## INTRODUCTION TO COMMUNITY POWER

New Hampshire's updated Community Power law ([RSA 53-E](#), as amended by SB 286, effective October 1, 2019) is a bipartisan policy designed to further democratize, evolve, and enhance the economic efficiency of our electric power industry.

The Legislature's intent in enacting RSA 53-E was to "*encourage voluntary, cost effective and innovative solutions to local needs with careful consideration of local conditions and opportunities.*" (Refer to <https://www.cpcnh.org/legislative-context> for a summary of the legislative context and local control authorities of Community Power.) To achieve this goal, RSA 53-E authorizes local governments (cities, towns, and counties) to launch Community Power programs that:

- Provide electricity supply service to residents and businesses, who are notified and enrolled on an "opt-in" customer choice or "opt-out" default service basis and may thereafter leave or rejoin the program (by switching suppliers in advance of their next billing cycle date);
- Procure a reliable supply of "all-requirements" electricity, inclusive of Renewable Portfolio Standard requirements, with the option to participate directly in the ISO New England wholesale market (as a load-serving entity on behalf of participating customers);
- Offer a range of innovative services, products, new Net Energy Metering supply rates, and local programs to participating customers;
- Establish a joint powers agency with other Community Power programs to share services, contract for energy project developments, and facilitate related energy initiatives; and
- Work collaboratively with distribution utilities, regulators, policymakers, and innovative energy businesses to help modernize our electrical grid and market infrastructure.

Distribution utilities will continue to deliver power to all customers, regardless of whether they are supplied electricity by new Community Power programs or Competitive Electric Power Suppliers (or have chosen to switch back to utility-provided default service).

## OVERVIEW OF BARRINGTON COMMUNITY POWER

Barrington Community Power is a program authorized under RSA 53:E to provide electricity supply service for the Town's residents, businesses, and other types of customers. Providing electricity supply involves being responsible for procuring electric generation (supply) to match customer loads (consumption) in real time, except when the grid goes down. The program will only launch if it is able to initially offer residential default rates that are lower than those offered by Eversource. Thereafter, the program will:

- Serve as the default electricity supplier for all Eversource customers on a default "opt-out" basis;
- Offer innovative services and generation rates to customers on an "opt-in" or "opt-up" basis (such as 100% renewable premium products, time-varying rates and Net Energy Metering generation credits for customers with solar photovoltaics);
- Operate on a competitive basis, in that customers may choose to switch between Barrington Community Power, service provided by Competitive Electric Power Suppliers, and utility-provided default service; and
- Be self-funded through revenues generated by participating customers; the Town will not use taxes to cover program expenses.

Eversource will continue to own and operate the distribution grid and be responsible for delivering power to all customers within the Town. Customers will continue to be charged for utility delivery services at rates set by the Public Utilities Commission.

The Barrington Select Board will authorize the Town Administrator, with support as needed from the Community Power Committee, to contract for the necessary services and power suppliers to implement and operate the program and continue to provide oversight over the program thereafter.

### **Customer Notification and Enrollment Process**

Prior to launch of Barrington Community Power, all eligible customers will be mailed notifications and provided the opportunity to "opt-out" or "opt-in" to the program, depending on whether they currently are on default service provided by Eversource or take service from a Competitive Electric Power Supplier:

- Customers already served by Competitive Electric Power Suppliers will be notified and may request to "opt-in" to the program; and
- Customers currently on default energy service provided by Eversource will be notified, provided the opportunity to decline participation ("opt-out"), and thereafter transferred to Barrington Community Power if they do not opt-out.

Notifications to customers on utility-provided default service will: include the initial fixed rate for the program's default service compared with the Eversource's rate, be mailed to customers at least 30 days in advance of program launch, provide details of service for various customer groups including exceptions to automatic enrollment, and provide instructions for customers to decline

participation (for example, calling a phone number, sending an email, or using a web portal). Examples of customer service websites and web portals are available at [www.CommunityPowerNH.gov](http://www.CommunityPowerNH.gov).

After the launch of Barrington Community Power, any new customers starting service within the Town will be given a similar opt-out notice and will be transferred onto default service provided by the program, unless they choose to take energy service from Eversource or a Competitive Electric Power Supplier.

All customers on Barrington Community Power default service will remain free to switch back to the energy supply service provided by their utility, or to take energy service from a Competitive Electric Power Supplier.

**Customer Accounts and Electricity Usage Estimates**

The table below shows the total number and annual electricity usage of Eversource customers within Barrington’s territory who would initially receive either “opt-out” or “opt-in” notifications:

<i><b>Aggregated data provided by Eversource for the 12 months ending July, 2023</b></i>						
<b>Customer Type</b>	<b><u>Utility Default Supply Customers</u></b> (Eligible for Opt-Out Notifications & Automatic Enrollment)		<b><u>Competitive Supply Customers</u></b> (Eligible for Opt-In Notifications & Voluntary Enrollment)		<b><u>Total Customers</u></b> (Combined Utility Default & Competitive Supply Customers)	
	<b>Customer Accounts</b>	<b>Annual Usage (MWh)</b>	<b>Customer Accounts</b>	<b>Annual Usage (MWh)</b>	<b>Customer Accounts</b>	<b>Annual Usage (MWh)</b>
Residential	3,085	22,493	1,202	8,789	4,287	31,283
Small Commercial (G)	425	3,271	206	4,393	631	7,664
Commercial & Industrial (GV)	-	-	6	21,205	6	21,205
Outdoor Lighting	89	83	26	27	115	110
<b>Total Y.E. 7/23</b>	<b>3,599</b>	<b>25,848</b>	<b>1,440</b>	<b>34,414</b>	<b>5,039</b>	<b>60,262</b>

If Barrington had been enrolled with CPCNH for the first wave of participating communities, for the 3 month period from May through July 2023, community members would have saved over \$240,000 on their electric bills\* as shown in the table below.

	<b>May – July kWh</b>	<b>Eversource</b>	<b>Granite Basic</b>	<b>Savings</b>
<b>Residential</b>	4,853,836	\$980,475	\$766,906	\$213,569
<b>Small Commercial</b>	677,070	\$136,768	\$106,977	\$29,791
<b>Outdoor Lighting</b>	16,230	\$3,278	\$2,564	\$714

\*Assumes no opt-out, electric rates: Eversource - \$0.202/kWh, Granite Basic - \$0.158/kWh

**Membership in the Community Power Coalition of New Hampshire**

Barrington is a member of the not-for-profit [Community Power Coalition of New Hampshire](#) (“the Coalition”), a joint powers agency authorized under RSA 53-A (“*Agreements Between Governments: Joint Exercise of Powers*”) that operates on a not-for-profit basis. The primary reason to join the Coalition is for the Barrington Community Power Committee to take advantage of the Coalition’s comprehensive power agency for authorizing, launching and operating Community Power programs, but also noting that they too are a potential supplier/partner. See [Attachment 1](#) for details on the Community Power Coalition of New Hampshire

On June 12, 2023 the Barrington Select Board voted to enter into the Coalition’s Joint Powers Agreement. The Coalition Board of Directors voted to welcome Barrington as a member on July 27, 2023. The Barrington Select Board appointed Paul W Panish as member representative to participate in the Coalition’s membership meetings and may delegate certain decision-making authorities to him to carry out their responsibilities at the Barrington Select Board’s direction.

This plan does not require that the Town will participate in the CPCNH for the purposes of implementing and operating Barrington Community Power.

**Purpose of this Community Power Plan**

The Barrington Community Power Committee was tasked by the Barrington Select Board to prepare this Community Power Plan, which sets forth Barrington’s goals for our Community Power program, summarizes program governance and implementation processes, and commits Barrington Community Power to comply with applicable statutes and regulations in terms of:

- Providing universal access, reliability, and equitable treatment of all classes of customers subject to any differences arising from varying opportunities, tariffs, and arrangements between different electric distribution utilities in their respective franchise territories; and
- Meeting, at a minimum, the basic environmental and service standards established by the

Public Utilities Commission and other applicable agencies and laws and rules concerning the provision of service under Community Power.

This plan does not otherwise commit Barrington to any defined course of action, including participation in the Coalition for the purposes of launching the program, and does not impose any financial commitment on the Town.

The Barrington Select Board retains the power to contract for all required program services and electricity supplies, to set rates, and to pursue related projects independently of the Coalition.

### **Approval Process for Barrington Community Power**

This Community Power Plan was developed by the Barrington Community Power Committee, nominated as an official town committee by the Barrington Select Board on July 10, 2023, with due input from the public, as required under RSA 53-E. Public hearings were held on November 2, 2023 and November 27, 2023.

The Community Power Committee has determined that this Community Power Plan satisfies applicable statutory requirements and is in the best, long-term interest of the Town and its residents, businesses, and other ratepayers.

The Barrington Select Board may now submit this Plan for consideration by the voters at Town Meeting. Adoption of this Plan by the voters at Town Meeting, by majority approval of those present and voting, establishes Barrington Community Power as an approved aggregation plan with statutory authorities defined under RSA 53-E:3 (to be exercised with due oversight and local governance, as described herein), and authorizes the Barrington Select Board, with support from the Barrington Community Power Committee to arrange and contract for the necessary professional services and power supplies to launch Barrington Community Power.

### **Implementation Process for Barrington Community Power**

This plan provides the Barrington Select Board a choice of two different options for implementing the program. They may decide to either:

- Hire a commercial electricity broker / consultant, and subsequently contract with a Competitive Electric Power Supplier (CEPS) to provide all the electricity and related services required to launch and operate Barrington Community Power; or
- Continue to participate in the non-profit Community Power Coalition of New Hampshire and rely on the Joint Powers Agency to provide for all the electricity and related services required to launch and operate Barrington Community Power.

Regardless of which option the Barrington Select Board chooses to implement Barrington Community Power, four things will remain constant:

- If it is determined before the program is launched that Barrington Community Power will be unable to offer default electric rates that are initially lower than the fixed energy service charge rates offered by Eversource for residential customers, then implementation of the program will not move forward. The program will not launch unless and until that condition is met.
- Customer participation in Barrington Community Power will be completely voluntary. After the

electricity rates to be offered under the program are established, customers will be notified and may choose to opt-out of the program. After program launch, customers on default service provided by the program may choose to opt-out without penalty.

- Eversource will continue to deliver electricity to customers, own and operate the distribution systems (poles, wires, transformers, substations, etc.) and in most cases, provide account and billing services to customers participating in the program.
- All costs associated with operating the program will be incorporated into rates paid by Barrington Community Power customers and will not be passed on to taxpayers or customers who chose to opt-out of participating in the program.

Under the terms of New Hampshire’s Community Power law ([RSA 53-E](#)):

- Community Power programs must be self-funded, with ongoing costs paid for using the revenues generated by participating customers.
- Municipalities are only allowed to incur incidental costs associated with implementing Community Power programs, such as the costs necessary to comply with the Community Power law, up to the time that the program starts to produce revenue from participating customers. Incidental costs should not include any costs that are more properly accounted for as capitalized or operating costs of the Barrington Community Power program.

The implementation of Barrington Community Power will not require any upfront cost for the Town other than such incidental expenses (e.g., the staff time, counsel review of agreements, and other expenses required to comply with the Community Power law before the program starts to generate revenue).

Decisions made by the Barrington Select Board regarding how to best implement and operate Barrington Community Power, including the approval of agreements with selected service providers, will be made at duly noticed public meetings.

### *Energy Risk Management, Retail Rates, and Financial Reserve Policies*

Barrington Community Power’s ability to maintain competitive rates, as market prices and Eversource default rates change over time, is a primary goal for the program. Competitive rates will significantly reduce the risk that customers opt-out of Barrington Community Power and allow the program to achieve our medium- to long-term goals.

To proceed with launching and operating Barrington Community Power through the Coalition:

- The Barrington Select Board would review and approve execution of the Coalition’s Cost Sharing Agreement and Member Services Contract, along with the Data Security and Privacy Policy and the Energy Portfolio Risk Management, Retail Rates, and Financial Reserves policies approved by the Coalition’s Board of Directors.<sup>1</sup>

---

<sup>1</sup> CPCNH’s (1) Joint Powers Agreement; (2) Energy Portfolio Risk Management, Retail Rates and Financial Reserves Policies; (3) Data Security and Privacy Policy; and (4) Cost Sharing Agreement and Member Services Contract are publicly available at <https://www.cpcnh.org/about> under “Key Documents.”

- The Coalition would provide the services and credit support necessary to launch and operate Barrington Community Power (along with the programs of other municipalities across the state) and would provide all-requirements electricity to customers participating in the programs.
- Confidential customer data would be handled in accordance with the Data Security and Privacy Policy.
- Power procurement and energy portfolio risk management, rate setting, and the accrual of financial reserves for the program would be carried out in accordance with the Coalition's Energy Portfolio Risk Management, Retail Rates, and Financial Reserves policies.
- The Coalition would collect revenues from program customers on the Town's behalf and would recover expenses incurred on behalf of Barrington Community Power in accordance with the Cost Sharing Agreement.

Governance of the power agency will be carried out pursuant to the Coalition's Joint Powers Agreement. The Coalition's Board of Directors and committees of Member Representatives — the Executive Committee, Finance Committee, Risk Management Committee, Member Operations and Engagement Committee, Regulatory and Legislative Affairs Committee, Audit Committee, etc. — will continue to meet regularly and carry out their responsibilities to provide oversight and direction, supported by a qualified CEO and staff experts hired to provide day-to-day oversight and management the agency's service providers, operations, planning, and program development activities.

### **Community Power Plan Submission to the Public Utility Commission**

Barrington will submit this final Community Power Plan to the Public Utilities Commission for review and approval as per RSA 53-E:7, II.

## Barrington Community Power Goals, Objectives, and Requirements

Barrington Community Power affords the Town the capacity and flexibility to realize and build on our goals pertaining to energy and infrastructure.

Our objectives will need to be pursued through a combination of direct program activities and informed public advocacy at the Legislature and Public Utilities Commission. This will require enhanced coordination with other communities as well as advanced operational services, dedicated expertise, innovation, and sustained initiative carried out over a period of multiple years.

Simultaneously, maintaining competitive rates compared to Eversource's default service rates — as market prices, energy technologies and policies change over time — will require nimble decision-making and the ability to evolve business operations in response to changing market conditions to actively manage risk, minimize costs and maximize the creation of customer value.

The structure of the Coalition — the combination of the joint powers agency's community governance model, competitive business model and coordinated approach to engaging in public advocacy — has been designed to enable and streamline these activities for Barrington Community Power at an advantageous, cost-effective economy-of-scale.

Participation in the Coalition is therefore expected to strengthen the capacity and financial performance of Barrington Community Power, such that the program is able to operate continuously as a self-supporting, competitive enterprise for the foreseeable future, and will be able to work towards achieving the full scope of our goals and objectives over the long-term.

### **Barrington's Policy Goals**

In October 2022 the Barrington Select Board voted to establish the Barrington Energy Committee. Included in the Committee Charge are the following items:

- Further sustainability in Barrington by
  - promoting energy efficiency
  - reducing environmental impacts
- Recommend municipal energy and energy efficiency projects that would result in cost savings for Barrington.
- Build awareness among residents, businesses, and other organizations regarding their energy consumption and the availability of more efficient, cost-effective, and/or renewable energy resources.

The Energy Committee decided to establish a Community Power Aggregation as its first substantive objective. It is our belief that this will help promote the objectives contained in the Committee Charge, and it is our intent to enroll with the Community Power Coalition of New Hampshire since we believe it is best suited to:

- Advocate for the Town of Barrington and its residents in its power purchasing

- arrangements,
- Represent the needs of Barrington to the PUC and NH Legislature,
  - Assist the Town on a consulting basis with energy projects it may wish to undertake,
  - Allow Barrington to participate jointly in other municipality's projects at the Town's discretion,
  - Offer lower rates and targeted customer services over the long term due to the non-profit structure of the organization.

Though at this time Barrington has no specific energy policies or policies regarding Community Power, the Select Board's charge represents a policy direction Barrington can build on in the future.

### **Barrington Community Power Objectives**

To achieve the above goals, Barrington Community Power will be guided by the following objectives:

- **Competitive Rates & Expanded Choices:** Barrington Community Power will only launch if it is able to initially offer residential default rates that are lower than or competitive with those offered by Eversource.
- As options become available, Barrington Community Power hopes to offer a variety of products. Options currently include rate selections providing different levels of renewable energy within the guidelines of the NH Renewable Portfolio Standard. Future options may include time-varying rates and selections which enable the intelligent use of customer demand response options as well as the use of a variety of smart-grid technologies expected to become available as our power grid is brought up to date.
- **Community Resilience:** Under the direction of the Select Board and the voting community, Barrington Community Power will have the ability to invest in infrastructure to add resiliency services for critical facilities such as back-up power generation and community micro-grids, to enable Barrington to respond to, withstand, and recover from adverse situations should they occur.

### **Near-Term Operational Requirements**

While many of the broader benefits Barrington Community Power intends to create for customers and the Town will be developed over time, the program's immediate objective is to offer competitive default supply rates compared to Eversource, and additionally offering voluntary products that retail customers may opt-up to receive as well as Net Energy Metering supply rates that allow customer generators to participate in the program.

### *Performance Relative to Utility Default Service and Net Energy Metering Generation Rates*

Compensation to customer generators under Net Energy Metering generation rates, the timing of the program’s rate setting decisions and, to a certain degree, the procurement of electricity will need to take into account Eversource’ tariffs, processes and timing in regard to these activities. Refer to [Attachment 2](#) for additional documentation and discussion of these factors.

### *Customer Rates and Products*

The table below provides an example of a default service product and optional rates offered to customers relative to Eversource residential default supply rates. The rates and products depicted below are offered by Community Power Coalition of New Hampshire to at least ten New Hampshire municipalities effective from August 2023 to January 31, 2024.

The Coalition sets and adjusts rates with the objective of offering customers cost savings and expanded options. The Coalition's default rates will change for the next utility rate period, scheduled from February 1 to July 31, 2024.

<b>Residential, General Service, and Outdoor Lighting</b>			
<i>Fixed Supply Rates Effective August 1, 2023 through January 31, 2024</i>			
<b><u>Renewable Content</u></b>	<b><u>Power Option</u></b>	<b><u>Rate (¢/kWh)</u></b>	<b><u>Estimated Cost*</u></b>
23.4%**	Granite Basic (default power option)	10.9¢	± \$65 / month
33%	Granite Plus	11.3¢	± \$68 / month
50%	Clean 50	12.3¢	± \$74 / month
100%	Clean 100	15.2¢	± \$91 / month
23.4%**	<i>Eversource</i>	12.582¢	± \$75 / month

\*Based on usage of 600 kWh per month

\*\*The NH Renewable Portfolio Standard requires 23.4% renewable content for power sold between August and December 2023, which will increase to 24.33% beginning in January 2024.

The products that Barrington Community Power initially offers to customers, and the rates charged for each product, will be refined and finalized in advance of program launch.

### *Renewable Portfolio Standard Requirements*

New Hampshire’s Renewable Portfolio Standard (RPS) requires all electricity suppliers to obtain Renewable Energy Certificates (RECs) for four distinct “classes” of renewables, each distinguishing between different technologies and dependent upon the year that the generators came online.

Eversource and other electricity suppliers are required to including the following amounts of renewable energy in their energy supply:

- For 2023, 23.4% renewable.
- For 2024, 24.3% renewable.
- For 2025, 25.2% renewable.

Absent an increase in the RPS, these minimum compliance requirements will remain fixed thereafter.

Barrington Community Power may seek to procure voluntary renewables in excess of the RPS minimum requirements from “Class I” resources (as defined at <https://www.cpcnh.org/renewable-portfolio-standard>). Additionally, the program could prioritize including as much renewable energy sourced from generating resources located in New Hampshire and New England as possible.

## COMMUNITY POWER PLAN STATUTORY REQUIREMENTS

The following requirements for this Community Power Plan, in compliance with RSA 53-E:6, are addressed below:

- A Organizational structure of the program;
- B Methods of entering into and terminating agreements;
- C Operation and funding;
- D Rate setting, costs, and customer enrollment process;
- E Rights and responsibilities of program participants;
- F Net metering and group net metering policies;
- G Ensuring discounts for Electric Assistance Program participants; and,
- H Termination of program.

### **Organizational Structure of the Program**

Upon approval of this plan, Barrington Community Power will be authorized to provide electricity and other related services to participating residents, businesses, and other customers in the Town.

The Barrington Select Board, with support from the Barrington Community Power committee, will oversee the program and has overall governance authority. Decisions regarding Barrington Community Power, such as updating program goals, adoption of Energy Portfolio Risk Management, Retail Rates, and Financial Reserve policies to govern the program's power procurement and rate-setting decisions, may be made at duly noticed public meetings and with support from the Community Power Committee.

Additionally, the Barrington Select Board may direct the Community Power Committee to hold meetings for the purpose of providing community input and advisory support regarding the program.

### **Methods of Entering into and Terminating Agreements**

This Community Power Plan authorizes the Barrington Select Board, with support from the Barrington Community Power committee, to negotiate, enter into, modify, enforce, and terminate agreements as necessary for the implementation and operation of Barrington Community Power.

### **Operation and Funding**

The Town will contract with qualified vendors and credit-worthy suppliers to provide the services, credit support and electricity required to launch and operate the program.

Services provided by third-party entities required to launch and operate the program may include portfolio risk management advisory services, wholesale Load Serving Entity (LSE) services, financial services, electronic data interchange (EDI) services with the utility, and customer notification, data management, billing, and relationship management (e.g., call center, website, etc.) services. Additional information on how Barrington Community Power will implement Load Serving Entity (LSE) services is found in [Attachment 3](#), *How Load Serving Entity Services will be Implemented*.

Additional support services such as management and planning, budgeting and rate setting, local project development support, regulatory compliance, and legislative and regulatory engagement services (on matters that could impact the program and participating customers) will be addressed through a combination of staff support and third-party services.

Barrington Community Power program will provide “all-requirements” electricity supply for its customers, inclusive of all of the electrical energy, capacity, reserves, ancillary services, transmission services (to the extent not provided through Eversource), transmission and distribution losses, congestion management, and other such services or products necessary to provide firm power supply to participants and meet the requirements of New Hampshire’s Renewable Portfolio Standard. (Refer to <https://www.cpcnh.org/renewable-portfolio-standard> for details regarding the requirements of Renewable Portfolio Standard statute, RSA 362-F.)

If a single supplier is relied upon to provide all-requirements electricity on behalf of Barrington Community Power, then (1) the supply contract will be executed or guaranteed by entities that possess at least a BBB- or equivalent investment-grade rating issued by a nationally recognized statistical rating organization (NRSRO), and (2) the supplier will be required to use proper standards of management and operations, maintain sufficient insurance, and meet appropriate performance requirements for the duration of the supply contract. Alternatively, if a portfolio of contracts with multiple entities is structured to diversify counterparty credit risk exposure, and actively managed to provide for all-requirements electricity on behalf of Barrington Community Power, then counterparty credit requirements and monitoring, hedging transaction authorities, residual ISO-NE market exposure limits, and reporting requirements will be carried out in accordance with Energy Portfolio Risk Management, Rates, and Financial Reserves policies that would be established prior to commencing procurement and implementing the program.

Additionally, RSA 53-E provides Community Power programs with authorities pertaining to meter ownership, meter reading, billing, and other related services. These authorities provide Barrington Community Power with the practical ability to help customers adopt and use innovative technologies (for example, building management systems, smart thermostats, backup battery storage systems, controllable electric vehicle chargers, etc.) in ways that save money, enhance grid resiliency, and decarbonize our power supply.

However, the implementation of these authorities is expected to take some time, as it requires action by the Public Utilities Commission to adopt enabling rules and coordination with Eversource to adapt existing meter and billing system processes.

### **Rate Setting, Costs, Enrollment Process, and Options**

Customers who choose not to participate in Barrington Community Power shall not be responsible for any costs associated with the program, apart from Town’s incidental costs incurred prior to the point at which the program starts producing revenue from participating customers (for example, contract review by legal counsel, but not any operational or capitalized costs of the program).

### *Rate Setting and Costs*

Barrington Community Power will only launch if it is able to offer residential default rates that are initially lower than those offered by Eversource; thereafter, the program will strive to maintain competitive rates for all default service customers on an overall annual basis, as well as customers who opt-in or opt-up to receive optional retail products, while working to achieve the program's goals (as set forth in this Community Power Plan and modified from time to time at the direction of the Barrington Select Board).

As required by law, the program will ensure the equitable treatment of all classes of customers, subject to any differences arising from varying opportunities, tariffs, and arrangements between different electric distribution utilities in their respective franchise territories.

In other words, customers will be treated the same based on their circumstances. For example, any customers that opt-in after being offered the opportunity to participate during the initial enrollment period may be offered rates that reflect how market prices have changed in the intervening period.

Changes to the program's default service rates shall be set and publicly noticed at least 30 days in advance of any rate change.

Should the Barrington Select Board, with support from the Barrington Community Power Committee, choose to select a non-profit supplier, they will also adopt Energy Risk Management and Financial Reserve policies to govern the program's power procurement and rate-setting decisions. Rates will be set at a level such that revenues from participating customers are projected to meet or exceed the ongoing operating and capital costs of the program.

To ensure the financial stability of Barrington Community Power, a portion of revenues will be deposited in a financial reserve account. In general, the fund will be restricted for uses such as:

- **In the near-term**, maintain competitive customer rates in the context of price fluctuations in the electricity market and other factors;
- **In the medium term**, as collateral for power purchase agreements (including for the development of new renewable and battery storage projects), and for additional credit enhancements and purposes that lower the program's cost of service; and
- **Over the long term**, may also be used to directly fund other program financial requirements, or to augment the financing for development of new projects and programs in the later years of the program.

### *Enrollment Process and Options*

Barrington Community Power intends to launch on an opt-out basis, providing an alternative default service to the Eversource provided default service rate. This format increases the number of customers, therefore improves buying power and revenue share opportunities when applicable. After approval of this Community Power Plan and before the launch of Barrington Community Power, all customers in the Town will be sent notifications regarding the program and offered the opportunity to participate:

- **Customers currently on default service provided by Eversource** will be sent “opt-out” notifications — describing the program, its implications for the Town, the rights and responsibilities of customers, and program rates and charges — with instructions on how to decline participation, and thereafter be transferred to Barrington Community Power if they do not opt-out of the program prior to launch.
- **Customers already served by Competitive Electric Power Suppliers** will receive “opt-in” notifications describing the program and may request to opt-in to the program.

If Eversource has not fully implemented Public Utilities Commission rules and procedures governing Community Power Aggregation service, certain groups of customers on default service provided by the utilities may need to be offered service on an opt-in basis, and/or offered service on an opt-out basis at a future date. For example, if the utilities are unable to reliably provide the data on customer-generators necessary to offer Net Energy Metering (NEM) rates and terms, then the program may initially choose to not enroll customer-generators on an opt-out basis, as doing so could risk negatively impacting NEM customer billing and crediting procedures.

Customers will be notified through a mailing, which will be posted not less than 30 days prior to the enrollment of any customers. All information will be repeated and posted at the Town’s Community Power website. A public information meeting will be held within 15 days of the notification to answer program questions or provide clarification.

Optional products, such as increased renewable power content in excess of the Renewable Portfolio Standard (RPS) requirements and other energy services, including time varying rates, may be offered on an opt-in basis.

After launch and in accordance with any applicable rules and procedures established by the Public Utilities Commission, new customers will be provided with the default service rates of Eversource and Barrington Community Power and will be transferred onto Barrington Community Power’s default service unless they choose to be served by Eversource or a Competitive Electric Power Supplier.

Customers that request to opt-in to the program may do so at the discretion and subject to the terms of Barrington Community Power.

Residents, businesses, and other electricity customers may opt-out of participating in Barrington Community Power default service at any time, by submitting adequate notice in advance of the next regular meter reading by Eversource (in the same manner as if they were on utility provided default service or as approved by the Public Utilities Commission).

Customers that have opted-in to an optional product offered by Barrington Community Power may switch back to the Eversource or to take service from a Competitive Electric Power Supplier subject to any terms and conditions of the optional product.

### **Rights and Responsibilities of Program Participants**

All participants will have available to them the customer protection provisions of the law and regulations of New Hampshire, including the right to question billing and service quality practices.

Customers will be able to ask questions of and register complaints with the Town, Eversource and the Public Utilities Commission.

Barrington Community Power shall maintain the confidentiality of individual customer data in compliance with its obligations as a service provider under [RSA 363:38](#) (privacy policies for individual customer data; duties and responsibilities of service providers) and other applicable statutes and Public Utilities Commission rules. Individual customer data includes information that singly or in combination can identify that specific customer including the individual customers' name, service address, billing address, telephone number, account number, payment information, and electricity consumption data.

Such individual customer data will not be subject to public disclosure under RSA 91-A (access to governmental records and meetings). Suppliers and vendors for Barrington Community Power will be contractually required to maintain the confidentiality of individual customer data pursuant to RSA 363:38, V(b). [Attachment 4](#), *Customer Data Protection Plan*, details the reasonable security procedures and practices that the Town and Barrington Community Power will employ to protect individual customer data from unauthorized access, use, destruction, modification, or disclosure.

Aggregate or anonymized data that does not compromise confidentiality of individual customers may be released at the discretion of Barrington Community Power and as required by law or regulation.

Participants will continue to be responsible for paying their bills. Failure to do so may result in a customer being transferred from Barrington Community Power back to Eversource (the regulated distribution utility and provider of last resort) for default energy service, payment collections and utility shut offs under procedures subject to oversight by the Public Utilities Commission.

### **Net Metering and Group Net Metering Policies**

Under the net metering process, customers who install renewable generation or qualifying combined heat and power systems up to 1,000 kilowatts in size are eligible to receive credit or compensation for any electricity generated onsite in excess of their onsite usage.

Any surplus generation produced by these systems flows back into the distribution grid and offsets the electricity that would otherwise have to be purchased from the regional wholesale market to serve other customers.

Currently, customer-generators are charged their full retail rate for electricity supplied by Eversource and receive credits for electricity they export to the grid based on Eversource' Net Energy Metering (NEM) tariffs.

Barrington Community Power intends to provide new rates and terms that compensate participating customer-generators for the electricity supply component of their net metered surplus generation.

Customer-generators will continue to receive any non-supply related components (e.g., transmission and distribution credits) directly from Eversource, as specified under the terms of their applicable net energy metering tariff.

For group net metering where the host customer-generator is on default service, to the extent Barrington Community Power supply rates are lower than Eversource default service or if the host is located outside of Barrington, it may be most advantageous for the host to remain an Eversource default service customer, while the other group members are free to switch to Barrington Community Power for their supply and continue to receive on-bill credits for their participation in the group.

Barrington Community Power's exact terms, conditions, and rates for compensating and crediting different types of NEM customer generators in the Town will be set at duly noticed public meetings and fully disclosed to all prospective NEM customers through the program's enrollment notification process and thereafter.

Certain aspects of administering net energy metering require coordination between Eversource and Barrington Community Power. The enabling services and strategies that Barrington Community Power may pursue, to benefit and encourage customers to adopt distributed generation, include but are not limited to:

- Dual-billing customer-generators separately for supply services;
- Offering time-varying rates and alternative credit mechanisms to compensate customers for surplus generation;
- Streamlining the establishment of new Group Net Metering and Low-Moderate Income Solar Project groups;
- Facilitating interval meter and Renewable Energy Certificate (REC) meter installations for customer-generators; and
- Engaging at the Legislature and Public Utilities Commission to advocate for upgrades and reforms to metering and billing infrastructure and business processes to enable Net Energy Metering and other innovative services to benefit customer-generators.

For additional details regarding these enabling services and strategies, refer to:

- [Attachment 2](#) provides an in-depth discussion regarding operational and strategic opportunities to enhance net metering and group net metering through Barrington Community Power.

### **Ensuring Discounts for Electric Assistance Program Participants**

Income eligible households can qualify for discounts on their electric bills under the Electric Assistance Program. Barrington Community Power will support income eligible customers who enroll in the Electric Assistance Program to receive their discount.

Electric Assistance Program discounts are funded by all ratepayers as part of the System Benefits Charge, which is charged to all customers and collected by the distribution utilities.

At present, the Public Utilities Commission and utilities only support provision of the discount to individual customers when the customer's electricity supply charges are billed through the distribution utility.

Barrington Community Power consequently plans to rely on Eversource to bill all customer accounts enrolled in the Electric Assistance Program. This represents no change in the provision or funding of this program.

This arrangement may be revisited if, at some point in future, the Public Utilities Commission enables Community Power programs to provide Electric Assistance Program customers with their discount directly.

### **Termination of the Program**

There is no planned termination date for Barrington Community Power.

Barrington Community Power may be terminated by majority approval of voters at Town Meeting. If so terminated, Barrington Community Power would cease operations after satisfying any obligations contractually entered into prior to termination, and after meeting any advance notification period or other applicable requirements in statute or regulation, at which point participating customers would either be transferred to default service provided by Eversource or to a Competitive Electric Power Supplier of their choosing.

Barrington Community Power will provide as much advance notice as possible regarding the potential or planned termination of the program to participating customers, the Public Utilities Commission and Eversource.

Upon termination, the balance of any funds accrued in the program's financial reserve fund and other accounts, if any, would be available for distribution or application as directed by the Barrington Select Board and in accordance with any applicable law and regulation.
