To the NH-PUC:

I recently learned that the NH Public Utilities Commission is about to release an Order concerning PUC Docket DE 22-060 on Changes to the Current Net Metering Tariff Structure. I understand a Settlement Agreement has been filed by the three investor-owned electric utilities, Clean Energy NH, Conservation Law Foundation (CLF), the Office of the Consumer Advocate (OCA), and the NH Hydro Association. I understand further that the Clean Power Coalition of NH has made recommendations regarding this settlement.

I urge the PUC to accept this Settlement Agreement as modified with CPCNH's recommendations. It is imperative that New Hampshire embraces the transition to clean energy thereby stimulating economic growth and improving public health. My husband and I have met with solar contractors, and the combined costs of re-roofing, cutting down trees and installing solar panels is daunting even with federal incentives. Net metering helps make it more affordable to us and also contributes to our sense that we are helping our community because they can make use of the power we do not use.

I would like my concern and support for the Settlement Agreement to be entered into the docket. Copies of this email will be sent to Governor Sununu and the DOE commissioner.

Sincerely,

Alice DonnaSelva

Concord
