I want to send this letter of concern regarding upcoming PUC hearings on changes to Net Metering.

Thousands of NH citizens struggle with paying increasingly high costs of electricity. The fact that there is no competition does not help. When solar energy and net metering programs became available, the opportunity arose to make a significant impact both on personal finances as well as the environment.

I strongly urge NH PUC to continue support for net metering and encourage more Granite Staters to seek out alternative energy for both our fiscal and ecological well being.--
