RE: Puc 2204.04 Notification of Commencement of Service | Durham, Hudson, Newmarket, New London, Pembroke, Stratham, Warner, Webster, Westmoreland

Pursuant to Puc 2204.04 I am writing to provide official Notification of Community Power Aggregation Commencement of Service not sooner than 90 days hence, or on or after February 19, 2024 with the target month for enrollments being March 2024 for the following municipalities for which the Community Power Coalition of New Hampshire serves as agent for purposes of implementing and operating their CPA programs:

1. Town of Durham
2. Town of Hudson
3. Town of Newmarket
4. Town of New London
5. Town of Pembroke
6. Town of Stratham
7. Town of Warner
8. Town of Webster
9. Town of Westmoreland

The two utilities noticed in this email serve some portion of some of these communities. These CPAs will be launching primarily on an opt-out alternative default service provider basis. Some groups of customers in the CPAs may be offered service only on an opt-in basis, particularly those that cannot be properly served by CPAs until certain data sharing and Puc 2200 rule compliance issues are resolved, including net energy metered customers.

If you have any questions about this notice, please reach out.

Regards,

Henry Herndon
