

**STATE OF NEW HAMPSHIRE  
PUBLIC UTILITIES COMMISSION**

**DE 22-060**

**ELECTRIC DISTRIBUTION UTILITIES**

**Consideration of Changes to the Current Net Metering Tariff Structure, Including  
Compensation of Customer-Generators**

**Procedural Order Re: Requests for Extension and/or Clarification on Record  
Requests**

On November 25, 2024, the Commission issued a series of record requests to the three electric distribution utilities and directed them to respond by December 20, 2024. Consistent with Order No. 27,085, the three utilities have separately filed requests for extensions and/or clarity regarding several of the record requests. The Commission will address each question discussed in the utilities' filings below.

**A. Questions 2 and 11**

All three utilities noted that they would be unable to provide complete answers to Question 2 by the December 20 deadline. In addition, Liberty Utilities (Granite State Electric) Corp. d/b/a Liberty (Liberty) requested an extension for Question 11 on the grounds that it would take longer to gather the necessary data to provide a response. In light of the concerns raised by the utilities, and in the interest in keeping the deadlines for each of the utilities the same, the Commission extends the deadline for the utilities to respond to both Questions 2 and 11 to January 21, 2025.

**B. Question 8**

In Question 8, the Commission asked the utilities "what changes [would be] necessary for the net metering infrastructure to accommodate net metering customers' ability to leverage electricity storage and more instantaneous netting, ideally five-minute intervals or faster, to allow such customers to extract benefits from away and production

towards peak demand periods.” Liberty now seeks clarification of this question, noting that storage is currently ineligible for participation in net metering.

The Commission acknowledges that storage is currently ineligible for participation in net metering. However, in the Supplemental Order of Notice issued on November 18, 2024, the Commission stated that it would consider in this docket whether to change the net metering tariff to allow storage to participate in the program. The Commission acknowledges that there may be many important considerations when deciding whether to amend the net metering tariff to allow storage to participate, including utility-specific concerns. But, as a baseline concern, the Commission is interested in understanding what changes to the utilities’ net metering infrastructure would be necessary to allow storage to participate in the manner outlined in Question 8. In asking this question, the Commission is not making any decisions about allowing storage to participate in net metering, which is an issue that will be decided in this docket. But the Commission believes the answer to Question 8 will help frame future discussions about the feasibility and benefits of adopting this change.

So ordered, this seventeenth day of December, 2024.
