To the Public Utilities Commission,

Please accept the Settlement in Docket 22-060. As a member of a household with solar, net metering was a critical piece in our decision to install a solar array on our home. Additionally, as a young person in the state, I believe that net metering along with other solar incentivizing initiatives will be key in expanding NH's reliance on clean energy. This is critical in securing a healthy and vibrant state for all- one in which young people will be encouraged to live and work in. It would benefit us all for the Public Utilities Commission to accept the Settlement that Clean Energy NH and others have brought to this issue.

Sincerely,
Taylor
