I am writing to express my strong support for the continuation of the NH residential solar credit program at its current level. As a retiree on a fixed income, I was somewhat hesitant to install a solar array on the roof of my home in Thornton, NH. But, along with the Federal credit and the NH incentive program, I made the commitment to install the system.

I am currently generating more electricity in most months than I use, without the burning of fossil fuels and the resulting pollution. I now expect my up-front investment to more than pay off over the life of the system, and I am very happy to not be contributing to the issues stressing our planet.

I hope the commission will see the value of this program to New Hampshire, the US and the world, and continue or even expand the program. Thank you.
