To the Public Utilities Commission & Governor Sununu,

As a NH resident who takes part in the net metering system, I hope you will accept the Settlement in Docket 22-060. At minimum, New Hampshire needs to maintain net metering policies and work to improve them for rate paying residents.

Net metering helped me to afford a solar energy project and I appreciate being fairly compensated for putting solar panels on our homes.

Net metering supports small-scale solar power for all, which is necessary to increase our local energy independence and prepare for the clean energy grid of the future. It would benefit us all for the Public Utilities Commission to accept the Settlement that Clean Energy NH and others have brought to this issue.

Thanks!

Amy Antonucci, Barrington NH
