Dear Public Utility Commissioners:

I write in support of NEM because, as a family in a private residence, I have found over the years following the installation of eight panels on my roof that the following has happened:

- my solar array has reduced the home's total electrical bill.
- my solar array, when installed, created jobs and prosperity for a New England company.
- my solar array produces kwhs and thus reduces transmission losses and grid congestion.
- my solar array is good for the environment.

Respectfully,

Kent Hackmann
