### MD Faisal Deen Arif (DEEN ARIF) 21 S. Fruit St., Suite 10, Room 235 Concord, N.H. 03301-2429

Work: 603-271-2441; Email: Faisal.DeenArif@energy.nh.gov

#### **SUMMARY**

- Education: Ph.D. (Economics) with specialization in Industrial Organization (Regulatory Pricing, Behavior of Public Enterprise, Competition Policy and Market Analysis); International Trade
- Highlights of relevant professional experience across federal departments: Experience working as an Administrator supervising a team of policy and data analysts of various ranks. Experience working at the Competition Bureau of Canada (equivalent to the Federal Trade Commission's Bureau of Competition) as well as the Federal Department for Innovation, Science and Economic Development (ISED) where, among others, I worked on market price setting regulations & policy design
  - Extensive work experience and knowledge of the regulated industry and applicable laws, rules and regulations related rate setting and general engineering, economic and account issues/concepts
  - Extensive experience in providing strategic advice and recommendations to senior executives (including Ministers, Deputy Ministers (DMs), Assistant DMs) on complex policy & program issues and technical factors
  - Extensive experience in supervising and providing training for professional and technical staff in the study, analysis, research and reporting of regulatory and policy issues
  - Significant experience in supervising and leveraging large amount of market and administrative data to perform behavioral analyses of regulated industry, forecasting rates/prices, and to prepare reports and exhibits to aid investigations, analyses, and appearance as expert witness before the Competition Tribunal (equivalent to the Commission)
  - Extensive experience in advising counsel during cross-examination; presenting and defending staff position at proceedings before the Competition Tribunal/Commission; preparing briefing products in drafting Commission/Tribunal orders on substantive and administrative matters
  - Experience in conferring with other agency administrators on administrative matters and agency policies and procedures
  - Extensive experience in representing the Department at public and legislative meetings, public comment sessions, open forum meetings on regulatory policy issues, and technical sessions
  - Demonstrated ability and extensive experience in establishing and maintaining continuous contact with external (e.g., other levels of governments, utility representatives, and the public) and internal officials/stakeholders (e.g., other units within and across the Departments/Ministries)

Docket DG 22-045 Direct Testimony of Faisal Deen Arif and Mark Thompson Attachment 1 Page 2 of 6

- **Highlight of professional experience in academia:** Extensive academic knowledge of economics and financial principles and practices in the field of public utilities and experience working at the Department of Economics, University of Ottawa as a Part-time Professor of Economics where I taught the following courses
  - Engineering Economics focusing on the accounting, engineering and economic factors involved in rate structure determination
  - Microeconomic Theory and Applications focusing on the structure of markets and economic principles
  - Introduction to Microeconomics emphasizing economic principles and applications

### • Knowledge:

- Knowledge of the mission, structure and operations of the New Hampshire Department of Energy
- Knowledge of the general jurisdiction and statutory and regulatory framework
- Knowledge and experience leading negotiations on substantive industry issues related to
- competition and regulatory policy (e.g., advising lawyers for appearance before the Competition Tribunal, participating in expert technical sessions and in settlement conferences with regulated companies)
- Extensive experience in preparing and leading cabinet and executive documents (Memorandum to Federal Cabinet, Federal Budget Proposals, Briefing Notes and Executive Dockets for the Commissioner, Policy Papers, Policy Briefs)
- Linguistic profile: Excellent oral and written communication skills in both English and French
- **Personal traits:** Good management and interpersonal skills; great ability to mobilize people to achieve results; able to create vision and strategy by exercising creative analytical thinking; able to do proactive risk management; reliable, flexible, adaptable; strong commitment to learning and upholding integrity and respect; sound judgment and values & ethics

#### Professional recognition:

- Departmental merit awards: Department of Employment and Social Development (ESDC) Deputy Ministers' Award of Excellence (2019), Treasury Board of Canada Secretariat (TBS) Merit Award (2017); Competition Bureau Commissioner's Merit Award (2009)
- Branch merit award: ESDC Learning Branch Assistant Deputy Minister's Award of Excellence in Policy Design (2019)
- Other award: Divisional special recognition for contribution to Federal Budget on price gap policy initiative, ISED (2014)
- **Professional goal:** to apply my Economics background and professional administrative experience to be able to effectively contribute towards sound stewardship of resources and public utilities regulation and management practices

#### **EDUCATION**

- Ph.D., Economics, University of Ottawa, Ottawa, 2012 (duration 5 years)
  - Specialization in Industrial Organization (Regulatory Economics, Competition Policy and Markets)
- Graduate courses (Ph.D. level), Economics, University of Guelph, 2004 (duration 1 year)
- M.A., Economics, York University, Toronto, 2003 (duration 1.5 years)

#### EMPLOYMENT OVERVIEW

### Director; Gas Division; New Hampshire Department of Energy (NHDOE) June 2022 – to-date

- Lead the Gas Division at the NHDOE
- Provide direction to analysts working on matters related to various gas dockets before the Department
- Represent Departmental positions on gas dockets before the NH Public Utilities Commission (NHPUC)
- Coordinate communications and workflows among the Department and the regulated utility companies in New Hampshire
- Represent/coordinate Departmental position on gas matters with other State (e.g., other New England States) and federal regulators (e.g., the Federal Energy Regulatory Commission, FERC)
- Provide input in developing the NH Energy Policy
- Assist Departmental Senior Management (e.g., the Commissioner, Deputy Commissioner, Director of Regulatory Division) in performing regulatory and administrative functions

Manager; Repayment Portfolio; Planning, Integrity and Repayment Division; Canada Student Loans Program; Employment and Social Development Canada (with commensurate responsibilities that of the U.S. Department of Labor and the Department of Health, Education and Welfare)

**June 2018 – June 2022** 

- Led strategic policy agenda and managed the secretarial support activities for the Federal-Provincial-Territorial (FPT) Committee on Repayment and Designation of the Canada Student Loans portfolio
- Led policy design and program delivery components of the Repayment Assistance Plan (RAP)
- Led policy design and modernization initiative for the Educational Institution Designation Policy Framework
- Led the program design, delivery and accountability of the Annual Strategic Incentives Plan (put in place to incentivize the third-party Service Provider responsible for disbursement and collection of Canada Student Loans)

Docket DG 22-045 Direct Testimony of Faisal Deen Arif and Mark Thompson Attachment 1 Page 4 of 6

- Led and provided strategic policy and program support to integrated and non-integrated Provinces and Territories in administering governance function on the Service Provider contract
- Led a team of seven individuals including Policy and Data Analysts (EC-02 to EC-06) and Program Officers (PM-03 and PM-04)
- Set employee performance agreements (by creating vision and strategy to mobilize people and promote internal and external collaboration with partners and stakeholders for innovation and guiding change to achieve result), evaluated PAs at the year-end, ensured successful delivery of all work items for the team, hired new employees, and provided stewardship on financial responsibilities

# Advisor/Economist, Pensions and Benefits Sector, Treasury Board Secretariat (with equivalent

responsibilities that of the U.S. Department of Treasury)

**April 2014 to June 2018** 

- Led the Government side (on behalf of the Treasury Board as the employer of the Federal Public Service) in working group negotiations and discussions with the Bargaining Agents (including PSAC, PIPSC, ACFO)
- Acted as the Lead Expert Advisor (plan & program design) to and an employer-side member of two Joint Committees (between TBS & Professional Institute of Public Service of Canada (PIPSC); and TBS & Public Service Alliance of Canada (PSAC))
- Authored briefing notes, executive decks and fact sheets (e.g. one- and two-pagers) to provide specific policy advice to the Deputy Minister (DM), ADM, Senior Directors, Directors and other members of the senior management team
- Penned policy papers, summary notes and briefing materials for senior officials
- Authored detailed report on regulatory policy gap analysis on employee benefits and services
- Wrote a series of data notes (and performed extensive data analyses) to design and support negotiation strategy
- Attended TBS inter-sectoral senior management team meetings as an expert advisor on policy issues related to employee benefits and human resources policy obligations
- Reviewed multiple Treasury Board Submissions and performed the challenge function from the TBS Policy Centre

# Economist/Policy Analyst, Strategic Policy Branch; Innovation, Science and Economic Development Canada (former Industry Canada – Equivalent to U.S. Department of Commerce)

**April 2010 to April 2014** 

- Authored departmental budget proposal on the Government of Canada's Price Gap policy initiative, featured in the Federal Budget 2014
- Held the pen on two Memoranda to the Cabinet (MC) on modernization of the Investment Canada Act (the national security provisions) and the relevant executive decks on the subject
- Participated and represented ISED at multiple interdepartmental meetings

Docket DG 22-045
Direct Testimony of Faisal Deen Arif
and Mark Thompson
Attachment 1
Page 5 of 6

- Authored policy papers, issue notes, research papers, one- & two-page summary notes, stakeholder consultation reports and briefing notes for senior management (including Ministers, Deputy Minister (DM), ADMs, and DGs)
- Provided multiple written strategic advice and analyses to senior management on issues related to: international investment coming into Canada, marketplace competition, intellectual property rights and marketplace framework policy issues
- Prepared regulatory packages for publication in Canada Gazette Part II involving complex, technical issues pertaining to foreign investments coming into Canada, impacts on the markets and on regulatory pricing
- Coordinated Branch inputs for the Departmental Results Reports (DRR)
- Prepared Question Period cards for the Parliamentary Committees (i.e., for members of the House of Commons / Representatives) and coordinated dockets for the Minister
- Authored a number of analytical research papers and supported the implementation of the research projects under the Industry Canada-Canada Intellectual Property Office MOU
- Led the design of and organized the ISED Distinguished Speakers Series

# Economist, Economic Policy and Enforcement Branch, Competition Bureau (with commensurate responsibilities that of the U.S. Department of Justice and the Federal Trade Commission)

**July 2008-July 2009** 

- Analyzed regulatory pricing and utility policy, rate structures and design for the purpose of determining appropriate utility rates, rate structures and services, and enforcing market competition
- Prepared analyses of upstream & downstream market conditions and industry trends to make recommendations on appropriate product price structures and/or service changes
- Led negotiations on substantive industry issues in technical sessions and settlement conferences and coordinated internal and external consultations related to complex regulatory and anti-trust cases
- Conducted investigations and performed comprehensive, complicated and detailed research and analysis of past testimonies and exhibits submitted by regulated companies, and other parties, using information from various sources (such as written staff information requests, audits, prior Competition Tribunal orders, relevant publications and reviews of utility reports and tariffs emphasizing compliance with statutes, rules and Tribunal orders)
- Conferred with other executive personnel and administrators to develop policies and strategies to achieve policy and procedural goals and objectives and to meet statutory mandates
- Prepared lectures and presentations for national conferences and association meetings and institutes
- Assisted attorneys drafting proposals on remedial measures on complex regulatory and antitrust cases to enforce regulations on behalf of the Competition Bureau
- Authored summary/opinion papers (i.e. briefing notes/memos summarizing the economic underpinning) on anti-trust issues related to regulatory pricing, mergers, dominance and abuse of market power, and civil matter cases
- Prepared written recommendations and provided oral briefings (as expert witness) to senior management on regulatory and competition issues (e.g., on market conditions and the state of

Docket DG 22-045 Direct Testimony of Faisal Deen Arif and Mark Thompson Attachment 1 Page 6 of 6

- competition, remedial propositions, supply planning and other accounting, financing and planning matters)
- Prepared analytical report on the Generic Drug Market Study, Phase II, jointly coordinated with the Legislative and Parliamentary Affairs Branch at the Competition Bureau

#### LEADERSHIP EXPERIENCE

- Co-Champion, Learning Branch Accessibility Committee
   September 2019 June 2022
- Co-led the Accessibility Committee along with the DG, Canada Education Savings Program
- Provided strategic direction on planning, design and delivery of various accessibility-related events thoughout the year to raise workplace awareness
- Co-Chair, Young Professionals' Network (YPN), Strategic Policy Sector, Industry Canada 2013-2014
- Co-Chaired the Strategic Policy Sector-Young Professionals' Network
- Coach young professionals and promote learning and career growth opportunities for them
- Industry Canada Charitable Campaign Canvasser 2011-2012
- Met with colleagues to raise awareness of the Government of Canada Workplace Charitable
- Campaign (GCWCC) and encouraged coworkers to donate
- Created a culture of generosity and charity to support charitable causes.
- Vice-President (Finances), Graduate Students' Association Étudients Diplômes, University of Ottawa

2005-2007

- Managed the uOttawa Graduate Students' Association's annual budget (an envelope of \$400,000 per annum)
- Led GSAÉD's financial support programs for the University of Ottawa grad students
- Led financial administration of GSAÉD
- Modernized and streamlined the preparation and presentation of financial reports and update, provided to the Governing Council of GSAÉD

#### DG 22-041

Petition for Approval to Recover Revenue Decoupling Adjustment Factor Costs

Department of Energy Data Requests - Set 3

Date Request Received: 3/17/23 Date of Response: 3/23/23 Request No. DOE 3-6 (Revised) Respondent: James Bonner

#### **REQUEST:**

Ref: Technical Session held on March 2, 2023.

Has Liberty undertaken any rate re-classifications or performed any inter-class migration among customer classes since the commencement of the RDAF mechanism as implemented on and after November 1, 2018? If yes, please provide details on such adjustments by rate class, by month, by year.

#### DOE 3-6 - Revised to Reduce the Number of Years Data Requested to 3 Years

COG Year 1: November 1, 2018 to October 31, 2019

Rate Class	Month	No. of Equivalent Bills prior to the adjustments	No. of Equivalent Bills after to the adjustments

#### COG Year 2: November 1, 2019 to October 31, 2020

Rate Class	Month	No. of Equivalent Bills <u>prior</u> to the adjustments	No. of Equivalent Bills after to the adjustments

Docket No. DG 22-041 Request No. DOE 3-6 (Revised)

COG Year	3: November	1. 2020 to	October 31	. 2021

Rate Class	Month	No. of Equivalent Bills <u>prior</u> to the adjustments	No. of Equivalent Bills after to the adjustments

#### **RESPONSE:**

Yes. EnergyNorth ran its Rate Review process in June 2019, June 2020, and July 2021.

The Rate Review process is a computer-generated weather-normalized historical annual billing comparison for each customer of their present rate to one or more proposed rates based on the rate class eligibility criteria shown in the tariff rate schedules. The results are then manually reviewed by customer care personnel, and if the recommended change is determined to be appropriate, each affected customer is notified, and a rate change is made. The process was run annually starting January 2017, then each subsequent year, except for 2022, after the May financial closing to ensure that the annual comparison completely contains the most recent Winter Season billing for each customer.

The summary results of the computer-generated billing comparison and recommendations for 2019, 2020, and 2021 are shown in Attachments DOE 3-6.1, DOE 3-6.2, and DOE 3-6.3, respectively. The summary results consist of two tables: the left-hand table contains the annual revenue comparison; the right-hand table compares the annual normalized weather consumption to the actual consumption.

For the revenue comparison table, the first column with the rate identifier in bold is the current rate class and the non-bold rate identifier is the recommended rate class. The second column shows the number of customers affected. The third column is the expected annual distribution revenue for the affected customers in aggregate under the recommended rate at prices in effect when the Rate Review was run. The fourth column is the expected annual distribution revenue for the affected customers in aggregate under the customer's present rate at prices in effect when the Rate Review was run. The fifth and sixth columns contain the annual revenue difference and percent annual revenue difference between recommended and present rates. For the annual normalized weather consumption to the actual consumption table, the information is presented in the same fashion.

Winter 2022–2023 and Summer 2023 Cost of Gas

Department of Energy Technical Session Data Requests - Set 1

Date Request Received: 5/19/23 Date of Response: 5/30/23 Request No. DOE TS 1-1 Respondent: Erin O'Brien

#### **REQUEST:**

Re: RDAF

Reference: technical session discussions held on May 9, 2023. Please provide a narrative description of Liberty Gas's process for calculating True-up for any given month. As an illustrative example, please use August 2022 actual (Tab titled "AugAdj 2022" in the excel file "Aug22 57. 46-Decoupling Entry -August 2022 & Tru Up EO review.xlsx") and August true-up (Tab titled "August Tru Up" in the same excel file).

For the illustrative month of August 2022, and for "AugAdj 2022" tab, please confirm that the tab references true-up data over April 2022 to August 2022 and not data over August 2022 to December 2022. If unable to confirm this understanding, please explain further, and provide an illustrative example and please provide any missing data.

Reference: Excel file "Aug22 57. 46-Decoupling Entry -August 2022 & Tru Up EO review.xlsx"). Please indicate where the final trued-up equivalent bills can be found for any given month (i.e., for example, for the month of August 2022, in which month will the true up equivalent bills show up?) Please provide all true-up data for all relevant months spanning Decoupling Year 3 and Year 4 (i.e., data related to creating final trued-up equivalent bills for the time period spanning September 1, 2020 to August 31, 2022).

#### **RESPONSE:**

At each month end, the initial decoupling calculation is performed based on the best information available during our 5-workday month-end close. As a result of cycle billing, most revenue pertaining to the month being closed is included in unbilled revenue, an estimate of the revenue not yet billed. In the subsequent months, the number of equivalent bills for that period is determined and is no longer estimated. The true up calculation is performed to record the results using the benefit of hindsight and true up the estimates initially recorded.

In the example of August 2022, the "AugAdj 2022" tab includes the estimates for unbilled revenue in Columns E ("# of Cust," number of equivalent bills in the estimated unbilled revenues recorded) and Column F ("Revenue," the Revenue Per Customer (RPC) as approved multiplied by the number of equivalent bills in Column E). This estimate is then carried into the "August"

Docket No. DG 22-045 Request No. DOE TS 1-1

Tru Up" tab to be compared to the actual results that pertain to August as determined in subsequent months.

As discussed in the May 9, 2023, technical session, the "August Tru Up" tab in the file provided was a placeholder. This Excel file was provided in September 2022 and we did not have the actual results for August at that time. If an earlier example is used, for example, the "Aug22 entry 56. 42-Decoupling Entry -April 2022 & Tru Up" file, you will see this represents the April 2022 calendar month decoupling results, for which we recorded the final true up in August 2022. In this example, the unbilled revenue estimates are brought into Columns C and D of the "Apr Tru Up" tab. You will see that these match Columns E and F of the "Apr Adj 2022" tab (those columns are discussed above). Then, the actuals are recorded in subsequent columns. If you scroll down to row 40 and below of the "Apr Tru Up" tab, you will see the actual results for April coming through in the May, June, July, and August equivalent bill data. As discussed, the first two months following include the bulk of the information. We have determined that four months is an appropriate adjustment period to capture the actual results in a reasonable amount of time (rather than extending this to pick up smaller adjustments that are not material).

As discussed above, the "Aug Adj 2022" tab includes the information available during the August close (i.e., through September 8, 2022, workday 5). The "August Tru Up" tab is a placeholder for the company as these are our working files. At the time this file was provided (September 2022), the data through December was not yet available. An illustrative example is included in (a) above.

The four months of true ups for May, June, July, and August 2022 (recorded in September, October, November, and December 2022, respectively) are included in Attachment DOE TS 1-1.zip

The final trued up bills will be found in the fourth month following the calendar month. As discussed above, the April 2022 true ups were finalized in August. When these files were provided in September 2022, the information for true ups available at that time were provided. As a result of timing of the filing, the May, June, July, and August 2022 true ups were not yet complete. They have since been completed and are included in Attachment DOE TS 1-1.zip as noted above.

DG 22-045

Winter 2022–2023 and Summer 2023 Cost of Gas

Department of Energy Technical Session Data Requests - Set 1

Date Request Received: 5/19/23 Date of Response: 5/30/23 Request No. DOE TS 1-2 Respondent: Erin O'Brien

#### **REQUEST:**

Reference: Excel file "Aug22 57. 46-Decoupling Entry -August 2022 & Tru Up EO review.xlsx"). Please provide source data that identify calculation of the Equivalent Bills for Decoupling Year 3 (DY3) and Year 4 (DY4) (i.e., time period spanning September 1, 2020 to August 31, 2022). Due to Liberty Gas's accounting practice that take multiple (i.e., four or more) months to true-up an estimated number of equivalent bills for any given month, please include all appropriate data that would clearly identify verifiable data (i.e., source data) for all months within the DY3 and DY4 timeframe.

#### **RESPONSE:**

Please refer to the "Monthly Delivery Sheets" files provided for EnergyNorth and Keene for DY4. Please note these files have multiple tabs and each month is layered on. Therefore, if you look at the August 2022 Monthly Delivery Sheet, it will include Calendar Month Delivery Service Bills by Month for all periods from September 2020 through August 2022.

As discussed, the Monthly Delivery Sheets are based on bills sent. Therefore, due to cycle billing, the current month will not capture most customer bills related to that month. This can be seen on each tab as the prior month's bills are consistently larger due to the timing of cycle billing weighting to early in each month.

Please see Attachment DOE TS 1-2.xlsx for Delivery Sheets not previously provided (September 2022 through December 2022).

Winter 2022–2023 and Summer 2023 Cost of Gas

Department of Energy Technical Session Data Requests - Set 1

Date Request Received: 5/19/23 Date of Response: 5/30/23 Request No. DOE TS 1-3 Respondent: Erin O'Brien

#### **REQUEST:**

Reference: excel file "Aug22 57. 46-Decoupling Entry -August 2022 & Tru Up EO review.xlsx"), Tab "AugAdj 2022" and Tab "Low Income Aug". For Decoupling Year 3 and Year 4 time period (i.e., time period spanning September 1, 2020 to August 31, 2022), please identify Gas Assistance Program (GAP) data that clearly separates revenues collected through the GAP component of LDAC into the following two categories – revenues collected from base distribution rates, and revenues collected from Cost of Gas (COG) passthrough. Please provide supporting documentation.

#### **RESPONSE:**

Please refer to Attachment DOE TS 1-3.xlsx. The "Back up" tab includes details from the Bills and Volumes report derived from the revenue system. This report is sorted for GAP customers (R-4 and R7, as applicable) and components of revenue are broken down into fixed, variable and gas supply (pass-through). The "Journal Entry" tab of this attachment is the support provided in the "Low Income Aug" tab of the Excel file "Aug22 57. 46-Decoupling Entry -August 2022 & Tru Up EO review.xlsx." The decoupling calculation only picks up the fixed and variable portions of the journal entry for the purposes of decoupling.

#### DG 22-045

Winter 2022–2023 and Summer 2023 Cost of Gas

Department of Energy Technical Session Data Requests - Set 1

Date Request Received: 5/19/23 Date of Response: 5/30/23 Request No. DOE TS 1-4 Respondent: James Bonner

#### **REQUEST:**

Re: RDAF

- a) Reference: Docket DG 22-041, Liberty Gas's Response to DOE DR 3-6. Liberty Gas's response to DOE 3-6 indicates that the Company ran rate reviews in June 2019, June 2020 and July 2021 resulting in customer migrations between rate classes. In the context of Decoupling Year 3 (spanning September 1, 2020 to August 31, 2021), please explain how such migration would impact the monthly decoupling revenue targets and the corresponding actual revenues. Please also explain how migration impacts the target and actual revenues when true-up process is completed after multiple (i.e., four or more) months.
- b) Reference: Liberty Gas's Response to DOE 6-8. In its response to DOE 6-8 in Data Request Set 6 (part two), Liberty Gas indicated that the Company did not perform a rate review in 2022. Please explain why not.

#### **RESPONSE:**

- a) Migration—meaning the movement of customers from one rate class to another—has no effect on the monthly decoupling target revenues (a.k.a. allowed revenues) or actual revenues. An individual customer's contribution to both is determined by the customer's rate class at the time the calculation is made. For example, a customer is not a Rate G-42 customer for the target revenue calculation and Rate G-43 customer for the allowed revenue calculation; they are in the same rate class for both. This is true even if the rate change takes place in the middle of the month. The customer's total equivalent bills and billed volume will be correctly apportioned between the two rates in the billing system. For the same reason, migration has no effect on the true-up process. The true-up process simply substitutes an actual measurement of the equivalent bills for a given month for the estimate originally used for the target revenue calculation at the time the decoupling entry was made.
- b) In the late spring of 2022, the Company's available billing resources were heavily engaged in both the later stages of the Customer First SAP billing conversion design and testing processes as well as operating the current Cogsdale billing system. Although it

Docket DG 22-045 Direct Testimony of Faisal Deen Arif and Mark Thompson Attachment 4 Page 6 of 7

Docket No. DG 22-045 Request No. DOE TS 1-4

was not intentional, the existing Rate Review process was simply overlooked during this extremely busy period.

DG 22-045

Winter 2022–2023 and Summer 2023 Cost of Gas

Department of Energy Technical Session Data Requests - Set 1

Date Request Received: 5/19/23 Date of Response: 5/30/23 Request No. DOE TS 1-5 Respondent: Erica Menard

#### **REQUEST:**

Reference: Review of ENNG's Revenue Decoupling Mechanism (Concentric Report by Gregg Therrien from August 8, 2019) in DG 22-041 Attachment of ELM-1 at Bates 1574; also found at DG 20-105, Exhibit 39. The Report states "The large RDM credit is unanticipated because the "real time" WNA is billed monthly on each customer's bill, thereby eliminating the largest anticipated variance component of the RDM, weather." Given this statement, please provide Liberty Gas's understanding of the reasons for decoupling adjustments in DY4 in excess of \$3 million.

#### **RESPONSE:**

As filed on December 8, 2022, the revenue decoupling adjustment factor for the residential class includes a prior period under-recovery associated with the previous LDAC year's RDAF rate of \$0.3 million plus a revenue deficiency of \$2.6 million for the current decoupling year 4. The revenue decoupling adjustment factor for the commercial class includes a prior period under-recovery associated with the previous LDAC year's RDAF rate of \$0.4 million plus a revenue deficiency of \$0.2 million for the current decoupling year 4.

The reasons for the decoupling year 4 revenue deficiency of \$2.6 million for the residential group and \$0.2 million for the commercial group are generally attributable to factors such as energy conservation, economic effects, and other variables. As described in the Company's previous response to DOE 1-4 (b) and DOE 2-3 (b), the methodology for comparing actual revenues to allowed revenues does not explicitly quantify the under-recovery into the various categories.

#### Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty

DG 22-045

# Winter 2022–2023 and Summer 2023 Cost of Gas (COG and LDAC)

Department of Energy Data Requests - Set 3

Date Request Received: 10/27/22 Date of Response: 11/23/22 Request No. DOE 3-1 Respondent: Craig Holden

#### **REQUEST:**

Reference: LDAC filing (August 2, 2022), Supplemental LDAC filing (September 1) COG filing

(dated September 1, 2022, filed September 2, 2022) and Updated filing (October 7,

2022) (hereinafter "COG filing" unless otherwise specified), and all Liberty EnergyNorth responses to data requests filed to date particularly Liberty's response to

DOE DR Set 1 (including supplemental response filed on September 8, 2022).

Using the same Excel format used in Liberty's September 8, 2022 supplemental response to DOE DR Set 1, please define and provide information on <u>allowed (or target) revenue and actual revenue</u> for *regular monthly reconciliation* that occurs every month for the period September 2021 through August 2022. For the purposes of (audit) verification, please identify the relevant accounting entries for the actual revenue figures.

(If the information has already been provided in this or other docket(s), please clearly identify the source and the timeframe when it was provided, and a citation to allow DOE to review it, or attach a copy.)

Please provide live Excel files that correspond to any tables and schedules provided "Live" files should include the formulas and allow the user to input new figures, if needed.

#### **RESPONSE:**

Please see Attachment DOE 3-1.zip for the files that support the regular monthly reconciliation for the period September 2021 through August 2022. Within the .zip file, there are folders for both EnergyNorth (EN Decoupling Mnthly Adj Sept21 – Aug22) and Keene (KN Decoupling Mnthly Adj Sept21 – Aug22). Within each folder, there are two Excel workbooks and two PDF documents per month. Using January 2022 as an example, here are the four files with a brief description of each.

• Jan22 30. 39-Decoupling Entry -January 2022 & Tru Up.xlsx – Calculation of the monthly decoupling journal entry.

Date Request Received: 10/27/22 Date of Response: 11/23/22 Request No. DOE 3-2 Respondent: Craig Holden

#### **REQUEST:**

Reference: COG filing

Using the same Excel format used in Liberty's September 8, 2022 supplemental response to DOE DR Set 1 please define and provide information on allowed (or target) revenue and actual revenue for true-up reconciliation that occurs four months after a given month (i.e., based on Liberty's earlier filing, it appears, that e.g., for the month of October 2021, the true-up reconciliation would occur in February 2022) for the period September 2021 through August 2022. If actual data is not available, please identify it accordingly and provide a narrative explanation as to when such data will be available. For all actual data, please identify the relevant accounting entries.

(If the information has already been provided in this or other docket(s), please clearly identify the source and the timeframe when it was provided, and a citation to allow DOE to review it, or attach a copy.)

Please provide live Excel files that correspond to any tables and schedules provided "Live" files should include the formulas and allow the user to input new figures, if needed.

#### **RESPONSE:**

Please see Attachment DOE 3-2.zip for the files that support the true-up reconciliation for the period September 2021 through August 2022. Within the .zip file, there are folders for both EnergyNorth (EN Decoupling True ups Sept21 – Aug22) and Keene (KN Decoupling True ups Sept21 – Aug22). Within each folder, there are two Excel workbooks per month. Using January 2022 as an example, here are the two files with a brief description of each.

• Jan22 entry 29. 35-Decoupling Entry -September 21 & Tru Up.xlsx – Refer to the month's "Tru up" tab for the calculation of four months of true-ups following the monthly decoupling journal entry. In this example, the final true-up entry posted in January relates to equivalent customer bills for September 2021.

Docket DG 22-045 Direct Testimony of Faisal Deen Arif and Mark Thompson Attachment 5 Page 4 of 4

Docket No. DG 22-045 Request No. DOE 3-2

• Jan22 29. Monthly Delivery Sheets - ENergy North.xlsx - Monthly delivery sheet breaking out the equivalent customer bills by the period (month) to which the bill relates.

#### MEMORANDUM

**TO:** Peter Dawes, Vice President, Finance and Administration

Energy North Natural Gas ("ENNG" or the "Company") d/b/a Liberty Utilities

FROM: Gregg Therrien

Concentric Energy Advisors, Inc. ("Concentric" or "CEA")

CC: Steve Mullen (ENNG), James Bonner (ENNG), Chris Wall (CEA), Peter Hoegler

(CEA)

**DATE:** August 8, 2019

RE: Review of ENNG's Revenue Decoupling Mechanism

#### SECTION I. EXECUTIVE SUMMARY

ENNG has engaged Concentric to conduct an audit of its recently approved revenue decoupling mechanism ("RDM") because the actual RDM results to date have resulted in distribution revenues \$1.4 million¹ below that allowed in the Company's last rate case.² Additionally, the RDM calculation has shown volatile results and has produced an unanticipated large credit to customers over the first seven months since the RDM has been in place.

#### Concentric's findings are summarized as follows:

- i. The Company's RDM calculations are accurate.
- ii. Actual class-level customer counts are significantly different than approved customer levels, resulting in a \$1.4 million distribution revenue shortfall because:
  - a. A Post-Test Year C&I customer reclass was not reflected in the rate case, and
  - b. The New Hampshire Public Utilities Commission ("NHPUC") Staff made an "equivalent bills" adjustment in the rate case that makes attaining allowed revenues difficult.
- iii. Increased use per customer is driving the large RDM credit.
- iv. ENNG's use per customer trends are consistent with other regional natural gas companies.
- v. The real-time weather normalization adjustment ("WNA") is now functioning properly after a \$0.264 million error was discovered in November 2018 and subsequently credited back to customers in April 2019.
- vi. The Company's unbilled revenue methodology is prone to higher monthly variation than other methods. Two minor errors in the seven months of entries also contributed to monthly decoupling entry variances.

Attachment AMI-1

The following chart summarizes the components of the variance between allowed and actual distribution revenues:

**Chart 1: Components of Distribution Revenue Variance** 

The purpose of an RDM is to sever the link between sales units (usage) and revenues, thus enabling companies to freely promote conservation measures to their customers without suffering financial harm. A revenue per customer ("RPC") RDM construct is intended to recognize that adding new customers requires compensation to fund the incremental investment necessary to connect that customer to the distribution system. As such, an RPC RDM does not reconcile differences in customer counts.

The above chart shows that changes in customers compared to the approved rate year has resulted in an unfavorable margin variance of \$1.4 million. This is primarily the result of two factors: 1) a February 2018 commercial and industrial ("C&I") rate review, which resulted in a significant reclassification of customers among the C&I rate schedules, and 2) a late adjustment to target (allowed) distribution revenues and customer counts ("equivalent bills") by the NHPUC Staff at the end of the rate case proceeding.

The \$6.1 million favorable margin variance related to higher use per customer is properly captured through the RDM and nets to zero.

#### SECTION II. BACKGROUND

ENNG has engaged Concentric to conduct an audit of its recently approved RDM because the actual RDM results to date have resulted in distribution revenues \$1.4 million below that allowed in the Company's last rate case. Additionally, the RDM calculation has shown volatile results and has produced an unanticipated large credit to customers over the first seven months since the RDM has been in place. The large RDM credit is unanticipated because the "real time" WNA is billed monthly on each customer's bill, thereby eliminating the largest anticipated variance component of the RDM, weather. Concentric first produced a work plan to address the primary purpose of this engagement, which is to determine whether there are any structural deficiencies in the RDM construct.

#### The details of this work plan consist of the following:

- 1. Verify that the RDM is functioning properly, through investigation of the following:
  - i. That the Allowed Revenue Per Customer being used in the RDM calculation is accurate and consistent with the approved billing determinants and allowed revenues from the rate case;
  - ii. That the Actual Revenue Per Customer ("RPC") since inception of the RDM is also calculated correctly, and
  - iii. That Concentric's independently calculated monthly RDM variances are equal to that recorded by the Company.
- 2. Quantify the monthly variances by category (i.e., customer-related and usage related);
- 3. Calculate the monthly weather-related variance and compare that result to actual billed WNA revenues;
- 4. Validate the monthly unbilled entries, and quantify the unbilled contribution to monthly variances, and
- 5. Summarize our audit findings and provide Concentric's recommendations.

#### SECTION III. THE ENNG VARIANCE ANALYSIS

The Company provided Concentric with its monthly decoupling values as well as its variances to allowed distribution revenues. This is summarized as follows:

Table 1: Variance to Allowed Distribution Revenues (November 2018 – May 2019)

Line	Revenue Type	Total
1	Allowed Distribution Revenues	62,292,497
2	<b>Actual Distribution Revenues</b>	60,930,806
3	Difference	(1,361,691)
4	Decoupling Deferral <sup>1</sup>	(6,089,952)

1 Included in Line 2 above

As Table 1 indicates, cumulative actual revenues (inclusive of the decoupling adjustment) are below allowed by \$1.4 million. This significant unfavorable variance, coupled with the larger than anticipated decoupling adjustment, led to this audit to ensure the RDM is functioning properly and that the base revenue target RPC is appropriate and calculated consistent with the Final Decision.

#### SECTION IV. PRELIMINARY RESULTS

On July 12, 2019 Concentric reviewed a Microsoft PowerPoint® presentation with ENNG Management. This presentation included the following preliminary findings:

- The Company's RDM calculations are accurate.
  - o Target RPC, by class and in total, are calculated correctly;
  - Actual Calendar Revenues cannot be calculated on a Class RPC basis because of the system-wide unbilled methodology, and
  - The method used to calculate the decoupling adjustment is different than the approved tariff methodology, but mathematically should yield the same result.
- Actual customer counts are below Allowed levels, primarily in the Commercial and Industrial
   ("C&I") rate classes result in a \$0.7 million<sup>3</sup> delivery revenue shortfall that is not recoverable
   through decoupling.
- Use Per Customer Growth drives the higher than anticipated decoupling credits.
- The unbilled calculation contributes significantly to the monthly variances, making it difficult to assess the true impact of the decoupling adjustment.

As a result of this presentation Concentric was asked to further investigate use per customer trends from other New England gas companies. The above findings have been validated and refined, and now also include the requested use per customer comparisons.

#### SECTION V. FINAL FINDINGS

#### A. The Company's RDM calculations are accurate.

Concentric validated the Company's monthly RDM calculations by performing three tests:

- 1. Replicate the monthly Target RPC;
- 2. Validate the Company's monthly Actual RPC, and
- 3. Compare the differences from steps 1 and 2 to the Company's reported monthly decoupling amounts.

These steps require a review of the Company's unbilled methodology and monthly entries, which are necessary to report monthly revenues on a calendar basis.

The first audit test was to validate that the monthly RPC targets were calculated correctly using class-specific data from the Final Decision. CEA first obtained the final approved billing determinants from the Final Decision, which includes the number of customers (equivalent bills), throughput (therms), and the appropriate tariff's monthly fixed charges and delivery rates per therm. We then multiplied these billing determinants by the tariff rates to derive monthly allowed distribution revenues by rate class. Each class-specific distribution revenue was then divided by the allowed number of equivalent bills to derive class-

<sup>&</sup>lt;sup>3</sup> Concentric's preliminary finding used customer rates to quantify the customer variance. The final analysis contained in this memorandum properly uses the class RPC values, which are used in the RDM calculation.

Attachment AMI-1

specific revenue per customer targets. Lastly, these revenue per customer targets were compared to the Company's RDM calculation workbook and were found to tie out in each class for each month.

The second step was to validate the Company's Actual RPC calculations. This was performed in total rather than at the class level because of the nature of the unbilled calculation (discussed below in Section VII). Unbilled is calculated by first using actual system gate station receipts less company use, daily metered volumes<sup>4</sup> and a lost-and-unaccounted-for deduction<sup>5</sup> pertaining to local delivery system losses. Because the Company utilizes the "gate station approach" to estimate unbilled sales, class-level detail is not possible. Therefore, Concentric reviewed both the class-specific billed revenues, the unbilled revenue estimate and the calculation of monthly equivalent bills to validate the monthly Actual revenues.

Concentric's review of the underlying billing data and unbilled entries did uncover a minor unbilled estimation error whereby the number of equivalent bills used in the unbilled calculation were incorrect for the months of November 2018 through and including March 2019<sup>6</sup>. This error has no effect on the seven-month cumulative variance, as the unbilled accruals are reversed each month and the equivalent bills error was corrected in the April 2019 accrual. Concentric then performed a second reasonableness test whereby the unbilled sales volumes and equivalent bills were spread to the rate classes based on billed volume percentages. This provided a "sanity check" calculation, which showed material volatility in the C&I classes. The root cause of this volatility is discussed below.

The third step compares the actual RPC to the Allowed RPC and multiplied times the number of calendar month equivalent bills. This calculation yielded a decoupling value very close to the Company's recorded decoupling revenues in total, but significant monthly variances in the months of November 2018 through March 2019.

#### A. Customer counts are significantly different than that allowed in the rate case.

Average customers for the period of November 2018 through May 2018 were compared to the 2016 rate year for each rate class. The variance in customer counts was then multiplied times the Allowed RPC for the same period. This calculation is shown below:

<sup>&</sup>lt;sup>4</sup> Daily metered volumes are excluded from the unbilled calculation as they are billed on a true calendar basis.

<sup>&</sup>lt;sup>5</sup> The Company utilizes a 1.6% lost-and-unaccounted-for percentage in all months. No attempts were made by Concentric to validate this assumption.

<sup>&</sup>lt;sup>6</sup> Actual cycle-based number of bills was inadvertently used in these five months.

# a. A Post-Test Year C&I Customer Reclass was not Included in the Decoupling Targets.

In February 2018 the Company analyzed its C&I rate classes to determine if any customers were not properly assigned to the appropriate rate class. For example, if a commercial customer has been receiving service under Rate G-41 (with an availability requirement that the customer must use less than 10,000 therms annually and use more than 67% of its annual usage in the winter months) and, as a result of the annual rate review it is determined that the customer has increased its annual usage above 10,000 therms, the customer is then reclassified to the G-42 rate schedule.

Concentric's review of current customer counts compared to that imputed into allowed revenues showed significant variation, particularly in the C&I class. We determined that the C&I rate review conducted in February 2017 was not accounted for in the rate case. The summary of these customer reclasses is as follows:

Table 3: February 2017 C&I Rate Reclassifications

	C&I (	Customer Rec	lass		
Rate Class	Out	In	Net	11/2018 - 5/2019 Allowed RPC	Delivery Revenue Impact
G-41	(489)	789	300	\$1,117	\$335,148
G-42	(529)	241	(288)	\$6,515	(\$1,876,269)
G-43	(18)	17	(1)	\$43,278	(\$43,278)
G-51	(437)	358	(79)	\$810	(\$64,015)
G-52	(97)	162	65	\$4,085	\$265,532
G-53	(10)	15	5	\$34,929	\$174,647
G-54	(9)	7	(2)	\$25,621	(\$51,241)
Total	(1,589)	1,589	-		(\$1,259,476)

This variance is a subset of the total customer-related margin variance calculated in Table 2.

# b. Test Year Adjustments Included in the Decoupling Targets Makes Attaining Imputed Customer Counts Difficult.

Near the completion of the litigated rate case in Docket No. 17-048 the Commission Staff required the Company to make a calendarization adjustment for the number of test year bills. This adjustment is intended to "normalize" the test year customer counts and reflect new customer accounts added during the test year. The Company's approach to this request was to calculate an equivalent bills adjustment, which both smoothed test year customer counts and recognized new customer additions made during the test year. This adjustment resulted in the following increase to Allowed customer counts, therms and revenues:

Attachment AMI-1

**Table 4: Rate Year Equivalent Bills Adjustment** 

Rate Class	Annual Bills	<b>Annual Therms</b>	<b>Delivery Revenues</b>
R-1	386	7,154	\$8,475
R-3	14,336	1,043,363	\$789,374
R-4	(1,580)	(214,472)	(\$56,689)
Total Residential	13,142	836,045	\$741,160
G-41	3,214	485,913	\$342,087
G-42	343	561,680	\$238,682
G-43	(28)	(554,018)	(\$138,357)
G-51	99	14,201	\$8,535
G-52	79	155,599	\$40,388
G-53	(21)	(544,071)	(\$96,774)
G-54	(16)	(836,835)	(\$47,439)
Total C/I	3,670	(717,529)	\$347,123
Total All	16,812	118,516	\$1,088,283

The above adjustment is included in the Approved RPC targets resulting in a higher customer count that must be attained to achieve allowed delivery revenues. The RDM adjustment does not compensate the Company for lower actual customer counts than that imputed into base delivery revenues. The RDM is designed to sever the link between sales (therms) and revenues, not customer counts.

#### **B.** Use Per Customer

Again, the purpose of the RDM is to sever the link between customer usage and delivery revenues. Reasons for usage variances are primarily the result of colder or warmer than normal weather, conservation measures (from both ratepayer-funded programs and individual customer conservation measures) and economic activity. Given the Company's RDM construct that includes a real-time WNA, the variances related to use per customer were anticipated to be small. To the contrary, the decoupling revenue adjustment has credited customers \$6.1 million over the first seven months of operation. The real-time WNA has properly captured the weather-related variance (discussed in Section VI below), which leaves the entire RDM adjustment attributable to use per customer. The increase in use per customer has occurred in both the Residential and C&I sectors:

Table 7: Participating Local Gas Distribution Companies ("LDCs")

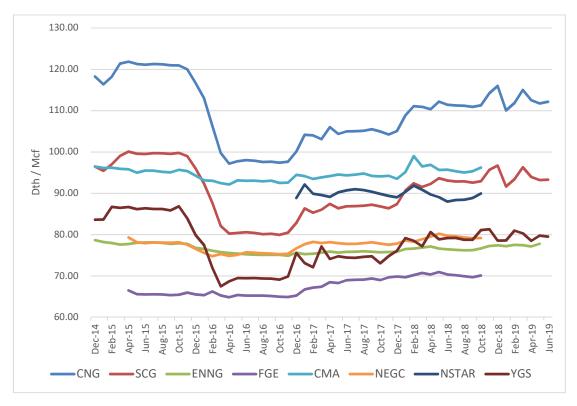

Utility	Abbreviation	Location	Approximate Number of Customers
Connecticut Natural Gas	CNG	Greater Hartford, CT and Greenwich, CT	180,000
Columbia Gas – MA	СМА	Springfield and Laurence, MA	325,000
Eversource Gas – MA	NSTAR	Central MA	290,000
Liberty – NH	ENNG	New Hampshire	95,000
National Grid – RI	NEGC	Rhode Island	55,000
The Southern Connecticut Gas Company	SCG	Greater New Haven and Bridgeport, CT	200,000
Unitil – MA	FGE	Fitchburg, MA	16,000
Eversource – CT	YGS	Across CT	200,000

Monthly customer and usage data was obtained by rate class for as far back as January 2014. Concentric then calculated monthly UPC, then calculated a 12-month rolling total. Normalized consumption data was used where available. The data below represents summarized data for Residential (heat and non-heat), Commercial and Industrial customer classes.

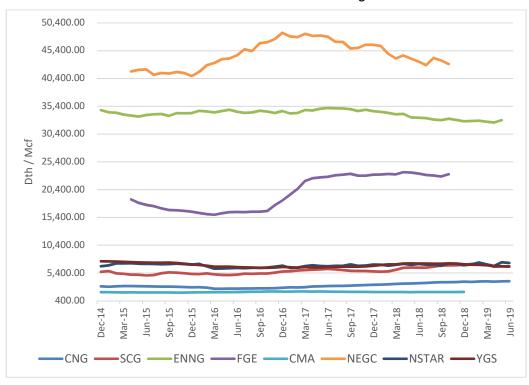

Chart 6: Industrial Use Per Customer Trends: 12-Month Rolling Total

The industrial class comparison is complicated by the fact that some of the utilities have appreciably different rate designs. For example, CNG, SCG and YGS's Industrial customers are served primarily under Rate LGS — Large General Service. This tariff does not carry a load factor distinction like the other participating LDCs tariffs. As such, the average UPC for these three LDCs appear much lower than those with more granular rate structures.

Appendix A contains individual use per customer graphs for each LDC.

## SECTION VI. WEATHER VARIANCES AND THE REAL-TIME WNA

One of the audit tasks is to validate the accuracy of the real-time WNA adjustment. The real-time WNA is a customer-specific calculation that results in either a charge (when weather is warmer than normal) or a credit (when weather is colder than normal). The WNA is billed in the month in which the weather variance occurs, thus matching the charge or credit with the weather-related impact on the bill. Customer WNA billings is captured as a separate revenue component in the Company's revenue reporting, enabling a comparison between what was billed and what a class-level spreadsheet analysis produces. This comparison, although not expected to match perfectly, should indicate that the WNA is functioning properly or not. The results of the comparison between the real-time WNA and the Excel© based weather analysis is as follows:

Table 5: Comparison of Calculated Weather-Related Variance to the Real-Time WNA

Category	Nov-18	Dec-18	Jan-19	Feb-19	Mar-19	Apr-19	May-19
Distribution Revenues	\$6,176,999	\$9,601,480	\$12,370,924	\$12,544,467	\$11,461,724	\$9,515,278	\$6,468,216
Heating Degree Days	Colder / (Warmer)						
Actual HDD	601	983	1,085	1,160	1,059	710	415
Normal HDD	504	857	1,162	1,167	1,026	737	414
Difference	97	126	(77)	(8)	33	(27)	1
Variance %	19.3%	14.8%	-6.6%	-0.7%	3.2%	-3.7%	0.3%
Weather Variance Calculated	(Credit) / Charge						
WNA	(\$510,539)	(\$900,154)	\$585,425	\$61,848	(\$255,743)	\$218,110	(\$7,368)
Billed WNA <sup>1</sup>	(\$65,581)	(\$926,070)	\$568,805	\$11,317	(\$172,550)	\$414,250	\$206,917
Difference	(\$444,958)	\$25,916	\$16,620	\$50,531	(\$83,193)	(\$196,139)	(\$214,285)
% of Revenues Calculated							
Weather	-8.3%	-9.4%	4.7%	0.5%	-2.2%	2.3%	-0.1%
Billed WNA	-1.1%	-9.6%	4.6%	0.1%	-1.5%	4.4%	3.2%

Upon reviewing the above comparison, one would expect to see only a small monthly variation between the calculated WNA and the billed WNA. Further, the two methods should move in the same direction (both methods resulting in a credit, or both resulting in a debit). Additionally, the magnitude of the adjustment should reflect the difference in heating degree days ("HDD"). Concentric's findings is that each month from December 2018 through March 2019 appear reasonable, displaying a close correlation between methods.

The months of November 2018 and April 2019 showed material variances between actual billed WNA and the spreadsheet estimate. November has a significant amount of HDDs and the weather was significantly colder than normal (19.3% colder). This colder than normal HDD implies that customers would have their heating systems on for the majority of the month. The fact that the billed WNA was a comparatively small credit compared to the spreadsheet analysis (and weather was significantly colder than normal) indicates that there was likely a billing system issue. It is our understanding from the preliminary results meeting that there was in fact an implementation issue with the real-time WNA in November 2018 and a credit was subsequently applied in April 2019, which explains the variation in these two months.

# SECTION VII. THE UNBILLED REVENUE METHODOLOGY AFFECTS THE RDM CALCULATION

Unbilled revenues reflect those sales that occurred in the calendar month but have yet to be billed to the customer. Accounting standards require companies to report revenues on a calendar basis. When companies such as ENNG utilize billing cycles, there is an inevitable mis-match between billed sales (which cross calendar months) and calendar sales. To remedy this mismatch, companies must estimate the value of these unbilled sales. There are three commonly used methods to estimate unbilled sales:

Method 1: Perform a system-wide calculation based on monthly actual gate station take

data (the "send-out" method);

Method 2: Utilize a base-thermal methodology, which estimates unbilled revenues based on

unbilled heating degree days (the "base-thermal" method), and

Method 3: Utilize actual end-of-month meter reads (the "AMI" method).

Of these three methods, ENNG utilizes method 1. This method is the simplest of the three as it relies on total gate station receipts and system-level adjustments to derive calendar sales. The shortcomings of this method is that results tend to be volatile across the months, and class-level detail is not estimated making variance analysis more difficult. Further, with an RDM that includes rate class revenue targets, performing the monthly RDM entry must be performed at the system level given the current method for unbilled estimation. This means that the Company's actual RDM calculation is different than its published tariff:

**Table 6: RDM Methodology Comparison** 

Approved Tariff Methodology (RPC)	Actual Practice (Revenues)
Step 1: Calculate the difference between Actual RPC and Allowed RPC for each rate class	Step 1: Derive Allowed revenues by multiplying the Allowed RPC times the actual number of customers for each rate class and sum them
Step 2: Multiply the RPC differences derived in step 1 times the Actual number of customers in each rate class	Step 2: Compare Actual Revenues to Allowed Revenues derived in step 1
Step 3: The sum of the rate class revenue differences calculated in step 2 to derive the monthly decoupling adjustment	Step 3: Subtract Actual from Allowed revenues to derive the decoupling adjustment

Both methodologies result in the same decoupling adjustment amount. However, the lack of transparency to the class level for the RDM calculation makes variance analysis more difficult.

There was an error in the unbilled calculation in the months of November 2018 through April 2019. Billing cycle equivalent bills rather than calendar equivalent bills were inadvertently used in the unbilled calculation. This error contributed to significant monthly swings in the RDM revenues, as the mismatch

Attachment AMI-1

in equivalent bills is captured by the RDM, which includes target RPC based on calendar equivalent bills. The monthly variations are as follows:

Table 7: Unbilled Equivalent Bills Error Impact on Monthly RDM Variation

	Nov-18	Dec-18	Jan-19	Feb-19	Mar-19	Apr-19	May-19
Customer Difference	(3,107)	2,160	3,215	4,977	(4,342)	(99)	(98)
Allowed RPC	\$85.90	\$112.91	\$127.12	\$119.83	\$102.87	\$69.23	\$49.68
Dollar Impact	(\$266,901)	\$243,919	\$408,697	\$596,338	(\$446,641)	(\$6,856)	(\$4,868)
Contribution to Monthly Unbilled Variance	(\$266,901)	\$510,820	\$164,779	\$187,641	(\$1,042,979)	\$439,785	\$1,988

Once the error was discovered and corrected in April 2019 the large variation ended.

# SECTION VIII. RECOMMENDATIONS

Recommendation 1: Any C&I rate review must be incorporated into the adjusted (rate year) equivalent bills calculation, and do not perform any rate reviews between rate cases.

Recommendation 2: Consider switching to a base-thermal unbilled methodology. This change will require some up-front investment in spreadsheet development but should help smooth monthly variances. This method will enable the Company to calculate its RDM consistent with its approved tariff and help with monthly variance analysis.

Recommendation 3: The real-time WNA should continue to be audited in the Company's billing system, particularly in the months when it is being applied to prorated bills (November and May).
