Effective: January 1, 2024

RSA 374:F-3, VI-a(d)(2) states that “The energy efficiency portion of the system benefits charge and local distribution adjustment charges shall adjust annually beginning January 1, 2023, and shall be calculated using the most recently available 3-year average of the consumer price index (CPI-W) as published by the Bureau of Labor Statistics of the United States Department of Labor as determined and verified by the department of energy.” The attached tariff pages reflect a total Systems Benefit Charge rate of 0.932 cents, which includes an energy efficiency portion of .577 cents per kWh, as calculated by the New Hampshire Department of Energy, for effect January 1, 2024 through December 31, 2024.

This rate also includes a Lost Base Revenue (“LBR”) adder of 0.205 cents per kWh as approved by the Commission in Order No. 26,621 (April 29, 2022) and the low income portion of the System Benefits Charge of 0.150 cents consistent with RSA 374:F-4, VIII(c). The LBR adder is currently under review in Docket No. DE 23-080 and will be updated upon the issuance of a final order in that docket.

Consistent with current Commission policy, this filing is being filed electronically only; paper copies will not follow. Please feel free to contact me if you have any questions regarding this matter.
