---

There should be no change to net metering in New Hampshire. I installed my system several years ago and planned on net metering offsetting some of the costs. To change the rules now is unfair to me and all other solar owners. Not only that but the power companies should not be able to sell excess power from my system to others without compensating me. Also eliminating net metering will very negatively impact a growing solar industry that is generating a lot of jobs and clean industry that helps mitigate climate change.

Eliminating net metering would be a terrible mistake for New Hampshire and would further tighten the Power companies stranglehold on electricity generation resulting in higher cost for all New Hampshire citizens.

So please no eliminating net metering.

Thanks Bob Zimmerman Mirror Lake NH.
