Good evening,

I would like to express my concern about the mailing I received for the subject docket. I do not believe, especially in New Hampshire, that any company providing a public utility should be able to propose raising their annual revenue by 55+% and have it be an acceptable proposal. It is already hard enough in today's economy to find a house, buy a house, rent a house or apartment, etc and pressing NH residents for an extra \$50 to \$170 or so per year (based on their self disclosed math) is the wrong move. Nominal increases for ongoing repairs and cost of labor is understandable, but this request (with no real explanation of why) is unfair to consumers who have no other choice, literally no competition. We're hostages.
