the scale of outages on the circuit. It also will prevent the Concord Hospital from experiencing an outage from faults to the west of Langley Parkway.

Estimated Annual Savings:
Customer Minutes: 11,563
Customer Interruptions: 192

DRBC09 - Install Recloser on Dover Rd - 8X3

8X3 does not currently have a circuit backup to restore load for an outage outside of the substation. Adding sectionalizing points will limit the impact of outages beyond the new recloser.

Estimated Annual Savings:
Customer Minutes of Interruption: 50,025
Customer Interruptions: 602

DRBC10 - Fusesaver Installations

The identified areas experienced several patrolled, nothing found, animal, and broken limb-related outages. Fusesavers add one layer of reclosing to a standard fuse. They operate based upon fuse TCC curves and therefore allow for reclosing in areas where it is challenging to coordinate reclosers. They also provide interruption histories, momentary or otherwise, real time current, and peak current loads.

Estimated annual savings (total):

Customer Minutes of Interruption: 20,443
Customer Interruptions: 198

Estimates

Internal Labor (\$):	75000
Purchases (\$):	
Contract Services (\$):	
Other Specific Charges (\$):	
Retirement (\$):	
Salvage (\$):	

Description/Scope

This budget item is to cover the costs of internal time associated with small Technology additions, enhancements, and upgrades where such activities cannot be reasonably identified or are too small (< \$10,000) to budget as a specific project.

These small projects maintain the value and viability of systems or are small projects that add value unto themselves.

Justification

1. Required to maintain the value and viability of Unitil Information Technology systems.
2. Capture smaller capital projects that would not otherwise be capitalized.

DESCRIPTION/SCOPE

Install (3) Fuse Savers on Pole 1 Rocky Point Drive in Bow. The (3) porcelain cutouts will also be replaced on the pole.

JUSTIFICATION

This area has experienced several patrolled, nothing found, animal, and broken limb-related outages. The Fuse Savers will add one layer of reclosing to a standard fuse. They operate based upon fuse TCC curves and therefore allow for reclosing in areas where it is challenging to coordinate reclosers. They also provide interruption histories, momentary or otherwise, real time current, and peak current loads.

Description/Scope

DRBC06 - Install Recloser and Switches, Fisherville Rd - 4W4

This project is to install a new microprocessor based recloser and a switch at P.92 and P.89 Fisherville Rd, Concord (respectively).

DRBC08 - Install Recloser on Pleasant St - 6X3

Install a microprocessor-based recloser in the vicinity of Pole 83 on Pleasant St, Concord.

DRBC09 - Install Recloser on Dover Rd - 8X3

Install a microprocessor-based recloser in the vicinity of Pole 5 on Dover Rd, Epsom.

DRBC10 - Fusesaver Installations

This reliability budget project is to install fusesavers at 5 different locations.

- (1) @ Borough Rd, Canterbury
- (3) @ Rocky Point Dr, Bow
- (1) @ Elm St, Boscawen
- (1) @ Old Turnpike Rd, Salisbury
- (1) @ W. Portsmouth St, Concord

These fusesaver installations will require additional work apart from the fusesaver installation, e.g. pole and wire replacements, etc.

Justification

DRBC06 - Install Recloser and Switches, Fisherville Rd - 4W4

There have been several large outages in the past year. Installing a recloser sectionalizes the exposure of customers to outages downline of the new recloser. It provides immediate interrupting as well. The GOAB switch allows for ~1213 customers to be restored via 4W3, should an upline fault occur.

Estimated Annual Savings:

Customer Minutes: 108,069
Customer Interruptions: 1,452

DRBC08 - Install Recloser on Pleasant St - 6X3

6X3 splits into two directions just outside of the substation. A recloser is being installed in the easterly direction in 2020. This recloser is to be installed in the westerly direction to protect the other half of the circuit. This recloser will limit the scale of outages on the circuit. It also will prevent the Concord Hospital from experiencing an outage from faults to the west of Langley Parkway.

Estimated Annual Savings:
Customer Minutes: 11,563
Customer Interruptions: 192

DRBC09 - Install Recloser on Dover Rd - 8X3

8X3 does not currently have a circuit backup to restore load for an outage outside of the substation. Adding sectionalizing points will limit the impact of outages beyond the new recloser.

Estimated Annual Savings:
Customer Minutes of Interruption: 50,025
Customer Interruptions: 602

DRBC10 - Fusesaver Installations

The identified areas experienced several patrolled, nothing found, animal, and broken limb-related outages. Fusesavers add one layer of reclosing to a standard fuse. They operate based upon fuse TCC curves and therefore allow for reclosing in areas where it is challenging to coordinate reclosers. They also provide interruption histories, momentary or otherwise, real time current, and peak current loads.

Estimated annual savings (total):

			CWO Total:	\$32,366.00

DESCRIPTION/SCOPE

The primary and neutral need to be de-energized and removed to allow the cranes the ability to set the new bridge over Bela Brook on Hooksett Turnpike Road in Concord. Two poles will be set at the Hooksett Turnpike Road and Page Road intersection in Bow. A new primary and neutral will be installed on these poles that will allow Unitil to feed all customers on the South side of the bridge from Page Road. After the bridge construction is complete the primary and neutral over Bela Brook will be replaced. This will allow a back-up feed in the event of storm damage or other emergencies in the future.

JUSTIFICATION

Governmental Requirement. The City of Concord has requested Unitil's lines over Bela Brook be de-energized during the replacement of the bridge over Bela Brook.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$51,504.00
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$51,504.00
Retirement:	\$0.00
Cost Of Removal:	\$10,788.00
Salvage:	\$0.00
CWO Total:	\$40,716.00

DESCRIPTION/SCOPE

This revision is to cover the additional cost not realized in the original authorization. After site meetings with the City of Concord and the project had initiated, changes were made to the design of the new guardrail. these changes required the poles to be set further back, to meet clearance guidelines from the State of NH DOT. These relocations will require and additional guying and additional conductor.

Original Authorization \$43,154.00
 Revision Amount \$ 8,350.00
 Total Project Cost \$51,504.00

The primary and neutral need to be de-energized and removed to allow the cranes the ability to set the new bridge over Bela Brook on Hooksett Turnpike Road in Concord. Two poles will be set at the Hooksett Turnpike Road and Page Road intersection in Bow. A new primary and neutral will be installed on these poles that will allow Until to feed all customers on the South side of the bridge from Page Road. After the bridge construction is complete the primary and neutral over Bela Brook will be replaced. This will allow a back-up feed in the event of storm damage or other emergencies in the future.

JUSTIFICATION

Governmental Requirement. The City of Concord has requested Until's lines over Bela Brook be de-energized during the replacement of the bridge over Bela Brook.

NOTES

Intake# 37185

AUTHORIZATION COMMENTS

DESCRIPTION/SCOPE

This project covers the cost of replacing the insulators on the 374J4 switch, replacement of 35kV bus sections, installation of structural support members and re-tensioning of the 374 Line at Bow Jct Substation.

JUSTIFICATION

This project was originally scoped to include replacing of broken insulators on the 374J4 switch only and was to be funded by a blanket CWO. However, during the insulator replacement it was discovered that the tension on the 374 line at this switch had bent parts of the aluminum support structure and caused misalignment of the 35kV IPS bus. This required re-tensioning of the line, installation of additional structural support members and replacement of the 35kV IPS bus.

NOTES

4/5/2021	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Salvage:	\$0.00
			CWO Total:	\$54,558.00

DESCRIPTION/SCOPE

This authorization will cover the cost to relocate (5) poles along Birchdale Road in Concord. The poles will be relocated to the opposite side of the road and (6) sections of three phase primary and neutral (approximately 850') will be relocated to the new poles.

JUSTIFICATION

The City of Concord has requested this overhead line be relocated to accommodate the bridge replacement over Bela Brook. In order to comply with OSHA distance requirements for clearance, half of the bridge abutments will be set, then the line relocated. After the line is relocated, the other half of the abutments will be set.

Net Authorized Cost:	\$28,500.00
Retirement:	\$0.00
Cost Of Removal:	\$1,500.00
Salvage:	\$0.00
CWO Total:	\$27,000.00

DESCRIPTION/SCOPE

This authorization is to inject Approx 900' of single phase radial direct buried cable along Cambridge Dr. in Canterbury installed in the early 1970's, with a cable rejuvenating fluid to increase it's life by 25 to 40 years. A sector cabinet will also be installed to allow for switching under energized conditions.

JUSTIFICATION

The underground development of Cambridge Dr, Layton Dr, and Abby Dr, Canterbury has experienced three cable failures since 2016. Previous projects have proven that cable injections greatly improve the reliability and overall life of the cable.

DESCRIPTION/SCOPE				
<p>This revised authorization is cover additional work not anticipated in the original scope, resulting in additional costs to the project. The original project was to inject Approx 900' of single phase redial direct buried cable along Cambridge Dr. in Canterbury installed in the early 1970's, with a cable rejuvenating fluid to increase it's life by 25 to 40 years. A sector cabinet will also be installed to allow for switching under energized conditions. The additional expenditures were due to having to excavate and clear a second splice between Pad 4 and 5, to be able to inject the cable. The additional excavation required hiring a local contractor to dig and to restore the nicely landscaped area to its original condition after the excavation. This also resulted in additional labor for the Novinium crew, performing the injection.</p> <p>Original Auth Amount - \$28,500.00 Revised Auth Amount - \$43,030.00 Variance - (\$14,530.00)</p>				
JUSTIFICATION				
<p>The underground development of Cambridge Dr, Layton Dr, and Abby Dr, Canterbury has experienced three cable failures since 2016. Previous projects have proven that cable injections greatly improve the reliability and overall life of the cable.</p>

4/21/2021	YES	Diggins, Todd Treasurer, Director, Finance	Salvage:	\$0.00
			CWO Total:	\$53,250.00

DESCRIPTION/SCOPE

This authorization for the cost to inject single phase, radial, and direct buried cable at Concord Commons, with a cable rejuvenating fluid. The original cable was installed in the 1980's. The rejuvenating fluid is expected to increase it's life by 25 to 40 years. Total expected injection distance is approximately 975 feet.

JUSTIFICATION

There is a single phase, radial run of 15kV, #2 Al direct buried cable for the Concord Commons apartment complex. This cable was installed in 1984. There have been 2 cable failures in the years 2016-2019 for a total of 19,291 customer minutes of interruption. Cable repair is costly and disruptive to customers and the landscape of the complex.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$20,000.00
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$20,000.00
Retirement:	\$0.00
Cost Of Removal:	\$0.00
Salvage:	\$0.00
CWO Total:	\$20,000.00

DESCRIPTION/SCOPE

Purchase two sets of power monitoring equipment that can be temporarily applied to primary conductor.

JUSTIFICATION

As part of the 2021 LCIPR settlement agreement with the NHPUC Unitil agreed to purchase power monitoring equipment (with real and reactive power measurements) that can be temporarily applied to distribution circuits and substations.

The units being considered will measure and record amps and power factor, which should meet the intent of the settlement agreement. A voltage constant is then applied in the software to calculate VARs.

DESCRIPTION/SCOPE

Replacing two poles at 1041 Battle Street, Webster. TDS Telecom has requested these replacements to gain clearance over the customers driveway and maintain the necessary clearance from UES lines. Delivery trucks were striking the telephone lines and TDS pulled their cable up to 13'8", but they are up against our neutral.

JUSTIFICATION

This work is necessary to comply with our Intercompany Operating Procedures / Agreement with TDS Telecom.

			CWO Total:	\$176,386.05

DESCRIPTION/SCOPE

This authorization is to install a new three phase primary underground line extension to service the underground infrastructure to the new shopping complex off Exit 17 on Whitney Rd in Concord.

JUSTIFICATION

A Rate-of-Return calculation has been performed by Business Development and this additional load meets the requirement for there to be no customer contribution.
 The customer has signed a Performance Agreement whereas any combination of time, usage and demand such that the funds invested by the Company for this project are fully recovered, on a simple payback basis, in no more than 5 years. A copy of this agreement is attached to this authorization.

DESCRIPTION/SCOPE

This non-budget authorization is to cover the cost of replacing the failing direct buried primary URD cable at residential home at 261 Bear Hill Rd Chichester.
 Replace p# 3/111, Install approx 400 feet of 4" conduit and primary URD cable from riser to padmount transformer. Abandon in place direct buried cable from pole 3/112 to padmount trans.
 This will also include the cost to perform the repair in June 2021.

JUSTIFICATION

There have been 3 cable faults since 2019, the latest being in June 2021. The original direct buried cable was install in 1983 and has become unreliable. unscheduled repairs due to failures are costly for the company and disrupting for the customer.

NOTES**AUTHORIZATION COMMENTS**

Move all charges from CWO# 20216106 to this authorization

9/21/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

This non-budget authorization covers the capital expenditure portion of the costs associated with restoration and response efforts during the snow storm of Dec 5th, and Dec 6th, 2020. This was an EEI. 3, high confidence weather projection with 6" of heavy wet snow and up to 50 mph wind gusts. The actual snow accumulation was 10" heavy wet snow. The total number of customers that were without electric service was approximately 7,827 with a total of 92 outages experienced. The total customer minutes of interruption was 1,927,455.

JUSTIFICATION

This wind storm caused significant damage to the electric facilities within the Capital service territory whereby many trees and tree limbs fell onto conductors requiring the need to engage emergency operational activities (including several line contractor crews) to adequately respond to customers and the public.

NOTES

Transfer charges to CWO# 20206196 to this auth once approved

AUTHORIZATION COMMENTS

This auth also covers extensive environmental clean up due to transformer oil spill and structural damage to one of the buildings at Goose Bay Lumber.

DESCRIPTION/SCOPE

Replacing structure #80 on the 33 sub transmission line. This structure is a (2) pole wood structure. It will be replaced with a single wood pole and Fiberglass cross arms and will add a mid span pole # 79X.

JUSTIFICATION

This structure was condemned under the transmission pole inspections field survey.

NOTES

AUTHORIZATION COMMENTS

Project was re-designed to add a mid span pole to eliminate the H structure and replace it with a single wood pole. This design eliminated the concern for phase galloping.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$736,409.00
Less Customer Contribution:	\$29,456.00
Net Authorized Cost:	\$706,953.00
Retirement:	\$3,891.00
Cost Of Removal:	\$141,391.00
Salvage:	\$503.00
Blanket Authorization Total:	\$595,521.00

DESCRIPTION/SCOPE

This authorization covers the costs associated with minor additions and improvements (under \$30,000) to the sub-transmission, distribution and substation systems where such improvements cannot be reasonably identified and budgeted as a specific project. The majority of this work is driven from our inspection programs and routine improvements to the system as a result of customer complaints or other findings.

The total amount of this authorization covers the costs projected for the first six (6) months of 2021 which was derived from reviewing historical expenditures for the first six (6) months as follows:

Year First 6 months % of Total Expenditure

2015 \$607,500 39%
2016 \$711,100 46%
2017 \$648,800 35%
2018 \$645,500 40%
2019 \$636,300 46%
2020 \$766,700 58%

Total Budgeted Amount \$1,606,711
Authorization Amount \$706,953 (44% of total budget).
Balance \$899,758

JUSTIFICATION

Replacement of defective equipment on a scheduled basis, intercompany replacements and changeovers.

7/7/2021	YES	Hurstak, Daniel Controller		
7/8/2021	YES	Hevert, Robert Senior Vice President & Chief Financial Officer & Treasurer		

DESCRIPTION/SCOPE

This revised authorization covers the costs associated with construction necessary to service new customers which would not be covered under other line extension categories (under \$30k and no customer contributions). Examples are services and one pole line extensions and associated work with the same.

Initial Authorization for first six months \$217,464
 YTD (through June) Actual Expenditures \$390,600
 Total Budgeted Amount \$494,236
 Revised Authorization Amount \$695,600
 Variance +\$201,364

Note: In 2021 we have experienced an unusual (higher) number of single pole line extensions and associated main line work compared to recent prior years resulting in the increase of costs for this blanket category. Additionally, the current final projected amount for 2021 of \$695,600 is in close proximity to the final actual expenditures in 2020 which was \$744,300.

8/12/2021	YES	Hurstak, Daniel <i>Controller</i>		
8/13/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

This revised authorization covers the costs associated with the necessary replacements to our facilities under emergency (unscheduled) and "minor" storm conditions.

Initial Authorization for first six months \$323,323

YTD (through July) Actual Expenditures \$721,000 (this includes transfers of approximately \$231k to storm recoverable account for applicable storms through May)

Total Budgeted Amount \$646,645

Revised Authorization Amount \$940,000

Variance = + \$293,355

The 2020 total actual was \$766,300.

Year 2021 has also brought upon an unusual high number of smaller storm events that has caused the 2021 unfavorable variance.

JUSTIFICATION

Maintain satisfactory level of service to customer by providing reliable electric service.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$407,633.00
Less Customer Contribution:	\$185,000.00
Net Authorized Cost:	\$222,633.00
Retirement:	\$4,000.00
Cost Of Removal:	\$45,000.00
Salvage:	\$800.00
Blanket Authorization Total:	\$363,433.00

DESCRIPTION/SCOPE

This authorization covers the costs associated with all work for which the vast majority of repayment is anticipated such as broken poles, 3rd party attachment requests, 3rd party damages to our facilities, and customer owned equipment that we may replace.

The total amount of this authorization covers the costs projected for the first six (6) months of 2021 which was derived from reviewing historical expenditures as follows:

Year First 6 mo. % of Full Year Actual

2016 \$121,300 28%
2017 \$90,700 34%
2018 \$185,600 52%
2019 \$171,200 58%
2020 \$352,100 73%

Total Budgeted Amount \$454,353
Authorization Amount \$222,633 (49% of total)
Balance \$231,720

JUSTIFICATION

Obligation to respond to customer outages, broken poles, etc.

7/6/2021	YES	Bonazoli, John <i>Manager Distribution Engineer</i>	Cost Of Removal:	\$90,000.00
7/6/2021	YES	Sprague, Kevin <i>VP, Engineering</i>	Salvage:	\$1,650.00
7/7/2021	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Blanket Authorization Total:	\$807,350.00
7/7/2021	YES	Hurstak, Daniel <i>Controller</i>		
7/8/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

This revised authorization covers the costs associated with all work for which the vast majority of repayment is anticipated such as broken poles, 3rd party attachment requests, 3rd party damages to our facilities, and customer owned equipment that we may replace.

Initial Authorization for first six months \$222,633
YTD (through June) Actual Expenditures \$333,700
Total Budgeted Amount \$454,353
Revised Authorization Amount \$523,700,
Variance = \$68,347

The cause for the projected variance is that there has been an unusual number of broken poles this year as "hit and runs" which are likely not going to be re-imbursed. This revised authorization may need to be increased in 2022 to reflect an updated progress on billing and re-imbursements.

JUSTIFICATION

Obligation to respond to customer outages, broken poles, etc.

Total Project Cost:	\$66,811.36
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$66,811.36
Retirement:	\$0.00
Cost Of Removal:	\$0.00
Salvage:	\$0.00
Blanket Authorization Total:	\$66,811.36

DESCRIPTION/SCOPE

This authorization is for the purchase and installation of transformers that are specifically associated with company driven projects such as conversions, stepdown upgrades and stepdown installations.

There are three (3) Company driven projects in 2021 whereby transformers will need to be replaced:

- 1) Upgrade Stepdown Transformer - Pine St, Seabrook.
- 2) Install Stepdown Transformers on Rt. 150, South Hampton in order to create an alternate feed and improve voltage levels.
- 3) Convert Main St, Plaistow - being driven by a new development (this is a Carryover project however the distribution transformers will be purchased in 2021 and also the labor to install them). The Stepdown transformers for this project were purchased and paid for in 2020.

JUSTIFICATION

Required for voltage and/or load driven projects.

7/7/2021	YES	Hurstak, Daniel <i>Controller</i>		
7/8/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

This revised authorization is for the purchase and installation of transformers that are specifically associated with company driven projects such as conversions, stepdown upgrades and stepdown installations.

Initial Authorization \$66,811 (same as budgeted amount)
 YTD (through June) Actual Expenditures \$106,100
 Total Budgeted Amount \$66,811
 Revised Authorization Amount \$300,000
 Variance + \$233,189

The variance is primarily due to a distribution project, namely convert Rt. 125, Kingston, that has been moved up into the schedule earlier than expected as a new 3 phase customer is expecting service this year for one building and early 2022 for the remaining buildings. In order to service this new load in a timely manner, the transformers for this conversion project need to be purchased this year in order to ensure they are delivered in time to begin construction later in 2021 and early 2022. The total estimated cost of these transformers is \$150,000 plus labor and contract services amount of \$50,000.

JUSTIFICATION

Required for voltage and/or load driven projects.

12/15/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

This revised authorization is primarily being driven by the need to replace the inventory of substation regulators that were utilized to replace failed regulators that were in the field. The following substation mounted regulators failed and were in need of replacement:

Two (2) regulators at the 47X1 tap.
 One (1) regulator for circuit 2X2 at Hampton Substation
 Two (2) regulators for circuit 20H1 at Dow's Hill Substation.

See Purchase Order SEA 55667-1 for the specification details and individual base cost pricing for each of these regulators and associated controls. The majority of the Purchase Order amount is expected to be expended in December of 2021 or January of 2022.

Initial Authorization \$66,811 (same as budgeted amount)
 YTD (through November) Actual Costs \$285,421
 Sequence #2 Revised Authorization Amount \$300,000
 This Revised (Sequence #3) Authorization Amount: \$485,000
 Variance + \$418,189 (from original budgeted amount) and +\$185,000 (from sequence #2 revised authorization).

JUSTIFICATION

Required for voltage and/or load driven projects or replacement of failed regulator units.

DESCRIPTION/SCOPE

This revised authorization consists of replacing poles, and their associated transfers, in various towns as a result of our distribution and sub-transmission inspection programs. Also, to cover other findings of aged poles that are not part of our scheduled inspections or the transfer of our facilities on substandard poles that may be replaced by the telephone Company

Original Budgeted Amount \$865,971
Revised Authorization Amount \$1,688,000
Variance : +\$822,029

JUSTIFICATION

Replacement per our Distribution Inspection Policy and other findings that may take place outside of the scheduled inspections. This revised authorization is increased to cover additional poles that were detected during our inspection program including some off road sub-transmission poles that were recently found to be condemned.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$140,000.00
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$140,000.00
Retirement:	\$500.00
Cost Of Removal:	\$28,000.00
Salvage:	\$0.00
CWO Total:	\$112,000.00

DESCRIPTION/SCOPE

This authorization consists of the work necessary to install three (3) 250kVA stepdown transformers in the vicinity of Pole 7 Amesbury Rd, South Hampton. It will also consist of re-building eight (8) sections of overhead circuit along Highland Rd. and Amesbury Rd with three-phase construction and re-conductoring these sections with 1/0ACSR.

C-20211803 OVERHEAD -NON BILLABLE \$ 112,000.00
Cost of Removal \$28,000.00

Total Company Cost \$140,000.00

The authorization amount is higher than the budgeted amount due to the need to replace and add new poles to accommodate the State ROW offset requirements.

JUSTIFICATION

Circuit analysis has identified that the primary voltage along Highland St in South Hampton is expected to be as low as 116.1V in the summer of 2021

The town of South Hampton has classified Old Route 150 as Class VI roadway. As such, they have stopped maintaining the road by either paving it when needed or plowing it in the winter. Currently, the overhead line that feeds the southwestern portion of 23X1 is along this section of road. Because of the road's classification, this section of overhead line has become difficult to maintain.

Once complete, voltage is expected to remain within normal limits throughout the year, and this project will also allow for much easier access and maintenance of the section of primary feeding the southwestern portion of the circuit.

ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$195,000.00
Less Customer Contribution:	\$0.00
Net Authorized Cost:	\$195,000.00
Retirement:	\$500.00
Cost Of Removal:	\$40,000.00
Salvage:	\$0.00
CWO Total:	\$155,000.00

DESCRIPTION/SCOPE

This revised authorization is to cover the additional costs expected to be incurred for the above named project. The project consists of the work necessary to install three (3) 250kVA stepdown transformers in the vicinity of Pole 7 Amesbury Rd, South Hampton. It will also consist of re-building eight (8) sections of overhead circuit along Highland Rd. and Amesbury Rd with three-phase construction and re-conductoring these sections with 1/0ACSR.

The additional costs are to broaden the scope of the project to completely remove two of the three phases that would serve no purpose as it would not be used to serve any customers. These phases run along Old Rt. 150, Kensington and into South Hampton. The removal of this unused line will mitigate the potential of damage and outages in the event trees fall onto the conductor and allow for less confusion and an added measure of safety for lineworkers during any required response to this line. This line is within a heavily treed area and a portion of this unused conductor is off road which adds to the justification in its removal.

C-20211803 OVERHEAD -NON BILLABLE \$ 155,000.00
Cost of Removal \$40,000.00

Total Company Cost \$195,000.00

Original Authorization \$140,000
Revised Authorization \$195,000
Variance \$55,000

JUSTIFICATION

Circuit analysis has identified that the primary voltage along Highland Rd. in South Hampton is expected to be as low as 116.1V in the summer of 2021

The town of South Hampton has classified Old Route 150 as Class VI roadway. As such, they have stopped maintaining the road by either paving it when needed or plowing it in the winter. Currently, the overhead line that feeds the southwestern portion of 23X1 is along this section of road. Because of the road's classification, this section of overhead line has become difficult to maintain.

2/8/2021	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Salvage:	\$300.00
			CWO Total:	\$311,785.52

DESCRIPTION/SCOPE

This authorization is for eliminating one of two remaining 4800V areas within the Unitil system located in South Hampton by converting the 4800V to a standard Unitil operating voltage. This project will also consist of reconductoring the primary conductor.

C-20211804 OVERHEAD/TRAFFIC/TREE \$388,785.52

Cost of Removal \$ 80,052.89

TOTAL COMPANY COST \$391,838.41

JUSTIFICATION

This conversion is required to eliminate this section of 4800V due to DG interconnection concerns. In addition, the conversion of the 4800V to 7,970V will provide stocking efficiencies by decreasing the number of 4800V transformers needed to be in stock. This will also allow external Unitil resources to work in this area during emergency events.

8/13/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

This supplement authorization is to cover the additional costs that were incurred for eliminating one of two remaining 4800V areas within the Unitil system located in South Hampton by converting the 4800V to a standard Unitil operating voltage. This project also consisted of reconductoring the primary conductor.

The added expenditures was a result of 3 factors;

- 1) Additional traffic control measures. Many days we were required to use two officers (versus one) when working at intersections and pulling wires.
- 2) Relocation of Poles after they were installed due to state setback requirements. Most pole replacements were scheduled to be placed in their existing location however we became aware that this roadway was a state maintained roadway whereby the State required us to relocate several poles further off the roadway and 3) There were some locations whereby we received limited permissions for tree clearing which caused added line crew labor to install additional rigging and multiple existing wire moving to make room for the new conductor being installed.

Original Authorization \$391,838.41
 Supplement Authorization \$500,000.00
 Variance + 108,161.59

JUSTIFICATION

This conversion is required to eliminate this section of 4800V due to DG interconnection concerns. In addition, the conversion of the 4800V to 7,970V will provide stocking efficiencies by decreasing the number of 4800V transformers needed to be in stock. ESTIMATED COST SUMMARY

Description	Amount
Total Project Cost:	\$39,099.26
Less Customer Contribution:	\$39,099.26
Net Authorized Cost:	\$0.00
Retirement:	\$0.00
Cost Of Removal:	\$44,512.00
Salvage:	\$5,664.74
CWO Total:	\$252.00

DESCRIPTION/SCOPE

This authorization is to de-energize, remove and retire 23 existing luminaires and existing aluminum standard street light poles along State Route 101 in the towns of Exeter, Stratham, and Hampton. This work is being requested by the State of NH. Additionally, the State has requested a new underground service be installed for a Intelligent Transportation System. All this work has been included within a Force Account Utility Agreement.

NEW UG Service \$252.00.
 PLUS: Cost of Removal \$44,512.00
 LESS: Salvage Credit \$ 5,664.74
 Customer Contribution \$39,099.26

JUSTIFICATION

This work will be completed at Exits 10, 11, 12, and 13. This work is being done at the request of the State of New Hampshire. The State will pay full cost of this work and traffic control less salvage value.

NOTES

NOTE: Please transfer all charges from CWO# 20215510 to CWO#20211805.

CWO Total:	\$27,000.00

DESCRIPTION/SCOPE

Improve Plaistow Garage Bathroom and Breakroom including: paint, flooring, new bathroom plumbing fixtures, paint, lighting, water heater, shelving. Remove no longer functional appliances from break room.

JUSTIFICATION

Plaistow garage is used daily by NUNH Gas Operations and is used by UES/Seacoast as a staging area emergency response activities. The bathroom and kitchen infrastructure is 40+ years old. Years ago E&H line crews worked out of this location on a daily basis. Over the years the appliances, plumbing infrastructure have fallen into disrepair and the finishes are worn. Plumbing fixtures need to be replaced as well as the water heater.

DESCRIPTION/SCOPE

Replace the existing 17W1 and 17W2 recloser controls at High Street substation.

JUSTIFICATION

The PCD relays in the existing controls have become a maintenance issue and are a type and vintage that has a history of component failure. The LCD display on the relay is failing and not legible during cold weather conditions. This relay product is no longer manufactured, and replacement components are becoming scarce.

EDP? (Yes or No):	No
Retirement:	5000
Salvage:	0
Description/Scope	
This project is to replace the PCD relays at 17W1 and 17W2.	
Justification	
These relays have become a maintenance issue and are the type and vintage that has a history of failure. The LCD display on this relay is failing and not legible during cold weather conditions. Parts for this type of relay are becoming obsolete.

DESCRIPTION/SCOPE

This non-budget authorization is for the necessary work to upgrade the neutral along Sweet Hill Road, Plaistow.

The scope of the work includes Installing 4/0 Triplex (2,160') from pole #97/36 to pole #97/52 and remove open wire secondaries.

C-20211827 OVERHEAD/TRAFFIC \$85,000.00

Cost of Removal \$20,000.00

Total Company Cost \$105,000.00

JUSTIFICATION

This work is being performed due to a stray voltage condition identified along Sweet Hill Road, Plaistow.

DESCRIPTION/SCOPE

This non budget authorization is for replacing structure 2070 on the 3350 Sub-Transmission Line in Seabrook. The top of the pole failed and the static wire came down across a phase conductor causing the 3348 and 3350 sub-transmission lines to lock out.

This structure is located in the marsh and is inaccessible by standard means of trucks and personnel therefore, out of the ordinary labor and specialized equipment was required to complete the work.

Note: The work and expenditures associated with this structure replacement was completed under a 2021 emergency blanket CWO, the expenditures of which shall be transferred to this authorization.

JUSTIFICATION

This work was required in order to restore the 3348 line back into service.

C-211830 OVERHEAD - NON BILLABLE \$53,000.00

COST OF REMOVAL \$13,000.00

TOTAL COMPANY COST \$66,000.00

NOTES

NOTE: Transfer all charges from CWO #20216528 to this authorization/CWO #20211830.

8/25/2021	YES	Hurstak, Daniel <i>Chief Accounting Officer & Controller</i>		
8/25/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

This non budget authorization covers the costs associated with eliminating the remaining 4800V portion of the Unitil system in the South Hampton area by converting the 4800V to a standard Unitil operating voltage. This project will also consist of reconductoring the primary conductor.

C-20211834 OVERHEAD - NON BILLABLE \$245,000

Cost of Removal \$ 60,000

Total Company Cost \$350,000

JUSTIFICATION

This conversion from 4800V to 7,970V will bring this area to a standard operating voltage, provide stocking efficiencies by decreasing the number of 4800V transformers needed to be in stock and also allow external Unitil resources that may be unfamiliar with the delta 4,800 volt systems to work in this area during emergency events.
