We need all the carbon-free power we can get. We need the PUC to support this need by encouraging as many citizens to install rooftop solar as possible. Rooftop solar is beneficial to not only the owner, but to all ratepayers on multiple levels. A sensible long term vision of our energy grid must include Distributed Energy Resources, like consumer owned solar and storage. Making this happen requires compensating owners fairly. A fair, predictable price for the excess energy that rooftop solar owners produce will encourage more consumers to hop on board.

We need to do everything we can to leave our kids and grandkids a liveable planet. A fair net metering policy is one small step. Please make it happen.

Respectfully,
Gerald Beck
