Dear PUC,

I am writing to urge you to support the settlement in Docket 22--060 to preserve net metering.

As a resident of NH concerned about converting to renewable energy, a solid and steady net metering policy is essential. I have installed solar panels on two successive homes and my church. Net metering that was available at the time made all of these investments possible for us. Now I am working with a business that absolutely needs to be confident about the NEM tariff for the 20 year period in the settlement in order to invest in a solar system.

Please preserve net metering and keep it simple!

Thank you

Sarah Thorne
