Subject: Manchester NH Gas Supply rate change May 2023

EXTERNAL: Do not open attachments or click on links unless you recognize and trust the sender.

Please see the following email sent to the NH Dept of Energy on 6/11/23 re: my Liberty Utility Natural Gas charge. I have been informed that this can be added to the public record.

Good morning,

I am a residential customer in Manchester NH using Liberty Utility for my Natural Gas provider.

I am just trying to confirm that the rate for Gas supply by Liberty is correct and if this is what I should expect to see in the future.

On my bill for the period of 4/1/23 to 4/28/23:
the Gas Supply was .13256/Therm

On my bill for the period of 4/29/23 to 5/31/23 :
the Gas Supply was 1.19305/Therm

That is an astronomically increase in the rate. From my calculations a 900% change. $.13256 \times 900\% = 1.19304$

Is this correct ?
