Subject: Preserve Net metering

EXTERNAL: Do not open attachments or click on links unless you recognize and trust the sender.

To the Public Utilities Commission,

Please accept the Settlement in Docket 22-060. At minimum, New Hampshire needs to maintain net metering policies and work to improve them for rate paying residents. Net metering puts solar energy projects in reach for many who might not be able to pay for these projects otherwise. Residents of our state deserve to be fairly compensated for putting solar panels on their homes. In addition, net metering supports small-scale solar power which is necessary to increase our local energy independence and prepare for the clean energy grid of the future. It would benefit us all for the Public Utilities Commission to accept the Settlement that Clean Energy NH and others have brought to this issue. The ISO is slow to get larger projects interconnected, the grid transition needs every support it can get. Thank you for your work on this matter -- Kendra
