---

The Campton Community Power Committee strongly supports the settlement agreement as modified with CPCNH's recommendations. Net metering is crucial to the development of renewable energy in New Hampshire. It incentivizes local and residential power generation, which makes the electric network more reliable and keeps more money inside the state, as well as assisting in the global effort to reduce climate change. These benefits more than compensate for any costs that may be shifted to other customers.

Thank you,

William Sebastian

Chair, Campton Community Power
