---

I recently learned that the NH Public Utilities Commission is about to release an Order concerning PUC Docket DE 22-060 on Changes to the Current Net Metering Tariff Structure. I understand a Settlement Agreement has been filed by the three investor-owned electric utilities, Clean Energy NH, Conservation Law Foundation (CLF), the Office of the Consumer Advocate (OCA), and the NH Hydro Association.

I urge the PUC to accept this Settlement Agreement. New Hampshire is a beautiful state and our quality of life and economy rely on our natural resources. It is just one of the many reasons we should do everything we can to encourage and promote sustainable energy production like solar. Net metering allows those of us who can install solar to share that power with the grid and this is one of the benefits that encourage personal and business investment in solar. Solar investment is important both to our long term energy infrastructure and the health of our state and planet.

I am copying the PUC Clerk on this email to register my support for the Settlement Agreement.

Thank you for your attention,
