11. Special Facilities Routing of Access Services

11.1 General

11.1.1 Description	
A.	The services provided under this tariff are provided over such routes and facilities as the Telephone Company may elect. Special facilities routing is involved when, in order to comply with requirements specified by the customer, the Telephone Company provides switched access service in a manner which includes one or more of the following.
1.	Diversity —Two or more services must be provided over not more than two different physical routes.
2.	Avoidance —A service must be provided on a route which avoids specified geographic locations.
3.	Cable Only Facilities —Certain services are provided on cable only facilities to meet the particular needs of a customer. Service is provided subject to the availability of cable only facilities. In the event of service failure, restoration will be made through the use of any available facilities as selected by the Telephone Company.

11.1.2 Manner of Provision	
A.	Avoidance, diversity and cable only facilities are available on switched access service (refer to Section 6).
B.	In order to avoid the compromise of special routing information, the Telephone Company will provide the required routing information for each specially routed service to only the ordering customer. If requested by the customer, this information will be provided when service is installed and prior to any subsequent changes in routing.
C.	The offering of special facilities routing of access services contemplates the use of existing facilities.

11.1.3 Application of Rates and Charges	
A.	The rates and charges for special facilities routing of Access services set forth in Section 31 are in addition to all other rates and charges that may be applicable for services provided under other sections of this tariff. The rates and charges for administration and any other specific items of cost directly attributable to the provision of this service shall be filed in Section 31 of this tariff.

13. Additional Engineering, Labor and Miscellaneous Services

13.1 Regulations

13.1.1 General	
A.	Regulations and charges for additional engineering, additional labor and miscellaneous services applicable to switched access services provided under the regulations and rates of this tariff are the same as those set forth in The FairPoint Telephone Companies Tariff FCC No. 1, Section 13, with the exception of the following:
1.	Those portions of Section 13 relating to customer notification, the equal access balloting process, the allocation process, and IC customer lists provisions for presubscription.
2.	Rates for 1+ Coin Rating Service which are contained in Section 30.13.1 of this tariff.

14. IntraLATA Presubscription (ILP) Services

14.1 IntraLATA Presubscription

14.1.1 Description	
A.	ILP is an arrangement whereby an exchange service customer of the Telephone Company designates either the Telephone Company or another carrier as its presubscribed interexchange carrier (ILP PIC) for calls made from the customer's exchange access line, without the customer having to dial an access code. Calls which qualify for ILP are intrastate intraLATA toll calls as defined in NHPUC No. 1.

(T)

Northern New England Telephone Operations LLC
d/b/a FairPoint Communications - NNE

14. IntraLATA Presubscription (ILP) Services

14.2 Primary Interexchange Carrier (PIC) Verification

14.2.1 Description	
A.	PIC verification enables an IC to obtain verification of their end user's PIC selection in a Telephone Company switch. The IC must provide the telephone number to the Telephone Company either verbally or by the PIC verification automated interface using appropriate system specifications as determined by the Telephone Company. PIC verification service will be provided from suitably equipped wire centers as specified in the NECA Tariff FCC No. 4.

Issued: August 19, 2011
Effective: August 19, 2011

Teresa R. Rosenberger
State President – NH

14. IntraLATA Presubscription (ILP) Services

14.3 Application of Rates and Charges

14.3.1 IntraLATA Presubscription	
A.	An ILP PIC NRC applies per change for each telephone exchange service line or trunk.
1.	For 90 days immediately following the date of implementation, customers may make one ILP PIC change without charge.
2.	The ILP PIC charge does not apply for new service customers selecting an ILP PIC at the time they place an order with the Telephone Company for telephone exchange service.
3.	A new customer who did not select an ILP PIC at the time service was being established and as a result was provided access code dialing as an alternative, has 60 days to request a change from access code dialing to the Telephone Company or to another carrier, and no ILP PIC charge will apply. Customers requesting a change after 60 days will incur the ILP PIC charge.
4.	The ILP PIC charge applies for an intralata PIC change on a line. The ILP PIC charge will be waived if an interlata PIC change is also being requested on that line at the same time, and on the same service order, as the intralata PIC change request.
B.	Service Charges — The applicable NHPUC No. 1 NRC (service order) applies to reestablish a customer's OCP service. (T)
1.	The charge does not apply when the customer's request is received within 90 days of the date upon which the customer's ILP PIC is changed from the Telephone Company.
C.	Unauthorized ILP PIC Change/Restoral
1.	If a customer denies authorizing a change in ILP as submitted by an IC, the customer will be credited the previously billed ILP PIC NRC, and the ILP PIC NRC will be waived for restoring the customer to its previous ILP PIC.
2.	The ILP PIC NRC will be assessed, as applicable, to an IC as set forth following when a customer denies authorizing the change in ILP as submitted by the IC (refer to Section 14.3.1A4).
a.	One ILP PIC NRC is assessed to the alleged unauthorized IC to recover the disputed ILP PIC NRC previously billed to the customer.
b.	One ILP PIC NRC is assessed to the alleged unauthorized IC to restore the customer to its previous ILP PIC.
3.	In accordance with the FCC's slamming liability rules in CC Docket 94–129, if an alleged unauthorized IC is ultimately exonerated of liability, the IC is entitled to receive full payment from the customer for all services provided. In such situations, any ILP PIC NRC assessed against the IC by the Telephone Company is subject to rebilling to the customer by the alleged unauthorized IC.

Northern New England Telephone Operations LLC
d/b/a FairPoint Communications - NNE

14. IntraLATA Presubscription (ILP) Services

14.3 Application of Rates and Charges

14.3.2 PIC Verification Service	
A.	A separate NRC will apply for each successful PIC verification made on either a verbal or automated interface basis.

14.3.3 Intrastate Equal Access Cost Recovery	
A.	The intrastate equal access cost recovery monthly charge applies per originating minute of use in order for the Telephone Company to recover the cost of implementing ILP PIC intrastate equal access capability. The monthly charge will apply for 24 months from the date of implementation. A true-up adjustment will be calculated and either billed or remitted to the ILP carrier at the end of the 24 months.

14.3.4 ILP PIC Change Charge Billing Options	
A.	<p>Direct Billing Option— This option is available when an IC initiates an ILP PIC change order through the CARE interface by either paper, magnetic tape, network data mover or by on-line electronic interface using system specifications determined by the Telephone Company. The IC can designate direct billing on any ILP PIC change orders it chooses by specifying the ILP PIC change charge indicator in position 405. The NRC for a change in presubscription will then be assessed to the IC, instead of the end user.</p> <ol style="list-style-type: none"> 1. Lines equipped with selective access blocking are not eligible for this option. 2. Direct billing is not available for a change in ILP PIC from other carriers on orders placed via the Telephone Company's residence, business or equal access service centers. 3. Direct billing may also be utilized, at the Telephone Company's discretion, for orders placed to obtain end user service from the Telephone Company. 4. Direct billing cannot be specified on an order for a change in presubscription which is normally provided at no charge to the end user.
B.	<p>Reverse Billing Option— This option is available to ICs for end user-initiated ILP PIC change orders placed at the Telephone Company's residence, business or equal access service centers. The NRCs for all of the IC's end user-initiated ILP PIC change orders placed at the Telephone Company's residence, business or equal access service centers will then be assessed to the IC instead of the end users.</p> <ol style="list-style-type: none"> 1. The IC must notify the Telephone Company in writing of its election to establish or cancel the reverse billing option. Establishment or cancellation will be effective within ten business days from the date the Telephone Company receives written notification and must be in effect for a minimum of six months.

15. Operating Territory
15.1 Locations

The operating territory of the Telephone Company for the State of New Hampshire is comprised of the locations defined by the names of rate centers which are contained in Section 15.1.1.

15.1.1 Rate Centers	
A.	Alstead, Ashland
B.	Barrington, Bartlett, Bedford, Belmont, Berlin, Bethlehem, Bristol
