

STATE OF NEW HAMPSHIRE  
BEFORE THE  
PUBLIC UTILITIES COMMISSION

Docket No. DG 23-003

Liberty Utilities (Granite State Electric) Corp. d/b/a Liberty  
Proposed Purchase of Receivables Program

DIRECT TESTIMONY

OF

ROBERT GARCIA

AND

MELYSSA M. FLAHERTY

September 24, 2024

THIS PAGE INTENTIONALLY LEFT BLANK

1 **I. INTRODUCTION AND PURPOSE**

2 **Q. What are your full names, business addresses, and positions?**

3 A. (RG) My name is Robert Garcia. My business address is 15 Buttrick Road,  
4 Londonderry, New Hampshire. My title is Manager, Rates and Regulatory Affairs.

5 (MF) My name is Melyssa M. Flaherty. My business address is 15 Buttrick Road,  
6 Londonderry, New Hampshire. My title is Supervisor II, Retail Choice

7 **Q. By whom are you employed?**

8 A. We are employed by Liberty Utilities Service Corp. (“LUSC”), which provides services  
9 to Liberty Utilities (Granite State Electric and Energy North Natural Gas) Corp d/b/a  
10 Liberty (“Liberty” or the “Company”).

11 **Q. On whose behalf are you testifying?**

12 A. We are testifying on behalf of the Company.

13 **Q. Mr. Garcia, would you describe your educational and professional background and**  
14 **training?**

15 A. I have an Artium Baccalaureus (Bachelor of Arts) degree in Political Science and French  
16 from Wabash College (Crawfordsville, Indiana) and a Master of Public Administration  
17 degree from the School of Public and Environmental Affairs at Indiana University  
18 (Bloomington, Indiana) with concentrations in Policy (Quantitative) Analysis and  
19 International Affairs. I also obtained a Certificat De Langue Et Civilisation Française  
20 from the Université de Paris – Sorbonne (Paris, France) and, as part of my graduate

1 studies, studied French and European government at the École Nationale  
2 D'Administration (Paris, France).

3 I was employed by ComEd from April 2001 to March 2023. I began my employment  
4 with ComEd in the Regulatory Department as a Regulatory Specialist and moved on to  
5 the positions of Senior Regulatory Specialist in 2004, Manager of Regulatory Strategies  
6 and Solutions in 2008, and Director of Regulatory Strategy and Services in 2013 before  
7 assuming my last position as Director of Regulatory Innovation & Initiatives in 2021.

8 Prior to joining ComEd, I worked for nearly nine years at the Illinois Commerce  
9 Commission, beginning in 1992 as an intern in what was then the Office of Policy and  
10 Planning and ending in 2001 as the senior policy advisor to a Commissioner. I initially  
11 joined the Commission Staff through the James H. Dunn Memorial Fellowship program,  
12 a one-year program sponsored by the Office of the Governor. Through this Fellowship, I  
13 also held short-term positions in the Bureau of the Budget and the Governor's Legislative  
14 Office.

15 **Q. Mr. Garcia, have you previously testified in regulatory proceedings before the New  
16 Hampshire Public Utilities Commission (the "Commission")?**

17 A. Yes, I have.

18 **Q. Ms. Flaherty, would you describe your educational background, and your business  
19 and professional experience?**

20 A. I have a Bachelor of Science degree in International Business from Franklin Pierce  
21 University in Rindge, New Hampshire. I also have obtained a Paralegal Certificate from

1 Arizona Paralegal in Phoenix, Arizona and Project Management and Business Analysis  
2 Certificates from New Horizons in Waltham, Massachusetts.

3 I have been employed with Liberty since October 2013. I began my employment with  
4 Liberty in the Retail Choice Department as a Transportation Analyst and moved on to the  
5 position of Senior Transportation Analyst in 2015 before assuming my current position as  
6 Supervisor II, Retail Choice. Prior to joining Liberty, I worked for Waveguide, Inc. for  
7 nearly three years beginning in October 2010 as a Project Administrator, as a Licensing  
8 Coordinator, and in my last position in 2012, as the Bids and Proposal Manager.

9 **Q. Ms. Flaherty, have you previously testified in regulatory proceedings before the**  
10 **Commission?**

11 A. No, I have not.

12 **Q. What is the purpose of your testimony?**

13 A. Pursuant to the Settlement Agreement entered on September 13, 2023, and approved by  
14 the Commission in Order No. 27,047 (August 16, 2024) (“Settlement Agreement”), our  
15 testimony submits for Commission approval in phase two of the instant proceeding: (1)  
16 edits to Liberty’s Tariff implementing its Purchase of Receivables (“POR”) Program; (2)  
17 its Energy Service Supplier Agreement (“ESSA”) for competitive electric power  
18 suppliers (“CEPS”) and Community Power Aggregators (“CPAs”) (collectively  
19 “Suppliers”) acting as load-serving entities, including the interim use of the rules,  
20 processes, standards, and procedures of the Massachusetts Electronic Business  
21 Transactions (“EBT”) Working Group and associated Electronic Data Interchange

1 (“EDI”) standards for the implementation of the POR Program; and (3) a proposed and  
2 alternative timeline for POR Program implementation. Liberty requests Commission  
3 approval (an order) before December 1, 2024, in order to effectuate its proposed POR  
4 implementation timeline, as discussed later in this testimony.

5 Liberty also offers some observations regarding the March 1 deadline for the annual  
6 reconciliation filings set in Order No. 27,047 (at page 10) and a solution for how to  
7 resolve the tension it creates with the expectations set for such filings in the Settlement  
8 Agreement.

9 **Q. Are there any schedules and attachments included in your testimony?**

10 A. Yes. The table below lists the schedules and attachment included in our testimony.

Schedule	Description
Attachment 1	Energy Service Supplier Agreement
Attachment 2	Illustrative Clean and Redlined Tariff Pages

11

12 **Q. How is your testimony organized?**

13 A. Our testimony is organized as follows:

- 14 • Section II provides an overview of Liberty’s proposed ESSA implementing POR  
15 requirements.
- 16 • Section III addresses the tariff changes proposed, namely the computation of the  
17 Discount Percentage Rate (“DPR”), the payment date and the annual

1 reconciliation process. This section also raises an easily corrected issue with the  
2 March 1 deadline set by the Commission for annual reconciliation filings and  
3 Liberty's proposed May 1, 2025, POR implementation date, which impact the  
4 cost data to be used and reconciliation period.

- 5 • Section IV presents two potential POR implementation timelines, a preferred and  
6 an alternative proposal, both of which end with implementation on May 1, 2025.  
7 The difference between the two timelines is that one employs means that assures  
8 May 1, 2025, implementation, while the other takes a more passive approach and  
9 leaves May 1, 2025, implementation date less certain.

## 10 **II. SUPPLIER AGREEMENT**

### 11 **Q. Does Liberty submit a new supplier agreement incorporating POR for Commission** 12 **approval?**

13 A. Yes. Attachment 1 contains the proposed Energy Service Supplier Agreement (“ESSA”),  
14 (which was formerly known as the CEPS Agreement in Liberty’s tariff and referred to as  
15 the Electric Supplier Services Master Agreement in the Settlement Agreement). The  
16 ESSA implements POR as a condition of Consolidated Billing Service. That is, an entity  
17 seeking Consolidated Billing Service must agree to sell Liberty its receivables at the  
18 applicable DPR, as set forth in the proposed tariff revisions. The ESSA is applicable to  
19 both CEPs and CPAs acting as load-serving entities in ISO New England.

### 20 **Q. Does the proposed ESSA address the EBT and EDI standards to be followed?**

21 A. Yes. The New Hampshire EDI (electronic data interchange) guidelines and standards  
22 have not been updated in more than twenty years. While the New Hampshire Electronic

1 Business Transactions (“EBT”) Working Group recently reconvened after many years to  
2 address the EDI guidelines and standards, the change control process has already proven  
3 to be extensive due to its technical nature. Furthermore, two of the NH utilities and many  
4 of the current NH suppliers are using the standards and guidelines of the Massachusetts  
5 EBT Working Group, which regularly updates their guidelines and standards, has a  
6 change control process, and hosts bi-monthly meetings. Utilizing Massachusetts’ EDI  
7 guidelines and standards will provide the framework to move forward with implementing  
8 POR and mitigate delays in the proposed implementation schedule for the utilities and the  
9 suppliers. Therefore, Liberty proposes the interim use of the rules, processes, standards,  
10 and procedures of the Massachusetts EBT Working Group for the implementation, unless  
11 and until directed otherwise by the Commission with respect to potential adoption and  
12 implementation of relevant EDI standards developed specifically for New Hampshire.

13 **Q. Do the Commission’s Puc 2200 rules require utilities to offer additional services to**  
14 **CPAs, above what is required to be provided to CEPs?**

15 A. Yes. While we are not attorneys, it is our understanding that there are additional services  
16 that are required to be provided to CPAs under the Puc 2200 rules. Docket No. DE 23-  
17 063, which is currently pending before the Commission, addresses one example  
18 concerning an optional “bill ready” form of consolidated billing. However, it is currently  
19 Liberty’s intention to make whatever additional services required to be provided to CPAs  
20 or their CEPS available to all CEPs, when permissible, in order to maintain a level  
21 competitive playing field and to potentially improve utilization of such services.

1 Therefore, Liberty will address any new service offerings through future revisions of the  
2 ESSA, whether through addendum or revised agreements.

3 **III. TARIFF REVISIONS**

4 **Q. Has the Company prepared tariff revisions implementing the POR Program?**

5 A. Yes. Attachment 2, which also borrows from Section I of the Settlement Agreement and  
6 incorporates the new August 1 effective date for changes to the DPR and payment date  
7 (*i.e.*, the effective date of the annual reconciliations) per Order No. 27,047, includes both  
8 clean and redline versions of the proposed tariff changes.

9 **Q. Do the proposed tariff revisions include Liberty's proposed discount rate for  
10 application when the POR Program launches?**

11 A. No. As shown in Attachment 2, Liberty proposes to calculate and file on or before  
12 February 3, 2025, an initial DPR to be applied to receivables purchased when the POR  
13 program launches (presumably by May 1, 2025). As the Settlement Agreement requires  
14 the use of calendar year data, Liberty proposes to file in February 2025 in order to  
15 include more current 2024 calendar year data in setting the initial DPR and payment date  
16 that will be applicable during most of calendar year 2026.

17 **Q. Is the DPR expressed in dollars or cents per kilowatt hour?**

18 A. No. As the name implies, the DPR is expressed as a percentage, which reflects the  
19 discount at which the Company purchases a Supplier's receivables for Energy Service.  
20 That is, Liberty will deduct a percentage of a Supplier's receivables for Energy Service at  
21 the applicable DPR and pay the Supplier the difference. For example, at an applicable

1 DPR of 5%, the Company retains \$5 of every \$100 of Supplier receivable purchased and  
2 pays the Supplier \$95.

3 **Q. How is the discounted amount of Supplier receivables used by the Company?**

4 A. In general, the discounted amount of Supplier receivables retained by the Company  
5 provides cost recovery for the POR Program. The DPR is the sum of three percentage  
6 calculations, or components. Some of the discounted amounts are retained to recover  
7 implementation and ongoing administrative costs, which is reflected in the  
8 Administrative Cost Percentage (“ACP”) calculation. Other portions of the amounts  
9 retained reflect the fact that an Energy Service receivable is not worth its full face value,  
10 as Liberty will not recover the full amounts from customers on average (*i.e.*,  
11 uncollectible), which is reflected in the Uncollectible Percentage (“UP”) component of  
12 the DPR. Lastly, as the DPR is the product of a fully-reconciling cost recovery  
13 mechanism, a portion of the discounted amount will also reflect a true-up of the costs and  
14 write offs resulting from POR with discounted amounts previously taken, which is  
15 reflected in the Past Period Reconciliation Percentage (“PPRP”). As a reconciling factor,  
16 the PPRP may increase or decrease the DPR. Thus, the costs of the POR Program will be  
17 fully born by Suppliers and will not impact customers remaining on Liberty’s default  
18 supply service.

19 **Q. Can you provide an overview of how these components of the DPR will operate**  
20 **during the coming years?**

21 A. As provided in the approved Settlement Agreement, Liberty calculates the DPR in three  
22 parts or components. The initial DPR will be set using just two of the three components.

1 Liberty's calendar year 2024 write offs divided by its total billings will set the initial UP  
2 component of the DPR. This serves as a proxy for Suppliers' actual uncollectible rate,  
3 which will be used in subsequent UP calculations. Next, Liberty will calculate the  
4 second component, the ACP, by dividing its forecasted administrative costs by the dollar  
5 amounts Liberty billed for Energy Service on behalf of the Suppliers in 2024, as  
6 previously noted. Liberty will amortize the costs to implement POR over a five-year  
7 period. The sum of the UP and ACP will equal the single DPR that Liberty will apply to  
8 Supplier receivables initially purchased after POR implementation.

9 In its first reconciliation filing on March 1, 2026, Liberty will calculate two separate  
10 DPRs for accounts receivable from the Large Customer Group (Rates G-1, G-2, EV-L,  
11 and EV-M) and Small Customer Group (Rates D, D-10, D-11, D-12, G-3, M, LED-1,  
12 LED-2, T, and V) utilizing all three components. With respect to the PPRP, Liberty will  
13 reconcile the actual administrative costs, which will be allocated between the two  
14 customer groups based on the Suppliers' Energy Service billings for each group, and the  
15 actual write-offs for the receivables purchased from each group with the discounted  
16 amounts charged for the purchase of receivables at the single DPR from each group,  
17 respectively. This sum will then be divided by the amounts Liberty billed for Energy  
18 Service to each the customer group on behalf of the Suppliers during the most recent  
19 calendar year to derive separate PPRPs for each customer group. Furthermore, Liberty  
20 will calculate a single ACP applicable to both customer groups, as described previously.  
21 Lastly, Liberty will calculate separate UPs based on the actual write offs associated with  
22 Supplier receivables purchased from each supply group, respectively. The sum of the

1 applicable PPRP, ACP, and the applicable UP will set the DPR for each supply group  
2 beginning August 1, 2026.

3 **Q. Are there any observations that you have to offer concerning the filing dates set in**  
4 **Order No. 27,047 and the use of twelve months of “actual” cost data in the approved**  
5 **Settlement Agreement?**

6 A. Yes. The reconciliation component of the DPR formula, the PPRP, as set forth in Section  
7 H of the Settlement Agreement, calls for the use of “12 months” of actual data, which  
8 presumably precludes the use of forecasts incorporated in other Company reconciliation  
9 mechanisms to complete a typical twelve-month reconciliation period. However, with a  
10 March 1 deadline for the annual reconciliation filings and Liberty’s proposed May 1,  
11 2025, POR implementation date, there will not be twelve months of actual data available  
12 to use in the first reconciliation filing that would be due on March 1, 2026. However, as  
13 the use of actual data is preferred, Liberty believes the simple solution would be to  
14 change the annual filing deadline and annual effective date of the DPR to whatever date  
15 the Commission sets for POR implementation plus fourteen months, in order to reset the  
16 filing deadline, and add an additional five months to reset the effective date of the DPRs.  
17 If the May 1, 2025, POR implementation date is approved, and the Commission concurs  
18 with the need to adjust the filing deadline, Liberty would reflect July 1 as the annual

1 filing deadline and December 1 as the effective date for approved DPRs in its compliance  
2 tariff filing.<sup>1</sup>

3 **Q. Do the proposed tariff revisions reflect the date when Liberty will pay Suppliers for**  
4 **their discounted receivables?**

5 A. No. Under Section D of the approved Settlement Agreement, the payment date for  
6 receivables purchased through Consolidated Billing Service in a given billing month will  
7 be set based on a formula, which is the midpoint of the month plus the average number of  
8 days between billing and receipt of payment from all customers during the most recent  
9 calendar year. Pursuant to Section G, the Company will update the payment date  
10 utilizing this formula and include it in its March 1 reconciliation filings.

11 **Q. Do the proposed tariff revisions include Liberty's proposed payment date for**  
12 **application when the POR Program launches?**

13 A. No. As shown in Attachment 2, Liberty proposes to calculate and file on or before  
14 February 3, 2025, an initial payment date for receivables purchased when the POR  
15 program launches (presumably, by May 1, 2025). As the Settlement Agreement requires  
16 the use of calendar year data, Liberty proposes to file this in February 2025 in order to  
17 use more current 2024 calendar year data in setting the initial DPR that will be applicable  
18 well into 2026.

---

<sup>1</sup> If not approved, the first reconciliation filing will either (1) require the use of less than twelve months of actual cost data (a partial year reconciliation) or (2) require the use of forecasts to reconcile a full twelve-month period.

1 Note that the proposed tariff does not contain a placeholder for where the payment date  
2 (or DPRs) will be located, as it would be odd to set forth a date (or rate) with no value or  
3 a blank. These will be added in its February 3, 2025, filing.

4 **Q. Does this payment date apply to all receivables purchased?**

5 A. No. Pursuant to Section F of the Settlement Agreement, Liberty will pay Suppliers for  
6 any existing receivables billed through Consolidated Billing Service before POR  
7 implementation within thirty days of POR implementation, as specified in the Settlement  
8 Agreement.

9 **IV. POR PROGRAM IMPLEMENTATION**

10 **Q. Did the Settlement Agreement address when POR would begin?**

11 A. Yes. In light of the August 16, 2024, approval of the Settlement Agreement, Section E of  
12 the Settlement Agreement would set the implementation date at the later of February 1,  
13 2025 (*i.e.*, the first of the month following the notice, which would be due January 16,  
14 2025) or roughly two months after the phase 2 order is issued (assuming it approves the  
15 proposed tariff changes and CEPS agreements). Specifically, Section E provides:

16 E. The Company shall implement its POR program on the later to occur  
17 of either (1) May 1, 2024, or (2) the first day of the month following  
18 notice by the Company to the Commission that all system  
19 modifications necessary to implement the POR program have been  
20 completed, tested, and are fully operational, which notice shall be  
21 given within six (6) months of Commission approval of this Settlement  
22 Agreement, provided, in each case, that amended Tariff (as defined  
23 below) terms and conditions and ESSMA (as defined below)  
24 provisions have been finalized and approved, to the extent necessary,  
25 not less than sixty (60) days prior to such date, consistent with the  
26 provisions of paragraph II.H below .

1 **Q. Is this timeline still feasible?**

2 A. No. In the year since the Settlement Agreement was entered, implementation efforts  
3 came to a halt while awaiting approval and were restarted earlier this month. But, upon  
4 further consideration, Liberty believes that to implement within two months after the  
5 approvals are granted, as provided in Section E of the Settlement Agreement, does not  
6 provide enough time to effectuate the transition required. For example, assuming a phase  
7 2 order is entered by mid-November and a February 1, 2025, implementation date is set,  
8 then that would allow roughly two and a half months for Liberty to distribute the  
9 approved ESSA and for the Suppliers to review, sign, and return the agreement. For any  
10 Supplier not responding in time, presumably, Liberty would be obligated to drop the  
11 Supplier (for lack of a valid supplier agreement) and transition their customers back to  
12 the applicable default supply service, a process that, if required, would take considerably  
13 more time than two and a half months or the two months allotted in Section E of the  
14 Settlement Agreement. Furthermore, additional time is required for approval of the  
15 initial DPR and payment date.

16 **Q. Did the Commission approve this timeline in the Settlement Agreement?**

17 A. Liberty does not interpret Order No. 27,047 as having approved the timeline set in  
18 Section E. While the order generally approves the Settlement Agreement with one  
19 exception (*i.e.*, the August 1 effective date of DPRs), it also states: “The effective date of  
20 the initial POR program will be determined during the second phase of this proceeding.”  
21 Order No. 27, 047 at page 10.

1 **Q. In light of Order No. 27,047, has Liberty prepared a new timeline for POR Program**  
2 **implementation for Commission consideration?**

3 A. Yes. In fact, Liberty has prepared two timelines for consideration. The first and  
4 Liberty's preferred timeline sets May 1, 2025, as the go-live date for the POR Program.  
5 The main distinction of this timeline is that an existing Supplier failing to return the  
6 ESSA in time would be dropped as a Supplier, as it would not have a valid agreement in  
7 effect after the January 31, 2025, deadline set in the proposed tariff, Attachment 2. Thus,  
8 this timeline largely provides for the orderly transition of a Supplier's customers to  
9 Liberty default supply service. An inherent buffer period is provided to resolve any  
10 issues, as the initial step would be to halt the addition of any new customers starting in  
11 February 2025 and then to return its customers to default supply in April 2025, prior to  
12 the May 1, 2025. The benefit of this approach is that it would prevent one Supplier from  
13 holding POR implementation hostage by not returning the ESSA.

14 **Q. Does Liberty have reason to believe that a CEPS might refuse to sign the Supplier**  
15 **Agreement?**

16 A. Liberty has not received any feedback from the Supplier community that there is a  
17 preference for consolidated billing without POR or that a particular Supplier would refuse  
18 to sign the Supplier Agreement. However, the consequences of discovering later that  
19 such a sentiment exists would be to delay POR implementation, strand IT investments,  
20 and delay recovery until such matters can be resolved. Therefore, Liberty prefers to set a  
21 more definitive timeline for POR implementation, one that advances POR and leaves  
22 behind any Supplier that does not adhere to the timeline for returning signed ESSA.

1 **Q. Are Suppliers that sign the ESSA obligated to sell their receivables at the discount**  
2 **rate, and under the terms, set forth in the revised tariff?**

3 A. Not necessarily. As shown in Attachment 1, the ESSA allows Suppliers to separately bill  
4 for their Energy Services, which is the same option that they have today. They just  
5 cannot utilize Consolidated Billing Service without selling their receivables. However,  
6 separately billing may not be a viable option for some Suppliers.

7 **Q. What is Liberty's proposed timeline for POR implementation?**

8 A. Assuming an order is entered in phase 2 of the instant proceeding before December 1,  
9 2024, Liberty proposes the following schedule:

- 10 • Before December 1, 2024: PUC approves the proposed ESSA and tariff  
11 revisions.
- 12 • December 1, 2024: Tariff revisions take effect.
- 13 • December 20, 2024: Liberty to distribute ESSA to Suppliers and provide  
14 notification that (1) any Supplier that does not return a signed ESSA by January  
15 31, 2025, will not be allowed to enroll new customers after February 1, 2025, and  
16 (2) their customers will be returned to Liberty default supply during the April  
17 billing period.
- 18 • January 31, 2025: Due date for signed ESSAs from Suppliers.
- 19 • February 3, 2025: Liberty to file initial DPR and payment date for Commission  
20 approval.
- 21 • February 11, 2025: Liberty to send notification to the Suppliers not returning an  
22 ESSA by January 31, 2025, confirming that their customer(s) will be dropped

1 from their pool in April 2025. Liberty will then begin preparing and submitting  
2 notifications to the customers of such Suppliers that they will be returned to  
3 Liberty's default supply service in April.

- 4 • Late March or Early April 2025: Commission approval of initial DPR and  
5 payment date.
- 6 • May 1, 2025: POR implementation day. Suppliers with a signed ESSA and their  
7 customers will be moved from Consolidated Billing Service to Consolidated  
8 Billing Service with POR.
- 9 • May 15, 2025: In accordance with Puc 2205.05 New Utility Service Customers,  
10 Liberty to send the CPAs updated default service lists of customers, so they may  
11 give that customer the option to opt out of the applicable aggregation program.

12 **Q. What is Liberty's alternative proposed timeline?**

13 A. Liberty's alternative proposal utilizes essentially the same schedule described above,  
14 including the May 1, 2025, go-live date, but it does not establish any consequences for  
15 Suppliers not returning the ESSA in time. That is, a Supplier that does not return the  
16 ESSA in time will not be dropped as a Supplier. Under this schedule, the deadline for  
17 Suppliers to return the ESSA becomes more of a soft target. That means a Supplier that  
18 does not return a signed Supplier Agreement on time or at all could delay the  
19 implementation to sometime beyond May 1, 2025, or until the matter can be resolved,  
20 presumably before the Commission.

1 As discussed in the instant and other POR proceedings, utilities cannot be expected to  
2 maintain two consolidated billing services, one that includes POR and one without for  
3 those that do not sign, and the approved Settlement Agreement in this case contemplates  
4 Liberty providing only consolidated billing with POR.

5 **Q. What is Liberty's alternative timeline for POR implementation?**

6 A. Again, assuming an order is entered in phase 2 of the instant proceeding before  
7 December 1, 2024, Liberty proposes the following schedule:

- 8 • Before December 1, 2024: PUC approves the proposed ESSA and tariff  
9 revisions.
- 10 • December 1, 2024: Tariff revisions take effect.
- 11 • December 20, 2024: Liberty to distribute ESSA to Suppliers.
- 12 • January 31, 2025: Due date for signed ESSAs from Suppliers.
- 13 • February 3, 2025: Liberty to file initial DPR and payment date for Commission  
14 approval.
- 15 • Late March or Early April 2025: Commission approval of initial DPR and  
16 payment date.
- 17 • May 1, 2025: POR implementation day. assuming all Suppliers have returned a  
18 signed ESSA.

1 **Q. Did Liberty prepare proposed tariff language supporting its alternative POR**  
2 **implementation timeline?**

3 A. No. The proposed tariff set forth in Attachment 2 reflects Liberty's preferred POR  
4 implementation timeline. However, to comport with its alternative timeline, Liberty  
5 would only need to remove the tariff provisions related to the dropping of any  
6 noncompliant Supplier as a Supplier and moving its customers to default supply.

7 **V. CONCLUSION**

8 **Q. Does this conclude your testimony?**

9 A. Yes, it does.
