Subject: gas utility bills increases

EXTERNAL: Do not open attachments or click on links unless you recognize and trust the sender.

Just a note from a consumer of gas from Liberty for heating our condo:

Last year, I had been paying \$60/month during the winter for heat. I then jumped to \$120/month during the winter. This is a 100% increase.

We now get a letter that they will be increasing our bill by 15.8% starting in October. This is approximately another \$18/month. So within a one year period my gas bill has increased 115% or \$78/month/winter.

When will this stop??

This is a very unfair increase to the consumer. We have NO recourse if we want to have heat this winter.

We keep our thermostat on 65 but I guess we will have to turn it down to 60 this winter.

Please vote NO to this additional increase; which is strange that they are allowed to increase a temporary increase BEFORE you vote on a permanent one.

They also go on to inform us that they will be asking for further increases in 2023, 2024, and 2025.

WHEN DOES IT STOP???

Thank you Dianne Humelsine
