---

Dear Sir, Madam, Mx.,

As a citizen of the United States, a NH resident and consumer of utilities, I would like to speak my piece.

When will these utility rate increases stop?

Do utility companies invest money, planning for future needs? If not, new leadership and a new plan are warranted.

Do these mega corporations who choose to buy out all the smaller companies (creating monopolies) really need to take from our pockets in order to accomplish these financial goals? I honestly doubt it.

Why can't they put their highly educated, well compensated selves together and figure out another way to work with what they have? I do. Even us common folk have had to manage our finances and make do.

Not to mention that Algonquin Power & Utilities Corp/Liberty Utilities has caused its own problems by being greedy and now want me and everyone to pay for it. Does the greed ever end?

The leadership of Algonquin Power & Utilities Corp/Liberty Utilities each make millions of dollars yearly, they don't have to stretch \$45,000/year or \$ 75,000/year to pay for their needs and needs of their family members. I would imagine that they can't even relate to most of us.

These rate increases are doing more to harm this country than just about anything else could including terrorism and war.

In fact, this constant fear and threat of rising prices for the the NEEDS in the lives of its people by these billion dollar monopolizing conglomerates amount to financial terrorism and socioeconomic war. It's them against us! We have no defense. We lose at the get go!

The strain on household budgets for essential products and services is causing stress, despair and anger amongst so many.

We all see this every day and it is getting worse.

Is this the kind of country that you want? Poor, hopeless, fed-up people with no reason to give a damn about anything?

We are well on our way to being a completely miserable country to live in, filled to the brim with hopeless and homeless souls.... children going to bed hungry in a shell of a house without utilities because they are too expensive? Is that what you want? Really, who needs our hard-earned dollars more?

Sincerely and proudly signed and submitted, Denise Perry
